Brian,

As discussed on the phone, Manti-La Sal National Forest personnel have reviewed the boundary data provided to Carl Zulick on December 11, 2017. The alignment of the boundary that crosses the forest was confirmed to be accurate. A change is requested, however, in the nlcs\_nm\_nca\_arc feature class. Currently road names in the **Defining Feature Code** do not match the authoritative road names as identified by the Forest. Please reference the attached map and spatial data to determine the correct beginning/ending point (not alignment) and road name.

Thank you for your assistance and please let me know if you have any questions.
