So what we need is the GIS files associated with the maps referenced in the proclamations. The acreage totals are explicit, suggesting the underlying GIS will calculate exactly the boundaries of the monuments. Do any of you have access to the GIS shape files? They can, essentially, reverse engineer legal descriptions for us.

FOR IMMEDIATE RELEASE

December 4, 2017

MODIFYING THE BEARS EARS NATIONAL MONUMENT

- - - - -

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

In Proclamation 9558 of December 28, 2016, and exercising his authority under section 320301 of title 54, United States Code (the "Antiquities Act"), President Barack Obama established the Bears Ears National Monument in the State of Utah, approximately 1.35 million acres of Federal lands for the preservation and management of objects of historic and scientific interest identified therein. The monument is managed jointly by the Department of the Interior's Bureau of Land Management and the Department of Agriculture's United States Forest Service (USFS). This proclamation makes certain modifications to the monument.

Proclamation 9558 identifies a long list of objects of historic or scientific interest. It describes cultural resources such as ancient cliff dwellings (including the Moon House and Doll House Ruins), Moki Steps, Native American ceremonial sites, tools and projectile points, remains of single-family dwellings, granaries, kivas, towers, large villages, rock shelters, and a prehistoric road system, as well as petroglyphs, pictographs, and recent rock art left by the Ute, Navajo, and Paiute peoples. It also identifies other types of historic objects, such as remnants of Native American sheep-handling and farming operations and early engineering by pioneers and settlers, including smoothed sections of rock, dugways, cabins, corrals, trails, and inscriptions carved into the rock. It also describes landscape features such as the Bears Ears, Comb Ridge,

Mesa, the Valley of the Gods, the Abajo Mountains, and Juan River, and paleontological resources such as the remains of fishes, amphibians, reptiles, and mammals, dinosaur trackways and traces of other terrestrial animals. Finally, it identifies several species, including animals like the porcupine, badger, and coyote; birds like the red-tailed hawk, Mexican spotted owl, American kestrel, and turkey vulture; and plants such as the Fremont cottonwood, Abajo daisy, sandbar willow, and boxelder.

The Antiquities Act requires that any reservation part of a monument be confined to the smallest area consistent with the proper care and management of the objects of scientific interest to be protected. Determining the protective area involves examination of a number of factors, including the uniqueness and nature of the objects, the needed protection, and the protection provided by

Some of the objects Proclamation 9558 identifies are unique to the monument, and some of the particular examples of these objects within the monument are not of significant scientific or historic interest. Moreover, many of the objects identified in Proclamation 9558 were not under threat of destruction before designation such that they required reservation of land to protect them. In fact, objects identified in Proclamation 9558 were then -- and still are -- subject to Federal protections under existing laws and agency management designations. For example, more than 500,000 acres were being managed to maintain, enhance, or protect their natural character before they were designated as part of a national monument. Specifically, the BLM manages approximately 1,000,000 acres of lands within the existing monument as Wilderness Areas, which the BLM is required by law to manage so as not to impair their suitability for future congressional designation as Wilderness. On lands managed by the USFS, 46,348 acres of the congressionally designated Dark Canyon Wilderness, which, under the 1964 Wilderness Act, 16 U.S.C. 1131-1136, the Utah Wilderness Act of 1984, Public Law 98-428, they manage so as to maintain or enhance its wilderness character. Approximately 89,396 acres of the USFS lands are also in 8 inventoried roadless areas, which are managed under the 2001 Roadless Rule so as to protect their wilderness character.

A host of laws enacted after the Antiquities Act provide specific protection for archaeological, historic, cultural, paleontological, and plant and animal resources and grant authority to the BLM and USFS to condition permitted activities.

