Great, thanks. Was asking, not complaining. I need to mow the lawn and do other such before it rains, so doubt I will sign on until 4 or so. My goal for today is to review all of the duplicates and the nears, to the extent they are available, and give them codes as we discussed - 1 opposed to review or to changes at Bears Ears, then .1 if no new information, .2 if new info.

To perhaps help avoid typos, plan to use "9" as "support changes. If can get all of the dups and near dups, then plan to apply my groups of words, so will want to have those already coded out of circulation, for lack of a better term, so they won't be reviewed twice. Does that happen automatically?

Either 7 or 9 for meeting is fine with me, just let me know what works best for you.

Randy,

There were 116,417 comments altogether so the ingest and indexing takes time to run; it had to go overnight to find the duplicates. I have shared the project with you and you have full access to the data. A few notes:

- Your level of access includes the ability to delete all the data and the project.
- The duplicate detection is complete.
- The near-duplicate clustering is still running
- A search for "Bears Ears" in the raw data shows 59,225 results
- There is a "bucket" with all 59,225 you can experiment with while the clustering completes
- The biggest duplicate group has 13,372 identical comments "As a supporter of bird conservation and our public lands, I strongly urge you to protect..."

I am around tonight if you want to have a web meeting. Probably 7 PM or 9 PM would be best.

Stu

I have registered and accessed the dashboard with no problems. However, I cannot see how to access the comments - or are they not posted yet? I will check back around 9 pm with the hope of doing a little work tonight and much more tomorrow
