

and celebrate the freedom and protection that it has always afforded us.

In commemoration of the signing of our Constitution and in recognition of the importance of informed, responsible citizenship, the Congress, by joint resolution of February 29, 1952 (36 U.S.C. 153), designated September 17 as "Citizenship Day," and by joint resolution of August 2, 1956 (36 U.S.C. 159), requested the President to proclaim the week beginning September 17 and ending September 23 of each year as "Constitution Week."

**Now, Therefore, I, William J. Clinton,** President of the United States of America, do hereby proclaim September 17, 1996, as Citizenship Day and September 17 through September 23, 1996, as Constitution Week, and urge all Americans to join in observing these occasions with appropriate programs and activities.

**In Witness Whereof,** I have hereunto set my hand this seventeenth day of September, in the year of our Lord nineteen hundred and ninety-six, and of the Independence of the United States of America the two hundred and twenty-first.

**William J. Clinton**

NOTE: This proclamation was published in the *Federal Register* on September 19.

### **Letter to Speaker Newt Gingrich on Legislation Prohibiting Possession of Firearms by Domestic Violence Offenders**

*September 17, 1996*

*Dear Mr. Speaker:*

I am pleased that you have now joined me in supporting legislation to prohibit domestic violence offenders from obtaining firearms. No one who has committed an act of domestic violence against a spouse or child should be able to possess a firearm.

As you know, Senator Lautenberg and Representative Torricelli have introduced legislation that would achieve this objective. The Senate passed the Lautenberg bill for the second time last week by an overwhelm-

ing and bipartisan vote of 97-2. It is now time for the House to act on the Torricelli bill and join the Senate in supporting this bipartisan effort.

There were 88,500 incidents of domestic violence where a firearm was present in 1994. I signed the Brady Law in 1993 and to date it has prevented over 60,000 felons, fugitives and others from buying handguns. My 1994 Crime Bill included the historic Violence Against Women Act, which made it a crime for stalkers and harassers under restraining orders to carry a gun. That provision is beginning to take hold—in Kentucky alone, over 300 stalkers and harassers were prohibited from buying firearms in one year. The legislation that you now support will build upon these important provisions.

I welcome your support and determination to complete this job. Protecting innocent women and children from deadly domestic violence is too important to let anything stand in the way. Bringing this bill to a vote in the House is an important step. But we must see it through to the end. Send it to me for my signature without further delay before Congress adjourns so that keeping guns out of the hands of all domestic violence offenders becomes the law of the land.

Sincerely,

**Bill Clinton**

NOTE: This letter was released by the Office of the Press Secretary on September 18.

### **Remarks Announcing the Establishment of the Grand Staircase-Escalante National Monument at Grand Canyon National Park, Arizona**

*September 18, 1996*

Thank you very much, ladies and gentlemen. Thank you for being here and for being in such good spirits. Thank you, God, for letting the Sun come out. This is a sunny day—we ought to have a sunny day for a sunny day.

Thank you, Rob Arnberger, for the work you do here at Grand Canyon National Park and for your participation; to all of our distinguished guests. I want to say a special word

of thanks to my good friend Governor Roy Romer from Colorado. And thank you, Secretary Bruce Babbitt, for your long, consistent, devoted efforts on behalf of America's natural heritage.

I also want to thank the Harvey High School choir and the students and the faculty from the Grand Canyon Unified School who are here. Where are you all? Thank you. I think this ought to qualify as an excused absence—[*laughter*]—or maybe even a field trip.

I want to thank all of our tribal leaders who are here and, indeed, all of the Native Americans who are here. We are following in your footsteps and honoring your ethic today.

I want to say a special word of thanks to my longtime friend Norma Matheson. Norma and her late husband, Scott, became great friends of Hillary's and mine when we served together as Governors. After Scott passed away, Norma honored me by asking me to come to Utah to speak at a dinner in his honor for a foundation set up in his memory. I never was with Scott Matheson, I never even talked to him on the phone that I did not feel I was in the presence of a great man. Both of them are truly wonderful human beings. And I am very grateful for her presence here today and for her commitment.

And finally, I want to thank, more strongly than I can ever convey to you, the Vice President for his passion, his commitment, his vision, and his sheer knowledge of environmental and natural heritage issues. It has become a treasure for the United States, and I have mined it frequently for 4 years.

