If by any chance we need to release anything on the status of the review, the attached draft report has been commented on by the review team, including Aaron and company in SOL. As I believe I mentioned previously, it is designed to be routine and not to reveal anything beyond what has actually been done or will clearly be done (i.e. working with NOAA). The Bears Ears economic report is awaiting one item from the Forest Service.

I have the press release and FR notice, listed as attachments to the status report, as word documents, so once the economic report is finished, I can update the number of comment received and send everything in a minute or so. As of now, we have received 149, 669 comments on [regs.gov](https://www.regulations.gov), including the Bears Ears ones, and approximately 17,000 mailed in comments, 9,000 of which were in a petition.
