News Release

Utah State Office

FOR IMMEDIATE RELEASE:
Jan XX, 2018

Media Contact: Michael Richardson
(801) 539 4020

BLM seeks public participation to develop land use plans for Bears Ears National Monument.

SALT LAKE CITY The Bureau of Land Management Utah State Office is seeking public input in advance of preparing land use plans for Bears Ears National Monument. These planning efforts are an opportunity to enhance our relationships with the State of Utah and local communities and to fulfill our trust responsibilities to tribal communities. BLM will efficiently develop these plans to protect objects of historic and scientific interest, consistent with the Presidential Proclamation.

The publication of the *Notice of Intent to Prepare Monument Management Plans for the Bears Ears National Monument Indian Creek and Shash Jaa Units and associated Environmental Impact Statement* in the Federal Register today initiated the public scoping period for the land use planning process. BLM welcomes comments for at least 60 days, or for 15 days after the last scheduled public scoping meeting, whichever is later.

The new land use plans will provide clarity to the public on how they can enjoy the new national monument. With State, local, and public participation the agency will develop alternatives for the land use plan. The public is encouraged to identify issues, management questions, or concerns that should be addressed in this process. Future public scoping meetings will also provide an opportunity to speak with resource specialists and deliver written comments in person.

The date(s) and location(s) of any scoping meetings will be announced at least 15 days in advance through local media, newspapers and the BLM website at: <https://www.blm.gov/utah>. The agency will provide additional opportunities for public participation upon publication of the Draft EIS.

Comments may be submitted by using any of the following methods:

- Email: EMAIL@blm.gov
- ePlanning: L
- Mail: 365 North Main P.O. Box 7 Monticello, UT 84535

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment including your personal identifying information may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. BLM will not consider anonymous comments. All submissions from organizations and businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be available for public inspection in their entirety.

Commented [GAL4]: Waiting for confirmation from Lisa on which address to use. Both are listed on the website and in the current NOI and mail is accepted at both addresses... but they are two separate addresses.

For further information concerning the land use planning process, please contact Lance Porter, District Manager at (435) 259-2100. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1-800-877-8339 to contact the above individual during normal business hours. The FRS is available 24 hours a day, seven days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

The BLM manages more than 245 million acres of public land located primarily in 12 Western states, including Alaska. The BLM also administers 700 million acres of sub-surface mineral estate throughout the nation. The agency's mission is to sustain the health, diversity, and productivity of America's public lands for the use and enjoyment of present and future generations. Diverse activities authorized on these lands generated \$75 billion in sales of goods and services throughout the American economy in fiscal year 2016 more than any other agency in the Department of the Interior. These activities supported more than 372,000 jobs.

Internal Working Document

Notice of Intent to Prepare Resource Management Plans for the Bears Ears National Monument Indian Creek Unit, Shash Jaa Unit and Associated Environmental Impact Statement

Communication Plan

December 2017

INTRODUCTION

The Bureau of Land Management's (BLM) Canyon Country District Office, Moab, Utah, and Manti La-Sal National Forest, Price, Utah, intend to prepare Resource Management Plans (RMPs) for the Bears Ears National Monument (BENM) Indian Creek and Shash Jaa Units. The BLM and United States Forest Service (USFS) will prepare a single Environmental Impact Statement (EIS) to satisfy the NEPA requirements for these RMPs. The BLM will serve as the lead agency for this planning process. By this notice, the BLM Canyon Country District is announcing the beginning of the scoping process to solicit public comments and identify issues to be addressed in the RMPs and EIS. The RMPs will replace portions of the existing Monticello Field Office Record of Decision and Approved RMP, as amended, and portions of the Manti- La Sal National Forest Plan. These land use plans will encompass BLM and USFS lands in San Juan County, Utah, within the modified boundaries of the BENM.

The new RMPs are necessary to implement Presidential Proclamation 9558, which established the BENM, and Presidential Proclamation 9681, which modified the boundaries of BENM and amended certain management provisions in Proclamation 9558 for lands within the monument.

BACKGROUND

The BENM was established by Proclamation 9558 of December 28, 2016. The original designation encompassed 1.35 million acres of Federal land. On December 4, 2017, President Trump issued Proclamation 9681 modifying the boundaries of the BENM. The modified boundaries exclude from designation and reservation approximately 1.15 million acres of land. Lands that remain part of the BENM are included in two units, known as the Indian Creek (71,896 acres of BLM land), and Shash Jaa (97,393 acres of BLM land and 32,587 acres of National Forest System Lands) units of the monument.

