Ann Miller, who created the Google drive for the monument review, sent you the invitation to access it a few minutes ago.

There are executive summaries for all the BLM monuments in the drive, but I have not edited those to remove the economic data - which is in the economic reports for each monument - or to add the answers to the additional questions (re wilderness and WSAs, legislative changes, etc). I was doing that as part of the briefing book process. I also have executive summaries from FWS and NPS but have not yet added them to the drive, will do that tomorrow.
