Re: letter of support for the BLM choice for Alternative #1 in North Peoria

Dear Sir,

As we have had correspondence in the past and will continue to do so in the future, I am writing once again to now commend the Bureau of Land Management's choice for alternative #1 for the transmission line that has been under review for these past many months.

I concur with the findings of the certificated route by APS, BLM and Arizona Corporation Commissioners who have all considered additional routes and have deemed placement along the north side of SR74 as the most logical choice and the one that will least impact all concerned considerations that this process has had the difficult task of considering.

In summation, I support the use of such public lands for the use of such a project for which a project of this nature is so aptly suited. I realize that such endeavors will always have some impact on the public at large and that no solution will be universally accepted by all but since a project of this nature will precipitate growth and stability within our area for future consideration, I see no other choice but to make use of the resources that we have at our disposal.

In closing, no one wants to degrade the natural beauty that this land offers to all who have the opportunity to live here or visit but this part of the country welcomes all peoples to our state and its only befitting that we will have the infrastructure in place that will develop the needed power to accomplish this task.

Thank-you for your efforts in these matters and I look forward to a successful completion of the project in the near future.

Respectfully yours,
