Micheal,

It's me again! Do you know if the BLM was presented with any scientific papers related to the need to expand the CSNM to protect the objects of interest from the original designation. I have not been able to find anything except jibber jabber on the scientific need to do so, but I have seen no peer reviewed scientific papers to that effect. if you have copies, could you provide me with the references and I'll look them up.

I am not representing anyone in these requests. These are for my own research and use.

Thanks.

Ed
