## O.1. INTRODUCTION

As part of the RMP revision process, the CRVFO developed a complementary travel management plan for all BLM-administered lands within the FO. The revised RMP comprehensively plans for all types of travel (recreational, casual, agricultural, industrial, administrative, etc.) and accompanying modes and conditions of travel, including motorized, mechanized, and non-mechanized (muscle-powered) uses. Travel and transportation management (TTM) is a comprehensive approach to on-the-ground management and administration of roads, primitive roads, trails, and areas. TTM consists of implementation of travel and transportation planning decisions, route inventory and mapping, signing, education and interpretation, law enforcement, easement acquisition, monitoring activities, and other measures necessary for providing access to and across public lands for a wide variety of uses (including recreational, traditional, authorized, commercial, educational, and for other travel and transportation purposes), as well as all forms of motorized and non-motorized access or use, such as foot, pack stock or animal-assisted travel, mountain bike, off-highway vehicle, and other forms of transportation.

**Land Use Planning Decisions for Off-Highway Vehicles.** The following decisions are required under the land use planning process pursuant to the regulations found in 43 CFR Part 1600.

**Designation of Off-highway Vehicle (OHV) Management Areas.** All public lands are required to have OHV area designations (see 43 CFR §8342.1). Areas must be designated as open, limited, or closed to motorized travel activities. Open, limited, and closed areas are defined in 43 CFR §8340.0-5, (f), (g) and (h) respectively. Criteria for open, limited, and closed area designations are established in 43 CFR §8342.1 (a-d). The OHV area designations for WSAs must comply with BLM Manual 6330 – Management of Wilderness Study Areas.

**Open** — Existing laws, proclamations, regulations, or Executive Orders may limit the use of the open area designation or impose additional requirements relating to travel and transportation planning and management in specific circumstances. Technological advances in OHVs and the volume of motorized recreation on public lands have required a shift in policy, where the designation or retention of large areas open to unregulated cross-country travel is no longer a viable management strategy.

Open areas will be limited to a size that can be effectively managed and geographically identifiable to offer a quality OHV opportunity for participants. Expansive open areas allowing cross-country travel, without a corresponding and identified user need or demand, will not be designated in RMP revisions or new travel management plans.

**Limited** – At a minimum, a limited area must have specific road, primitive road, and trail designations (i.e., limited to designated routes). Consideration must be given to a range of alternatives pursuant to NEPA and to a range of route specific limitations. These specific road, primitive road, and trail designations will be done as part of an implementation-level decision making process. More than one limitation may apply beyond the specific road, primitive road, and trail designations, including travel routes that will be limited to specific types or modes of travel, such as foot, equestrian, bicycle, and motorized, limited to time or season of use, limited to certain types of vehicles (street legal vehicles, motorcycles, all-terrain vehicles, over-snow vehicles, or high clearance vehicles), limited to authorized or permitted vehicles or users, limited to BLM administrative use only, or other types of limitations (e.g., hunting access, game retrieval, and pull-out camping). The implementation level decisions also must provide specific guidance about the process for managing motorized vehicle access for authorized, permitted, or otherwise approved vehicles for those specific categories of motorized vehicle uses that are exempt from a limited designation (see 43 CFR §8340.0-5(a)(1-5)).

It is Colorado BLM policy (CO-IM-2007-20) to restrict all off-highway vehicle use within limited areas to designated routes.

**Closed** – Motorized vehicle travel is prohibited in a closed area. Access by means other than motorized vehicle, such as mechanized or non-motorized use, is permitted. Areas are designated closed if closure to all vehicular use is necessary to protect resources, promote visitor safety, or reduce use conflicts.

Except as otherwise provided by law, congressionally designated wilderness areas are statutorily closed to motorized and mechanized use. Routes in these areas need to be identified, along with their mode of travel.

