[NPS Archeology Program Antiquities Act.htm](#)  
[Craters of the Moon Amendment PLAW-107publ213.pdf](#)  
[Executive Order Fact Sheet Reviewing Abuses of the Antiquities Act of 19....pdf](#)

Hi all, we have received another CRS request related to BLM-managed National Monuments. While I do not believe that we will have answers for most of the questions in this request, please note the following question:

*"Based on my research, the presidential monument expansion in 2000 contained in excess of 100,000 acres. Specifically, the 2000 proclamation expanded the monument by 661,287 acres, with approximately 410,000 managed by NPS, and approximately 251,000 managed by BLM. My further understanding is that P.L. 107-213 affected the 410,000 NPS acres only, renaming the area as the Craters of the Moon National Preserve and making other changes to the management of the lands. P.L. 107-213 did not affect the monument portion managed by BLM. Is this correct?"*

My general read of this question is that CRS is asking for the acreage of the BLM-managed portions of the monument and which Public Law or Proclamation required the BLM to manage those acres. Do you agree, and if so, could you please provide to me so we can send to 100 and the Department for review?

Thanks!  
Jamie

FYI: We just received the following urgent request from the Congressional Research Service for a variety of information related to Craters of the Moon National Monument's exclusion from the White House Fact Sheet accompanying E.O. 13792, *Review of Designations Under the Antiquities Act*.

While BLM Legislative Affairs cannot speak to the development of the White House Fact Sheet, staff will work with WO 400 to confirm the acreages that are managed by the BLM. We will check in with the front hallway prior to delivery. Please let me know if you have any questions.

Thank you,

Jamie, Thank you again for your help last Friday regarding the Cascade-Siskiyou National Monument. I have a question along the same lines, pertaining to the Craters of the Moon National Monument. I am hoping that BLM can respond to this question today as it is time sensitive. I am seeking information from NPS on this question too, but I think that it is better addressed by BLM.

The question is why the Craters of the Moon National Monument was excluded in the attached table in the Administration's Fact Sheet (see the third attachment). The Fact Sheet states that: "There are 24 DOI-managed national monuments that were designated within the past 21 years. (full list of reviewable monument designations attached)." It appears to list monument proclamations that exceed 100,000 acres. The Fact Sheet is a supplement to the Presidential Executive Order on the Review of Designations Under the Antiquities Act at this link:

<https://www.whitehouse.gov/the-press-office/2017/04/26/presidential-executive-order-review-designations-under-antiquities-act>

I would have expected Craters of the Moon to be on the list in the Fact Sheet. Does BLM know of any reason why Craters of the Moon was excluded? Based on my research, the presidential monument expansion in 2000 contained in excess of 100,000 acres. Specifically, the 2000 proclamation expanded the monument by 661,287 acres, with approximately 410,000 managed by NPS, and approximately 251,000 managed by BLM. My further understanding is that P.L. 107-213 affected the 410,000 NPS acres only, renaming the area as the Craters of the Moon National Preserve and making other changes to the management of the lands. P.L. 107-213 did not affect the monument portion managed by BLM. Is this correct?

Here is a link to the proclamation with the pertinent text copied:

<http://www.presidency.ucsb.edu/ws/?pid=62283>

Presidential Proclamation 7373 expanding the monument, November 9, 2000

“The Federal land and interests in land reserved consist of approximately 661,287 acres, which is the smallest area compatible with the proper care and management of the objects to be protected.”

“The Secretary of the Interior shall manage the area being added to the monument through the Bureau of Land Management and the National Park Service, pursuant to legal authorities, to implement the purposes of this proclamation. The National Park Service and the Bureau of Land Management shall manage the monument cooperatively and shall prepare an agreement to share, consistent with applicable laws, whatever resources are necessary to manage properly the monument; however, the National Park Service shall have primary management authority over the portion of the monument that includes the exposed lava flows, and shall manage the area under the same laws and regulations that apply to the current monument. The Bureau of Land Management shall have primary management authority over the remaining portion of the monument, as indicated on the map entitled, "Craters of the Moon National Monument Boundary Enlargement."

