THE WHITE HOUSE

Office of the Press Secretary

FOR IMMEDIATE RELEASE

December 4, 2017

MODIFYING THE BEARS EARS NATIONAL MONUMENT

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

In Proclamation 9558 of December 28, 2016, and exercising his authority under section 320301 of title 54, United States Code (the "Antiquities Act"), President Barack Obama established the Bears Ears National Monument in the State of Utah, reserving approximately 1.35 million acres of Federal lands for the preservation and management of objects of historic and scientific interest identified therein. The monument is managed jointly by the Department of the Interior's Bureau of Land Management (BLM) and the Department of Agriculture's United States Forest Service (USFS). This proclamation makes certain modifications to the monument.

Proclamation 9558 identifies a long list of objects of historic or scientific interest. It describes cultural resources such as ancient cliff dwellings (including the Moon House and Doll House Ruins), Moki Steps, Native American ceremonial tools and projectile points, remains of single family dwellings, granaries, kivas, towers, large villages, rock shelters, and a prehistoric road system, as well as petroglyphs, pictographs, and recent rock art left by the Ute, Navajo, and Paiute peoples. It also identifies other types of historic objects, such as remnants of Native American sheep herding, farming operations and early engineering by pioneers and settlers, including smoothed sections of rock, dugways, huts, cabins, corrals, trails, and inscriptions carved into rock at the Hole in the Rock and Outlaw Trails. It also describes landscape features such as the Bears Ears, Comb Ridge, Cedar Mesa, the Valley of the Gods, the Abajo Mountains, and the San Juan River, and paleontological resources such as the fossil remains of fishes, amphibians, reptiles, and mammals, as well as dinosaur trackways and traces of other terrestrial animals. Finally, it identifies several species, including animals such as the porcupine, badger, and coyote; birds like the red tailed hawk, Mexican spotted owl, American kestrel, and turkey vulture; and plants such as the Fremont cottonwood, Abajo daisy, and

sandbar willow, and boxelder.

The Antiquities Act requires that any reservation of part of a monument be confined to the smallest area compatible with the proper care and management of the objects of his scientific interest to be protected. Determining the appropriate protective area involves examination of a number of factors including the uniqueness and nature of the objects, the needed protection, and the protection provided by other

Some of the objects Proclamation 9558 identifies are unique to the monument, and some of the particular examples of these objects within the monument are not of significant scientific or historic interest. Moreover, many of the objects Proclamation 9558 identifies were not under threat of destruction before designation such that they required a reservation of land to protect them. In fact, objects designated in Proclamation 9558 were then and still are subject to Federal protections under existing laws and agency management designations. For example, more than 500,000 acres were being managed to maintain, enhance, or protect their road character before they were designated as part of a national monument. Specifically, the BLM manages approximately 38 acres of lands within the existing monument as Wilderness Areas, which the BLM is required by law to manage so as not to impair their suitability for future congressional designation as Wilderness. On lands managed by the USFS, 46,348 acres are part of the congressionally designated Dark Canyon Wilderness which, under the 1964 Wilderness Act, 16 U.S.C. 1131-1136 the Utah Wilderness Act of 1984, Public Law 98-428, the USFS manages so as to maintain or enhance its wilderness character. Approximately 89,396 acres of the USFS lands are also included in 8 inventoried roadless areas, which are managed under the 2001 Roadless Rule so as to protect their wilderness character.

A host of laws enacted after the Antiquities Act provide specific protection for archaeological, historic, cultural, paleontological, and plant and animal resources and give authority to the BLM and USFS to condition permitted actions on Federal lands, whether within or outside a monument. These laws include the Archaeological Resources Protection Act 16 U.S.C. 470aa-470mm, National Historic Preservation Act 16 U.S.C. 300101 et seq., Bald and Golden Eagle Protection Act 16 U.S.C. 668-668d, Endangered Species Act of 1973, 16 U.S.C. 1531 et seq., Federal Cave Resources Protection Act of 1988, 16 U.S.C. 4301 et seq., Federal Land Policy and Management Act of 1966, 16 U.S.C. 1701 et seq., Migratory Bird Treaty Act, 16 U.S.C.

