

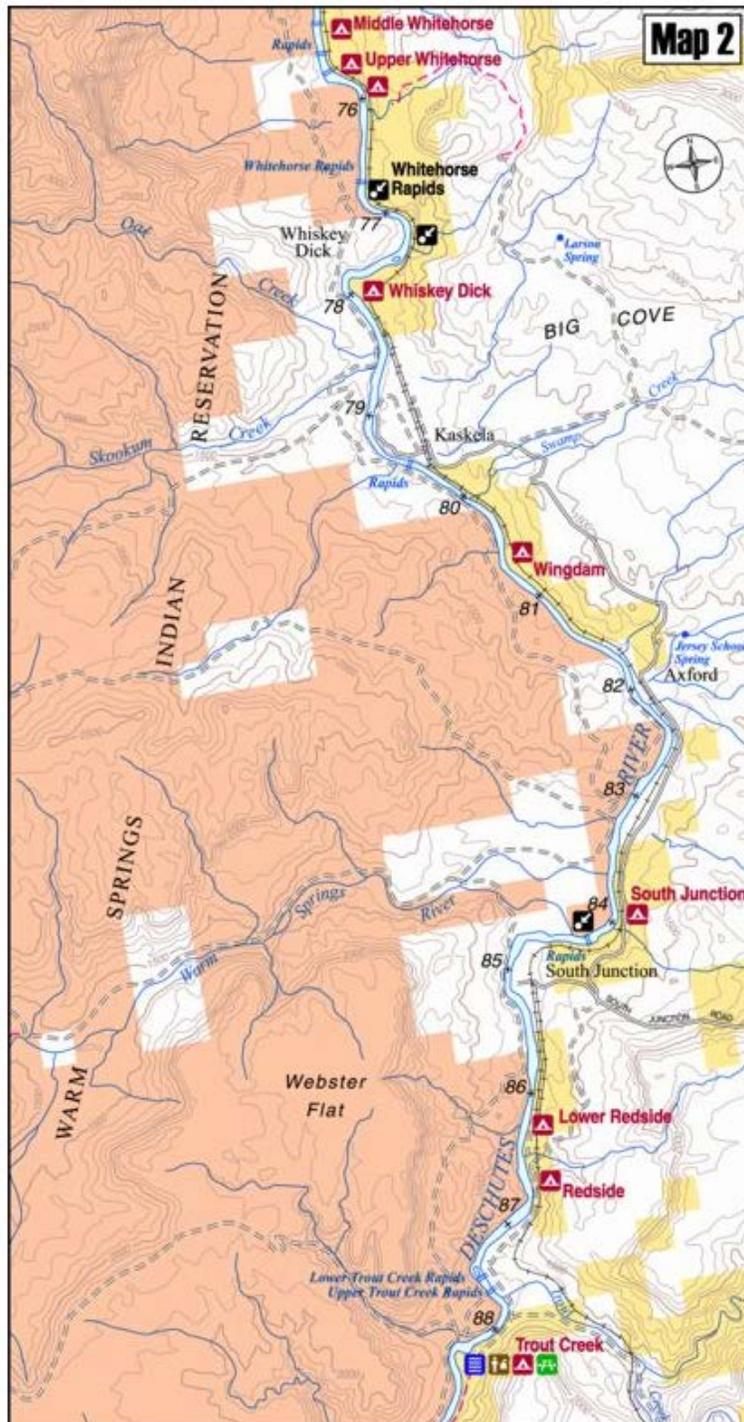

Map 2: Trout Creek Rapids (87.7) to Whitehorse Rapids (76.4)

River Mile	Description - Map 2
87.7	Upper Trout Creek Rapids, Class II: Small waves with shallow rocks near center of river.
87.5	Lower Trout Creek Rapids, Class II+: River is navigable on either side of the island. Standing waves, beware of boulder at top center of right channel.
86.6	Redside: Two campsites, medium groups, toilet, good shade.
86.2	Lower Redside: Campsite, large group, good shade.
84.3	Wildlife Note: Osprey are often seen at the confluence of the Warm Springs River.
83.9	South Junction: Fee campground, vehicle access (not recommended for float-in camping), toilet, garbage service, closed to boat launching.
80.5	Wingdam: Three campsites, medium group, toilet, limited shade.
77.8	Whiskey Dick: Seven campsites, medium to large groups, toilet, some shade, sandy beaches.
77.3	Geologic Note: Large rock outcropping on river right shows signs of extreme pressure during volcanic formation. This unstable rock is a constant problem for the railroad. Elaborate spring-loaded wire fences have been constructed to signal warning lights for oncoming trains when rock slides occur.
76.8	Whitehorse Rapids Scouting Point: 1/2 mile below the Whiskey Dick campsites on river right, just after small Class II rapid. Active railroad - DANGER - stay off the tracks!!
76.7	Whitehorse Rapids, Class III+: Large rocks, standing waves, and turbulent currents make this half mile long rapid the most difficult rapid in this section. Scouting is highly recommended!!