Here is the pertinent text of P.L. 107-213, “To redesignate certain lands within the Craters of the Moon National Monument, and for other purposes. The full text of the law is attached (see the first attachment).

*Be it enacted by the Senate and House of Representatives of  
the United States of America in Congress assembled,*

**SECTION 1. SPECIAL MANAGEMENT REQUIREMENTS FOR FEDERAL  
LANDS RECENTLY ADDED TO CRATERS OF THE MOON  
NATIONAL MONUMENT, IDAHO.**

(a) REDESIGNATION.—The approximately 410,000 acres of land added to the Craters of the Moon National Monument by Presidential Proclamation 7373 of November 9, 2000, and identified on the map accompanying the Proclamation for administration by

the National Park Service, shall, on and after the date of enactment of this Act, be known as the “Craters of the Moon National Preserve”.

Here is a relevant section of Senate Committee Report 107-181 on H.R. 601, enacted as P.L. 107-213

pp. 1-2

#### BACKGROUND AND NEED

.....

On November 9, 2000, President Clinton issued Presidential Proclamation 7373, which added 661,287 acres to the monument. The lands added to monument had previously been administered by the Bureau of Land Management (BLM). The proclamation directed that the National Park Service manage approximately twothirds of the lands added, or 410,000 acres. The BLM retained management authority over the remaining 251,000 acres.

.....

H.R. 601 would redesignate the 410,000 acres added to the monument under National Park Service management as a National Preserve where hunting would be authorized. The bill does not affect other portions of the monument.

Additionally, can BLM provide me with the contact information for the office/person who issued the list in the Fact Sheet? I have other questions about its content that I would like to resolve.

Thank you for any assistance that BLM can provide.

Best,

Carol Hardy Vincent

## FACT SHEET

### **Executive Order: Reviewing Abuses of the Antiquities Act of 1906**

#### **BACKGROUND**

- The Antiquities Act of 1906, (Pub. L. 59–209, 34 Stat. 225, 54 U.S.C. § 320301–320303), is an act of Congress, signed into law by Theodore Roosevelt on June 8, 1906. The Act grants the President the authority to designate as national monuments “historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest” on federal lands.
- Concerned about potential federal overreach, Congress limited monument designations to the “smallest area compatible with proper care and management of the objects to be protected.”
- The Act was first used in 1906 to designate Devils Tower National Monument on 1,193.9 acres in Wyoming. Since 1906, 16 Presidents have designated more than 185 monuments covering more than 747 million acres of land and marine areas.
- The President’s authority under the Act is subject to few procedural constraints. There is no requirement for public input before the designation of a monument. There is also no National Environmental Policy Act requirement.

#### **HISTORIC TRENDS**

- The average size of monuments has exploded in recent decades. When the Act was first used in the early 1900s, the average size of a national monument was a mere 422 acres. Now it is common for a monument to be more than a million acres.
- President Obama designated more areas of land and water than any previous President. Added up, Obama has established or expanded land use limits on more than 550 million acres (according to the Washington Post).
- The designations of the Grand Staircase-Escalante National Monument (GSENM) in 1996 and the Bears Ears National Monument (BENM) in 2016 represent the book-ends of modern Antiquities Act overreach.

#### **LOCAL CONCERN: Abuse of the Antiquities Act**

- Over the last ten years in particular, the Antiquities Act has been used to designate tens of millions of acres of land and marine areas, putting these areas “off limits” for traditional multiple-uses like farming, ranching, timber harvest, mining, oil and gas exploration, fishing, and motorized recreation.
- Designating too much land for a national monument harms the economies of communities near the affected land by eliminating grazing, timber harvesting, and mining opportunities.
- President Obama designated more areas of land and water (550 million acres) than any previous President. This was often done over the opposition of states, counties, and local officials.

**EXECUTIVE ORDER: Reviewing Abuses of the Antiquities Act of 1906**

The Antiquities Act of 1906 authorizes the president to declare federal lands of historic or scientific value to be “National Monuments” and thereby restrict the types of uses to which those lands can be put. Past administrations have overused this power and designated large swaths of land well beyond the areas in need of protection. The Antiquities Act Executive Order directs the Department of the Interior to review prior monument designations and suggest legislative changes or modifications to the monument proclamations.

