Subject: Support of proposed alternative on transmission lines

Dear Joe,

I am writing to express my support of the proposed alternative to high power transmission lines running through native desert of Trilogy at Vistancia and having the lines placed on the north side of State Route 74.

SR74 is already designated as a transportation corridor and is scheduled to be expanded into a 6 lane highway.

The proposed alternative is supported by ADOT, Maricopa County and the City of Peoria.

Building high power transmission lines through native desert is not environmentally responsible.

Thank you for your support of the alternative plan to place these high power lines along the north side of SR 74.