**Land Use Planning for Other Modes of Travel.** Whereas a comprehensive interdisciplinary approach to travel and transportation management incorporates the concerns and needs of multiple programs, the recreation program has a specific need to recognize and manage motorized recreational use of OHVs and non-motorized travel, such as foot, equestrian, and non-motorized mechanical travel.. An understanding of the regional supply and demand of recreational opportunities and access needs is important in designating a system of roads, primitive roads, trails, and areas for specific recreation and other uses.

## **O.2. IDENTIFICATION OF TRAVEL MANAGEMENT ISSUES**

Scoping has consistently demonstrated comprehensive travel management as a major issue to be addressed in land use plans. Increased demand for access to public lands, combined with research on the impacts of roads on resources and resource uses, has increased the need for a well-designed and managed transportation system.

Travel management issues were initially identified by BLM resource specialists in the preparation plan and by the public during scoping. BLM staff identified the following factors describing the condition of travel management within both planning areas, thereby identifying the need for developing a comprehensive travel management plan.

- A lack of comprehensive travel management that considers the relationship between various resources, access for authorized permittees, and recreation uses.
- The lack of planning for recreational experiences that preceded the construction of historical routes.
- Unauthorized uses originating from designated routes causing impacts on other resources.
- Subdivision of private property creating new access points to BLM lands.
- Routes that are open to motorized use being accessible only to adjacent landowners.
- Conflicts between recreational users.

During scoping, the BLM received 162 comments about travel management and transportation issues. This number represents 26 percent of the total comments received on planning issues, thereby constituting the category that received the most comments overall.

**Trails and Routes Data-Collection Workshops.** The CRVFO also hosted three trails and routes data-collection workshops in 2007. The workshops were held to: (1) allow the public to review the BLM’s inventory for accuracy and completeness, (2) provide information on routes that are missing from the BLM’s inventory, and (3) offer suggestions for reroutes or new trail sections that would complement the existing route system. Table O-1 shows the date, location, and number of attendees for each workshop. All meetings were from 4 p.m. to 7 p.m.

**Table O-1**  
**Trails and Routes Data Collection Workshop Attendance**

Location (Colorado)	Date	Number of Attendees
El Jebel El Jebel Community Center 0020 Eagle County Drive	June 12, 2007	14
Gypsum Gypsum Recreation Center 52 Lundgren Boulevard	June 13, 2007	7
Rifle Fire Protection District Station 1 1850 Railroad Avenue	June 14, 2007	2
<b>Total</b>		<b>23</b>

Each open house was structured in a similar format. Attendees were asked to sign in, and then were briefed on the room layout and goals and objectives of the workshop. Two-page information sheets summarizing the BLM’s planning effort and travel management process, RMP Newsletter Volume 1, Number 1, and comment forms to document attendees’ comments on new or existing routes were made available.

An overview map was displayed at the entrance of the room that showed the FO boundary and the different travel management zones within the FO. The CRVFO was divided into travel management zones. Dividing the FO into a number of management zones enabled the public to focus on a specific area of interest.

Work stations were set up around the room with topographic- and aerial photograph-based maps displaying the inventoried trails and routes for each zone. Attendees were asked to complete a comment form and draw on the maps to document any missing existing trails and routes. Proposed new routes were also drawn on the maps. Pencils and markers were available to edit the maps.

The comment period for routes and trails data collection was open until July 20, 2007. The public could submit comments by completing the comment form and sending it via email, US mail, facsimile, or hand delivery to either FO. All travel management zone maps and comment forms were available at the six workshops, at the CRVFO, and on the project Web site ([www.blm.gov/rmp/co/kfo-gsfo](http://www.blm.gov/rmp/co/kfo-gsfo)).

The results from scoping and the data collection workshops were incorporated with input from the BLM Colorado Northwest Resource Advisory Council (and subgroup) and cooperating agencies comments into four alternatives that were analyzed in the Draft RMP/Draft EIS.