Preliminary issues identified for analysis in the RMPs include cultural and historic resources, including protection of Indian sacred sites and traditional cultural properties; paleontological resources; travel management; livestock grazing; wildlife; vegetation and fire management; outdoor recreation.

Preliminary planning criteria for the BENM include:

- 1) The public planning process for the RMPs will be guided by Proclamation 9558 as modified by Proclamation 9681, in addition to FLPMA and NEPA.
- 2) The BLM and USFS will use current scientific information, research, technologies, and results of inventory, monitoring, and coordination to determine appropriate management.
- 3) The BLM and USFS will use current scientific information, and results of inventory, monitoring, and coordination to determine appropriate management.

Commented [1]: Check font for consistency throughout

Commented [2]: FS calls them LRMPs so you may want to change to a more generic "Land Use Plans"

Commented [3]: Need to make sure this reflects USFS feedback on the process once BLM understands how USFS wants to engage

Commented [CJ4]: I think it may be worth clarifying up front that there will be two BLM RMPs and one FS (LRMPs for a total of 3 plans, or whatever the nomenclature turns out to be.

Commented [5]: Should we just say "amended"?

Commented [AT6]: Cannot change this section until we get forest service input.

Deleted: : and visual resource management

Internal Working Document

4) The BLM and USFS will strive for consistency of management decisions with other adjoining planning jurisdictions, both Federal and non Federal.

5) Decisions made in the planning process will only apply to BLM Lands, National Forest System Lands, and, where appropriate, split estate lands where the subsurface mineral estate is managed by the BLM.

6) Existing Wilderness Study Areas (WSAs) will continue to be managed to prevent impairment and ensure continued suitability for designation as wilderness. Should Congress release all or part of a WSA from wilderness study, resource management will be determined by preparing an amendment to the RMPs.

7) The BLM will consider changes to the off highway vehicle (OHV) area designations (open, closed, limited) approved through the Monticello Field Office Record of Decision and Approved RMP. Implementation level travel and transportation management planning (route designations) will be deferred until after the RMP is completed.

8) As required by the Proclamation, the BLM and USFS will meaningfully engage with the Shash Jáa Commission and will carefully and fully consider integrating the traditional and historical knowledge and special expertise of the Commission into the planning decisions for the Shash Jáa Unit. The BLM and USFS will also work with the Commission to identify parameters for continued meaningful engagement that will be set forth in the management plan.

KEY MESSAGES

1. Public input is key to sound decision making. Public involvement will be welcomed in land use planning and NEPA analyses as the agencies implement the modified proclamation. BLM appreciates the time and effort people take in providing comments, as inclusion is vital to managing sustainable, working public lands.
2. Existing management plans remain in effect until new plans are adopted. The new land use plans will provide clarity for the public and permittees on how they can enjoy and use public lands within the monument.
3. Any federal lands outside of the revised monument boundaries will remain in the stewardship of BLM and USFS. The BLM and USFS lands will be managed according to all relevant laws including but not limited to the Federal Land Policy and Management Act, National Forest Management Act, Wilderness Act, Paleontological Resources Preservation Act, the Archaeological Resources Protection Act, the National Historic Preservation Act, and Native American Graves Protection and Repatriation Act.

TALKING POINTS

- Proclamation 9681 modified the boundaries of BENM to comprise the smallest area compatible with the protection of important objects of historic or scientific interest. The scoping period will be open for 60 days or until 15 days after the last scheduled public meeting, whichever is later. The date(s) and location(s) of any scoping meetings will be announced at least 15 days in advance through local media, newspapers and the BLM website at: <https://www.blm.gov/utah>. In order to be considered in the Draft EIS, all

Internal Working Document

comments must be received prior to the close of the 60 day scoping period or 15 days after the last public meeting, whichever is later.

- The BLM and USFS encourage public participation in the planning process. The BLM and USFS will consider all comments received during public scoping and work cooperatively with other Federal, State, Tribal, and local governments to formulate an appropriate range of alternatives.
- The Trump Administration is ensuring that the monument and is protected and preserved consistent with intent of the proclamation and the Antiquities Act.
- We will provide additional opportunities for public participation upon publication of the Draft EIS.