I remember when I was trying to decide what sort of person I wanted to ask to run with me for Vice President, and I made up my mind I wanted somebody who was smarter than I was—that left a large field to pick from—[*laughter*]—someone who was philosophically in tune with me, someone who would work like crazy, and someone who knew things I didn't know. And I read "Earth in the Balance," and I realized it was a profoundly important book by someone who knew things I wanted to learn. And we have learned a lot and done a lot together over the last 4 years. Very few things we have done

will have a more positive, lasting effect than this, and it will always have Al Gore's signature on it as well. And I thank him for what he has done.

Ladies and gentlemen, the first time I ever came to the Grand Canyon was also in 1971 in the summer. And one of the happiest memories of my entire life was when, for some fluky reason, even in the summertime, I found a place on a rock overlooking the Grand Canyon where I was all alone. And for 2 hours I sat, and I lay down on that rock, and I watched the sunset. And I watched the colors change layer after layer after layer for 2 hours. I could have sat there for 2 days if the Sun had just taken a little longer to set. [*Laughter*] And even today, 25 years later, in hectic, crazy times, in lonely, painful times, my mind drifts back to those 2 hours that I was alone on that rock watching the sunset over this Canyon. And it will be with me till the day I die. I want more of those sights to be with all Americans for all time to come.

As all of you know, today we are keeping faith with the future. I'm about to sign a proclamation that will establish the Grand Staircase-Escalante National Monument. Why are we doing this? Well, if you look at the Grand Canyon behind me, it seems impossible to think that anyone would want to touch it. But in the past there have been those who wanted to build on the Canyon, to blast it, to dam it. Fortunately, these plans were stopped by far-sighted Americans who saw that the Grand Canyon was a national treasure, a gift from God that could not be improved upon.

The fact that we stand here is due, in large part, to the Antiquities Act of 1906. The law gives the President the authority to protect Federal lands of extraordinary cultural, historic, and scientific value, and in 1908 that's just what Theodore Roosevelt did when he protected the Grand Canyon.

Since then, several Presidents of both parties, Republicans and Democrats, have worked to preserve places that we now take for granted as part of our own unchanging heritage: Bryce Canyon, Zion, Glacier Bay, Olympic, Grand Teton. These places many of you have been to, and I've been to many of them myself. I thank goodness that the

Antiquities Act was on the books and that Presidents, without regard to party, used it to protect them for all of us and for generations to come.

Today we add a new name to that list: the Grand Staircase-Escalante National Monument. Seventy miles to the north of here in Utah lies some of the most remarkable land in the world. We will set aside 1.7 million acres of it.

On this site, on this remarkable site, God's handiwork is everywhere in the natural beauty of the Escalante Canyons and in the Kaiparowits Plateau, in the rock formations that show layer by layer billions of years of geology, in the fossil record of dinosaurs and other prehistoric life, in the remains of ancient American civilizations like the Anasazi Indians.

Though the United States has changed and Utah has grown, prospered, and diversified, the land in the Utah monument remains much as it did when Mormon pioneers made their way through the Red Canyons in the high desert in the late 1800's. Its uniquely American landscape is now one of the most isolated places in the lower 48 States. In protecting it, we live up to our obligation to preserve our natural heritage. We are saying very simply, "Our parents and grandparents saved the Grand Canyon for us; today, we will save the Grand Escalante Canyons and the Kaiparowits Plateaus of Utah for our children."

Sometimes progress is measured in mastering frontiers, but sometimes we must measure progress in protecting frontiers for our children and all children to come. Let me make a few things about this proclamation clear: First, it applies only to Federal lands, lands that belong already to the American people. Second, under the proclamation, families will be able to use this canyon as they always have: The land will remain open for multiple uses including hunting, fishing, hiking, camping, and grazing. Third, the proclamation makes no Federal water rights claims. Fourth, while the Grand Staircase-Escalante will be open for many activities, I am concerned about a large coal mine proposed for the area. Mining jobs are good jobs, and mining is important to our national economy and to our national security. But we

can't have mines everywhere, and we shouldn't have mines that threaten our national treasures.

That is why I am so pleased that PacifiCorp has followed the example set by Crown Butte New World Mine in Yellowstone. PacifiCorp has agreed to trade its lease to mine coal on these lands for better, more appropriate sites outside the monument area. I hope that Andalex, a foreign company, will follow PacifiCorp's example and work with us to find a way to pursue its mining operations elsewhere.

