here is Stu's message on copying the first few words. Hopefully the first few words of the attachments will be more useful than this example, and he could just send us that without needing anyone to do more work. Downey had left for an event, so do not know if the sample from your spreadsheet I left for her will be good enough or if we need more - will let you know in the am.

Also, are all of the attachments pdf, or were some of them spreadsheets? Am concerned we may have missed some, as Stu seems to have sorted out only pdfs..

Task: Identify Mass Mailings - Code document if it represents "**x**" number of attached form letters.

What we are looking for are **mass mailings in the attachments**. When and if you find them, please Highlight the first 4-5 words in the viewer:

Inline image 1

then create an annotation:

Inline image 2

where **the code is the # of purported versions** of the form letter in the attachments:

Inline image 1

Reply all with questions about a particular case. Identify the document ID when you have a question about a confusing case. You do NOT need to count hundreds or thousands of postcards. Instead, look for information on the total number.

~Stu
