— Segment: 6205

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: Winter Closure

Mitigation

- Reroute
- Maintenance
- Drainage Crossing

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Special Designation Wild Horse Area
- Water Stream Crossing
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations during critical periods.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Reccomended: Open (All modes of travel)

M101, 327, 100, 145, 242, 261, 415, 293, 140, 164 (Coal Creek Canyon): currently this is open to vehicles, and makes a delightful 4WD trip to overlook the Grand Junction Valley. Alternative B proposes to limit this access to <50" OHV's. Please do not restrict access to this area. It is a great recreational boon for the Grand Junction area. Plus, there is a limited parking for trailers with OHV's - no more than 4-5 vehicles plus trailers could be accommodated with the small parking area.

Commenter Name: Znamenacek, Dale

Area M: M140, M 145, M 261, M101, M164, M152, M170, M157, 1. History: Coal Canyon and its overlooks have been used for many years by the grand Mesa Jeep club. 2. The Grand Mesa Jeep Club had a special event permit from the BLM for their "Rock Junction" its event in 2012. 1. The Grand Mesa Jeep club has an annual club run to the Palisade rim of the Coal Canyon trail in the fall. 2. This trail has been a favorite of many due to the prime vistas of the grand Valley and the town of Palisade. 3. One piece of this trail seems to have been omitted from the maps. Segment M 148 does not is not visible on current maps. 4. Routes M156, M162, M157, and M177, are marked administrative on all our current alternatives. These end near an overlook of Grand Junction 5. We ask that the BLM consider changing all of Coal Canyon to "open to all motorized vehicles" on the 2013 Travel Management Plan.

- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation ACEC
- Special Designation VRM Class III
- Special Designation Wild Horse Area
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to reduce the number of duplicative and redundant routes in the Little Book Cliffs Wild Horse Range.
- Designation was considered to emphasize protection of wild horses in the LBCWHR and minimize impacts to their population and habitat.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Commenter Name: Herron, Lydia**Organization:****Submission Code: emc0806****Recommened: Limited to Vehicles Under 50" wide**

Zone M = "Little Bookcliffs" If we read the #s routes properly, M242 is the main motorized route into that area, and is proposed in the preferred alternative B to become a <50" route. Wed like to see it remain open for use as it is with the seasonal closures as they currently exist. We have hiked and ATVD that route many times, with friends & family, and have seen wild horses on multiple occasions. We love the trails to the old mine, which overlooks onto I-70 and the valley, above Palisade (M181 & M185). We have been up on top, towards Mt. Garfield, to another valley overlook area (M148 or M156), where the views cant be compared. We have taken trails that required we park our ATVs and then hiked down to a "slot" in the rocks that leads to a rock ledge, overlooking the valley. All of these places are unique and spectacular to find. The views here are spectacular. This area is great for encountering wildlife, site seeing, and taking photos. Please keep these unique routes undisturbed. M293 is proposed as administrative use, which is currently a horse route. There is a benefit to an OHV route and a parallel horse route in this area, and we would like to see it remain open for horse & foot traffic. This would prevent potential future user conflicts, by leaving it as it is. We have also been atv-ing in the North Soda Springs and Bronco Flats, but accessed from the Debeque area trails and would like to see M197 route remain open.

Trail Description (challenges, viewpoints, terrain type, etc.): The above areas are special to me, my family and many others. They represent unique view opportunities and driving challenges and the spurrs above offer great camping and view points
Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): Exploring, 4x4 driving, a big appeal to driving these less traveled roads and spurrs is the feeling of exploration that is often lost when channelized onto major routes. Why you like this trait(challenges you vehicle, close to home, wildlife, history characteristics views): The big appeal of these trails is to get away from others and experience the solitude of the outdoors the views and camping are amazing. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): The solitude and sence of adventure are the big draws for me for these areas. They are unmatched in Colorado. These areas currently receive very light traffic. The vast majority of users are respectful to the ecology, the history and other users.

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce the number of duplicative and redundant routes in the Little Book Cliffs Wild Horse Range.
- Designation was considered to emphasize protection of wild horses in the LBCWHR and minimize impacts to their population and habitat.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation ACEC
- Special Designation VRM Class I
- Special Designation Wild Horse Area
- Wildlife Bighorn Sheep Production Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to preserve the visual character of the existing landscape, limit or reduce the number of routes in areas managed as VRM Class I
- Designation was considered to reduce the number of duplicative and redundant routes in the Little Book Cliffs Wild Horse Range.
- Designation was considered to emphasize protection of wild horses in the LBCWHR and minimize impacts to their population and habitat.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.

Public Comments On Route: M156

Commenter Name: Znamenacek, Dale

Submission Code: emc0597

Organization: Grand Mesa Jeep Club

Recommended: Open (All modes of travel)

Trail Number(s): Coal Canyon and the overlooks, Hoodoo Trail Name: M140, M145, M261, M101, M164, M152 & M170, The rest of route M157 traveling west, M148, M156, M162, M157 connecting with M156 and M177, M13 I would like to see all routes in this area left open to all sizes of vehicles. These are commonly used jeep routes, and also a fantastic trip on my UTV and on an ATV.

Commenter Name: Herron, Lydia

Submission Code: emc0806

Organization:

Recommended: Limited to Vehicles Under 50" wide

Zone M = "Little Bookcliffs" If we read the #s routes properly, M242 is the main motorized route into that area, and is proposed in the preferred alternative B to become a <50" route. We'd like to see it remain open for use as it is with the seasonal closures as they currently exist. We have hiked and ATVD that route many times, with friends & family, and have seen wild horses on multiple occasions. We love the trails to the old mine, which overlooks onto I-70 and the valley, above Palisade (M181 & M185). We have been up on top, towards Mt. Garfield, to another valley overlook area (M148 or M156), where the views can't be compared. We have taken trails that required we park our ATVs and then hiked down to a "slot" in the rocks that leads to a rock ledge, overlooking the valley. All of these places are unique and spectacular to find. The views here are spectacular. This area is great for encountering wildlife, site seeing, and taking photos. Please keep these unique routes undisturbed. M293 is proposed as administrative use, which is currently a horse route. There is a benefit to an OHV route and a parallel horse route in this area, and we would like to see it remain open for horse & foot traffic. This would prevent potential future user conflicts, by leaving it as it is. We have also been atv-ing in the North Soda Springs and Bronco Flats, but accessed from the Debeque area trails and would like to see M197 route remain open.

Trail Description (challenges, viewpoints, terrain type, etc.): The above areas are special to me, my family and many others. They represent unique view opportunities and driving challenges and the spurrs above offer great camping and view points Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): Exploring, 4x4 driving, a big appeal to driving these less traveled roads and spurrs is the feeling of exploration that is often lost when channelized onto major routes. Why you like this trait(challenges you vehicle, close to home, wildlife, history characteristics views): The big appeal of these trails is to get away from others and experience the solitude of the outdoors the views and camping are amazing. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): The solitude and sence of adventure are the big draws for me for these areas. They are unmatched in Colorado. These areas currently receive very light traffic. The vast majority of users are respectful to the ecology, the history and other users.

- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.

- Designation was considered to reduce the number of duplicative and redundant routes in the Little Book Cliffs Wild Horse Range.
- Designation was considered to emphasize protection of wild horses in the LBCWHR and minimize impacts to their population and habitat.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: M242

Commenter Name: Weber, Patricia

Submission Code: emc0459

Organization:

Recommened: Open (All modes of travel)

M101, 327, 100, 145, 242, 261, 415, 293, 140, 164 (Coal Creek Canyon): currently this is open to vehicles, and makes a delightful 4WD trip to overlook the Grand Junction Valley. Alternative B proposes to limit this access to <50" OHV's. Please do not restrict access to this area. It is a great recreational boon for the Grand Junction area. Plus, there is a limited parking for trailers with OHV's - no more than 4-5 vehicles plus trailers could be accommodated with the small parking area.