Now, let me also say a word to the people of Utah. Mining revenues from Federal and State lands help to support your schools. I know the children of Utah have a big stake in school lands located within the boundaries of the monument that I am designating today. In the past these scattered school lands have never generated significant revenues for the Utah school trust. That's why Governor Scott Matheson, one of the greatest public figures in the history of Utah, asked the Congress to authorize the exchange of nonrevenue-producing lands for other Federal lands that can actually provide revenue for the school trust.

Finally, I was able to sign legislation to accomplish that goal in 1993. And I will now use my office to accelerate the exchange process. I have directed Secretary Babbitt to consult with Governor Leavitt, Congressman Orton, Senators Bennett and Hatch to form an exchange working group to respond promptly to all exchange requests and other issues submitted by the State and to resolve reasonable differences in valuation in favor of the school trust. By taking these steps, we can both protect the natural heritage of Utah's children and ensure them a quality educational heritage.

I will say again, creating this national monument should not and will not come at the expense of Utah's children. Today is also the beginning of a unique 3-year process during which the Bureau of Land Management will work with State and local governments, Congressman Orton, and the Senators and other interests to set up a land management process that will be good for the people of Utah and good for Americans. And I know

a lot of you will want to be involved in that and to be heard as well.

Let us always remember, the Grand Staircase-Escalante is for our children. For our children we have worked hard to make sure that we have a clean and safe environment, as the Vice President said. I appreciate what he said about the Yellowstone, the Mojave Desert, the Everglades, the work we have done all across this country to try to preserve our natural heritage and clean up our environment. I hope that we can once again pursue that as an American priority without regard to party or politics or election seasons. We all have the same stake in our common future.

If you'll permit me a personal note, another one, it was 63 years ago that a great Democrat first proposed that we create a national monument in Utah's Canyonlands. His name was Harold Ickes. He was Franklin Roosevelt's Interior Secretary. And I'm sorry he never got a chance to see that his dream would become a reality, but I'm very glad that his son and namesake is my Deputy Chief of Staff and is here today.

And it was 30 years before that, 93 years ago, that a great Republican President, Theodore Roosevelt, said we should make the Grand Canyon a national monument. In 1903, Teddy Roosevelt came to this place and said a few words from the rim of the Canyon I'd like to share with you as we close today:

"Leave the Grand Canyon as it is. You cannot improve upon it. What you can do is keep it for your children, your children's children, all who come after you. We have gotten past the stage when we are pardoned if we treat any part of our country as something to be skinned for. The use of the present generation, whether it is the forest, the water, the scenery, whatever it is, handle it so that your children's children will get the benefit of it."

It was President Roosevelt's wisdom and vision that launched the Progressive Era and prepared our Nation for the 20th century. Today we must do the same for the 21st century. I have talked a lot about building a bridge of possibility to that 21st century, by meeting our challenges and protecting our values. Today the Grand Staircase-Escalante

National Monument becomes a great pillar in our bridge to tomorrow.

Thank you, and God bless you all.

NOTE: The President spoke at 12:10 p.m. outside El Tovar Lodge. In his remarks, he referred to Rob Arnberger, Superintendent, Grand Canyon National Park; Norma Matheson, widow of former Utah Gov. Scott Matheson; and Gov. Michael O. Leavitt of Utah.

### **Proclamation 6920—Establishment of the Grand Staircase-Escalante National Monument**

*September 18, 1996*

*By the President of the United States of America*

#### **A Proclamation**

The Grand Staircase-Escalante National Monument's vast and austere landscape embraces a spectacular array of scientific and historic resources. This high, rugged, and remote region, where bold plateaus and multi-hued cliffs run for distances that defy human perspective, was the last place in the continental United States to be mapped. Even today, this unspoiled natural area remains a frontier, a quality that greatly enhances the monument's value for scientific study. The monument has a long and dignified human history: it is a place where one can see how nature shapes human endeavors in the American West, where distance and aridity have been pitted against our dreams and courage. The monument presents exemplary opportunities for geologists, paleontologists, archeologists, historians, and biologists.

