
Legend

- Proposed Pad Location
- Hypothetical FFD Production Pad or Processing Facility
- Proposed Roads
- Proposed Pipelines
- Proposed Overhead Powerlines
- Hypothetical Roads
- Hypothetical Pipelines
- Hypothetical Airstrip
- Existing Alpine Pipeline
- Existing Infrastructure
- Plan Area
- Northeast NPR-A Planning Area
- Potential Development Area for Production Pad
- Potential Development Area for Processing Facility
- No Permanent Oil and Gas Facilities
- Sensitive Area Consultation
- State Land
- Native Land Interim Conveyed
- Special Caribou Stipulations
- No Surface Activity
- Not Available for Oil and Gas Leasing

Notes:

1) The hypothetical pad, road, and pipeline locations are provided to assist the analysis of potential future development and to provide a visual representation of potential future development. There are too many uncertainties about oil and gas potential to project where pads would be located or the number of pads that will be proposed and constructed. Bridges and culverts would be located to minimize affects on water flow and fish passage.
2) Horizontal Datum NAD 83, Coordinate System Alaska Albers Equal Conic, Feet
3) Basemap generated from coverages provided by CPAI and the BLM
4) Road and pipeline route information from PN&D, March 13, 2004
5) Multiple pipes, including a sales oil line and a three-phase gathering line, may exist within proposed pipeline corridors.
6) Proposed road, pipelines, powerlines, and pads are shown larger than actual footprint for visual representation