Commenter Name: Winans, Scott

Submission Code: emc0868

Organization:

Recommened: Open (All modes of travel)

Route Comments: Continued access along M13 (Coal Cyn Road) is very important. The land on east side of M13 should be considered for singletrack route in future development (between M13 and Mt. Lincoln). The route inventory around Mt Lincoln is incomplete, including access from Cameo and other existing routes. M242 provides westward access to Zone H which ultimately can allow connection to the North Fruita Desert trail area in Zone I.

This linkage is critical for one portion of valley wide trail connection (northern boundary region of the valley). Routes M181 and M185 should remain accessible by mechanized users. These are very long standing routes in the area and provide the only direct access to the Bookcliff face in the Palisade area. Local users access this ridgeline commonly, and continued legal routes are needed. The solitude found in this area is surprising considering the very close proximity to the valley and the interstate, and the views and huge relief from the Bookcliff face are inspiring.

Zone M = "Little Bookcliffs" If we read the #s routes properly, M242 is the main motorized route into that area, and is proposed in the preferred alternative B to become a <50" route. We'd like to see it remain open for use as it is with the seasonal closures as they currently exist. We have hiked and ATVD that route many times, with friends & family, and have seen wild horses on multiple occasions. We love the trails to the old mine, which overlooks onto I-70 and the valley, above Palisade (M181 & M185). We have been up on top, towards Mt. Garfield, to another valley overlook area (M148 or M156), where the views can't be compared. We have taken trails that required we park our ATVs and then hiked down to a "slot" in the rocks that leads to a rock ledge, overlooking the valley. All of these places are unique and spectacular to find. The views here are spectacular. This area is great for encountering wildlife, site seeing, and taking photos. Please keep these unique routes undisturbed. M293 is proposed as administrative use, which is currently a horse route. There is a benefit to an OHV route and a parallel horse route in this area, and we would like to see it remain open for horse & foot traffic. This would prevent potential future user conflicts, by leaving it as it is. We have also been atv-ing in the North Soda Springs and Bronco Flats, but accessed from the Debeque area trails and would like to see M197 route remain open.

Area M: M140, M 145, M 261, M101, M164, M152, M170, M157, 1. History: Coal Canyon and its overlooks have been used for many years by the grand Mesa Jeep club. 2. The Grand Mesa Jeep Club had a special event permit from the BLM for their "Rock Junction" its event in 2012. 1. The Grand Mesa Jeep club has an annual club run to the Palisade rim of the Coal Canyon trail in the fall. 2. This trail has been a favorite of many due to the prime vistas of the grand Valley and the town of Palisade. 3. One piece of this trail seems to have been omitted from the maps. Segment M 148 does not is not visible on current maps. 4. Routes M156, M162, M157, and M177, are marked administrative on all our current alternatives. These end near an overlook of Grand Junction 5. We ask that the BLM consider changing all of Coal Canyon to "open to all motorized vehicles" on the 2013 Travel Management Plan.

I feel strongly that these high value recreational routes (route segments) in Zone M should remain open to the general public for all forms of use including motorized/OHV use. Routes M: 197,204,202, 217, 209,195,215,401,402,211,406,412,407,419,382, 72, 73, 60, 65, CVI, 50, 58,46,47,92,81,93, 91, 83, 108, 164, 185, 13, 181, 164. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone M routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Segment: 5344

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Foot/Horse/Mechanized

Seasonal Limitations: None

Mitigation

- Reroute

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Soils Slope Greater than 40%
- Special Designation VRM Class II
- Special Designation Wild Horse Area
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to eliminate duplicative or redundant routes in areas with slopes exceeding 40 percent.
- Designation was considered to reduce the number of duplicative and redundant routes in the Little Book Cliffs Wild Horse Range.
- Designation was considered to emphasize protection of wild horses in the LBCWHR and minimize impacts to their population and habitat.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Reccomended: Foot/Horse/Mechanized

We support the Alterative B decisions regarding routes M419, M407, M412, and M406, leaving these open for bike, foot and horse travel but closing them to motorized use. Further M220 should also get that designation. These routes in particular are known for their state wide importance to Quiet users and are even highlighted in the Colorado Mountain Club guide book as prime hiking routes.

Commenter Name: Shepherd, Janice

Organization:

Submission Code: rmc0089

Reccomended: Foot/Horse/Mechanized

M407 is a great trail to hike in cooler weather. The steep climb is a great challenge and a good work-out. There are fun encounters with wild horses and the views are wonderful. The trail shown in the inventory does not quite follow the trail on the ground as it swings around Corcoran Point. For example the trail crosses 12 S 714385 4345664 and 12 S 714375 4345918. There are switch backs in the trail route and it joins M419 much earlier than shown. There is a side trail leading up to the summit. The summit makes a dandy spot for lunch.

Submission Code: No Record

Reccomended: Foot/Horse

This is a great trail for solitary hiking and a chance to see evidence of wild horses. OHV traffic appears to be approaching via M70, M419, M416. This approach should be closed to motorized traffic to allow the wildhorses some quiet zones and allow hikers t

– Route: M415

– Segment: 21970

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: Winter Closure

Mitigation

- Reroute

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.
- **Wilderness Natural Area:** Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-highway vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Special Designation VRM Class I
- Special Designation VRM Class III
- Special Designation Wild Horse Area
- Special Designation WSA
- Water Stream Crossing
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

- Range Study Site
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to preserve the visual character of the existing landscape, limit or reduce the number of routes in areas managed as VRM Class I
- Designation was considered to reduce the number of duplicative and redundant routes in the Little Book Cliffs Wild Horse Range.
- Designation was considered to emphasize protection of wild horses in the LBCWHR and minimize impacts to their population and habitat.
- Designation was considered when protecting Wilderness Study Areas values.
- Designation was considered to reduce impairment of wilderness characteristics in areas managed for wilderness characteristics.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.
- Designation was considered to maintain a minimum of administrative access to range study sites.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Public Comments On Route: M415

Commenter Name: Weber, Patricia

Submission Code: emc0459

Organization:

Recommended: Open (All modes of travel)

M101, 327, 100, 145, 242, 261, 415, 293, 140, 164 (Coal Creek Canyon): currently this is open to vehicles, and makes a delightful 4WD trip to overlook the Grand Junction Valley. Alternative B proposes to limit this access to <50" OHV's. Please do not restrict access to this area. It is a great recreational boon for the Grand Junction area. Plus, there is a limited parking for trailers with OHV's - no more than 4-5 vehicles plus trailers could be accommodated with the small parking area.

– Route: M46

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone M should remain open to the general public for all forms of use including motorized/OHV use. Routes M: 197,204,202, 217, 209,195,215,401,402,211,406,412,407,419,382, 72, 73, 60, 65, CVI, 50, 58,46,47,92,81,93, 91, 83, 108, 164, 185, 13, 181, 164. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone M routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Route: M88

– Segment: 5337

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- Maintainence

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class II
- Special Designation Wild Horse Area
- Wildlife Mule Deer Winter Range
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.

- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to reduce the number of duplicative and redundant routes in the Little Book Cliffs Wild Horse Range.
- Designation was considered to emphasize protection of wild horses in the LBCWHR and minimize impacts to their population and habitat.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Open (All modes of travel)

— Segment: 5246

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: N164

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0081

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone N should remain open to the general public for all forms of use including motorized/OHV use. Routes N: 138, 706, 626, 892, 974, 876, 807, 71, 866, 829, 853, 164, 494, 1133, CVI, 1145, 171, 172, 132, 169, 199, 1237,1215,1276, 1271, 231, 1382, 946, 949, 948, 888, 889, 319, 224, 192, 223. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone N routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Route: N186

– Segment: 3844

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class IV
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Greater Sage Grouse Preliminary General Habitat
- Wildlife Mule Deer Winter Range
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.

- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III
- Wildlife Mule Deer Winter Range
- Wildlife Wildlife Emphasis Area
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: N807

Commenter Name: Siegfried, Brandon

Submission Code: cfc0081

Organization:

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone N should remain open to the general public for all forms of use including motorized/OHV use. Routes N: 138, 706, 626, 892, 974, 876, 807, 71, 866, 829, 853, 164, 494, 1133, CVI, 1145, 171, 172, 132, 169, 199, 1237,1215,1276, 1271, 231, 1382, 946, 949, 948, 888, 889, 319, 224, 192, 223. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone N routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

— Route: N829

— Segment: 21974

Designation ?

