To: NAZproposedwithdrawal@azblm.org

I have yet to experience the Grand Canyon. My children have yet to experience the Grand Canyon.

The Grand Canyon is not a renewable resource, it is a finite resource - just like uranium.

All the uranium in the world will last a hundred years and leave nothing in its wake but a mess to clean up.

Preserve the Grand Canyon

Solar energy is perpetual and Arizona and Utah have plenty.

Peace

Comparing the world's energy resources*

Where should we invest for the long-haul??

©Richard Perez, et al.

*yearly potential is shown for the renewable energies. Total reserves are shown for the fossil and nuclear "use-them, lose-them" resources. World energy use is annual.