The process of working with the Colorado Northwest Resource Advisory Council (and subgroup) and cooperating agencies up to the Proposed RMP/Final EIS is summarized in Chapter 1.7 Collaboration. The public comment process is summarized in Chapter 5 – Consultation and Coordination.

### **O.3. INTERDISCIPLINARY (ID) TEAM PROCESS**

TTM planning must use an interdisciplinary approach. The TTM planning process considers and addresses all resource and administrative access needs. This process requires consideration of the impact of travel and transportation alternatives on other resources and uses and the impact of managing other resources and uses on travel and transportation management. These resources shall include, but not be limited to, recreation, soil, vegetation, water, hydrology, air, wildlife, wildlife habitat, threatened and endangered species, lands managed to protect with wilderness characteristics, paleontological resources, and cultural resources. Interdisciplinary teams involved in TTM planning must have the knowledge and expertise to adequately assess travel and transportation requirements and impacts in relationship to the management and protection of these resources. The TTM planning process is incorporated into the development of all RMPs to ensure access needs are balanced with resource management goals and objectives.

Throughout the RMP revision planning process, the CRVFO ID team held meetings specifically concerning travel management and discussed travel designations in relationship with each alternative. The CRVFO also coordinated with user groups, cooperating agencies, and members of the BLM Northwest Resource Advisory Council (and subgroup).

The purposes of the ID Team meetings were:

1. Gather input from ID team members on travel/access conflicts and discuss possible mitigation.
2. Identify the purpose and need for all designated routes.
3. Develop area and route designations that fulfill the management goals and objectives of each alternative.
4. For areas classified as limited consider a full range of possibilities, including travel that will be limited to types or modes of travel, such as foot, equestrian, bicycle, motorized, etc.; limited to time or season of use; limited to authorized users; limited to BLM administrative use only; or other types of limitations.

All travel recommendations were examined on an area by area and route-by-route basis, usually by employing geographic information system (GIS) and other digital and physical mapping to overlay physical constraints, public comments, and background topography and/or aerial photography, with existing routes and their public and administrative uses.

Considerations of both social and physical elements helped define the proposed travel plan by alternative. The social aspects include: public demands, historical uses, existing rights-of-way, permitted uses, public access, resource development, law enforcement and safety, conflicts between existing or potential uses, recreation opportunities, local uses, and cultural and economic issues. Physical aspects include: terrain, soils, water, vegetation, and watersheds, connectedness of routes, special designations, demands for specific types of vehicle use, and manageability considerations. The ID team considered criteria defined in 43 CFR 8342.1:

- Designated areas and designated trails shall be located in a manner to minimize impacts to physical resources (soils, watershed, vegetation, air, and other resources) and to prevent impairment of wilderness suitability.
- Designated areas and designated trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- Designated areas and designated trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreation uses.
- Designated areas and designated trails shall not be located in officially designated wilderness areas or primitive areas, and shall be located in natural areas only if the authorized officer determines that off-road vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which they were established.

- Section 106 of the NHPA applies to route designation and BLM follows the phased process outlined in the Amendment to the Protocol on travel management.

The ID team also considered a wide variety of factors such as:

**a. Environmental Conditions**

- a. General
  - Does access on the route promote resource damage/concerns?
  - Is the route causing resource damage?
  - Does the route provide public access?
- b. Soil stability
  - Is the route within a highly erosive soils area?
  - Does the route cross slopes of 50 percent or greater?
- c. Wildlife habitat (e.g., winter range, nesting/brooding and rearing habitat, calving/fawning areas)
  - Is the route a known issue within big game winter range?
- d. Special status species habitat
  - Is the route a known issue within special status species habitat?
- e. Proximity to riparian areas and/or 303(d) streams
  - Is the route causing damage to water quality?
  - Does the route negatively impact wetlands/riparian/fens/mires?
- f. Visual resources
  - Does the route conflict with visual resource management class objectives?
- g. Cultural/paleontological resources
  - Is the route creating adverse effects to historic properties?
  - Is the route creating an issue for any areas of Native American concern?
  - Does the route cross significant paleontological areas?
- h. Special management areas
  - Is the route within a WSA?
  - Is the route within an area managed for Protect wilderness characteristics?
  - Is the route within an area determined to contain Protect wilderness characteristics?
  - Does the route conflict with recreation management area (RMA) objectives?
  - Does the route Support RMA objectives?
  - Does the route conflict with area of critical environmental concern objectives?