Proposed Designation: Open (All modes of travel) **Seasonal Limitations: Winter Closure**

Mitigation

- Signage and maintenance to avoid braiding and use of pipeline

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range
- Wildlife Wildlife Emphasis Area
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations during critical periods.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Public Comments On Route: N946

Commenter Name: Herron, Lydia

Organization:

Submission Code: emc0806

Recommended: Open (All modes of travel)

Zone N = Collbran Many motorized trails open to public use are slated for "administrative use" in Plan B. Trails N494, N339, N949, N934, N946, N1237, N199, N1276 are important for the public use as they create loop routes. We want them to remain open to the public.

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0081

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone N should remain open to the general public for all forms of use including motorized/OHV use. Routes N: 138, 706, 626, 892, 974, 876, 807, 71, 866, 829, 853, 164, 494, 1133, CVI, 1145, 171, 172, 132, 169, 199, 1237, 1215, 1276, 1271, 231, 1382, 946, 949, 948, 888, 889, 319, 224, 192, 223. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone N routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Route: N949

– Segment: 5003

Designation [?](#)

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Energy Access COGCC well
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Not Meeting Public Land health Standard (1)
- Soils Fragile soils
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or

potentially eligible for listing on the National Register of Historic Places.

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain administrative access to active oil and gas wells, but limit public access to provide for public safety at active well sites.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Reccomended: Foot/Horse

Rapid Creek and Cottonwood Creek, Trails O1, O1046, O1045, O32, O998, O193, O206, O205, should be designated and maintained as Horse and Hiking Trails. These trails which form a network in the canyons and up on top are a beautiful ride on horseback, with grand vistas, water, woods, and some grass. While we could ride them as Admin trails they need and deserve designation and maintenance to keep them in good shape, otherwise, wash outs and over growth will occur. These trails are important assets to the horse community and deserve better care. In addition, with proper permissions, they connect with the trails leading to the Chalk Mountain Area. Because of the need for admin access to the upper reservoirs, the cottonwood trails may need to be wider than normal.

Commenter Name: Herron, Lydia
Submission Code: emc0806

Organization:
Reccomended: Open (All modes of travel)

Zone O = Whitewater Hill OHV open area While a smaller area than the Grand Valley OHV area, it has many similar characteristics, and besides "open" riding, offers trail riding through the rocks and desert shrubbery. These are great trails! Not too technical, but enough to make it fun. We have started rides with friends and family off Hwy 50, just South/East of 32 Road intersection and then traveled on the rocky & diverse trails over to Kannah Creek Rd/Lands End Rd. There is one trail (# unknown) that is a technical, rocky, continuously inclining route, which climbs its way upward above Palisade. It does dead end at an administrative use gate, but the view was spectacular and the ride exhilarating. We do not want to see any closures in this area. We would like to see Alternative A or Alternative D routes remain open for this area. Some trails in Alternative B, slated for administrative use that wed like to have remain open for public use are O736, O937, O812, O434 & O440, O1046, O104, as these and others that have recreation value. This zone should also remain an intensive OHV use area.

Commenter Name: Shepherd, Janice
Submission Code: emc0835

Organization: The Quiet Trails Group
Reccomended: Foot/Horse/Mechanized

Specifically we support the closure and rehab of O887, O885 and O731 to protect the rare plants in the area. We are also interested that O293 retains its designation as bike, foot and horse. We note though the oddity in Alt B where O293, a bike, horse, foot routes is bounded at each end by Admin/Permittee routes. It is our understanding that Admin/Permittee routes are open to horse and foot but not bikes. Through access is needed for mountain bikers that includes route O293 as this provides access to the Whitewater Basin trail system. We also support designating the Rapid Creek and Cottonwood Creek trail complex (O1, 1046, O1045, O32, O998, O193, O206, O205) as horse, foot and biking trails. The BLM should work out with the adjoining landowners permissions to allow for a nonmotorized loop that includes O1 and O1045.

O14 is a nice established route providing entrance from the lower Cottonwood Creek area Accurate Pal Rim trail needs to be added to map O1045 and O1 (Cottonwood & Rapid Creek Roads) are critical access to Mesa direction and upper altitudes. In Zone M, the town of Palisade will focus on mountain bike and trail based recreation around the Bookcliffs. The Bookcliff area offers quick access to little used terrain that is immediately adjacent to the Grand Valley and yet not visibly connected until one reaches the ridgeline of the Bookcliff range. This isolation and eventual visual connection is a unique aspect of Bookcliff area riding. The only local access to this region of Zone M is through Cameo and Coal Canyon Road (M13). There is ongoing work to connect the town of Palisade to Cameo and Island Acres Campground via trail, as well as efforts to access the private lands on the bench south of Cameo as the Xcel power plant is decommissioned in that area. This connection will create yet another access from town directly to trails in these areas. With an established trailhead on M13, some resources are already in place to support improvement of existing routes and expansion of new routes in the area.

Zone O from a Bicycle perspective: Zone O offers the opportunity to connect to the Grand Mesa via bordering lands with NFS. Zone O also includes the Palisade Rims, The Blowout, Mesa Slopes, and Horse Mountain. These regions together form contiguous parcels to the east, southeast, and south of the town of Palisade. These areas have trail access via many points, and together could be made to form a recreation area that would be an amazing boon to the economy and quality of life for the town of Palisade. It will be important to assure access to-and-from the Zone to nearby lands, and to establish a Recreation Management Area which will plan future trail development. I would like to see this area turned into an SRMA for multiple types of trail based recreation. Route Comments: Southern region - dont limit access off of Indian Point area. O830/831/833 should be bike accessible O825/O2060 should be bike accessible. Whitewater Basin area O293/O292 should have complete connection to Whitewater basin (NFS boundary) O1219/O1131 - should remain accessible, form loop route. Upper Mesa O1029 - retain as open to mechanized travel for continued access off of the Mesa top Mesa Slopes O141/O226/O239 form nice spur loop O1213 should be continuous O1108 provides nice high access for later connection Flats; south of Horse Mtn O305 - serves as connector to trails in the flats Horse Mtn area O75 - access North from ridgeline road connects to O1794, which allows for loop creation, and its existing trail. Existing trail not on map to the West of O75, and South of E-W road across the hill O1794, O132, and O113 are all part of that loop and make good connectivity around Horse Mtn Route is missing off of existing north O75 wrapping clockwise and intersecting O18 to the east.

– Route: O113

– Segment: 8447

Designation

Proposed Designation: Foot/Horse/Mechanized

Seasonal Limitations: Winter Closure

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Federally Listed vegetation species proximate (200m)

- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Closed

Alternative C (Conservation): Closed

Alternative D (Development): Admin/Permitted Use Only

— Segment: 8252

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Federally Listed vegetation species proximate (200m)
- Lands and Realty Utility corridor
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.

Horse Mtn area - most important access locally to the town of Palisade - I love to be able to ride to Horse Mtn and access dirt quickly. Existing routes are not all catalogued here. Those on the mtn itself already offer nice loop options. O75 - access North from ridgeline road connects to O1794, which allows for loop creation, and its existing trail. This is a nice existing route that is well defined and usable in loop form now. Existing trail is not on map to the West of O75, and South of EW road across the hill O1794, O132, and O113 are all part of that loop and make good connectivity around Horse Mtn Route is missing off of existing north O75 wrapping clockwise and intersecting O18 to the east.

O14 is a nice established route providing entrance from the lower Cottonwood Creek area Accurate Pal Rim trail needs to be added to map O1045 and O1 (Cottonwood & Rapid Creek Roads) are critical access to Mesa direction and upper altitudes. In Zone M, the town of Palisade will focus on mountain bike and trail based recreation around the Bookcliffs. The Bookcliff area offers quick access to little used terrain that is immediately adjacent to the Grand Valley and yet not visibly connected until one reaches the ridgeline of the Bookcliff range. This isolation and eventual visual connection is a unique aspect of Bookcliff area riding. The only local access to this region of Zone M is through Cameo and Coal Canyon Road (M13). There is ongoing work to connect the town of Palisade to Cameo and Island Acres Campground via trail, as well as efforts to access the private lands on the bench south of Cameo as the Xcel power plant is decommissioned in that area. This connection will create yet another access from town directly to trails in these areas. With an established trailhead on M13, some resources are already in place to support improvement of existing routes and expansion of new routes in the area.

