Mr. [REDACTED]
Thank you for comments on the proposed Sun Valley to Morgan Transmission Line.
Your comment is being included in the project record.

Gentlemen,

Originally I supported Alternative 1 of the Draft Statement where the Transmission line would cross over to the north side of SR 74 onto BLM land and then cross back over SR 74 back onto BLM land. However, I now support Alternative 2 where the transmission lines stay on the south side of SR 74 instead of Alternative 1. The additional cost it takes to cross over SR 74 twice and use BLM lands is not prudent or efficient construction and seems just plain silly. It seems there may be ulterior motives for Alternative 1 such as a developer (Sunland) protesting the southern Alternative 2 route. This was brought up in a public meeting I attended and was presented as an argument. In either Alternative 1 or Alternative 2 the developers residential buildings will see the transmission lines. I recommend and support Alternative 2 as the best overall solution!
