**Subject:** HAVE A QUESTION REGARDING THE WILD BURROS

Hello Joe,of the BLM and Chris of the City of Peoria

Something interesting for you both, the BLM and the City of Peoria, Maricopa County, the State of Arizona.....Some one brought this to my attention

There are wild burros on the land just north of present day Vistancia [Blackstone] and we have wild burros roaming free --north of Vistancia / Blackstone always up to Rte 74 and maybe up wards of the north side of Rte 74.

Now did the BLM and the City of Peoria, do any studies or have the developers going back to around 2000 when Sun Belt Holdings and Vistancia were first proposed, along with now Diamond Ventures and Saddleback Heights and lake Pleasant Heights

Did all the above take into consideration the wild burros and their habitat and were any applications made, any studies made, any any thing regarding these protected animals --burros--and their habitat ?  
????????????????????????????????

Was the Department of Interior notified in any way, presented with any studies or EIS studies or of something similar to an EIS study and say the City of Peoria's Conservation Ordinance that would apply or any other requirements no matter how inconsequential they might have been to others at the time and up until the present time ????

So what about the wild burros that run wild in these areas ?????????????????????????????? This would include State lands being used for the towers ???????????

Look forward to the information

regards,
