What shows is Bears Ears, which would have been comments received by COB May 26; June 13, June 19, June 28, July 4 and July 20 - which included comments through COB July 10, but it took that extra time to fix the problems in [regs.gov](#). so they could do a bulk extract.

Also, when you talk with the Help Desk, would you please ask if the system problems July 10 could have effected the submission count.