712, National Forest Management Act, 16 U.S.C. 1600 et se Native American Graves Protection and Repatriation Act of 25 U.S.C. 3001 et seq., and Paleontological Resources Preservation Act, 16 U.S.C. 470aaa 470aaa 11. Of particu note, the Archaeological Resources Protection Act specifi protects archaeological resources from looting or other desecration and imposes criminal penalties for unauthoriz excavation, removal, damage, alteration, or defacement of archaeological resources. Federal land management agenci grant a permit authorizing excavation or removal, but onl undertaken for the purpose of furthering archaeological knowledge. The Paleontological Resources Preservation Ac contains very similar provisions protecting paleontologic resources. And the Migratory Bird Treaty Act and Endange Species Act protect migratory birds and listed endangered threatened species and their habitats. Moreover, the BLM USFS were already addressing many of the threats to objec identified in Proclamation 9558 in their governing land u before designation of the monument.

Given the nature of the objects identified on the la reserved by Proclamation 9558, the lack of a threat of da destruction to many of those objects, and the protection those objects already provided by existing law and govern use plans, I find that the area of Federal land reserved Bears Ears National Monument established by Proclamation not confined to the smallest area compatible with the pro and management of those objects. The important objects o scientific or historic interest can instead be protected smaller and more appropriate reservation of 2 areas: Sha and Indian Creek. Revising the boundaries of the monumen cover these 2 areas will ensure that, in accordance with Antiquities Act, it is no larger than necessary for the p care and management of the objects to be protected within monument.

The Shash Jáa area contains the heart of the nationa monument: the iconic twin buttes known as the Bears Ears tower 2,000 feet above the surrounding landscape and are considered sacred to the Native American tribes that call area their ancestral home. Many of the significant objec described by Proclamation 9558 can be found throughout th Jáa area. Ancestral Puebloan occupation of the area bega the Basketmaker II period at least 2,500 years ago, and i behind objects such as pit houses, storage pits, lithic s campsites, rock shelters, pictographs, and baskets, as we manos and metates for grinding corn. Occupation dating t

Basketmaker III period, from approximately 500 to 750 C.E. additional evidence of maize and bean based agriculture, with pottery, bows and arrows, pit houses, kivas, storage and dispersed villages.

New waves of human settlement occurred around 900 C. the Pueblo I period gave rise to large villages near Comb and 1050 C.E., when inhabitants from the Pueblo II period expansive and complex multi family dwellings. Around 115 the dawn of the Pueblo III period, the area's inhabitants increasingly sought shelter in cliff dwellings and left b evidence of an era of unrest. Several centuries later, t Paiute, and Navajo came to occupy the area.

East of the Bears Ears is Arch Canyon, within which paleontologists have found numerous fossils from the Perm Upper Permian eras. Cliff dwellings are hidden throughou canyon, and the mouth of the canyon holds the fabled Arch ruin, which spans the Pueblo II and III periods and conta pictographs and petroglyphs ranging from the Archaic to t historic periods.

Just south of Arch Canyon are the north and south fo Mule Canyon. Five hundred feet deep, 5 miles long, and d with alternating layers of red and white sandstone, these striking canyons contain shelter cliff dwellings and othe archaeological sites, including the scenic and accessible on Fire Ruin, which includes differing masonry styles tha indicate several episodes of construction and use.

Perched high on the open tablelands above the south Mule Canyon are the Mule Canyon ruins, where visitors can exposed masonry walls of ancient living quarters and a pa restored kiva. The deep canyons and towering mesas of th Jáa area are full of similar sites, including rock art, r of single family dwellings, granaries, kivas, towers (inc the Cave Towers), and large villages primarily from the P and III periods, along with sites from the Basketmaker an Archaic periods.

The Shash Jáa area also includes Comb Ridge, a north trending monocline that originates near the boundary of t La Sal National Forest, ends near the San Juan River, and contains remnants from the region's thousands of years of habitation, including cliff dwellings, granaries, kivas, ceremonial sites, and the Butler Wash ruin, a world famou Ancestral Puebloan ruin with multiple rooms and kivas. C

Ridge also includes world class examples of ancient rock art such as the Butler Wash Kachina Panel, a wall sized mural of Juan Anthropomorph figures that dates to the Basketmaker and is considered to be one of the Southwest's most important petroglyph panels for understanding the daily life and rituals of the Basketmaker people. Significant fossil sites have also been discovered in Butler Wash.