**b. Route conditions:**

- a. General
  - Is the route a BLM-maintained route?
  - Is the Road condition poor and/or unsustainable?
  - Is the route unsafe (e.g., steep, no turn-around)?
- b. Parallel route
  - Does the route run parallel to another existing route?
- c. Spurs

- d. Dead end
  - Is it a Dead-end route (0.5-mile or less)?
- e. Does the route end at private property?
- f. Access
  - Is there legal public access?
  - Is there an existing right-of-way?
- c. User conflicts, such as:**
  - a. Motorized travel versus mechanized travel
  - b. Mechanized travel versus foot and horse travel
- d. Administrative purposes, such as:**
  - a. Is the route necessary for rangeland activities?
  - b. Is the route necessary for wildland fire suppression activities?
  - c. Is the route necessary for safety?
  - d. Is the route necessary for resource management and permitted activities?
- e. Public purposes, such as:**
  - a. Accessing public or private land
  - b. Destinations for specific activities
    - Does the route have recreation value (no special destination)?
  - c. Types of desired use (motorized, mechanized, non-motorized/non-mechanized)
- f. Route, vehicle type and size limitations, such as:**
  - a. wheel base of full-size vehicles
  - b. wheel base of ATVs
  - c. Single track (motorcycles/mountain bikes)
- g. Public information and demand**
  - a. Existing and potential trail systems
  - b. Historical use
  - c. Recreational opportunities
- h. Decisions proposed within each alternative**
  - a. Special designations (e.g., WSAs, ACECs, SRMAs, ERMA) and identifications
- i. Emergency use and access**
- j. Administrative access**

*Route Designations in WSAs.* Information Bulletin No. 99-181 (BLM) directs BLM to comply with the wilderness nonimpairment mandate (FLPMA, Section 603(c)). BLM must monitor and regulate the activities of off-highway vehicles in the WSAs to assure that their use does not compromise these areas by impairing their suitability for designation as wilderness. The BLM's Off Road Vehicle Regulations (43 CFR 8342.1) require that BLM establish off-road vehicle designations of areas and routes that meet the non-impairment mandate. It is the BLM's policy that cross-country vehicle use in the WSAs does cause the impairment of wilderness suitability. Thus, the BLM should establish off-road vehicle designations in WSAs that limit vehicular access to boundary roads, or ways existing inside a WSA that were identified during the inventory phase of the wilderness review.

*Emergency Uses.* By regulation, any fire, military, emergency or law enforcement vehicle when used for emergency purposes is exempted from OHV decisions. Emergency uses in WSAs are covered under the BLM's Interim Management Policy, Section I.B.11 and 12.

*Administrative Access and Use.* Routes considered for administrative use only were discussed by the ID team. These administrative categories could include routes to stock ponds and other range improvements, guzzlers, and BLM facilities. The CRVFO reserves the right to allow travel on these routes to permittees, BLM employees, or whomever it deems appropriate on a case-by-case basis.

#### **O.4. IMPLEMENTATION**

Implementation decisions are actions to implement land use plans and generally constitute BLM's final approval allowing on-the-ground actions to proceed. These types of decisions are based on site-specific planning and NEPA analyses and are subject to the administrative remedies set forth in the regulations that apply to each resource management program of the BLM. Implementation decisions are not subject to protest under the planning regulations.

