In your earlier report NMFS cited an 8 -year total revenue from the monument area of \$12 million. However, in yesterday's comments, nothing was said about this apparently conflicting sentence -

Available data show that, between 2006 and 2013, the 42 vessels fishing in the Monument area reported 1001 sets occurring on 280 individual trips; that this area contains approximately 1.4% of the total U.S. Atlantic pelagic longline activity for this period, or about \$12 million average annual revenue.

Is the correct number \$12 million cumulatively or annually? Just hoping to avoid correction later, not that this is a substantial issue of itself.