Just north of upper Butler Wash, the aspen filled White Draw contains a series of alcoves that have sheltered evidence of human habitation for thousands of years, including Cave 7 site where Richard Wetherill, as part of the Hyde Expedition of 1893, first identified what we know today as the Basketmaker people. The nearby Milk Ranch Point is home to a rich concentration of kivas, granaries, dwellings, and other evidence that Pueblo I farmers used this area to cultivate corn, beans and squash.

The Shash Jaa area also contains the Comb Ridge Fossil which includes a trackway created by a giant arthropod (*Diplichnites cuithensis*), the first recorded instance of a trackway in Utah. Also, the diverse landscape of the Shash area provides habitat for the vast majority of plant and animal species described by Proclamation 9558.

Finally, the Shash Jaa area as described on the accompanying map includes 2 non contiguous parcels of land that encompass Moon House Ruin, an example of iconic Pueblo-decorated architecture, which was likely the last occupied site on the Mesa, as well as Doll House Ruin, a fully intact and well preserved single room granary that is associated with an extensive agricultural area on the mesa top. These significant ruins are important examples of cultural resource objects and should remain within the monument's boundaries.

The Indian Creek area likewise contains objects of significance described in Proclamation 9558. At its center is the broad Indian Creek Canyon, which is characterized by red cliffs and spires of exposed and eroded layers of Navajo Sandstone, Wingate, and Cedar Mesa sandstone, including the North and South Six Shooter Peaks.

Also located within the Indian Creek area is the Canyon Research Center. Spanning lands managed by the National Forest Service, BLM, USFS, and private landowners, this unique partnership works to increase our understanding of the complex natural systems on the landscape, providing their custodians with the information needed to manage the area.

information they need to adapt to the challenges of a changing Colorado Plateau.

Newspaper Rock, a popular attraction in the Indian Creek area, is a roadside rock art panel that has been listed on the National Register of Historic Places since 1976. This site displays a significant concentration of rock art from multiple periods, etched into Wingate sandstone. The older art is attributed to the Ancestral Puebloan people who inhabited the region for 2,000 years, while the more recent rock art is attributed to the Ute people who still live in the Four Corners area.

In addition to Newspaper Rock, the Indian Creek area contains numerous other significant rock art sites, including distinctive and well preserved petroglyphs in Shay Canyon. The Indian Creek area also provides opportunities for cultural and scientific research and paleontological study. Dinosaur tracks in the bottom of the Shay Canyon stream bed are a unique visual reminder of the area's distant past. Additional paleontological resources can be found throughout the Indian Creek area, including vertebrate and invertebrate fossils, primarily in the Chinle Formation. The Indian Creek area also includes two prominent mesas, Bridger Jack Mesa and Lavender Mesa, which are home to relict plant communities, predominantly composed of pinyon-juniper woodland, with small, interspersed sagebrush parklands that exist only on these isolated islands in the desert sea and are generally, unaltered by humans. These mesas provide the opportunity for comparative studies of pinyon-juniper woodland and sagebrush communities in other parts of the Colorado Plateau. Additionally, the Indian Creek area includes the exposed Chinle Formation, known for abundant fossilized flora and fauna, including pelecypods, gastropods, arthropods, fish, amphibians, and reptiles (including dinosaurs). Finally, the area is well known for vertebrate trackways, including the footprints of various animals.

Some of the existing monument's objects, or certain of those objects, are not within the monument's revised boundaries because they are adequately protected by existing designations, agency policy, or governing land use plans. For example, although the modified boundaries do not include the Juan River or the Valley of the Gods, both of those areas are protected by existing administratively designated Areas of Critical Environmental Concern. Plant and animal species such as the bighorn sheep, the Kachina daisy, the Utah night lizard, the *Eucosma navajoensis* moth are protected by the Endangered Species Act and existing land use plans and policies protecting

special-status species. Additionally, some of the range of species falls within existing Wilderness Areas and Wilderness Study Areas. Finally, although Hideout Canyon is likewise included within the modified boundaries, it is generally threatened and is partially within a Wilderness Study Area.

The areas described above are the smallest compatible with the protection of the important objects identified in Proclamation 9558. The modification of the Bears Ears National Monument will maintain and protect those objects and preserve the area's cultural, scientific, and historic legacy.

