# Uranium Mining next to Grand Canyon National Park?

**Just say No!**

I support protecting from mining the one million acres of public lands surrounding Grand Canyon National Park as identified in Alternative B of the Draft Environmental Impact Statement. I also support protecting these lands for 20 years, which is the maximum allowed administratively. I actually wish for them to be protected in perpetuity. But do all that you can to keep these lands healthy, beautiful, desirable to people and a safe, clean haven for all.

Thank you

Elsie

Secretary Ken Salazar

No uranium mining at the Grand Canyon

Dear Secretary Salazar,

I support protecting the Grand Canyon's entire million-acre watershed from uranium mining as outlined in Alternative B in the Draft Northern Arizona Proposed Withdrawal Environmental Impact Statement and Revisions to the Withdrawal Application, Arizona.

The Grand Canyon National Park is an international treasure. The diversity of habitats resulting from its great depth, its diverse topography, and its isolated seeps, springs and caves make it one of the most biologically diverse national parks in the United States.

The Grand Canyon is also the home of the Havasupai Nation. Indigenous Nations have been suffering from uranium mining for years. We can't sacrifice their lives. President Obama has signed the UN Declaration on the rights of Indigenous Peoples in December 2010. Now, it is time to implement it.

Yours Ina Lindner

Dear Scott,

I support the full withdrawal, Alternative B  
in the Environmental Impact Statement.

I am opposed to allowing uranium  
mining in the Grand Canyon. Mining would  
endanger water in the Colorado River, which  
supplies millions of people, and also  
ground water. Also, the impact of mining,  
roads, trucks, equipment would destroy  
the land, animals, and birds. I don't  
understand how this proposal would even  
be considered, as the Grand Canyon is  
the seventh Wonder of the World  
attracting millions of visitors.

Subject Re: Letter regarding Uranium Mining

Thanks for trying to make sense of what the USPO did to my submission.

I have sent an email with my comments.

Obviouly my bias is to prohibit all mining in the proposed 1,000,000 A+ exclusion area. And I spent 29 years in the nuclear business.

(928) 453-6760 • 1-800-854-4796 • FAX (928) 453-5948

(Whereupon, the following comments were made regarding the Northern Arizona Proposed Withdrawal DEIS:)

SHERLENE SUSANYATAME: Okay. I just wanted to make a comment that I oppose to all of it because the public still don't have a say, you know, whether or not we can have it or not have it. I think it's still a dangerous thing for all humanity.

\*\*\*\*\*

SANDRA IRWIN: I just support the Tribe's decision about supporting Alternative B 'cause we don't want it to encroach on our area, to have that mining.

\*\*\*\*\*

CARRIE CANNON: Oh, it was regarding the plant species. I'm an ethnobotanist for the Hualapais. One of the species -- I went through their list and everything, and I guess the species that I had a comment for was agave utahensis kaibabensis, it's -- the common name I think is Grand Canyon Agave, and it's within the vicinity of the withdrawal areas. And so I guess the case that I'm trying to make is I'm a proponent of the Tribe's decision in favor of the withdrawal because there's -- in the -- I guess the way that they project there would be -- there would be less mining if there was a withdrawal. Right? I guess -- well, what I'm

trying to say is to protect that resource, I'm in favor of Proponent B -- or Alternative B because then there would be likely less mining and then there would be less negative effects on that plant resource, which is significant to the Tribe.

That's my spiel.

(Whereupon, the comments were concluded.)

C E R T I F I C A T E

I, Diane S. Fayette, RPR, CRR, CCR, do hereby  
certify:

That the foregoing proceedings were taken by me in  
shorthand and thereafter transcribed under my direction;

That the foregoing three pages contain a true and  
correct transcription of my shorthand notes so taken.

I further certify that I am not interested in the  
events of this action.

WITNESS my hand this 4th day of April, 2011.

I support protecting from mining the one million acres of public lands surrounding Grand Canyon National Park as identified in Alternative B of the Draft Environmental Impact Statement. I also support protecting these lands for 20 years, which is the maximum allowed administratively.

Please protect the Grand Canyon from destructive mining.  
Thank you  
Thomas Barry

**No uranium mining at the Grand Canyon!**

Dear Secretary Salazar,

I support protecting the Grand Canyon's entire 1 million-acre watershed from uranium mining as outlined in Alternative B in the Draft Northern Arizona Proposed Withdrawal Environmental Impact Statement and Revisions to the Withdrawal Application, Arizona.

The Grand Canyon National Park is an international treasure. The diversity of habitats resulting from its great depth, its diverse topography, and its isolated seeps, springs and caves make it one of the most biologically diverse national parks in the United States.

The Grand Canyon is also the home of the Havasupai Nation. Indigenous Nations have been suffering from uranium mining for years. We can't sacrifice their lives. President Obama has signed the UN Declaration on the Rights of Indigenous Peoples in December 2011. Now, it is time to implement it.

Yours
