---

Lets wait until I hear back from her - mailing it to Reston might face the same problem.

Rog. I can print it and send to Ann if she would like.

Let me see if Ann can get it printed at Reston and bring it with her to DOI; she works here a couple of days per week. All incoming mail still gets irradiated - a holdover from the anthrax attacks years ago - and paper that goes through that tends to fall apart.

This appears to be just what I need. Is there any way to get a printed copy, say 3 feet by 5 or 6, whichever is the natural proportion to go with 3' on the narrow side? Our copier can't handle something like this.

Hi Randy,

A map that should meet your needs can be downloaded from ([https://pubs.usgs.gov/of/2012/1266/appendix\\_2.html](https://pubs.usgs.gov/of/2012/1266/appendix_2.html)). It is sourced from a USGS Open File Report (<https://pubs.usgs.gov/of/2012/1266/>). Let me know if you have any questions.

Best regards  
Jason

Actually its a little more than one expedition. I am working on the Secretary's review of national monuments, and am looking for information that might indicate why the particular area designated as the NE Canyons and Seamounts was chosen, i.e. how is it different from other areas of canyons and seamounts along the East coast, if there are any. Since most of those directly involved in the discussions were political appointees who are no longer here, there is a certain amount of reconstruction involved.

As part of this, it would be very helpful to have a map or maps showing other canyons and seamounts, from perhaps Virginia to Maine and out to the EEZ boundary. The map or maps need not be in great detail at this point, as long as it or they show those features.

Hi Jason,

I am cc-ing Randy Bowman at DOI who is looking for the maps from the most recent expeditions?

Can you help?

-Ann
