This is the proclamation:

...reserve as part thereof all lands and interests in lands owned or controlled by the Federal Government within the boundaries described on the accompanying map, which is attached to and forms a part of this proclamation. These reserved Federal lands and interests in lands encompass approximately 1.35 million acres. The boundaries described on the accompanying map are confined to the smallest area compatible with the proper care and management of the objects to be protected.

Can someone tell me what the proclamation said as far as BENM acres are concerned? Was that included?

Hi Brian,
Is there an "easy" way to run land management acreage? The BENM fact sheets for the USFS and BLM use different numbers
USFS: 289,000 acres of usfs land
BLM: 290,000 acres of usfs land

With the new/final GIS data, can we get accurate numbers to revise the table located here on page 3: https://www.blm.gov/sites/blm.gov/files/documents/files/BE%20QA%20Fast%20Facts_1.pdf

?

I think it would be helpful to know the following:

1. NPS acreage
2. USFS acreage
3. State of Utah acreage (a) SITLA and b) "other state lands" broken down separately if possible)
4. BLM acreage
5. WSAs acreage

6. USFS Wilderness acreage (Dark Canyon)
7. BLM SRMAs and ACECs (if the fact sheet isn't correct on page 2, last paragraph)

Also, is this possible?

1. Acreage available to leasing prior to designation
2. Acreage available to leasing after designation

Thank you! This information would be used to update the website/fact sheet and to prepare for the proposed public meetings.
