11. **Wild and Scenic Rivers (WSR) comment:** No issue. The BLM found 32 river segments totaling 240 miles suitable in the 2000 GSENM Management Plan; the DRMP/DEIS documents current conditions and potential minimal impacts to the existing suitable WSR segments; and assumptions outlined in this targeted plan amendment provide assurances that "the values for which these river segments were found eligible and suitable are not compromised until Congress makes a decision regarding WSR designation."