The monument is a geologic treasure of clearly exposed stratigraphy and structures. The sedimentary rock layers are relatively undeformed and unobscured by vegetation, offering a clear view to understanding the processes of the earth's formation. A wide variety of formations, some in brilliant colors, have been exposed by millennia of erosion. The monument contains significant portions of a vast geologic stairway, named the Grand Staircase by pioneering geologist Clarence Dutton, which rises 5,500 feet to the rim of Bryce Canyon in an unbroken sequence of great cliffs and plateaus. The monument in-

a lot of you will want to be involved in that and to be heard as well.

Let us always remember, the Grand Staircase-Escalante is for our children. For our children we have worked hard to make sure that we have a clean and safe environment, as the Vice President said. I appreciate what he said about the Yellowstone, the Mojave Desert, the Everglades, the work we have done all across this country to try to preserve our natural heritage and clean up our environment. I hope that we can once again pursue that as an American priority without regard to party or politics or election seasons. We all have the same stake in our common future.

If you'll permit me a personal note, another one, it was 63 years ago that a great Democrat first proposed that we create a national monument in Utah's Canyonlands. His name was Harold Ickes. He was Franklin Roosevelt's Interior Secretary. And I'm sorry he never got a chance to see that his dream would become a reality, but I'm very glad that his son and namesake is my Deputy Chief of Staff and is here today.

And it was 30 years before that, 93 years ago, that a great Republican President, Theodore Roosevelt, said we should make the Grand Canyon a national monument. In 1903, Teddy Roosevelt came to this place and said a few words from the rim of the Canyon I'd like to share with you as we close today:

"Leave the Grand Canyon as it is. You cannot improve upon it. What you can do is keep it for your children, your children's children, all who come after you. We have gotten past the stage when we are pardoned if we treat any part of our country as something to be skinned for. The use of the present generation, whether it is the forest, the water, the scenery, whatever it is, handle it so that your children's children will get the benefit of it."

It was President Roosevelt's wisdom and vision that launched the Progressive Era and prepared our Nation for the 20th century. Today we must do the same for the 21st century. I have talked a lot about building a bridge of possibility to that 21st century, by meeting our challenges and protecting our values. Today the Grand Staircase-Escalante

National Monument becomes a great pillar in our bridge to tomorrow.

Thank you, and God bless you all.

## **Proclamation 6920—Establishment of the Grand Staircase-Escalante National Monument**

*September 18, 1996*

*By the President of the United States of America*

### **A Proclamation**

The Grand Staircase-Escalante National Monument's vast and austere landscape embraces a spectacular array of scientific and historic resources. This high, rugged, and remote region, where bold plateaus and multi-hued cliffs run for distances that defy human perspective, was the last place in the continental United States to be mapped. Even today, this unspoiled natural area remains a frontier, a quality that greatly enhances the monument's value for scientific study. The monument has a long and dignified human history: it is a place where one can see how nature shapes human endeavors in the American West, where distance and aridity have been pitted against our dreams and courage. The monument presents exemplary opportunities for geologists, paleontologists, archeologists, historians, and biologists.

The monument is a geologic treasure of clearly exposed stratigraphy and structures. The sedimentary rock layers are relatively undeformed and unobscured by vegetation, offering a clear view to understanding the processes of the earth's formation. A wide variety of formations, some in brilliant colors, have been exposed by millennia of erosion. The monument contains significant portions of a vast geologic stairway, named the Grand Staircase by pioneering geologist Clarence Dutton, which rises 5,500 feet to the rim of Bryce Canyon in an unbroken sequence of great cliffs and plateaus. The monument in-

cludes the rugged canyon country of the upper Paria Canyon system, major components of the White and Vermilion Cliffs and associated benches, and the Kaiparowits Plateau. That Plateau encompasses about 1,600 square miles of sedimentary rock and consists of successive south-to-north ascending plateaus or benches, deeply cut by steep-walled canyons. Naturally burning coal seams have scorched the tops of the Burning Hills brick-red. Another prominent geological feature of the plateau is the East Kaibab Monocline, known as the Cockscomb. The monument also includes the spectacular Circle Cliffs and part of the Waterpocket Fold, the inclusion of which completes the protection of this geologic feature begun with the establishment of Capitol Reef National Monument in 1938 (Proclamation No. 2246, 50 Stat. 1856). The monument holds many arches and natural bridges, including the 130-foot-high Escalante Natural Bridge, with a 100 foot span, and Grosvenor Arch, a rare "double arch." The upper Escalante Canyons, in the northeastern reaches of the monument, are distinctive: in addition to several major arches and natural bridges, vivid geological features are laid bare in narrow, serpentine canyons, where erosion has exposed sandstone and shale deposits in shades of red, maroon, chocolate, tan, gray, and white. Such diverse objects make the monument outstanding for purposes of geologic study.