COMMUNICATION GOALS

- Ensure the public is notified of the intent to develop new land use plans and an associated EIS;
- Encourage public participation in the land use planning process;
- Educate external stakeholders and media representatives about land use plan goals and processes;
- Ensure the public is aware of how they can participate in the process and submit comments regarding the land use plans;
- Ensure BLM Utah and USFS Region 4 are prepared to respond to media inquiries with one voice and a consistent message.

COMMUNICATION TACTICS

- Publish NOI in *Federal Register*.
- Post any relevant documents on BLM's NEPA Register (ePlanning) with instructions on how to provide comments.
- Promote information about the scoping period using various methods, such as: news releases, website postings, and public mailings.
- Contact, meet and/or conference with target audiences identified during the plan amendment process. See "Target Audiences" section.
- Share messages on social media.

SOCIAL MEDIA

The goal for social media will be to make people aware of opportunities to provide comments and attend scoping meetings. The social media manager will develop a series of tweets to highlight upcoming milestones in the planning process.

Internal Working Document

QUESTIONS AND ANSWERS

Why is the BLM conducting land use planning?

The presidential proclamations establishing Bears Ears National Monument require BLM and USFS to prepare a management plan.

How will the BLM and USFS complete the planning process for the Indian Creek and Shash Jaa units of Bears Ears National Monument?

The BLM and USFS will prepare three plans for the BENM. One EIS will be prepared in association with this planning process.

The Shash Jaa unit is co managed by the BLM and USFS. At the completion of the planning process each agency will prepare a decision adopting a land use plan [?] for lands within their respective jurisdictions. The Indian Creek Unit is solely managed by the BLM. The BLM will prepare a separate plan for this unit because it is geographically separate from the Shash Jaa Unit and may involve some discrete issues.

How do I provide scoping comments?

The BLM will schedule multiple public scoping meetings. Written comments will be accepted at all public scoping meetings and until the close of the 60 day scoping period or 15 days after the last scheduled meeting, whichever is later. Individuals are encouraged to submit comments electronically through the BLM's e planning page. INSERT MAILING/ePLANNING INFO.

What are the major differences between the previous BENM boundary established in 2016 and the revised monument boundary established in 2017?

PLACEHOLDER: Insert key acreage differences, a comparison map, note geographic areas affected by revision, discuss the inclusion of key areas with "objects" (paleo/archy/etc.) and also note areas with other non monument protections that are outside of the new boundary.

INTERIM MANAGEMENT Q&As

How will leasable mineral resources be managed within both the original and modified boundaries of BENM?

All lands in the modified BENM will remain closed to mineral leasing. Lands that excluded from the monument are managed according to the Monticello RMP, as amended, and the Manti La Sal National Forest Plan.

How many oil and gas leases are there within the modified Bears Ears monument boundaries? What steps need to occur before drilling could occur in the area?

There are no existing oil and gas leases in the modified BENM. There are 23 federal oil and gas leases (26,696 acres) that are partially or wholly contained in areas that are now excluded from the monument. The BLM has not received any applications for permits to drill (APD) on these leases.

In order for drilling to occur on federal leases, a company must submit an APD and the BLM would consider whether to approve the application if has met all requirements of the National

Commented [AT7]: Waiting for USFS decision.

Commented [8]: Two RMPs and an LRMP? Or three LUPs?

Commented [9]: Needs to be updated once USFS provides guidance on their intended involvement in the process. Most likely, two RMPs, one Forest Management Plan

Deleted: RMPs

Commented [10]: The USFS manages the 46,353 acre Dark Canyon Wilderness pursuant to the enabling legislation – the Utah Wilderness Act of 1984 - and the 1964 Wilderness Act, as amended.

BLM manages 11 WSAs in the region in a manner so as not to impair the suitability of such areas for preservation as wilderness, pursuant to FLPMA Sections 202 and 603.

Four areas (Dark Canyon, Mancos Mesa, Nokai Dome East and Grand Gulch) were carried forward in the 2008 Monticello Approved RMP for protection of their wilderness characteristics. All of the areas are managed as avoidance areas for rights-of-way (ROW). Mancos Mesa, Nokai Dome East and Grand Gulch are unavailable for oil and gas leasing. Dark Canyon is available subject to a no surface occupancy stipulation that cannot be waived, excepted or modified.