Whitewater Basin area - connecting out of or into this basin will be important to making long range connections between the top of the Mesa and the valley floor. A Mesa top to valley floor trail system will be a spectacular way to combine high country temperatures and characteristics with access to towns by bike. This will be a huge economic impact, as well as accessing backcountry trails that are as close to town as possible with short drives up Lands End road. Ultimately, I'd like to see complete singletrack trail connections from Mesa Top trail to the town of Palisade. This would provide the elevation change (both climbing and descending options) and access to such a wide variety of terrain that is quite unique - not available anywhere else in the valley. O293/O292 should have complete connection to Whitewater basin (NFS boundary) O1219/O1131 - should remain accessible, form loop route.

It will be important to assure access to-andfrom the Zone to nearby lands, and to establish a Recreation Management Area which will plan future trail development. I would like to see this area turned into an SRMA for multiple types of trail based recreation. Route Comments: Southern region - dont limit access off of Indian Point area. O830/831/833 should be bike accessible O825/O2060 should be bike accessible. Whitewater Basin area O293/O292 should have complete connection to Whitewater basin (NFS boundary) O1219/O1131 - should remain accessible, form loop route. Upper Mesa O1029 - retain as open to mechanized travel for continued access off of the Mesa top Mesa Slopes O141/O226/O239 form nice spur loop O1213 should be continuous O1108 provides nice high access for later connection Flats; south of Horse Mtn O305 - serves as connector to trails in the flats Horse Mtn area O75 - access North from ridgeline road connects to O1794, which allows for loop creation, and its existing trail. Existing trail not on map to the West of O75, and South of E-W road across the hill O1794, O132, and O113 are all part of that loop and make good connectivity around Horse Mtn Route is missing off of existing north O75 wrapping clockwise and intersecting O18 to the east.

– **Route: O1141**

– **Segment: 10982**

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Access Dispersed Campsite
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Riparian proximate (100 ft)
- Wildlife Elk Winter Range
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce livestock and recreation impacts to riparian areas.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: O1156

Commenter Name: Siegfried, Brandon

Submission Code: cfc0080

Organization:

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Route: O1182

– Segment: 11301

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Recommended: Foot/Horse/Mechanized

Whitewater Basin area - connecting out of or into this basin will be important to making long range connections between the top of the Mesa and the valley floor. A Mesa top to valley floor trail system will be a spectacular way to combine high country temperatures and characteristics with access to towns by bike. This will be a huge economic impact, as well as accessing backcountry trails that are as close to town as possible with short drives up Lands End road. Ultimately, I'd like to see complete singletrack trail connections from Mesa Top trail to the town of Palisade. This would provide the elevation change (both climbing and descending options) and access to such a wide variety of terrain that is quite unique - not available anywhere else in the valley. O293/O292 should have complete connection to Whitewater basin (NFS boundary) O1219/O1131 - should remain accessible, form loop route.

Recommended: Foot/Horse/Mechanized

Key Routes we Would Like to See Remain Open to Bicycles O830/831/833 and O825/O2060 O293/0292 should have complete connection to Whitewater basin (NFS boundary) O1219/O1131 - should remain accessible, form loop route. O1029 - retain as open to mechanized travel for continued access off of the Mesa top O141/O226/O239 form nice spur loop O1213 should be continuous O1108 provides nice high access for later connection O305 - serves as connector to trails in the flats O75 - access North from ridgeline road connects to O1794, which allows for loop creation, and its existing trail. Existing trail not on map to the West of O75, and South of E-W road across the hill O1794, O132, and O113 are all part of that loop and make good connectivity around Horse Mtn Route is missing off of existing north O75 wrapping clockwise and intersecting O18 to the east. O57 provide access northward from upper reaches of Blowout - very important ridgeline to long range route options. O14 is a nice established route providing entrance from the lower Cottonwood Creek area Accurate Pal Rim trail needs to be added to map O1045 and O1 (Cottonwood & Rapid Creek Roads) are critical access to Mesa direction and upper altitudes. In Zone M, the town of Palisade will focus on mountain bike and trail based recreation around the Bookcliffs. The Bookcliff area offers quick access to little used terrain that is immediately adjacent to the Grand Valley and yet not visibly connected until one reaches the ridgeline of the Bookcliff range. This isolation and eventual visual connection is a unique aspect of Bookcliff area riding. The only local access to this region of Zone M is through Cameo and Coal Canyon Road (M13). There is ongoing work to connect the town of Palisade to Cameo and Island Acres Campground via trail, as well as efforts to access the private lands on the bench south of Cameo as the Xcel power plant is decommissioned in that area. This connection will create yet another access from town directly to trails in these areas. With an established trailhead on M13, some resources are already in place to support improvement of existing routes and expansion of new routes in the area.

Commenter Name: Monholland, Landon

Zone O from a Bicycle perspective: Zone O offers the opportunity to connect to the Grand Mesa via bordering lands with NFS. Zone O also includes the Palisade Rims, The Blowout, Mesa Slopes, and Horse Mountain. These regions together form contiguous parcels to the east, southeast, and south of the town of Palisade. These areas have trail access via many points, and together could be made to form a recreation area that would be an amazing boon to the economy and quality of life for the town of Palisade. It will be important to assure access to-and-from the Zone to nearby lands, and to establish a Recreation Management Area which will plan future trail development. I would like to see this area turned into an SRMA for multiple types of trail based recreation. Route Comments: Southern region - dont limit access off of Indian Point area. O830/831/833 should be bike accessible O825/O2060 should be bike accessible. Recommened: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Route: 0146**– Segment: 8402****Designation ?****Proposed Designation: Closed****Seasonal Limitations: None****Designation Following Mitigation: Foot/Horse****Seasonal Limitations: None****Mitigation**

- Work with Land Owner on Public Access

Rationale**Designation Criteria**

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Soils Slope Greater than 40%
- Special Designation VRM Class III
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Wildlife Emphasis Area
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to eliminate duplicative or redundant routes in areas with slopes exceeding 40 percent.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Route: 01508

– Segment: 9711

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Not Meeting Public Land health Standard (1)
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

No public comments for this Route

– Route: 01750

– Segment: 10207

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant

routes susceptible to cheatgrass and noxious weed infestations.

- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Public Comments On Route: O1750

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0080

Recommened: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Route: O1756

– Segment: 10765

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Lands and Realty Utility corridor
- Range Study Site

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.

- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.
- Designation was considered to maintain a minimum of administrative access to range study sites.

We live on 35 Road (East Orchard Mesa) and access the BLM land from Upland Drive with our ATV and 4-wheel drive vehicles using primarily Roads 0118, 01594, 01779, 0153, 0147, 0132, and 018. We use the BLM lands for recreation, to exercise our dog, and for our own exercise. We appreciate the beauty and seclusion of the country. We want this area to stay open to off highway vehicles. Closing these roads would decrease our property value and decrease our quality of life. Part of the reason we moved here was because of BLM access close to our house. We use this area on a daily basis, year around.

Submission Code: emc0456

Organization:

Recommened: Open (All modes of travel)

We live on 35 Road (East Orchard Mesa) and access the BLM land from Upland Drive with our ATV and 4-wheel drive vehicles using primarily Roads 0118, 01594, 01779, 0153, 0147, 0132, and 018. We use the BLM lands for

recreation, to exercise our dog, and for our own exercise. We appreciate the beauty and seclusion of the country. We want this area to stay open to off highway vehicles. Closing these roads would decrease our property value and decrease our quality of life. Part of the reason we moved here was because of BLM access close to our house. We use this area on a daily basis, year around.

Horse Mtn area - most important access locally to the town of Palisade - I love to be able to ride to Horse Mtn and access dirt quickly. Existing routes are not all catalogued here. Those on the mtn itself already offer nice loop options. O75 - access North from ridgeline road connects to O1794, which allows for loop creation, and its existing trail. This is a nice existing route that is well defined and usable in loop form now. Existing trail is not on map to the West of O75, and South of EW road across the hill O1794, O132, and O113 are all part of that loop and make good connectivity around Horse Mtn Route is missing off of existing north O75 wrapping clockwise and intersecting O18 to the east.

