BLM Postpones Oil and Gas Regulations, Plans to Revise them through rulemaking

WASHINGTON – Through a notice published in the Federal Register on Thursday, June 15, 2017, the Bureau of Land Management (BLM) postponed the compliance dates for certain oil and gas regulations contained in the 2016 final rule entitled, "Waste Prevention, Production Subject to Royalties, and Resource Conservation" (2016 final rule). "In addition to issuing the immediate postponement of upcoming deadlines, DOI is working on proposed rules that would remove unnecessary burdens imposed by the existing rule and extend current compliance deadlines while these revisions are being developed," said Vincent DeVito, Counselor for Energy Policy to the Secretary of the Interior. "Extending the filing deadlines in the court proceedings will enable the agency to focus on making these changes and would benefit all parties by avoiding needless litigation."

NOTE for tomorrow: Cook Inlet (Alaska) Oil and Gas Lease Sale 244

The Proposed Outer Continental Shelf (OCS) Oil and Gas Leasing Program for 2012-2017 includes one special-interest lease sale in the Cook Inlet Planning Area (Sale 244). This sale is currently scheduled for June 21, 2017. The bid reading will be live-streamed from this page. The web stream will be accessible beginning at 9 a.m. Alaska Time; the bid reading will begin at 10 a.m. Alaska time.

Distribution Plan Available for FY 2017 Funding for Bureau of Reclamation

A majority of funding will be available for water conservation and delivery, Western drought response and rural water projects

WASHINGTON – Bureau of Reclamation Acting Commissioner Alan Mikkelsen today released the spending plan for \$112.3 million of the total \$179.3 million provided to Reclamation in the Consolidated Appropriations Act of 2017, which provided funds in six categories within Water and Related Resources for Reclamation activities. The funds will go toward water conservation and delivery, Western drought response, rural water projects, and other important projects.

"A sustainable water supply is important to everyone throughout the West," Acting Commissioner Mikkelsen said. "The funding in this spending plan will assist infrastructure improvements that supports Reclamation's mission of delivering water and generating power in the Western United States."

The funding of \$112.3 million is divided among six categories:

- water conservation and delivery (\$12.0 million);
- Western drought response (\$40.0 million);
- rural water (\$46.5 million);
- environmental restoration and compliance (\$7.0 million);
- fish passage and fish screens (\$5.0 million); and
- facility operations, maintenance, and rehabilitation (\$1.8 million).

- **Emergency Management**

As of 5:00 a.m. EDT, a disturbance characterized as having potential to become Tropical Cyclone Three was located approximately 305 miles south-southwest of the mouth of the Mississippi River. The disturbance is expected to be near the Louisiana coast by Wednesday night, with some slight strengthening possible before the system reaches the coast. A Tropical Storm Warning is in effect from Cameron, Louisiana to the mouth of the Pearl River, accompanied by a Tropical Storm Watch from west of Cameron, Louisiana to High Island, Texas. Tropical storm conditions are expected within the warning area this afternoon. The greatest threat is inundation of 1 to 3 feet along the coast in the Tropical Storm Warning area. Total rain accumulations of 4 to 8 inches with isolated maximum amounts of 10 inches are expected over southeastern Louisiana, southern Mississippi, southern Alabama, and the Florida Panhandle through Thursday morning. Rainfall amounts of 2 to 4 inches with isolated maximum amounts of 6 inches can be expected farther west, from southwestern Louisiana to southeastern Texas, through Thursday morning.

Interior Media Report

Submitted 6/19/17

DAILY COMMUNICATIONS REPORT

Inquiries

· Eric Lipton (NY Times) – REQUEST – Interview with the Secretary, If not, can you let me know who else at the Department of Interior or BLM I can speak with to ask about questions about the lifting of the coal leasing moratorium, the stay of the ONRR rule, the new Royalties working group you have formed, and what plans are regarding leasing for coal in the coming year. – RESPONSE – Secretary is not available. Considering other options.

· Mary Catherine O'Connor (The Guardian) – REQUEST -- I know the Secretary has endorsed such a move but am hoping to get some research to support this outcome. Is there any research showing economic outcomes of National Park campgrounds run by concessionaires? Have those operations improved the financial health of their host parks? And what has the outcome been for users? Have camping fees increased in those places? – RESPONSE – Asked for Sec. Zinke statement about PPPs and the backlog and getting info from NPS on successful PPPs.

Top Stories

· BOSTON GLOBE: “In a backroom at a waterfront Legal Seafoods, about 20 representatives from New England fisheries and fishermen’s associations sought to persuade Zinke to shrink or eliminate the monument. Expressing unanimous disapproval of Obama’s move to use the Antiquities Act to protect the area, they argued that fisheries incur substantial financial losses and fishermen risk their safety by having to steer clear of the protected area. Meghan Lapp, fisheries liaison for Seafreeze, Ltd., said the company has two vessels that had fished for squid, mackerel, and butterfish in the zone since the 1980s. After the area became a monument, Lapp estimated the company lost hundreds of thousands of dollars. Fishermen around the table told similar stories.”

