Believe me, I had many calls and email exchanges with Dr. Shulman on that point, so completely understand your concern. While I don't think re-coding by accident is possible, I inadvertently captured items more than once in searches by not setting things up properly, and had to redo the searches.

Ok yes I see that now - I just got the following message. Thanks for the clarification and sorry to bug you and Dr. Shulman about this. Just wanted to make sure.

I raised the same concern extensively over the weekend. Dr. Shulman has been in a meeting and is just getting to this morning's emails, but I believe the system is designed to prevent recoding of a dataset such as the one everyone is working on - or was, as I have just been advised by one of the other team members that all of the comments are now coded.

The issue is the duplication of work and the potential that each of us in the working group will code the same 5462 units. The question is whether the system is set up to ensure that people aren't coding units that have already been coded by someone else.

We cannot easily split them up now. If they are all coded the same way, I'm not sure there is an issue.

Okay thanks. I know that's what you said on the call, just wanted to make sure.

The system is set up to prevent duplicate coding, so that should not be a problem. I am copying Stu and Marcia on my reply in case I am missing something.

On Fri, Jun 2, 2017 at 10:00 AM, Calhoun, John <john_calhoun@nps.gov> wrote:

Randy,

When I select the data set, it only indicates the number of units I have coded (20) and does not reflect all of the units coded by the group (which is well over 1,000 units). Is this right? I want to make sure I'm not doing work that has already been done. Thanks.

Congratulations to Katherine Harrigan, who has reviewed and coded 1,001 comments.

Overall, we have disposed of about 40% of the remaining comments. If those who have not yet worked on these, or have done only a handful, will spend time at it in the next few days we should be able to finish by Wednesday if not sooner.
