Subject: Fwd: National Monument Closures Data CRS Request - Invitation to edit

To: Molly Brown <mmbrown@blm.gov>, Christopher Heppe <cheppe@blm.gov>, Amanda James <ajames@blm.gov>, Winfred Wong <wwong@blm.gov>, Benjamin Blom <bblom@blm.gov>, Gabriel Garcia <grgarcia@blm.gov>, "Brooke, Rebecca (Becca)" <rbrooke@blm.gov>, Douglas Herrema <dherrema@blm.gov>, "Wood, Vicki" <vwood@blm.gov>

Cc: "Ann (Este) Stifel" <astifel@blm.gov>, Alan Bittner <abittner@blm.gov>, Beth Ransel <bransel@blm.gov>

Molly, Chris, Amanda, Fred, Ben, Gabe, Becca, Doug and Vicki,

As your aware the President signed an Executive Order (EO: https://www.whitehouse.gov/the_press_office/2017/04/26/presidential_executive_order_review_designations_under_antiquities_act) yesterday that requires a review of the National Monuments established since 1996. This EO has generated a data call concerning recreational hunting/fishing programs, motorized recreation and access.

I have filled in the spreadsheet includes:

- The 1000 off shore rock and island acres are closed to: Recreational Hunting, Recreational Shooting, and Motorized Recreation.
- There are no closures for on the CCNM mainland units due to us being in the development stages of planning, but there may be some limitations.

The following is the comments provided:

There have been no BLM supplementary rules or closure orders issued following the three presidential proclamations establishing and expanding the CCNM. On the 1000 acres of small (<11 acre) off-shore rocks and islands (managed in cooperation with the State of CA Dept. of F&W/State Parks) there are no roads or recreational hunting/shooting or motorized recreation opportunities as they are surrounded by water at mean high tide and provide habitat for sensitive non-game species (e.g., breeding seabirds, marine mammals), so in essence they are closed to these uses. On the mainland units, we are in the process of resource management plan development and will be conducting travel management and public use opportunity planning in the future. The mainland units were in many cases acquired from land

trusts or other federal agencies (e.g, US Coast Guard) and have deed restrictions that provide sideboards concerning some uses. In addition, some mainland units are physically too small or managed with others that would preclude some of these uses.

I've provided you this information in case you can not access the google spreadsheet that is linked in the below email.

Please note that Tim Fisher's request asks for the information by 3 pm Eastern on Thursday April 20th, but I'm sure he meant to say Thursday April 27th. If you or your staff could provide me by 11:00 this morning with changes or concerns that need to better recognize the field office's numbers it would be appreciated. If you or your staff have questions please let me know.

Thanks,

David

Fisher, Timothy

3:40 PM (17 hours ago).

I just received an extremely urgent request for information from the Congressional Research Service (CRS). I am sorry for the short turn around but BLM 410 has created a fillable table to hopefully make this a quick process. Unfortunately our deadline is **Thursday 3:00 Eastern April 20, 2017.**

Rachel Wootton will be forwarding a Google Spreadsheet momentarily. Sorry for the rush.

If a certain National Monuments do not have this information readily available I understand; but the more information BLM can provide the better. This deadline can not be extended so I appreciate you being able to do the best you can in the short time frame given.

CRS would like the total acreage of areas within BLM-managed National Monuments designated under the Antiquities Act that are closed to each of these five activities/uses:

1. Recreational hunting
2. Recreational shooting
3. Recreational fishing
4. Motorized recreation
5. Public access

Again the spreadsheet should be self explanatory.

For each of the five activities, CRS is interested in the total acreage closed, and the subset of that acreage that is closed for weather-related emergencies only.

I appreciate you all working collaboratively and please give me or Rachel a call if you have any issues with the link.

Thanks

Fisher, Timothy

8:10 AM (39 minutes ago).

Even though closures may predate the Monuments we will still need this information. Predated closures is great information and please let Rachel and I know in an email. We will add to the comments section of closures prior. If there is document or agreement or legislative component related to the closure; please provide them in the email if easily accessible.

All it is still imperative to fill out the spreadsheet in google documents because this is the only way WO410 can address closures across the board in such a short time frame.
