Thanks Ben. I went ahead and pulled up individual maps for each monument and then sketched in the approximate location of each on a general map of the U.S. The result was suitable enough to help identify potential areas of resource potential. I've already completed a rough draft for energy-related resources; Murray and I will discuss it tomorrow morning (I just arrived in California). If all goes well then hopefully we can get something to you in short order. Thanks...

Hi Walter,

Not sure. We have been trying to get information on this, but no luck so far.

Ben, thanks for the info and it was great to meet you yesterday. Do you know if there happens to be a singular map that contains outlines of all the potentially affected monuments? Thanks...

Hi Murray,

Here is a map of Bears Ears NM.

Hi,

If we can have a call at 4:30pm today that would be most appreciated. We have some very challenging time deadlines and it would be helpful to have a discussion as soon as possible.

Walter -- if you are in the DOI building, you can come to my office ... room 3513.

Unfortunately I'm out tomorrow afternoon (downtown on Capitol Hill). I 'might' be able to make a 4:30 call from DOI but I can't commit to it. Friday afternoon would better (at least for me, anyway) if it would better suit everyone's schedules. Thanks...

Murray has a 1:00 pm meeting. How about 4:15 or 4:30 pm?

Thanks,

Hirut

Hi Murray,

I think we met when I was out at USGS for a meeting organized by Carl and at the Econ meeting.

I think I'm going to be involved in some aspects of the review of Monuments. One of the things I'm trying to obtain is information on the energy and mineral resources that might be located within the boundaries of Monuments. Would you have a few minutes to discuss this?

Ben
