Today's report

MEMORANDUM FOR THE WHITE HOUSE STAFF SECRETARY AND CABINET SECRETARY
June 13, 2017

FROM: Scott Hommel, Chief of Staff, U.S. Department of the Interior

SUBJECT: Interior Department Weekly Update for the Week of June 12, 2017

DOI 30-Day Policy Look Ahead

Presidential Initiatives and Awareness

1. **SAGE GROUSE:** Last week, the Secretary announced via Secretarial Order a multi-faceted strategy on sage grouse that includes partnership with the eleven affected western states, a review of 2015 land use plans to identify provisions that require modification or recession, and an analysis of the efficacy of target populations on a state-by-state basis. An interagency review team was established by the review, which is required to report back within 60 days of the signing of the order on a path forward.
Timing: August 2017
Contact: Kathy Benedetto, Bureau of Land Management
2. **MONUMENT REVIEW:** The Secretary submitted the interim report to the President required by Executive Order 13792 entitled “Review of Designations under the Antiquities Act” containing recommendations on the Bears Ears National Monument (BENM) due on June 10. The Secretary is traveling to the Katahdin Woods National Monument in Maine this week as well as Boston to visit with Fisherman on the Northeast Canyons and Seamounts National Monument on Friday.
Timing: June 10-August 24 (conclusion of review).
Contact: Downey Magallanes, Acting Deputy Chief of Staff
3. **WESTERN GOVERNORS ASSOCIATION:** This event would be a great opportunity to showcase the President’s America-First Energy Policy and the impact it will have on western states and rural communities. If the President cannot attend, we are requesting that the Secretary attend as his representative. Western Governors have approx. 90% of public lands that would be part of future energy opportunities. Energy Week is the last week of June. We submitted a proposal for the President’s participation in an event in Whitefish, MT during the Western Governors’ Association annual meeting to highlight onshore energy production, which plays an integral role in domestic energy production and is a major economic driver for rural communities throughout the West. **Timing:** June 27

4. **NEW FIVE-YEAR OFFSHORE ENERGY PROGRAM.** In response to President Trump’s Executive Order on Offshore Energy, Secretary Zinke will announce a request for information for a new five-year offshore program that considers opening new areas of the Outer Continental Shelf for offshore exploration. Since the Administration took office, Bureau of Labor Statistics reporting shows that the number of workers in oil and gas extraction has steadily risen as Administration policies and rebounding of energy prices has driven employment higher. This is

potentially a significant announcement that could highlight the President's vision for American Energy production.

Timing: Target Last Week of June 2017

5. **USGS CRITICAL MINERALS:** USGS will release a new report presenting resource and geologic information for 23 critical mineral commodities important to our national economy and national security, many of which are sourced entirely outside of the United States. This is the first update since the last assessment undertaken in 1973. The report provides an in-depth look at each commodity's use, distribution of deposit types, and status of production, resources, and reserves. The Department will be developing a rollout event likely in July that will potentially be pitched for White House participation.

Timing: July 2017

6. **NAVAJO GENERATING STATION.** The Department is working to facilitate a path forward to maintain operation of the Navajo Generating Station, which provides baseload electricity for much of the Southwest and directly supports more than 800 local jobs. The Department's Bureau of Reclamation is a part owner of the power generated by the plant and thus the Administration have a role in the ultimate decision associated with the plant. Interior has hosted a series of public listening sessions and meetings on this issue. The current focus is extending the expiring lease between the main operator, Salt River Project, and the Navajo Nation which owns the land. After facilitation by Interior, an agreement in principle was reached on a two-year extension of the lease for the operating life of the power plant through 2019. It should be signed in July. Interior is helping to identify a possible future owner to keep the plant generating power indefinitely.

Timing: July 2017

7. **CALIFORNIA WATER FIX RECORD OF DECISION.** The Bureau of Reclamation, U.S. Fish and Wildlife Service, and the Department of Commerce's National Marine Fisheries Service are working with the State of California to achieve federal and state environmental compliance on the \$15 billion California Water Fix water infrastructure project. The project would construct tunnels to divert water from the Sacramento River to provide water supplies to California residents, businesses and farmers. The federal and state environmental reviews are expected to be completed about June 9, and Interior will be asked to sign off on the associated federal Record of Decision about June 23.