- The Executive Order directs the Department of the Interior to review monuments designated using the Antiquities Act since January 1, 1996, that are in excess of 100,000 acres, or that were expanded without adequate public outreach and coordination with relevant stakeholders.
- There are 24 DOI-managed national monuments that were designated within the past 21 years. (full list of reviewable monument designations attached)
- What the Executive Order does:
  - Directs the Secretary of the Interior to conduct a review of monuments designated in the last 21 years that are more than 100,000 acres or that were designated with insufficient input from affected communities.
  - Directs the Secretary of the Interior to make recommendations to the President on whether a monument should be rescinded or resized.
  - Directs the Secretary of the Interior to consult and coordinate with, as appropriate, the Secretary of Defense, the Secretary of Agriculture, the Secretary of Commerce, the Secretary of Energy, the Secretary of Homeland Security, and the heads of any other executive departments or agencies concerned with areas designated under the Act.
  - Directs the Secretary of the Interior to consult and coordinate with the Governors of States affected by monument designations or other relevant officials of affected State, Tribal, and local governments.
  - Directs the Secretary of the Interior to provide an interim report to the President within 45 days of the date of the order.
  - Directs the Secretary of the Interior to provide a final report to the President within 120 days of the date of the order.
- What the Executive Order does not do:
  - It does NOT strip any monument of a designation.
  - It does NOT loosen any environmental or conservation regulations on any land or marine areas.

116 STAT. 1052

PUBLIC LAW 107-213—AUG. 21, 2002

Public Law 107-213  
107th Congress

An Act

Aug. 21, 2002  
[H.R. 601]

To redesignate certain lands within the Craters of the Moon National Monument,  
and for other purposes.

*Be it enacted by the Senate and House of Representatives of  
the United States of America in Congress assembled,*

16 USC 431 note,  
698w.

**SECTION 1. SPECIAL MANAGEMENT REQUIREMENTS FOR FEDERAL  
LANDS RECENTLY ADDED TO CRATERS OF THE MOON  
NATIONAL MONUMENT, IDAHO.**

(a) REDESIGNATION.—The approximately 410,000 acres of land added to the Craters of the Moon National Monument by Presidential Proclamation 7373 of November 9, 2000, and identified on the map accompanying the Proclamation for administration by the National Park Service, shall, on and after the date of enactment of this Act, be known as the “Craters of the Moon National Preserve”.

(b) ADMINISTRATION.—

(1) IN GENERAL.—Except as provided by paragraph (2), the Craters of the Moon National Preserve shall be administered in accordance with—

(A) Presidential Proclamation 7373 of November 9, 2000;

(B) the Act of June 8, 1906, (commonly referred to as the “Antiquities Act”; 34 Stat. 225; 16 U.S.C. 431); and

(C) the laws generally applicable to units of the National Park System, including the Act entitled “An Act to establish a National Park Service, and for other purposes”, approved August 25, 1916 (16 U.S.C. 1 et seq.).

(2) HUNTING.—The Secretary of the Interior shall permit hunting on lands within the Craters of the Moon National Preserve in accordance with the applicable laws of the United States and the State of Idaho. The Secretary, in consultation with the State of Idaho, may designate zones where, and establish periods when, no hunting may be permitted for reasons of public safety, protection of the area’s resources, administration, or public use and enjoyment. Except in emergencies, any regulations prescribing such restrictions relating to hunting shall be put into effect only after consultation with the State of Idaho.

Approved August 21, 2002.

**LEGISLATIVE HISTORY—H.R. 601:**

HOUSE REPORTS: No. 107 34 (Comm. on Resources).

SENATE REPORTS: No. 107 181 (Comm. on Energy and Natural Resources).

**CONGRESSIONAL RECORD:**

Vol. 147 (2001): May 1, considered and passed House.

Vol. 148 (2002): Aug. 1, considered and passed Senate.
