The Secretary is committed to restoring trust in the Department's decision-making and that begins with institutionalizing state and local input and ongoing collaboration, particularly in communities surrounding public lands.

The Department currently has more than 200 boards, committees, and other internal and external advisory functions that are authorized to solicit input and meet periodically.

To maximize feedback from these boards and ensure their compliance with the Federal Advisory Committee Act and the President's recent executive orders, the Department is currently reviewing the charter and charge of each Board/Advisory Committee. This review process necessitates the temporary postponement of advisory committee meetings.

As the Department concludes its review in the weeks ahead, agencies will notice future meetings to ensure that the Department continues to get the benefit of the views of local communities in all decision-making on public land management.

## Agency suspends advisory panels even as decisions loom

The Interior Department is formally reviewing the "charter and charge" of more than 200 advisory panels that assist federal agencies managing hundreds of millions of acres of public lands at a time when the Trump administration is considering significant changes to land-use designations and management practices.

The Bureau of Land Management has told members of its 30 resource advisory councils (RACs) to postpone scheduled meetings through at least September as part of the new national review of Interior's advisory panels, both internal and external.

That includes canceling meetings of six other BLM advisory committees affiliated with specific sites within the agency's National Conservation Lands system, as well as two other high-profile panels: the National Wild Horse and Burro Advisory Board and the North Slope Science Initiative Science Technical Advisory Panel in Alaska.

It also affects other panels, such as the National Park System Advisory Board, which advises the NPS director and Interior secretary "on matters relating to the National Park Service, the National Park System, and programs administered by the National Park Service," including the Antiquities Act, which has been targeted by GOP congressional leaders.

The timing means some land management recommendations — including a high-profile review of national monuments — will be completed without the advisory panels' input.

Heather Swift, an Interior spokeswoman, told E&E News in an email today that the review is part of an ongoing effort by Interior Secretary Ryan Zinke aimed at "restoring trust in the Department's decision-making."

Swift said the review of "the charter and charge of each Board/Advisory Committee" is designed to "maximize feedback from these boards and ensure their compliance with the Federal Advisory Committee Act," the 1972 law that ensures that advice by various advisory committees is objective and accessible to the public.

"This review process necessitates the temporary postponement of advisory committee meetings," Swift said.

But Swift said the review is also designed to ensure compliance with "the President's recent executive orders."

President Trump in the last month has signed a number of executive orders, including one requiring the review of all policies that may "potentially burden" energy production activity on federal lands.

Trump last week also signed one requiring Interior to review the boundaries of dozens of national monuments designated within the last two decades and to decide whether they should be altered or eliminated ([Greenwire](#), April 26).

That executive order is targeted at more than 30 national monuments designated since 1996 that comprise at least 100,000 acres. It will initially focus on the fate of the recently designated 1.35-million-acre Bears Ears National Monument but will ultimately include sites like the 1.9-million-

acre Grand Staircase-Escalante National Monument, both in Utah.

That executive order requires Zinke to submit a report with his recommendations on the national monuments to the president within 120 days, before the Interior review of the advisory committees and boards is completed and the postponement of the meetings lifted.

That means the Utah resource advisory council that provides recommendations to BLM on management of the 22.9 million acres of federal public lands in the state will not weigh in on the national monument issue; neither, presumably, will the members of the agency's Grand Staircase-Escalante National Monument advisory committee.

That concerns Greg Zimmerman, deputy director of the Center for Western Priorities.

"The Trump administration and Interior Secretary Zinke talk a big game about including Western communities in decisionmaking on public lands, but this action proves it's nothing more than talk," Zimmerman said. "They are shutting out input from communities just as the administration takes unprecedented steps toward wiping national monuments from the map."

It's a particular concern for BLM, critics say.

Canceling the BLM RAC meetings "sends a clear signal that Secretary Zinke intends to make decisions behind closed doors and not through an open and transparent public process," Zimmerman said.

The agency's 30 RACs, whose members are appointed by the Interior secretary, are designed to help guide BLM administrators on a wide variety of issues involving major projects such as multistate transmission lines and energy projects.

The advisory panels typically have 10 to 15 members, who are supposed to represent a cross-section of local residents, state government agencies, industry and conservation leaders. They evaluate and submit recommendations on "land use planning, fire management, off-highway vehicle use, recreation, oil and gas exploration, noxious weed management, grazing issues, wild horse and burro herd management issues," and other topics, according to BLM.

Recommendations from the RACs, established by Interior in 1995 during the Clinton administration, are supposed to carry significant weight with BLM leaders.

But there have been some high-profile examples in the past two years where BLM ignored the recommendations of its RACs.

BLM in January approved the final two segments of the Gateway West Transmission Line Project in Idaho over the objections of an eight-member subcommittee of the BLM Boise District's RAC that concluded the route would unnecessarily affect communities, natural resource values and private landowners ([\*Greenwire\*](#), Jan. 20).

And last year, BLM formally approved the 287-megawatt Soda Mountain Solar Project in the Southern California desert, despite the recommendation of BLM California's Desert District RAC against the project and its impacts on wildlife, groundwater quality and other natural resources ([\*E&E News PM\*](#), April 5, 2016).