on Federal lands, whether within or outside a monument. Laws include the Archaeological Resources Protection Act, 16 U.S.C. 470aa-470mm, National Historic Preservation Act, 16 U.S.C. 300101 *et seq.*, Bald and Golden Eagle Protection Act, 16 U.S.C. 668-668d, Endangered Species Act of 1973, 16 U.S.C. 1531 *et seq.*, Federal Cave Resources Protection Act of 1988, 16 U.S.C. 4301 *et seq.*, Federal Land Policy and Management Act, 43 U.S.C. 1701 *et seq.*, Migratory Bird Treaty Act, 16 U.S.C. 712, National Forest Management Act, 16 U.S.C. 1600 *et seq.*, Native American Graves Protection and Repatriation Act, 25 U.S.C. 3001 *et seq.*, and Paleontological Resources Preservation Act, 16 U.S.C. 470aaa-470aaa-11. Of particular note, the Archaeological Resources Protection Act specifically protects archaeological resources from looting or other desecration and imposes criminal penalties for unauthorized excavation, removal, damage, alteration, or defacement of archaeological resources. Federal land management agencies may grant a permit authorizing excavation or removal, but only if undertaken for the purpose of furthering archaeological knowledge. The Paleontological Resources Preservation Act contains very similar provisions protecting paleontological resources. And the Migratory Bird Treaty Act and Endangered Species Act protect migratory birds and listed endangered threatened species and their habitats. Moreover, the USFS were already addressing many of the threats to objects identified in Proclamation 9558 in their governing laws before designation of the monument.

Given the nature of the objects identified on the monument, the threat of destruction to many of those objects, and the protection of those objects already provided by existing law and government use plans, I find that the area of Federal land reserved for Bears Ears National Monument established by Proclamation 9558 is not confined to the smallest area compatible with the protection and management of those objects. The important objects of scientific or historic interest can instead be protected by a smaller and more appropriate reservation of 2 areas: the Shash Jaa area and Indian Creek. Revising the boundaries of the monument to cover these 2 areas will ensure that, in accordance with the Antiquities Act, it is no larger than necessary for the care and management of the objects to be protected within the monument.

The Shash Jaa area contains the heart of the national monument: the iconic twin buttes known as the Bears Ears tower 2,000 feet above the surrounding landscape and a

considered sacred to the Native American tribes that call this area their ancestral home. Many of the significant objects described by Proclamation 9558 can be found throughout the Jaa area. Ancestral Puebloan occupation of the area began at the Basketmaker II period at least 2,500 years ago, as evidenced by objects such as pit houses, storage pits, lithic tools, campsites, rock shelters, pictographs, and baskets, as well as manos and metates for grinding corn. Occupation dating to the Basketmaker III period, from approximately 500 to 750 C.E., includes additional evidence of maize- and bean-based agriculture, along with pottery, bows and arrows, pit houses, kivas, storage pits, and dispersed villages.

New waves of human settlement occurred around 900 C.E. The Pueblo I period gave rise to large villages near the confluence of the Jaa and 1050 C.E., when inhabitants from the Pueblo II period began to build expansive and complex multi-family dwellings. Around the dawn of the Pueblo III period, the area's inhabitants increasingly sought shelter in cliff dwellings and left behind evidence of an era of unrest. Several centuries later, the Paiute, and Navajo came to occupy the area.

East of the Bears Ears is Arch Canyon, within which paleontologists have found numerous fossils from the late Permian and Upper Permian eras. Cliff dwellings are hidden throughout the canyon, and the mouth of the canyon holds the fabled Mesa Verde ruin, which spans the Pueblo II and III periods and contains numerous pictographs and petroglyphs ranging from the Archaic to the historic periods.

Just south of Arch Canyon are the north and south Mule Canyons. Five-hundred feet deep, 5 miles long, and with alternating layers of red and white sandstone, the striking canyons contain shelter-cliff dwellings and numerous archaeological sites, including the scenic and accessible Fire Ruin, which includes differing masonry styles that indicate several episodes of construction and use.

Perched high on the open tablelands above the south Mule Canyon are the Mule Canyon ruins, where visitors can see exposed masonry walls of ancient living quarters and a restored kiva. The deep canyons and towering mesas of the Jaa area are full of similar sites, including rock art (such as the Cave Towers), and large villages primarily from the Pueblo II and III periods, along with sites from the Basketmaker II and Archaic periods.

The Shash Jáa area also includes Comb Ridge, a north-trending monocline that originates near the boundary of La Sal National Forest, ends near the San Juan River, contains remnants from the region's thousands of years of habitation, including cliff dwellings, granaries, kivas, ceremonial sites, and the Butler Wash ruin, a world-famous Ancestral Puebloan ruin with multiple rooms and kivas. Ridge also includes world-class examples of ancient rock art such as the Butler Wash Kachina Panel, a wall-sized mural of San Juan Anthropomorph figures that dates to the Basketmaker III period and is considered to be one of the Southwest's most important petroglyph panels for understanding the daily life and culture of the Basketmaker people. Significant fossil sites have been discovered in Butler Wash.

