IDLED WELL SCORING CHECKLIST

1. Property ID No:	2. Well Name & No:				
3. Operator:					
4. Surface Location:					
¹ / ₄ of the	¹ /4 of Sec.	Township	Range	County	
Section 1. Factors					
1. Percent of Idled to Active Wells					
< 30 = 1 30 - 60 = 3	> 60 = 5			Score:	
2. Years Idle					
7 = 1 8 - 15 = 3 > 1	5 = 5			Score:	
3. Environmental, Safety and Public Health Concerns					
Environmental Rate 1 – 5 Explanation:				Score:	
Safety Rate 1 – 5 Explanation:				Score:	
Public Health Rate 1 – 5 Explanation:				Score:	
4. Sensitive environmental resource and other land use priorities					
Recreational Use: (based on inter	nsity) $1-4$			Score:	
Located in significant wildlife are	ea 1-3			Score:	
The weight of this factor ranges from 1 to 5 points for each – Environmental, Safety and Public Health. The weight of this factor will be dependent on the impact that a well poses to Environment, to Safety or to the Public Health. If the factor does not apply, then a weight of (0) should be given. Some examples that may apply under this factor are: a well that contains corroded or leaking valves on the wellhead, or a well that contains corroded casing or no casing at all.					
				Total:	

Section 2. Priority				
Priority 1 (High) Leaking well				
Total > 29				
Priority 2 (Medium) Total 17 – 29				
Priority 3 (Low) Total < 17