Top Issues and Accomplishments

· This week, Secretary Zinke will testify at the Senate Energy and Natural Resources, Senate Appropriations, and House Natural Resources Committees regarding the FY2017 Budget.

Outside Media of Interest

Interior Head Says Public Lands Can Make U.S. A ‘Dominant’ Oil Power.

Reuters (6/19, Volcovici) reports Interior Secretary Ryan Zinke said that drilling and mining on protected federal lands could help the US become dominant as a global energy force. He said, “There is a social cost of not having jobs. ... Energy dominance gives us the ability to supply our allies with energy, as well as to leverage our aggressors, or in some cases our enemies, like Iran.” Last week, Zinke recommended that President Trump reduce the size of the Bears Ears National Monument, the first recommendation in a series of reviews of the monuments in the US. While the Interior Secretary said the US government should find solutions to address climate change, jobs are the top priority. He said, “If you don’t have an economy you can’t afford to put in the environmental protections you need.”

Federal, Range Leaders Discuss Proposed Mining Ban Near Boundary Waters.

WDIO-TV Duluth, MN (6/19) reports that Rep. Rick Nolan and “several other elected officials were in Mountain Iron Monday to discuss the proposed mining ban” near the Boundary Waters. According to the article, “the group of elected officials toured UTAC in Eveleth before having a

meeting on the proposed ban at the RAMS office in Mountain Iron.” Nolan “called the meeting a successful discussion on the ban, and controversial topic of having a clean environment and growing mining economy.”

Zinke, Perdue Break With Tradition.

The East Oregonian (6/19) editorializes that when Interior Secretary Ryan Zinke and Agriculture Secretary Sonny Perdue visited Idaho together June 2, they “did something a little different, something they’re still talking about in Idaho.” According to the paper, “in a closed-door meeting with 10 producers before the Boise State event, Perdue and Zinke didn’t make speeches. They listened.” Acknowledging that it was “refreshing,” the paper concludes that “it will be even more refreshing if they deliver.”

Mashpee Tribe’s Land In Trust Decision Delayed.

The Cape Cod (MA) Times (6/19, Lindahl) reports that “a decision from the Bureau of Indian Affairs on whether the Mashpee Wampanoag Tribe qualifies for reservation lands was not released Monday as expected.” It’s unclear whether the BIA “has made its decision on the tribe’s 170 acres in Mashpee and 151 acres in East Taunton, where it plans to build its First Light Resort & Casino”. BIA spokeswoman Nedra Darling “said she had not received any notice of the decision Monday evening.”

Dams: ‘Relics’ Or Vital To An ‘All Of The Above’ Fix?

E&E Publishing (6/19, Jacobs) reports that “as the West struggles with climate change, drought and rapid population growth,” the question “about the region’s deepening water woes often boils down to” whether to “build more dams and other infrastructure, or ramp up conservation.” The article provides two contrasting viewpoints from Daniel Beard, the commissioner of the Bureau of Reclamation in the Clinton administration, and Patricia Mulroy, the former general manager of the Southern Nevada Water Authority.

Federal Register Listings

Items was cleared for the FR on Tuesday.

REG0007019 FWS Endangered and Threatened Wildlife and Plants; Pima Pineapple Cactus Draft Recovery Plan. The cactus is listed as endangered under the Endangered Species Act of 1973, as amended. This plant species is currently found in southern Arizona and in northern Sonora, Mexico. Notice 06/19/2017.

REG0007080 FWS Endangered and Threatened Wildlife and Plants; Removing the Greater Yellowstone Ecosystem Population of Grizzly Bears from the Federal List of Endangered and Threatened Wildlife. The U.S. Fish and Wildlife Service is issuing a final rule to establish the Greater Yellowstone Ecosystem (GYE) grizzly bear as a Distinct Population Segment (DPS) and remove (delist) the GYE population of grizzly bears from the Federal List of Endangered and Threatened Wildlife under the ESA. Final Rule 06/19/2017.

REG0007106 FWS Establishment of a Nonessential Experimental Population of the Oregon Silverspot Butterfly in Northwestern Oregon. The Oregon silverspot butterfly is native to the coast of Oregon and northern California. The Service intends to reintroduce this species into

areas of suitable habitat within its historical range for the purpose of restoring populations to meet recovery goals. Final Rule 06/19/2017.

REG0006769 NPS Boundary Adjustment at Delaware Water Gap National Recreation Area. NPS is announcing the adjustment of the boundary of the Delaware Water Gap National Recreation Area to include three parcels of land (1,055.89 acres total) in Pike County, Pennsylvania. Fee simple interest in two parcels and a right-of-way over the third parcel will be donated to the United States. Notice 06/19/2017.