Just north of upper Butler Wash, the aspen-filled Canyon Draw contains a series of alcoves that have sheltered human habitation for thousands of years, including Canyon Draw site where Richard Wetherill, as part of the Hyde Expedition of 1893, first identified what we know today as the Basketmaker III people. The nearby Milk Ranch Point is home to a rich concentration of kivas, granaries, dwellings, and other archaeological features that Pueblo I farmers used this area to cultivate corn and squash.

The Shash Jáa area also contains the Comb Ridge I, which includes a trackway created by a giant arthropod (*Diplichnites cuithensis*), the first recorded instance of a trackway in Utah. Also, the diverse landscape of the area provides habitat for the vast majority of plant and animal species described by Proclamation 9558.

Finally, the Shash Jáa area as described on the map includes 2 non-contiguous parcels of land that encompass Moon House Ruin, an example of iconic Pueblo-decorated architecture, which was likely the last occupied site on the mesa, as well as Doll House Ruin, a fully intact and well-preserved single room granary that is associated with an extensive agricultural area on the mesa top. These structures are important examples of cultural resource objects that should remain within the monument's boundaries.

The Indian Creek area likewise contains objects of significance described in Proclamation 9558. At its center is the broad Indian Creek Canyon, which is characterized by red cliffs and spires of exposed and eroded layers of

Kayenta, Wingate, and Cedar Mesa sandstone, including North and South Six-Shooter Peaks.

Also located within the Indian Creek area is the Research Center. Spanning lands managed by the National Service, BLM, USFS, and private landowners, this unique partnership works to increase our understanding of the natural systems on the landscape, providing their customers with the information they need to adapt to the challenges of a changing Colorado Plateau.

Newspaper Rock, a popular attraction in the Indian Creek area, is a roadside rock art panel that has been listed on the National Register of Historic Places since 1976. This site displays a significant concentration of rock art from multiple periods, etched into Wingate sandstone. The older art is attributed to the Ancestral Puebloan people who inhabited the region for 2,000 years, while the more recent rock art is attributed to the Ute people who still live in the Four Corners area.

In addition to Newspaper Rock, the Indian Creek area contains numerous other significant rock art sites, including distinctive and well-preserved petroglyphs in Shay Canyon. The area also provides opportunities for cultural and scientific research and paleontological study. Dinosaur tracks at the bottom of the Shay Canyon stream bed are a unique view into the area's distant past. Additional paleontological findings can be found throughout the Indian Creek area, including vertebrate and invertebrate fossils, primarily in the Chinle Formation. The Indian Creek area also includes two prominent mesas, Bridger Jack Mesa and Lavender Mesa, which are relict plant communities, predominantly composed of pinyon-juniper woodland, with small, interspersed sagebrush communities that exist only on these isolated islands in the desert sea. These communities are generally unaltered by humans. These mesas provide a unique opportunity for comparative studies of pinyon-juniper and sagebrush communities in other parts of the Colorado Plateau. Additionally, the Indian Creek area includes exposed Chinle Formation, known for abundant fossilized fauna, including pelecypods, gastropods, arthropods, and amphibians, and reptiles (including dinosaurs). Finally, the area is well known for vertebrate trackways, including dinosaur footprints.

Some of the existing monument's objects, or certain of those objects, are not within the monument's revised boundaries because they are adequately protected by existing

designation, agency policy, or governing land-use plan. For example, although the modified boundaries do not include the Juan River or the Valley of the Gods, both of those areas are protected by existing administratively designated Areas of Critical Environmental Concern. Plant and animal species such as the bighorn sheep, the Kachina daisy, the Utah night hawk, and the *Eucosma navajoensis* moth are protected by the Endangered Species Act and existing land-use plans and policies for special-status species. Additionally, some of the rare plant species falls within existing Wilderness Areas and Wilderness Study Areas. Finally, although Hideout Canyon is likely included within the modified boundaries, it is generally not threatened and is partially within a Wilderness Study Area.

The areas described above are the smallest compatible with the protection of the important objects identified in Proclamation 9558. The modification of the Bears Ears National Monument will maintain and protect those objects and preserve the area's cultural, scientific, and historic legacy.

