Subject: proposed APS Sun Valley to Morgan 500/230kV transmission line project and Proposed Resource Management Plan Amendment

I have attended most of the meetings regarding the proposed 500/230kV transmission Line Project and Proposed Resource Management Plan Amendment. I have carefully considered all that spoke for and against, and I still prefer the proposed action, with the 200 foot-wide right-of-way and single-use BLM corridor within the Arizona Corporation Commission certificated route. I understand that the RMP would need to be amended. The lines should go north of the 74 highway.

The other alternatives would not be in Phoenix (and surrounding communities) interest. We

need to proceed right away and Phoenix is getting ready for a housing upsurge. We need to be ready with power ASAP and the proposed action is the right way to make Phoenix a really attractive to have a business and to build a good home for the future.

Thank you for a through process that was open to thoughts and discussion. I also want to thank the ABS and BLM and also the communities of Peoria and Surprise. This is truly a great state.
