

Red Butte, a sacred area for the Havasupai tribe, is threatened by uranium mining associated with the nearby Canyon Mine

Dear Secretary Salazar:

I care deeply about the Grand Canyon and the surrounding public and tribal lands, so I am asking that you take immediate action to protect it and its watershed.

The Grand Canyon is one of the world's greatest natural wonders and a crown jewel of our National Park System. Radioactive pollution from uranium mining is a threat to Grand Canyon National Park visitors and wildlife, nearby Native American communities and Southwestern cities that get their water from the Colorado River. Past uranium mining activities have left a legacy of waste, contamination, health problems, and are costing the taxpayers hugely for clean ups.

Please immediately act to withdraw the Grand Canyon watershed from uranium mining.

Sincerely,

(Name) Tara Red Bird Ugualla
(Address) P.O. Bx #834
(Email) Grand Canyon, AZ 86003