Zone O from a Bicycle perspective: Zone O offers the opportunity to connect to the Grand Mesa via bordering lands with NFS. Zone O also includes the Palisade Rims, The Blowout, Mesa Slopes, and Horse Mountain. These regions together form contiguous parcels to the east, southeast, and south of the town of Palisade. These areas have trail access via many points, and together could be made to form a recreation area that would be an amazing boon to the economy and quality of life for the town of Palisade. It will be important to assure access to-and-from the Zone to nearby lands, and to establish a Recreation Management Area which will plan future trail development. I would like to see this area turned into an SRMA for multiple types of trail based recreation. Route Comments: Southern region - dont limit access off of Indian Point area. O830/831/833 should be bike accessible O825/O2060 should be bike accessible. Whitewater Basin area O293/O292 should have complete connection to Whitewater basin (NFS boundary) O1219/O1131 - should remain accessible, form loop route. Upper Mesa O1029 - retain as open to mechanized travel for continued access off of the Mesa top Mesa Slopes O141/O226/O239 form nice spur loop O1213 should be continuous O1108 provides nice high access for later connection Flats; south of Horse Mtn O305 - serves as connector to trails in the flats Horse Mtn area O75 - access North from ridgeline road connects to O1794, which allows for loop creation, and its existing trail. Existing trail not on map to the West of O75, and South of E-W road across the hill O1794, O132, and O113 are all part of that loop and make good connectivity around Horse Mtn Route is missing off of existing north O75 wrapping clockwise and intersecting O18 to the east.

Public Comments On Route: 0192

No public comments for this Route

– Route: 01935

– Segment: 11681

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Not Meeting Public Land health Standard (1)
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Public Comments On Route: 02003

Commenter Name: Rechel, Eric

Organization:

Submission Code: rmc0049

Reccomended: Closed

Need to keep motorized travel limited to roads that are graded and maintained otherwise there will be an increase in dust, especially with the drought. I approve of closing roads 02022, and 02025. Close roads around Chenny Reservoir e.g. 0840,0832, and 02003.

– Route: 02019

– Segment: 13346

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Soils Not Meeting Public Land health Standard (1)
- Soils Mancos Shale areas
- Soils Slumping soils

- Vegetation Federally Listed vegetation species proximate (200m)

- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Water Stream Crossing
- Wildlife Pronghorn Antelope Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to eliminate duplicative or redundant routes with slump areas.
- Designation was considered to reduce as much as practicable route density (miles/square mile) within 200 meters of known Threatened and Endangered plant occurrences throughout the field office.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Rapid Creek and Cottonwood Creek, Trails O1, O1046, O1045, O32, O998, O193, O206, O205, should be designated and maintained as Horse and Hiking Trails. These trails which form a network in the canyons and up on top are a beautiful ride on horseback, with grand vistas, water, woods, and some grass. While we could ride them as Admin trails they need and deserve designation and maintenance to keep them in good shape, otherwise, wash outs and over growth will occur. These trails are important assets to the horse community and deserve better care. In addition, with proper permissions, they connect with the trails leading to the Chalk Mountain Area. Because of the need for admin access to the upper reservoirs, the cottonwood trails may need to be wider than normal.

Commenter Name: Shepherd, Janice
Submission Code: emc0835

Organization: The Quiet Trails Group
Recommended: Foot/Horse/Mechanized

Specifically we support the closure and rehab of O887, O885 and O731 to protect the rare plants in the area. We are also interested that O293 retains its designation as bike, foot and horse. We note though the oddity in Alt B where O293, a bike, horse, foot routes is bounded at each end by Admin/Permittee routes. It is our understanding that Admin/Permittee routes are open to horse and foot but not bikes. Through access is needed for mountain bikers that includes route O293 as this provides access to the Whitewater Basin trail system. We also support designating the Rapid Creek and Cottonwood Creek trail complex (O1, 1046, O1045, O32, O998, O193, O206, O205) as horse, foot and biking trails. The BLM should work out with the adjoining landowners permissions to allow for a nonmotorized loop that includes O1 and O1045.

– Route: O239

– Segment: 7994

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Water Stream Crossing
- Wildlife Wildlife Emphasis Area
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Submission Code: emc0922

Reccomended: Foot/Horse/Mechanized

Zone O from a Bicycle perspective: Zone O offers the opportunity to connect to the Grand Mesa via bordering lands with NFS. Zone O also includes the Palisade Rims, The Blowout, Mesa Slopes, and Horse Mountain. These regions together form contiguous parcels to the east, southeast, and south of the town of Palisade. These areas have trail

access via many points, and together could be made to form a recreation area that would be an amazing boon to the economy and quality of life for the town of Palisade. It will be important to assure access to-and-from the Zone to nearby lands, and to establish a Recreation Management Area which will plan future trail development. I would like to see this area turned into an SRMA for multiple types of trail based recreation. Route Comments: Southern region - dont limit access off of Indian Point area. O830/831/833 should be bike accessible O825/O2060 should be bike accessible. Whitewater Basin area O293/O292 should have complete connection to Whitewater basin (NFS boundary) O1219/O1131 - should remain accessible, form loop route. Upper Mesa O1029 - retain as open to mechanized travel for continued access off of the Mesa top Mesa Slopes O141/O226/O239 form nice spur loop O1213 should be continuous O1108 provides nice high access for later connection Flats; south of Horse Mtn O305 - serves as connector to trails in the flats Horse Mtn area O75 - access North from ridgeline road connects to O1794, which allows for loop creation, and its existing trail. Existing trail not on map to the West of O75, and South of E-W road across the hill O1794, O132, and O113 are all part of that loop and make good connectivity around Horse Mtn Route is missing off of existing north O75 wrapping clockwise and intersecting O18 to the east.

O14 is a nice established route providing entrance from the lower Cottonwood Creek area Accurate Pal Rim trail needs to be added to map O1045 and O1 (Cottonwood & Rapid Creek Roads) are critical access to Mesa direction and upper altitudes. In Zone M, the town of Palisade will focus on mountain bike and trail based recreation around the Bookcliffs. The Bookcliff area offers quick access to little used terrain that is immediately adjacent to the Grand Valley and yet not visibly connected until one reaches the ridgeline of the Bookcliff range. This isolation and eventual visual connection is a unique aspect of Bookcliff area riding. The only local access to this region of Zone M is through Cameo and Coal Canyon Road (M13). There is ongoing work to connect the town of Palisade to Cameo and Island Acres Campground via trail, as well as efforts to access the private lands on the bench south of Cameo as the Xcel power plant is decommissioned in that area. This connection will create yet another access from town directly to trails in these areas. With an established trailhead on M13, some resources are already in place to support improvement of

existing routes and expansion of new routes in the area.

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Open (All modes of travel)

— Segment: 10268

Designation ?

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Special Status Species survey and possible mitigation

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Not Meeting Public Land health Standard (1)
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Submission Code: cfc0080

Reccomended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Route: O266

– Segment: 10322

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Not Meeting Public Land health Standard (1)
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Water Stream Crossing

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Public Comments On Route: 0310

Commenter Name: Siegfried, Brandon

Submission Code: cfc0080

Organization:

Reccomended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWS) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Route: 032

– Segment: 8113

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Other Considerations County Vested Interest
- Soils Severe Erosion Hazard roads and trails
- Soils Not Meeting Public Land health Standard (1)
- Soils Fragile soils
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard
- Water Municipal Watersheds and source-water protection areas
- Water Does not meets Public Land Health Standard Hydro
- Wildlife Wildlife Emphasis Area
- Lands and Realty Utility corridor
- Range Study Site

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce point and non-point source contributions of water quality contaminants from public lands by reducing disturbance footprints associated with travel infrastructure and other surface disturbing actions while also maintaining access and meeting resource use objectives.
- Designation was considered to maintain a minimum of administrative access to range study sites.

