Twin Peaks Gather Inspection L

August 18 2010 8

A total of 55 animals were inspected this morning including one John mule. 1 Bay stud L with L carpal laceration, sorrel stud with L caudal mandible injury, looks to be old, sorrel L stud with blind L eye and injured L ear, old injuries. These studs are thinner and have lots L of kick and bite wounds. 9 colts with a bay colt with sore feet, 3 mares in good shape. L One colt probably couple weeks old. 10 mares, grulla mare with cut upper eyelid, will L staple. 8 dry mares in good shape some scrapes. Will treat above with antibiotics and L banamine as needed. L

Retreat animals from 8/17 look improved and treated with antibiotics and banamine as L needed and some turned out. L

1pm inspection: 35 animals inspected that were gathered this morning. 6 colts slight sore L feet and tired. 14 mares, some with inverted 2 LH, good shape. 13 studs, some with L inverted 2 LH, bite marks and kick marks, good shape otherwise. 1 pair, mare with L inverted 2 LH, about a week old colt, slightly swollen and sore LF, will keep up and L recheck 8/19. Antibiotics and banamine given to animals with sore feet. L

2:30 pm: 21 animals inspected. Good body condition. 9 studs with a grey stud with L L stifle wound and LF heel bulb injury, bite wounds and waddles. Treated with antibiotics L and banamine. One grey stud with LF chronic carpal swelling. Is walking on it well. Bay L stud with RR possible old and healed L fracture of the fetlock/pastern area. Walking good L on it. 7 mares in good shape some mares with inverted 2 LH. Bay mare with a 2 on LH, L freeze iron on L neck: 88208039. 5 colts in this group in good shape, one grey filly with L sore feet, banamine given. L

Most animals in good body condition. Will examine treated animals again 8/19. 8
