Mark and Kerry,

After coordinating with Jeff Krauss and the folks in Utah, I've uploaded the latest comms materials for both of these notices into DTS. They are also attached below.

Thanks,
Charles

Internal Working Document

Notice of Intent to Prepare Resource Management Plans for the Grand Staircase-Escalante National Monument-Grand Staircase, Kaiparowits, and Escalante Canyon Units and Federal Lands previously included in the Monument that are excluded from the Boundaries and Associated Environmental Impact Statement

Communication Plan

January 2018

INTRODUCTION

The Bureau of Land Management's (BLM) Grand Staircase Escalante National Monument (GSENM) and Kanab Field Office (KFO) are publishing a Notice of Intent (NOI) that the BLM GSENM and Kanab Field Office, Kanab, Utah, intend to prepare four Resource Management Plans (RMPs) and one associated Environmental Impact Statement (EIS) for the GSENM Grand Staircase, Kaiparowits, and Escalante Canyon Units, and Federal lands previously included in the Monument that were excluded from the GSENM boundaries by Proclamation 6920. These lands are located in Garfield and Kane Counties, Utah.

These RMPs are necessary to implement Presidential Proclamation 6920, which established the monument, and Presidential Proclamation 9682, which modified the boundaries of GSENM and clarified and modified certain management provisions in Proclamation 6920 for lands within the monument.

BACKGROUND

The GSENM was originally established by Proclamation 6920 of September 18, 1996. The planning area encompasses approximately 1.9 million acres of Federal land, including lands originally designated under Proclamation 6920 and subsequent boundary adjustments through land exchanges. On December 4, 2017, President Trump issued Proclamation 9682 modifying the GSENM. The modified boundaries of the GSENM exclude from designation and reservation approximately 861,974 acres of land. Lands that remain part of the GSENM are included in three units, known as the Grand Staircase (209,993 acres), Kaiparowits (551,034 acres), and Escalante Canyons (242,836 acres) units. The preparation of RMPs for each of the three units in the GSENM is required by Proclamation 9682.

Preliminary issues identified for analysis include paleontology, geology, cultural and historic resources, travel management, livestock grazing, and vegetation and fire management, outdoor recreation, wildlife, and other resources.

Preliminary planning criteria include:

- 1) The public planning process for the RMPs will be guided by Presidential Proclamation 6920 as modified by Proclamation 9682, in addition to FLPMA and NEPA.
- 2) Those Federal lands excluded from the monument boundaries will remain in Federal ownership and will be managed by the BLM under applicable laws.
- 3) The BLM will use current scientific information, and results of inventory, monitoring, and coordination to determine appropriate management.

Deleted: ,

Internal Working Document

4) The BLM will strive for consistency of management decisions with other adjoining planning jurisdictions, both Federal and non Federal.

5) Decisions made in the planning process will only apply to Federal lands and, where appropriate, to split estate lands where the subsurface mineral estate is managed by the BLM.

6) Existing Wilderness Study Areas (WSAs) will continue to be managed to prevent impairment and ensure continued suitability for designation as wilderness. Should Congress release all or part of a WSA from wilderness study, resource management will be determined by preparing an amendment to the RMPs.

7) A baseline reasonably foreseeable development scenario will be developed for oil and gas and other mineral resources for Federal lands previously included in the GSENM that are now excluded from the monument boundaries.

8) The BLM will consider changes to off highway vehicle (OHV) area designations.

9) The public may nominate or recommend areas on public lands that are excluded from the modified monument boundaries as potentially new special management areas as part of this planning process (BLM Manual 1613.3.31).

10) Parties interested in leasing and development of Federal coal in areas that are excluded from the monument should provide coal resource data for their area(s) of interest. Specifically, information is requested on surface resource values related to the 20 coal unsuitability criteria described at 43 CFR part 3461. This information will be used for any necessary updating of coal screening determinations (43 CFR 3420.1 4) and in the environmental analysis, completion of which would be necessary before any proposal to lease or develop Federal coal in such areas.

(b)(5) DPP

KEY MESSAGES

1. Public participation is key to sound decision making. Public involvement will be welcomed in future land use planning and NEPA analyses as the agencies implement Presidential Proclamation 6920 as modified by the Proclamation 9682. The BLM appreciates the time and effort people take in providing comments, as inclusion is vital to managing sustainable, working public lands.
2. The existing GSENM Management Plan remains in effect until new plans are developed. Pending the RMP planning process and implementation level travel and transportation management planning, actions taken by BLM in the Grand Staircase, Kaiparowits, and Escalante Canyons Units, as well as the Federal lands excluded from the GSENM by Proclamation 9682 will continue to conform to the 1999 Monument Management Plan until such plan is modified through this or another planning process.
3. The new land use plans will provide clarity for the public and permittees on how they can enjoy and use public lands within the monument. A land use plan will also clearly describe how public lands outside the monument will be managed, according to other relevant laws and resource considerations.
4. Any public lands outside of the revised monument boundaries will remain in the stewardship of BLM. BLM lands and will be managed according to all relevant laws including but not limited to the Federal Land Policy and Management Act, Paleontological

Internal Working Document

Resources Preservation Act, the Archaeological Resources Protection Act, the National Historic Preservation Act, and Native American Graves Protection and Repatriation Act.