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Admin/Permitted Use Only

– Segment: 8141

Designation

Proposed Designation: Admin/Permitted Use Only
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Other Considerations County Vested Interest
- Soils Severe Erosion Hazard roads and trails
- Soils Not Meeting Public Land health Standard (1)
- Soils Fragile soils
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard
- Water Municipal Watersheds and source-water protection areas
- Water Does not meets Public Land Health Standard Hydro
- Wildlife Wildlife Emphasis Area
- Lands and Realty Utility corridor
- Range Study Site

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Commenter Name: Potterveld, Jan

Submission Code: emc0634

Organization: Back Country Horsemen of Colorado

Recommended: Foot/Horse

Rapid Creek and Cottonwood Creek, Trails O1, O1046, O1045, O32, O998, O193, O206, O205, should be designated and maintained as Horse and Hiking Trails. These trails which form a network in the canyons and up on top are a

beautiful ride on horseback, with grand vistas, water, woods, and some grass. While we could ride them as Admin trails they need and deserve designation and maintenance to keep them in good shape, otherwise, wash outs and over growth will occur. These trails are important assets to the horse community and deserve better care. In addition, with proper permissions, they connect with the trails leading to the Chalk Mountain Area. Because of the need for admin access to the upper reservoirs, the cottonwood trails may need to be wider than normal.

Commenter Name: Shepherd, Janice
Submission Code: emc0835

Organization: The Quiet Trails Group
Recommended: Foot/Horse/Mechanized

Specifically we support the closure and rehab of O887, O885 and O731 to protect the rare plants in the area. We are also interested that O293 retains its designation as bike, foot and horse. We note though the oddity in Alt B where O293, a bike, horse, foot routes is bounded at each end by Admin/Permittee routes. It is our understanding that Admin/Permittee routes are open to horse and foot but not bikes. Through access is needed for mountain bikers that includes route O293 as this provides access to the Whitewater Basin trail system. We also support designating the Rapid Creek and Cottonwood Creek trail complex (O1, 1046, O1045, O32, O998, O193, O206, O205) as horse, foot and biking trails. The BLM should work out with the adjoining landowners permissions to allow for a nonmotorized loop that includes O1 and O1045.

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Commenter Name: Siegfried, Brandon

Organization: Grand Mesa Jeep Club

Submission Code: cfc0071

Recommened: Open (All modes of travel)

There are many established routes in the Whitewater Hill OHV area that fall under RS 2477 as they were constructed prior to 1976 and the BLM has no legal authority to close these legal ROW's under RS 2477. The routes identified as 069, 0457, 0468, 0405, 0490, 0432, 01125, 01133, 0358, 0330 should remain open to motorized use as

they are a legal ROW. I claim RS 2477 on these routes. Having a variety of areas to ride OHV's in the Grand Valley will offer safer and more enjoyable riding conditions for our youth, visitors and residents. High Density riding situations could prove hazardous and result in injury or death and alter the enjoyment of the experience. Finding peace and solitude is often desired.

- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Federally Listed vegetation species In or Through (20m points)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce as much as practicable route density (miles/square mile) within 200 meters of known Threatened and Endangered plant occurrences throughout the field office.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

No public comments for this Route

– Route: 0332

– Segment: 10836

Designation ?

Proposed Designation: Foot/Horse/Mechanized

Seasonal Limitations: None

Mitigation

- Reroute
- Needs More Data
- Special Status Species plants

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations County Vested Interest
- Recreation Extensive Recreation Management Area
- Special Designation VRM Class III
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)

Rationale for Decision

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.

Public Comments On Route: O367

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0080

Recommened: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWS) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Special Designation VRM Class IV
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Open (All modes of travel)

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Open (All modes of travel)

Public Comments On Route: 0370

No public comments for this Route

– Route: 0375

– Segment: 10622

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Public Comments On Route: 0388

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0080

Reccomended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Public Comments On Route: 0432

Commenter Name: Siegfried, Brandon

Submission Code: cfc0080

Organization:

Recommened: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Commenter Name: Siegfried, Brandon

Submission Code: cfc0071

Organization: Grand Mesa Jeep Club

Recommened: Open (All modes of travel)

There are many established routes in the Whitewater Hill OHV area that fall under RS 2477 as they were constructed prior to 1976 and the BLM has no legal authority to close these legal ROW's under RS 2477. The routes

identified as 069, 0457, 0468, 0405, 0490, 0432, 01125, 01133, 0358, 0330 should remain open to motorized use as they are a legal ROW. I claim RS 2477 on these routes. Having a variety of areas to ride OHV's in the Grand Valley will offer safer and more enjoyable riding conditions for our youth, visitors and residents. High Density riding situations could prove hazardous and result in injury or death and alter the enjoyment of the experience. Finding peace and solitude is often desired.

- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce as much as practicable route density (miles/square mile) within 200 meters of known Threatened and Endangered plant occurrences throughout the field office.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to protect shallow pipeline infrastructure, maintain administrative access (only) over pipeline facilities.

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale**Designation Criteria**

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural Historic Trail
- Cultural High Potential Cultural Class 1 Modeling
- Cultural Historic Trail
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Lands and Realty ROW

Rationale for Decision

- Designation was considered to minimize ongoing or potential impacts to historic trails that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to protect shallow pipeline infrastructure, maintain administrative access (only) over pipeline facilities.

Designation ?

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).

- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Public Comments On Route: 0434

Commenter Name: Herron, Lydia

Organization:

Submission Code: emc0806

Recommened: Open (All modes of travel)

Zone O = Whitewater Hill OHV open area While a smaller area than the Grand Valley OHV area, it has many similar characteristics, and besides "open" riding, offers trail riding through the rocks and desert shrubbery. These are great trails! Not too technical, but enough to make it fun. We have started rides with friends and family off Hwy 50, just South/East of 32 Road intersection and then traveled on the rocky & diverse trails over to Kannah Creek Rd/Lands End Rd. There is one trail (# unknown) that is a technical, rocky, continuously inclining route, which climbs its way upward above Palisade. It does dead end at an administrative use gate, but the view was spectacular and the ride exhilarating. We do not want to see any closures in this area. We would like to see Alternative A or Alternative D routes remain open for this area. Some trails in Alternative B, slated for administrative use that wed like to have remain open for public use are O736, O937, O812, O434 & O440, O1046, O104, as these and others that have recreation value. This zone should also remain an intensive OHV use area.

Commenter Name: Siegfried, Brandon

Commenter Name: Siegfried, Brandon

Organization: Grand Mesa Jeep Club

Submission Code: cfc0071

Recommended: Open (All modes of travel)

There are many established routes in the Whitewater Hill OHV area that fall under RS 2477 as they were constructed prior to 1976 and the BLM has no legal authority to close these legal ROW's under RS 2477. The routes identified as 069, 0457, 0468, 0405, 0490, 0432, 01125, 01133, 0358, 0330 should remain open to motorized use as they are a legal ROW. I claim RS 2477 on these routes. Having a variety of areas to ride OHV's in the Grand Valley will offer safer and more enjoyable riding conditions for our youth, visitors and residents. High Density riding situations could prove hazardous and result in injury or death and alter the enjoyment of the experience. Finding peace and solitude is often desired.

– Route: 0474

– Segment: 11596

Designation

Proposed Designation: Foot/Horse/Mechanized
Seasonal Limitations: None

Mitigation

- Needs More Data
- Special Status Species plants

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations County Vested Interest
- Recreation Extensive Recreation Management Area
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Federally Listed vegetation species proximate (200m)

Rationale for Decision

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.

Alternative B (Preferred): Admin/Permitted Use Only

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Admin/Permitted Use Only

– Segment: 11606

Designation

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Public Comments On Route: 0474

No public comments for this Route

– Route: 0486

– Segment: 10208

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: Winter Closure

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Water Municipal Watersheds and source-water protection areas
- Wildlife Elk Winter Range
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations during critical periods.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Public Comments On Route: 0486

Commenter Name: Siegfried, Brandon

Submission Code: cfc0080

Organization:

Recommened: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Designation [?](#)

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural Historic Trail
- Cultural High Potential Cultural Class 1 Modeling
- Cultural Historic Trail
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Federally Listed vegetation species In or Through (20m points)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Lands and Realty ROW

Rationale for Decision

- Designation was considered to minimize ongoing or potential impacts to historic trails that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce as much as practicable route density (miles/square mile) within 200 meters of known Threatened and Endangered plant occurrences throughout the field office.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.

- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to protect shallow pipeline infrastructure, maintain administrative access (only) over pipeline facilities.

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Known Cultural Site Visible or Nuisance

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

– Segment: 11732

Designation ?

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: Winter Closure

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Recreation Access Dispersed Campsite
- Special Designation VRM Class III
- Water Municipal Watersheds and source-water protection areas
- Wildlife Mule Deer Winter Range
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to provide access to undeveloped campsites that exist along dead-end spur roads.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations during critical periods.

Public Comments On Route: 0659

Commenter Name: Siegfried, Brandon

Submission Code: cfc0080

Organization:

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Commenter Name: Velarde, Ron

Submission Code: rmc0074

Organization: Colorado Parks and Wildlife

Recommended: Admin/Permitted Use Only

Zone 0 Road 0822 and 0813. In Alternative B (preferred alternative) the BLM is proposing to keep 822 open with current winter timing stipulations, and close and rehab 813. Currently, BLM does not have a legal access easement to use 822. and the United States Forest Service does have a legal easement to use 813. This mixed use of access roads needs to be cleared up and finalized/memorialized in a document and depict it in the BLMs travel management plan. If BLM cannot get an easement for 822, it should be closed & rehabbed, and 813 opened. Road

0822. The BLM proposes to turn 0822 into a foot, horse, and bike trail in Alternative B & C; CPW does not support this change in any alternative. This area is not used by mountain bikers or hikers, and is used primarily by hunters. Currently hunters can drive an ATV to the BLM USFS boundary, and must hike from there. There is also an extensive road that takes off from 0822 (generally at the center of S8. T13S, R97W) to old habitat treatments that is not labeled in any alternative. This road should remain open with a big game winter season closure (December 1 to April 15). Roads 02033, 02036, 02035, 0833, 0827, & 0825. The main route driven by hunters to get from Kannah Creek to Hwy 50 has many sections that show up as administrative only. 02033, 02036, 02035, 0833, 0827, & 0825 are the main access roads, and they should remain open. Road 02034. This road leads to a campsite and probably doesn't need to be designated but should remain open. Road 0825. In Alternative D 0825 is an ATV only trail, this is a good road, that can easily handle truck traffic. CPW recommends that it be designated as open to all vehicles. Roads 0836 and 0831. There are many roads that essentially go the same place as other existing roads, the BLM proposes to make many of them administrative in Alternative B. For example 0836, and 0831 will continue to be used by the public unless they are closed and rehabbed. CPW would like to see expanded implementation of administratively closed roads in Zone 0. Road 0832. In Alternative B, there would be no legal public access to Cheney Reservoir, an area used by waterfowl and small game hunters. CPW recommends that Road 0832 be designated as open, and the remaining roads in close proximity to Cheney be closed and rehabbed. Roads 0762 and 0731. Roads 0762 and 0731 are power line roads. CPW recommends that these roads and other power line roads be designated as Administrative so that maintenance can be done if needed. The roads should be closed to the general public. Road 0659. Road 0659 leads to an irrigation structure for the City of Grand Junction, Alternative B shows this road be closed and rehabbed. CPW recommends that the road be designated as Administrative. Road 0292 leads to the trailhead for the Whitewater Creek Trail onto the forest, most of this road is open, and there is no good reason to stop the public from driving all the way to the gate/forest boundary. CPW recommends that the road remain open. Road 0980 and 0983. Roads 0980 and 0983 are proposed to be closed and rehabbed in Alternative B near Palisade Point. The roads are administrative and should be designated as such.

– Route: 0663

- Wildlife Bald Eagle Nest (0.5 miles)

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to reduce route density in areas where long-term management is designed to protect wilderness characteristics.
- Designation was considered to minimize surface disturbing activities such that the natural quality of the area is maintained. Also to maintain opportunities for solitude and primitive recreation where they occur in the areas.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

– Segment: 9877

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Federally Listed vegetation species In or Through (20m points)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce as much as practicable route density (miles/square mile) within 200 meters of known Threatened and Endangered plant occurrences throughout the field office.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Public Comments On Route: 073

Commenter Name: BE, Andrew

Organization:

Submission Code: emc0358

Reccomended: Open (All modes of travel)

We have 3 launch sites within the RMP zone which have been actively used for decades by free-flight pilots from around the western United States. Two of these sites (Reeder Mesa, roads 073, J0737/0738, and Otto's Ridge, road K64 and access) are flown year-round and are known for their steady conditions, safe learning environment for newer pilots and progressive conditions for intermediate pilots. They're known for smooth, multiple-hour flights. The third site (Peanut Point, road E27 and access) is known as one of the best cross-country flying sites in Colorado, with many flights exceeding 100 miles. All three of these sites are established and insured through a national governing organization, the US Hang Gliding and Paragliding Association (USHPA). Personally, I fly Otto's Ridge and Reeder Mesa sometimes 3-4 times per week. I have worked with the private property owners at Reeder Mesa (who grant access to the BLM land across their private property) for 7 years to ensure good relationships are maintained. I have worked with pilots, instructors and USHPA to promote good land-use practices to ensure minimal impact and long-term accessibility.

Public Comments On Route: 0731

Commenter Name: Shepherd, Janice

Submission Code: emc0835

Organization: The Quiet Trails Group

Recommended: Closed

Specifically we support the closure and rehab of O887, O885 and O731 to protect the rare plants in the area. We are also interested that O293 retains its designation as bike, foot and horse. We note though the oddity in Alt B where O293, a bike, horse, foot routes is bounded at each end by Admin/Permittee routes. It is our understanding that Admin/Permittee routes are open to horse and foot but not bikes. Through access is needed for mountain bikers that includes route O293 as this provides access to the Whitewater Basin trail system. We also support designating

the Rapid Creek and Cottonwood Creek trail complex (O1, 1046, O1045, O32, O998, O193, O206, O205) as horse, foot and biking trails. The BLM should work out with the adjoining landowners permissions to allow for a nonmotorized loop that includes O1 and O1045.

Commenter Name: Rechel, Eric

Organization:

Submission Code: rmc0049

Reccomended: Closed

Zone 0: Roads 0887,0885,0882,0731, should be closed. The entire area where these roads are located should be off limits to motorized travel because of presence of Colorado Hookless cactus.

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0080

Reccomended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWS) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Commenter Name: Velarde, Ron

Organization: Colorado Parks and Wildlife

Submission Code: rmc0074

Reccomended: Admin/Permitted Use Only

Zone 0 Road 0822 and 0813. In Alternative B (preferred alternative) the BLM is proposing to keep 822 open with current winter timing stipulations, and close and rehab 813. Currently, BLM does not have a legal access easement to use 822. and the United States Forest Service does have a legal easement to use 813. This mixed use of access roads needs to be cleared up and finalized/memorialized in a document and depict it in the BLMs travel management plan. If BLM cannot get an easement for 822, it should be closed & rehabbed, and 813 opened. Road 0822. The BLM proposes to turn 0822 into a foot, horse, and bike trail in Alternative B & C; CPW does not support this change in any alternative. This area is not used by mountain bikers or hikers, and is used primarily by hunters. Currently hunters can drive an ATV to the BLM USFS boundary, and must hike from there. There is also an extensive road that takes off from 0822 (generally at the center of S8. T13S, R97W) to old habitat treatments that is not labeled in any alternative. This road should remain open with a big game winter season closure (December 1 to April 15). Roads 02033, 02036, 02035, 0833, 0827. & 0825. The main route driven by hunters to get from Kannah Creek to Hwy 50 has many sections that show up as administrative only. 02033, 02036, 02035, 0833, 0827, & 0825 are the main access roads, and they should remain open. Road 02034. This road leads to a campsite and probably doesn't need to be designated but should remain open. Road 0825. In Alternative D 0825 is an ATV only trail, this is a good road, that can easily handle truck traffic. CPW recommends that it be designated as open to all vehicles. Roads 0 836 and 0831. There arc many roads that essentially go the same place as other existing roads, the BLM proposes to make many of them administrative in Alternative B For example 0836, and 0831 will continue to be used by the public unless they are closed and rehabbed. CPW would like to see expanded implementation of administratively closed roads in Zone 0. Road 0832. In Alternative B, there would be no legal public access to Cheney Reservoir, an area used by waterfowl and small game hunters. CPW recommends that Road 0832 be designated as open, and the remaining roads in close proximity to Cheney be closed and rehabbed. Roads 0762 and 0731. Roads 0762 and 0731 are power line roads. CPW recommends that these roads and other power line roads be designated as Administrative so that maintenance can be done if needed. The roads should be closed to the general public. Road 0659. Road 0659 leads to an imigation structure for the City of Grand Junction, Alternative B shows this road be closed and rehabbed CPW recommends that the road be designated as Administrative. Road 0292 leads to the trailhead for the Whitevater Creek Trail onto the forest, most of this road is open, and there is no good reason to stop the public from driving all the way to the gate/forest boundary. CPW recommends that the road remain open. Road 0980 and 0983. Roads 0980 and 0983 are proposed to be closed and rehabbed in Alternative B near Palisade Point. The roads are administrative and should be designated as such.