Instead, implementation decisions are subject to various administrative remedies. Where implementation decisions are made as part of the land use planning process, they are still subject to the appeals process of other administrative review as prescribed by specific resource program regulations after BLM resolves the protests to land use plan decisions and make a decision to adopt or amend the RMP.

Actual route designations within the limited category can be modified without completing a plan amendment, although NEPA compliance is still required. The federal regulations at 43 CFR 8342.3 state: "The authorized officer shall monitor effect of the use of off-road vehicles. On the basis of information so obtained, and whenever the authorized officer deems it necessary to carry out the objectives of this part, designations may be amended, revised, revoked, or other action taken pursuant to the regulation in this part."

In conducting such NEPA compliance, the factors such as:

- Routes suitable for different categories of OHVs including dirt bikes, ATVs, dune buggies, and 4-wheel-drive touring vehicles, as well as opportunities for joint trail use.
- Needs for parking, trailheads, informational and directional signs, mapping and profiling, and development of brochures or other materials for public dissemination.
- Opportunities to tie into existing or planned route networks.
- Measures needed to avoid onsite and offsite impacts to current and future land uses and important natural resources, among others, issues include noise and air pollution, erodible soils, stream sedimentation, non-point source water pollutions, listed and sensitive species habitats, historic and archeological sites, wildlife, special management areas, grazing operations, fence and gate security, needs of non-motorized recreationists, and recognition of property rights for adjacent landowners.

- Public land roads or trails determined to cause considerable adverse effects or to constitute a nuisance or threat to Public safety would be considered for relocation or closure and rehabilitation after appropriate coordination with applicable agencies and partners.

Those areas managed as closed will not be available for new motorized or mechanized route designation or construction (not including maintenance or slight route alterations on existing routes).

Regulations at 43 CFR 8342.2 require BLM to monitor the effects of OHV use. Changes should be made to the travel network based on the information obtained through monitoring. Procedures for making changes to route designations after the record of decision (ROD) is signed are established in the RMP.

Site specific NEPA documentation is required to change the route designations (e.g., motorized to non-motorized) for routes designated in this plan.

*Temporary Limitations or Closures.* Whenever the authorized officer determines that OHV use will cause or is causing considerable adverse effects on resources (i.e., soil, vegetation, wildlife, wildlife habitat, cultural, historic, scenic, recreation, or other resources), the area may be immediately closed to the type of use causing the adverse effects (43 CFR 8341.2). Such limitation or closures are not OHV designations.

## **O.5. CULTURAL RESOURCES**

BLM is satisfying the requirements of Section 106 of the National Historic Preservation Act (NHPA), 16 U.S.C. § 470f, for the travel and transportation management decisions relating to the Colorado River Valley Field Office Resource Management Plan pursuant to Addendum 1 to the Colorado State Protocol Agreement (Protocol) between the Colorado State Historic Preservation Officer (SHPO) and BLM. The Protocol, which supplements the National Programmatic Agreement between BLM, Advisory Council on Historic Preservation (ACHP), and the National Conference of State Historic Preservation Officers, adopts an alternate procedure for compliance with Section 106 of the NHPA as allowed under 36 C.F.R. § 800.14(b). Addendum 1 recognizes that BLM's designation of routes and areas is an undertaking triggering compliance with Section 106 of the NHPA, and that BLM must complete the Section 106 requirements as part of route designation during the planning process. The Addendum specifically outlines how BLM will comply with the requirements for Section 106 for Comprehensive Travel and Transportation Management Planning. As described in the Addendum, "selection of specific route networks and imposition of other use limitations, will avoid impacts on cultural resources where possible. In accordance with 43 CFR 8342, existing cultural resource information must be considered when choosing among the range of alternatives for the design of a planning area travel system, including the potential impacts on cultural resource when determining whether each of the routes or areas in a planning area should be designated as open, limited, or closed." During the designation process, existing cultural resource information is considered when choosing among the range of alternatives for the design of a planning area travel system. A large number of existing routes and areas are designated in these planning efforts (Land Use Plans and Resource Management Plans). "Designation provides a purposefully designed and clearly delineated travel network, reduces the potential for user caused route

proliferation, and facilitates travel management law enforcement”, all of which are helpful in reducing adverse effects to historic properties.

