I went back a minute ago, and everything is as I left it - "project" says Bears Ears, which is where I was doing the search. I will exit and log in again in a few minutes, will see if problem still exists.

Randal -

Just out of curiosity... is the "Projects" dropdown on the left side showing a project or, "-- select a project--"? (see the screenshot below)... if it is not showing the project's name in the box, be sure it is selected... if there is no project there (that is, it's showing the "-- select a project --" text) - then it is unsure of exactly which project it is in, and cannot gather the bucket list for that project... it seems to be working consistently for me when I have a project selected... without a project selected - I was seeing the same behaviour you were describing...

The empty text box is still showing - I left everything as it was

What is the URL of the page you are on?

I have been working on transferring comments on marine monuments from the Bears Ears project to a bucket for export to NOAA.

Twice now while transferring comments on "Northeast Canyons and Seamounts", the "add to bucket" text box that lets you pick an existing bucket has come up with an empty box - blue outlined rectangle that says "Add to bucket", and the word "cancel" - no list of buckets, no other text. Trying multiple times gets the same result.

Last time I exited and returned, it worked once and the problem then reappeared.