The monument includes world class paleontological sites. The Circle Cliffs reveal remarkable specimens of petrified wood, such as large unbroken logs exceeding 30 feet in length. The thickness, continuity and broad temporal distribution of the Kaiparowits Plateau's stratigraphy provide significant opportunities to study the paleontology of the late Cretaceous Era. Extremely significant fossils, including marine and brackish water mollusks, turtles, crocodilians, lizards, dinosaurs, fishes, and mammals, have been recovered from the Dakota, Tropic Shale and Wahweap Formations, and the Tibbet Canyon, Smoky Hollow and John Henry members of the Straight Cliffs Formation. Within the monument, these formations have produced the only evidence in our hemisphere of terrestrial vertebrate fauna, including mammals, of the Cenomanian-Santonian ages. This se-

quence of rocks, including the overlaying Wahweap and Kaiparowits formations, contains one of the best and most continuous records of Late Cretaceous terrestrial life in the world.

Archeological inventories carried out to date show extensive use of places within the monument by ancient Native American culture. The area was a contact point for the Anasazi and Fremont cultures, and the evidence of this mingling provides a significant opportunity for archeological study. The cultural resources discovered so far in the monument are outstanding in their variety of cultural affiliation, type and distribution. Hundreds of recorded sites include rock art panels, occupation sites, campsites and granaries. Many more undocumented sites that exist within the monument are of significant scientific and historic value worthy of preservation for future study.

The monument is rich in human history. In addition to occupations by the Anasazi and Fremont cultures, the area has been used by modern tribal groups, including the Southern Paiute and Navajo. John Wesley Powell's expedition did initial mapping and scientific field work in the area in 1872. Early Mormon pioneers left many historic objects, including trails, inscriptions, ghost towns such as the Old Paria townsite, rock houses, and cowboy line camps, and built and traversed the renowned Hole-in-the-Rock Trail as part of their epic colonization efforts. Sixty miles of the Trail lie within the monument, as does Dance Hall Rock, used by intrepid Mormon pioneers and now a National Historic Site.

Spanning five life zones from low-lying desert to coniferous forest, with scarce and scattered water sources, the monument is an outstanding biological resource. Remoteness, limited travel corridors and low visitation have all helped to preserve intact the monument's important ecological values. The blending of warm and cold desert floras, along with the high number of endemic species, place this area in the heart of perhaps the richest floristic region in the Intermountain West. It contains an abundance of unique, isolated communities such as hanging gardens, tinajas, and rock crevice, canyon bottom, and dunal pocket communities, which have provided refugia for many an-

cient plant species for millennia. Geologic uplift with minimal deformation and subsequent downcutting by streams have exposed large expanses of a variety of geologic strata, each with unique physical and chemical characteristics. These strata are the parent material for a spectacular array of unusual and diverse soils that support many different vegetative communities and numerous types of endemic plants and their pollinators. This presents an extraordinary opportunity to study plant speciation and community dynamics independent of climatic variables. The monument contains an extraordinary number of areas of relict vegetation, many of which have existed since the Pleistocene, where natural processes continue unaltered by man. These include relict grasslands, of which No Mans Mesa is an outstanding example, and pinon-juniper communities containing trees up to 1,400 years old. As witnesses to the past, these relict areas establish a baseline against which to measure changes in community dynamics and biogeochemical cycles in areas impacted by human activity. Most of the ecological communities contained in the monument have low resistance to, and slow recovery from, disturbance. Fragile cryptobiotic crusts, themselves of significant biological interest, play a critical role throughout the monument, stabilizing the highly erodible desert soils and providing nutrients to plants. An abundance of pack rat middens provides insight into the vegetation and climate of the past 25,000 years and furnishes context for studies of evolution and climate change. The wildlife of the monument is characterized by a diversity of species. The monument varies greatly in elevation and topography and is in a climatic zone where northern and southern habitat species intermingle. Mountain lion, bear, and desert bighorn sheep roam the monument. Over 200 species of birds, including bald eagles and peregrine falcons, are found within the area. Wildlife, including neotropical birds, concentrate around the Paria and Escalante Rivers and other riparian corridors within the monument.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431) authorizes the President, in his discretion, to declare by public proclamation historic landmarks, his-

toric and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as a part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

