

# Tangle Lakes Campground

## Tent Campers:

We apologize for the hard compacted tenting surfaces you are experiencing. Our renovations completed by contract a year ago specified gravel surfacing as we did not have sufficient funds to provide for a more specialized application at that time. We are planning to “soften” the surfaces of all of the tent sites starting this year so that you will more easily be able to secure your tents to the ground. All campsites have a tenting surface that will be upgraded.

Thank you for your patience while we complete this work.

We welcome your comments! Please contact the Glennallen Field Office or speak with the campground host.