The steps set forth in the Addendum establish a phased process for the identification, evaluation, and resolution of potential adverse effects to historic properties eligible for or listed on the National Register of Historic Places. The area of potential effect (APE) that is subject to inventory will be determined by the cultural resource specialist as defined by 36 CFR 800.16(d). When defining the APE, the BLM will consider potential direct, indirect, and cumulative effects to historic properties. The Addendum’s phased process for identification is broken down into three steps: 1) planning; 2) route development; and 3) route maintenance. During the planning phase, existing cultural resource data along with known areas of higher use or concentration of travel will be used to determine priority areas for Class III cultural resource inventory. The SHPO, interested Native American Tribes, and other consulting parties are consulted during planning and invited to participate in the development and implementation of identification, monitoring, and treatment options according to the Colorado State Protocol in association with the National Programmatic Agreement. During the route development phase when Class III inventory is being completed, if BLM identifies historic properties that are eligible for or listed on the National Register of Historic Places that are affected, BLM will identify ways to avoid, minimize or mitigate such adverse effects, and outline treatment procedures. The types of avoidance, minimization or mitigation may include fencing, site testing or excavation, signing, route realignment, or possibly route limitation or closure. The third phase focuses on conducting Class III inventories, as necessary, for those areas identified during the planning phase as being the lowest priority inventory areas with designated routes.

For the CRVFO RMP travel and transportation management planning process, BLM has identified existing routes throughout the field office and examined the routes to determine appropriate designation based on public need and known natural and cultural resource concerns. BLM utilized current cultural resource inventories and assessments to determine potential cultural resource concerns on a route-by-route basis. The designated routes identify cultural resource concerns along with any other issues or rationale for the route designation, which are reflected in Table O-2. During the CRVFO RMP designation process, the type of use on 142 routes was changed based on cultural resource concerns. BLM has withheld from public disclosure sensitive cultural resources associated with routes even though BLM considered such information during the designation process. During the RMP phase, the CRVFO consulted with the SHPO and interested Native American tribes and incorporated the comments received into our Proposed RMP. Once the RMP is finalized the CRVFO will move into the phased identification process to determine priority areas for Class III cultural resource inventory. A priority list of designated routes that require Class III cultural resource inventory will be completed based on the implementation plan and implementation priorities. The remaining phases will follow the steps of the Addendum as described above. For those routes that BLM determines may have adverse effects impacts on cultural resources eligible for or listed in the National Register of Historic Places, the CRVFO will consult with the SHPO, interested Native American tribes, and other interested parties to determine means to avoid, minimize or mitigate such adverse effects on a case-by-case basis.

## O.6. ROUTE DESIGNATIONS FOR ALTERNATIVE B

Table O-2 displays considerations and rationale for route designations in Alternative B-Proposed RMP. The route numbers (often divided into segments) relate to the numbered routes displayed on the travel maps for Alternative B found in Appendix A.

**Table O-2**  
**Route Designations for Alternative B**

<b>Route #</b>	<b>Route Designation</b>	<b>Concern, Issue or Rationale for Designation</b>
8020	full sized vehicle	Protect ACEC values
8020A	foot/horse only	Protect ACEC values
8020B	foot/horse only	Protect ACEC values
8021A	obliterate	Protect ACEC values
8021	foot/horse only	Protect ACEC values
8022	administrative route	No public access
8022B	administrative route	No public access
8023A	administrative route	No public access
8023B	administrative route	No public access
8024	administrative route	No public access
8024B	administrative route	No public access
8024BA	administrative route	No public access
8025	administrative route	No public access
8025A	administrative route	No public access
8025AA	administrative route	No public access
8025AB	administrative route	No public access