**Now, Therefore, I, William J. Clinton,** President of the United States of America, by the authority vested in me by section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Grand Staircase-Escalante National Monument, for the purpose of protecting the objects identified above, all lands and interests in lands owned or controlled by the United States within the boundaries of the area described on the document entitled "Grand Staircase-Escalante National Monument" attached to and forming a part of this proclamation. The Federal land and interests in land reserved consist of approximately 1.7 million acres, which is the smallest area compatible with the proper care and management of the objects to be protected.

All Federal lands and interests in lands within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale, leasing, or other disposition under the public land laws, other than by exchange that furthers the protective purposes of the monument. Lands and interests in lands not owned by the United States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

The establishment of this monument is subject to valid existing rights.

Nothing in this proclamation shall be deemed to diminish the responsibility and authority of the State of Utah for management of fish and wildlife, including regulation of hunting and fishing, on Federal lands within the monument.

Nothing in this proclamation shall be deemed to affect existing permits or leases for, or levels of, livestock grazing on Federal lands within the monument; existing grazing uses shall continue to be governed by appli-

cable laws and regulations other than this proclamation.

Nothing in this proclamation shall be deemed to revoke any existing withdrawal, reservation, or appropriation; however, the national monument shall be the dominant reservation.

The Secretary of the Interior shall manage the monument through the Bureau of Land Management, pursuant to applicable legal authorities, to implement the purposes of this proclamation. The Secretary of the Interior shall prepare, within 3 years of this date, a management plan for this monument, and shall promulgate such regulations for its management as he deems appropriate. This proclamation does not reserve water as a matter of Federal law. I direct the Secretary to address in the management plan the extent to which water is necessary for the proper care and management of the objects of this monument and the extent to which further action may be necessary pursuant to Federal or State law to assure the availability of water.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy, or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

**In Witness Whereof**, I have hereunto set my hand this eighteenth day of September, in the year of our Lord nineteen hundred and ninety-six, and of the Independence of the United States of America the two hundred and twenty-first.

**William J. Clinton**

[Filed with the Office of the Federal Register, 12:27 p.m., September 23, 1996]

NOTE: This proclamation will be published in the *Federal Register* on September 24.

### **Proclamation 6918—National POW/MIA Recognition Day, 1996**

*September 18, 1996*

*By the President of the United States  
of America*

#### **A Proclamation**

Since our country's birth, Americans have responded to military threats against liberty

and democracy, whether at home or in remote areas of the world. The young men and women of our Armed Forces understand the need to resist oppression, and they have willingly put themselves in harm's way around the globe to do so. Those young Americans who stand in the defense of freedom are our country's most precious natural resource.

It is particularly painful when these brave Americans are made Prisoners of War, or are classified as Missing in Action. They have earned our deep appreciation and respect for the great sacrifices they have made so that all of us can continue to enjoy the privileges of liberty. In keeping faith with them, we continue our concerted efforts to determine the fate of all those who are unaccounted for and to bring home the remains of those who have perished.

The grief for our prisoners of war and those missing in action is most intense, of course, among their families and loved ones at home, who wait—often for years, and sometimes in vain—for confirmation of their fate. These families display their own courage too, by their endurance in the face of deep anxiety. Their cause is our cause, and we pledge ourselves to them anew on this special day.

On September 20, 1996, the flag of the National League of Families of American Prisoners of War and Missing in Southeast Asia, a black-and-white banner symbolizing all of America's missing, will be flown over the White House, the United States Capitol, the United States Departments of State, Defense, and Veterans Affairs, the Selective Service System headquarters, the Vietnam Veterans Memorial, the Korean War Veterans Memorial, and national cemeteries across the country.

**Now, Therefore, I, William J. Clinton**, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim September 20, 1996, as National POW/MIA Recognition Day. I ask all Americans to join me in honoring former American POWs and those Americans still unaccounted for as a result of their service to our great Nation. I also encourage the American people to express their gratitude to the families of these missing Ameri-