All of Indian Creek, Lavendar Mesa, Shay Canyon and Valley of the Gods Areas of Critical Environmental Concern (ACEC) and a portion of the San Juan River ACEC were designated in the 2008 RMP. Valley of the Gods ACEC is a ROW exclusion area and closed to mineral leasing; Indian Creek, Shay Canyon, Lavender Mesa and San Juan River ACEC are ROW avoidance and subject to No Surface Occupancy. USFS manages the 266 acre Cliff Dwellers Pasture Research Natural Area (RNA).

All of Beef Basin, Cedar Mesa, Dark Canyon, Tank Bench and White Canyon, the majority of Indian Creek, and portions of the San Juan River SRMAs were designated in the 2008 RMP for provision of recreation opportunities.

Internal Working Document

Environmental Policy Act (NEPA), National Historic Preservation Act (NHPA), Endangered Species Act (ESA), and other applicable laws. Alternatively, development outside of any existing leases would require 1) nomination of a lease parcel; 2) a separate environmental review of the nominated lease parcel; 3) purchase of the lease at auction; and 4) submission of an APD within the new lease, and agency approval.

How will BLM manage locatable mineral resources within both the original and modified boundaries of BENM?

All lands within the modified BENM boundaries will remain closed to locatable mineral location and entry. Federal lands that are excluded from the modified national monument and are not otherwise closed to such location by other withdrawals are available for mineral location at 9:00 a.m. EST on February 2, 2018. Claimants can file mining claims for locatable minerals governed by the Mining Law of 1872 (e.g., silver, gold, copper, uranium, etc.) at that time. For more information on mining claims, visit: https://www.blm.gov/sites/blm.gov/files/documents/files/PublicRoom_Mining_Claims_Brochure_2016.pdf.

Commented [SOL-JFH11]: Are there overlapping withdrawals in the Monticello PA?

Commented [AT12R11]: Yes. However it would be difficult to map these areas.

When will energy companies be able to nominate parcels within lands now excluded from monument boundaries for inclusion in lease sales?

While companies can nominate parcels at any time, BLM will not be able to begin processing nominations for lands excluded from the BENM until February 2, 2018, 60 days after the signing of the proclamation. Any lease nominations will follow the agency's standard process for consideration and will be analyzed, including through the NEPA process.

How do changes in the BENM boundary affect travel management or route designations?

The modified monument designation has no immediate effect on public motorized access within the BENM or on lands excluded from the monument boundaries. The existing Monticello Field Office Travel Management Plan will remain in effect until new implementation level travel management plans are completed. Implementation level travel plans will be developed following completion of the RMPs.

Commented [AT13]: Need to add forest service. Depending on decisions that are made.

How do changes in the BENM boundary affect livestock grazing management?

No immediate changes will occur to livestock grazing management on lands included in the modified BENM or excluded from the monument boundaries. Grazing continues to be authorized with the goal of maintaining healthy land conditions. Livestock grazing will continue to be managed under existing laws, regulations, and policies followed by the BLM and USFS.

Will American Indian tribes have access to the area for ceremonial and other traditional uses?

Yes. Tribes will continue to be able to collect plants and other traditional materials for noncommercial uses inside and outside of the modified BENM. American Indians who are collecting products on BLM administered lands for ceremonial or other traditional uses can obtain a free use permit from the BLM Monticello Field Office, 365 North Main Street, Monticello, UT 84535 (435) 587 1500.

Internal Working Document

How do changes in the BENM boundary affect firewood collection?

The modified monument proclamation has no immediate effect on firewood collection. BLM will continue to issue permits based on the availability of woodland products and protection of other resource values. The existing Monticello Field Office Resource Management Plan identifies areas that are open for firewood collection. In some areas, commercial and private collection of firewood is not allowed please check with the BLM Monticello Field Office, 365 North Main Street, Monticello, UT 84535 (435) 587 1500.

Can I hunt and fish within the national monument?

Hunting will continue to be managed by the State of Utah under the same regulations as before the original designation. There are no fish bearing streams within BENM.

Do I need camping permits or climbing permits to access the monument?

All commercial guiding and activities on any BLM administered lands require a permit under BLM’s special recreation permit program.

Under current management, no permits are required for car camping on BLM administered lands, unless there are more than 15 vehicles or more than 50 people. Backcountry camping permits are required for many of the Cedar Mesa canyons. No permits are required for rock climbing. Permit requirements may be analyzed during the new land use planning process.