TALKING POINTS

- Proclamation 9682 modifies the boundaries and management of the GSENM to the smallest area compatible with the protection of important objects of historic or scientific significance.
- The scoping period will be open for 60 days or until 15 days after the last scheduled public meeting, whichever is later. The date(s) and location(s) of any scoping meetings will be announced at least 15 days in advance through local media, newspapers and the BLM website at: <https://www.blm.gov/utah>. In order to be considered in the Draft EIS, all comments must be received prior to the close of the 60 day scoping period or 15 days after the last public meeting, whichever is later.
- The BLM encourages public participation in the planning process. BLM will incorporate comments received during public scoping and work cooperatively with other Federal, State, Tribal, and local governments to formulate an appropriate range of alternatives.
- The Trump Administration is ensuring public lands are for public use and enjoyment by increasing access and availability.
- In a continuing effort to Make America Safe through Energy Independence, the Trump Administration also prioritizes the completion of this new planning effort to maximize appropriate lands outside of the national monument boundaries as available for energy and minerals development. The coal reserves on the Kaiparowits Plateau offer economic opportunities for local communities, and the Administration supports development of American coal resources, where feasible and appropriate. A Coal Suitability Study for lands excluded from the monument will be completed in advance of the land use planning effort.
- We will provide additional opportunities for public participation upon publication of the Draft EIS.

COMMUNICATION GOALS

- Ensure the public is notified of the intent to develop four new land use plans and an associated EIS;
- Encourage public participation in the land use planning process;
- Educate external stakeholders and media representatives about land use plan goals and processes;
- Ensure the public is aware of how they can participate in the process and submit comments regarding the land use plans;
- Ensure BLM Utah is prepared to respond to media inquiries with one voice and a consistent message.

Internal Working Document

COMMUNICATION TACTICS

- Publish NOI in *Federal Register*.
- Post any relevant documents on BLM's NEPA Register (ePlanning) with instructions on how to provide comments.
- Promote information about the scoping period using various methods, such as: news releases, informational fliers, website postings, and public mailings.
- Contact, meet and/or conference with target audiences identified during the plan amendment process. See "Target Audiences" section.
- Share messages on social media.
- Mail public notification letter to stakeholders and interested individuals on project mailing list developed and updated during the Grand Staircase Escalante National Monument Management Plan Amendment for Livestock Grazing process.

SOCIAL MEDIA

The goal for social media will be to make people aware of opportunities to provide comments and attend scoping meetings. The social media manager will develop a series of tweets to highlight upcoming milestones in the planning process.

QUESTIONS AND ANSWERS

Why is the BLM conducting land use planning?

Proclamation 9682 directs BLM to prepare and maintain a management plan for each of the 3 units of the monument, with maximum public involvement.

How do I comment on the Notice of Intent?

The BLM will schedule multiple public scoping meetings. Written comments will be accepted at all public scoping meetings and for 60 days after publication of the NOI or until 15 days after the last scheduled public meeting, whichever is later. Individuals are encouraged to submit comments electronically through the BLM's e planning page at: <https://goo.gl/EHvhbc>.

TARGET AUDIENCES:

Outreach will continue with the following stakeholders, who were identified during the GSENM Livestock Grazing Plan Amendment/EIS process. Specific contacts are provided in the following tables. Primary contacts include:

Internal Working Document

- Congressional officials
- State Agencies: Governor, Public Land Policy Coordination Office
- Local government agencies: Garfield and Kane counties
- Other federal agencies: National Park Service, US Fish and Wildlife Service, etc.
- Tribes: Hopi, Zuni, Navajo, Kaibab Paiute, Paiute Tribes of Utah, San Juan Paiute, and Ute.
- Local communities (Kanab, Escalante, Big Water, Cannonville, Boulder, Glendale)
- Recreationists (backpacking, hiking, mountain biking, rock art/archaeology/paleontology groups, OHV users)
- Special interest groups/Nonprofit organizations: Grand Staircase Escalante Partners, Glen Canyon Natural History Association, Southern Utah Wilderness Alliance, The Grand Canyon Trust, Great Old Broads for Wilderness, all plaintiffs in filed suits, etc.
- Industry energy, grazing, mining
- Local law enforcement agencies
- Cultural resources preservation organizations
- Private landowners adjacent to or near planning area boundaries
- GSENM Monument Advisory Council
- General media for Salt Lake City and Kanab/Escalante area
- General public (via project mailing list)
