**Subject:** Peoria Overhead Transmission Lines

Dear Joe:

As 70-plus retirees who moved to Trilogy at Distance over 6 years ago to live out our lives in an unspoilt piece of paradise, we wish to formally register our concerns about the proposed APS plan to route the transmission lines over BLM lands. We love our community and have always been very actively involved in preserving its future.

- It is unacceptable to have to suffer the visual impacts of the lines if they are placed on the Carefree Highway alignment. We know such a move would make the lines visible from both Trilogy and many parts of Vistancia.
- As State Route 74 is already designated as a transportation corridor it makes more sense to take advantage of the situation and place the power lines along an existing corridor.
- SR74 is scheduled by ADOT to be expanded into a 6 lane highway. It will have 1000ft on each side of the road scaped for right-of-way. The APS lines should be installed adjacent to that 1000 ft right-of-way.
- It is not environmentally reasonable to build the high-powered transmission lines through native desert.
- Finally, we as tax paying citizens have actively participated for over 3 years in the public process ... and now that BLM has identified and supports the PROPOSED ALTERNATIVE ROUTE, we want to lend our support to this proposal.
- We must protect our local desert for generations to come!

Sincerely,

[REDACTED]
