Photo 1
Shaffer Mountain Met Tower # 4,
T 30 N R 15 E Section 19, SW1/4

View looking west up Shaffer Mountain access road

Met tower is approximately 1320 feet (.25 miles) from photo location.
Summit with radio towers is approximately .75 miles away.
9-28-07, 7:40 AM.

Photo 2
Shaffer Mountain Met Tower # 4,
T 30 N R 15 E Section 19, SW1/4

View looking northeast down Shaffer Mountain access road.

Tower is approximately 564 feet (.1mile) from photo location to tower.

Tower is 164 feet tall (50 meters).

9-28-07, 7:42 AM

Photo 3
Shaffer Mountain Met Tower # 4 (50 meters tall/164 feet)

Viewed from 4.25 miles away at junction of Highway 395 and Wendel Road looking northwest.

Tower is not evident in this photo due to viewing distance, small tower width and lighting conditions.
Photo taken 3-13-07, 8:02 AM

Photo 4
Shaffer Mountain Met Tower # 4 (50 meters tall/164 feet)

View from 4 miles away at Highway 395 and BLM Wild Horse Corrals looking northwest. Riders crossing road during horse endurance ride that included riding up Shaffer Mountain.

Tower is not visible in this photo due to viewing distance, narrow width of tower and lighting conditions.
Photo taken 9-28-07, 11:04 AM.

Note the difference in lighting between the previous 8:00 AM photo taken in mid March when the sun is further south in the morning and this late September photo when the sun is higher and more overhead at 11:00 AM. In both cases lighting still did not make the tower visible. Also note how distance diminishes the size of the much larger communication towers on the summit (see close up of summit tower following these photos).

Photo 5
Antelope Mountain Met Tower

Antelope Mountain from Spring Ridge Drive and Highway 139. Antelope Mountain is to the right of the white cross. Viewing distance is 3.0 miles looking NE. Visible tower is lattice communication tower. Met tower is left of the communication tower and not evident. Photo taken 11-14-07, 1:25 pm with Cannon Power Shot 1S IS digital camera with 5.8 to 58 mm optical zoom lens. At 1:16 pm the sun was directly south and 60 degrees above the horizon.

Photo 6
Antelope Mountain Met Tower

Antelope Mountain as seen in full frame view (no zoom) from .6 miles away. View is looking SE from entrance to private driveway south of Highway 139, in T 30 N R 12 E Sec 13 SW1/4. Red and white met tower is approximately 3 inches left of left tower on summit in this photo. Photo taken 11-14-07, 1:35 pm using Cannon Power Shot S1 IS digital camera with a 5.8 to 58 mm lens. At 1:16 pm, sun was directly south and 60 degrees above the horizon.
