---

Thank you. There was a typo in your email address as I received it, and for some reason it took several tries before it was corrected on Dr. Shulman's end.

Hi Randal:

I can come over to MIB the week of the 11th. I didn't get to code any of bears ears, but I'm happy to help on the next go around, now that I can access the system.

Thanks...

I've been notified by several team members that coding is completed - congratulations to all! This is well ahead of what I anticipated.

Please take some time to think about what you encountered while working on the comments and make some notes to yourself on ideas for the future, lessons learned here and related matters. Then, either later today or early next week, please send me your comments and ideas. Also, please be thinking about we can best address the next round of comments, which will cover multiple monuments and multiple subject issues.

We will have a conference call and - if enough of you can come to Main Interior - meeting early the week of June 11 - to discuss how best to address the comments on the other monuments. I will send some thoughts on what we need from those comments, which will be different from Bears Ears, next week.