WHEREAS, Proclamation 9558 of December 28, 2016, describes the Bears Ears National Monument in the State of Utah and reserved approximately 1.35 million acres of Federal land for the care and management of the Bears Ears buttes and other objects of historic and scientific interest identified there and

WHEREAS, many of the objects identified by Proclamation 9558 are otherwise protected by Federal law; and

WHEREAS, it is in the public interest to modify the boundaries of the monument to exclude from its designation reservation approximately 1,150,860 acres of land that is unnecessary for the care and management of the objects to be protected within the monument; and

WHEREAS, the boundaries of the monument reservation therefore be reduced to the smallest area compatible with the protection of the objects of scientific or historic interest described above in this proclamation;

NOW, THEREFORE, I, DONALD J. TRUMP, President of the United States of America, by the authority vested in me by section 320301 of title 54, United States Code, hereby proclaim that the boundaries of the Bears Ears National Monument are hereby modified and reduced to those lands and interests owned or controlled by the Federal Government within the boundaries described on the accompanying map, which is attached to and forms a part of this proclamation. I hereby further proclaim that the modified monument areas identified on the accompanying map shall be known as the Indian Creek and Shashone units of the monument, the latter of which shall include House and Doll House Ruins. These reserved Federal lands and interests in lands cumulatively encompass approximately 2 million acres. The boundaries described on the accompanying map shall be confined to the smallest area compatible with the proper

management of the objects to be protected. Any lands reserved by Proclamation 9558 not within the boundaries identified on the accompanying map are hereby excluded from the monument.

At 9:00 a.m., eastern standard time, on the date thirty days after the date of this proclamation, subject to valid existing rights, the provisions of existing withdrawals, requirements of applicable law, the public and National Forest System lands excluded from the monument reservation shall be:

- (1) entry, location, selection, sale, or other disposition under the public land laws and laws applicable to the U.S. Forest Service;
- (2) disposition under all laws relating to mineral geothermal leasing; and
- (3) location, entry, and patent under the mineral

Appropriation of lands under the mining laws before the time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate an adverse possession are governed by State law where not in conflict with Federal law.

Nothing in this proclamation shall be construed to remove any lands from the Manti La Sal National Forest or to otherwise revoke, modify, or affect any withdrawal, reservation, or appropriation, other than the one created by Proclamation

Nothing in this proclamation shall change the management of the areas designated and reserved by Proclamation 9558 that remain part of the monument in accordance with the terms of the proclamation, except as provided by the following 4 paragraphs:

In recognition of the importance of tribal participation in the care and management of the objects identified above, to ensure that management decisions affecting the monument reflect tribal expertise and traditional and historical knowledge, Proclamation 9558 established a Commission to provide guidance and recommendations on the development and implementation of management plans and on management of the monument, and to partner with Federal agencies by making continuing contributions to inform decisions regarding the management of the monument.

order to ensure that the full range of tribal expertise and traditional historical knowledge is included in such guidance recommendations, paragraph 29 of Proclamation 9558 is hereby revised to provide that the Bears Ears Commission shall be, as the Shash Jaa Commission, shall apply only to the Shash unit as described herein, and shall also include the elected officer of the San Juan County Commission representing Diné, acting in that officer's official capacity.

Proclamation 9558 is hereby revised to clarify that, preparation of the transportation plan required by paragraph thereof, the Secretaries of the Interior and Agriculture shall allow motorized and non motorized vehicle use on roads and trails designated for such use immediately before the issuance of Proclamation 9558 and maintain roads and trails for such use.

Paragraph 35 of Proclamation 9558 governing livestock grazing in the monument is hereby revised to read as follows: "Nothing in this proclamation shall be deemed to affect authorizations for livestock grazing, or administration thereon on Federal lands within the monument. Livestock grazing on the monument shall continue to be governed by laws and regulations other than this proclamation."

Proclamation 9558 is amended to clarify that, consistent with the care and management of the objects identified above, Secretaries of the Interior and Agriculture may authorize ecological restoration and active vegetation management activities in the monument.

If any provision of this proclamation, including its application to a particular parcel of land, is held to be invalid, the remainder of this proclamation and its application to other parcels of land shall not be affected thereby.

IN WITNESS WHEREOF, I have hereunto set my hand this fourth day of December, in the year of our Lord two thousand seventeen, and of the Independence of the United States of America the two hundred and forty second

DONALD J. TRUMP