WHEREAS, Proclamation 9558 of December 28, 2016, established the Bears Ears National Monument in the State of Utah and reserved approximately 1.35 million acres of Federal land for the care and management of the Bears Ears buttes and other objects of historic and scientific interest identified in the proclamation; and

WHEREAS, many of the objects identified by Proclamation 9558 are otherwise protected by Federal law; and

WHEREAS, it is in the public interest to modify the boundaries of the monument to exclude from its designation and reservation approximately 1,150,860 acres of land that is unnecessary for the care and management of the objects of historic and scientific interest protected within the monument; and

WHEREAS, the boundaries of the monument reservation should therefore be reduced to the smallest area compatible with the protection of the objects of scientific or historic interest described above in this proclamation;

NOW, THEREFORE, I, DONALD J. TRUMP, President of the United States of America, by the authority vested in me by section 320301 of title 54, United States Code, hereby modify that the boundaries of the Bears Ears National Monument be hereby modified and reduced to those lands and interests owned or controlled by the Federal Government within the boundaries described on the accompanying map, which is

to and forms a part of this proclamation. I hereby fu  
 proclaim that the modified monument areas identified o  
 accompanying map shall be known as the Indian Creek ar  
 units of the monument, the latter of which shall inclu  
 House and Doll House Ruins. These reserved Federal la  
 interests in lands cumulatively encompass approximate  
 acres. The boundaries described on the accompanying r  
 confined to the smallest area compatible with the prop  
 management of the objects to be protected. Any lands  
 Proclamation 9558 not within the boundaries identifie  
 accompanying map are hereby excluded from the monument

At 9:00 a.m., eastern standard time, on the date  
 days after the date of this proclamation, subject to v  
 existing rights, the provisions of existing withdrawa  
 requirements of applicable law, the public and Nationa  
 System lands excluded from the monument reservation sh  
 to:

- (1) entry, location, selection, sale, or ot  
 disposition under the public land laws and l  
 applicable to the U.S. Forest Service;
- (2) disposition under all laws relating to  
 geothermal leasing; and
- (3) location, entry, and patent under the r

Appropriation of lands under the mining laws befo  
 and time of restoration is unauthorized. Any such att  
 appropriation, including attempted adverse possession  
 U.S.C. 38, shall vest no rights against the United Sta  
 Acts required to establish a location and to initiate  
 possession are governed by State law where not in con  
 Federal law.

Nothing in this proclamation shall be construed t  
 any lands from the Manti-La Sal National Forest or to  
 revoke, modify, or affect any withdrawal, reservation,  
 appropriation, other than the one created by Proclamat

Nothing in this proclamation shall change the mar  
 the areas designated and reserved by Proclamation 9558  
 remain part of the monument in accordance with the te  
 proclamation, except as provided by the following 4 pa

In recognition of the importance of tribal partic

the care and management of the objects identified above to ensure that management decisions affecting the monument take into account tribal expertise and traditional and historical knowledge. Proclamation 9558 established a Commission to provide advice and recommendations on the development and implementation of management plans and on management of the monument, and to partner with Federal agencies by making continuing contributions to inform decisions regarding the management of the monument in order to ensure that the full range of tribal expertise and traditional historical knowledge is included in such contributions. Paragraph 29 of Proclamation 9558 is hereby revised to provide that the Bears Ears Commission shall be replaced by the Shash Jaa Commission, shall apply only to the monument unit as described herein, and shall also include the Secretary of the Interior or his or her designee, and an officer of the San Juan County Commission representing the community, acting in that officer's official capacity.

Proclamation 9558 is hereby revised to clarify that, in the preparation of the transportation plan required by paragraph 30 thereof, the Secretaries of the Interior and Agriculture shall allow motorized and non-mechanized vehicle use on roads and trails designated for such use immediately before the revision of Proclamation 9558 and maintain roads and trails for such use.

Paragraph 35 of Proclamation 9558 governing livestock grazing in the monument is hereby revised to read as follows: "Nothing in this proclamation shall be deemed to affect or limit authorizations for livestock grazing, or administrative actions on Federal lands within the monument. Livestock grazing on the monument shall continue to be governed by laws and regulations other than this proclamation."

Proclamation 9558 is amended to clarify that, consistent with the care and management of the objects identified above, the Secretaries of the Interior and Agriculture may authorize ecological restoration and active vegetation management activities in the monument.

If any provision of this proclamation, including its application to a particular parcel of land, is held to be invalid, the remainder of this proclamation and its application to other parcels of land shall not be affected thereby.

IN WITNESS WHEREOF, I have hereunto set my hand and the seal of the Department of the Interior on the fourth day of December, in the year of our Lord one thousand nine hundred and twenty-two thousand seventeen, and of the Independence of the United States of America the two hundred and forty-second.

DONALD J. TRUMP