Route: 0736

— Segment: 11707

Designation

Proposed Designation: Admin/Permitted Use Only
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Wildlife Wildlife Emphasis Area
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Public Comments On Route: 0736

Commenter Name: Harris, Jonathan

Submission Code: emc0334

Organization:

Recommended: Open (All modes of travel)

*Aside from my personal interest in maintaining these sites, they are a draw for some pilots from across the country, potentially providing tourist dollars for the local economy.

Commenter Name: Brown, Matt

Submission Code: cfc0059

Organization:

Recommended: Open (All modes of travel)

These are the only access roads to these locations which have been used by hang gliders and Para gliders for almost 40 years. Foot launch aviation sites are few and far between and we cannot afford to lose access to these sites. As a hang glider pilot, I can tell you these are the only flyable sites in the area and losing them would be devastating to the flying community.

Commenter Name: Hanning, David**Organization:****Submission Code: emc0328****Recommended: Open (All modes of travel)**

As a user of public lands for multiple sports I am requesting that the BLM maintain or improve current access and support of Paragliding and Hang gliding. 1. request to maintain full access to: - Road K.64 and access (Otto's Ridge fly-site) - Roads 0736, 0737, 0738 (Reeder M.s. fly-site) - Road E27 and access (Peanut Point) 2. our sport and land-use needs: - Unlike other recreational activities, we necessitate a very small amount of access to very specific locations. - Our sport has extremely low impact on public land. - These flying sites are flown year-round by pilots from across the western United States. - Reeder Mesa and Otto's Ridge sites are known to be some of the safest and consistently used in Colorado. - These sites fulfill an essential role of helping beginning and intermediate pilots safely learn and hone their skills. - These are established and insured flying sites with the US Hang Gliding and Paragliding Association.

Commenter Name: Banks, Granger**Organization: USHPA****Submission Code: emc0331****Recommended: Open (All modes of travel)**

I have been alerted to proposed closing of access to these roads: - Road K64 and access (Otto's Ridge fly-site) - Roads 0736, 0737, 0738 (Reeder Mesa fly-site) - Road E27 and access (Peanut Point) Sat, Feb 23, 2013 at 8:05 AM As a paragliding instructor that regularly visits these areas and brings pilots there that spend money in the local businesses, I encourage you to keep these roads open.

Commenter Name: Ratay, Chris**Organization:****Submission Code: emc0332****Recommended: Open (All modes of travel)**

I was recently informed that the BLM is considering closing access for paragliding pilots to Otto's Ridge, Reeder Mesa, and Peanut Point. (Road K64 and access, Roads 0736, 0737, 0738, and Road E27 and access to flying site). I am a Colorado resident and although there is plenty of BLM land here in Boulder, I don't get to utilize most of it. I utilize the roads listed above to access safe paragliding sites. I am a beginner/intermediate paraglider, and there are limited places in Colorado that I can safely fly to improve my skills. Paragliding is low-impact on public land and the environment, far less than many mountain and dirt bike trails I've used in the past. I didn't like the impact the dirt-bike caused, and have since gotten rid of them. The sites at Otto's Ridge and Reeder Mesa are safe and with consistent conditions make it worth traveling over from the Front Range. They are established and insured flying sites with the US Hang Gliding and Paragliding Association.

Commenter Name: Lawrence, Jerry**Organization:****Submission Code: emc0333****Recommended: Open (All modes of travel)**

I am a paragliding pilot from Westcliffe, CO. I am writing to ask that you not restrict access to some of the best flying sites in Colorado. Specifically: - Road K64 and access (Otto's Ridge fly-site) - Roads 0736, 0737, 0738 (Reeder Mesa fly site) - Road E27 and access (Peanut Point) Sat, Feb 23, 2013 at 9:01 AM These are established and insured flying sites with the US Hang Gliding and Paragliding Association. Our sport has extremely low impact on public land. These flying sites are flown year-round by pilots from across the western United States. Reeder Mesa and Otto's Ridge sites are known to be some of the safest and most consistently used in Colorado.

Commenter Name: Lawrence, Jerry**Organization:****Submission Code: emc0333****Recommended: Open (All modes of travel)**

Organization: ALTUS Environmental, LLC

Submission Code: emc0357

Reccomended: Open (All modes of travel)

Further, these sites, especially Reeder Mesa and Otto's Ridge offer safe environments for newer pilots to hone their skills. From what I know, all three sites are established and insured flying sites by our governing body, USHPA. We often use Road K64 and access for Otto's Ridge and roads 0736, 0737, and 0738 for the Reeder Mesa site.

Commenter Name: McGlammery, Matthew

Organization:

Submission Code: emc0365

Reccomended: Open (All modes of travel)

As a paraglider pilot I have a keen interest in keeping the following sites available for access to both drive up to launch and to participate in paragliding activities. - Road K64 and access (Otto's Ridge fly-site) - Roads 0736, 0737, 0738 (Reeder Mesa fly-site) - Road E27 and access (Peanut Point) All the sites are important as free flying sites, I am particularly fond of Otto's Ridge, Road K64 and would very much like to keep it available for drive up transportation, camping and foot traffic. Since all the options except Option A would close road K64 my only choice for an Alternative is Alternative A: No changes to current access.

Commenter Name: Hach, David

Organization:

Submission Code: emc0367

Reccomended: Open (All modes of travel)

I write today to express that full access be maintained to Otto's Ridge, Reeder Mesa, and Peanut Point. Specifically, roads K64 and access to Otto's Ridge, roads 0736, 0737, and 0738 to the Reeder Mesa fly site, and road E27 to Peanut Point. I support Altematiw A, no change to currant access so that we may continue to enjoy using these special sites. I personally use the Otto's Ridge site several times per year.

Commenter Name: Kurtz, Douglas

Organization:

Submission Code: emc0380

Reccomended: Open (All modes of travel)

I'm a Colorado paraglider pilot witing in response to proposed closures to Road K64, Roads 0736, 0737, 0738, and Road E27. All of these roads access flying sites that are central to our sport in the Grand Junction area.

Commenter Name: Kocurek, Richard

Organization:

Submission Code: emc0400

Reccomended: Open (All modes of travel)

Maintain full access to: - Road K64 and access (Ottos Ridge fly-site) - Roads 0736, 0737, 0738 (Reeder Mesa fly-site) - Road E27 and access (Peanut Point) Unlike other recreational activities, we necessitate a very small amount of access to very specific locations. Our sport has extremely low impact on public land. These flying sites are flown

year-round by pilots from across the western United States. Reeder Mesa and Ottos Ridge sites are known to be some of the safest and most consistently used in Colorado. These sites fulfill an essential role of helping beginning and intermediate pilots safely improve and hone their skills. These are established and insured flying sites with the US Hang Gliding and Paragliding Association.

Commenter Name: Su, Steve

Organization:

Recommended: Open (All modes of travel)

I'm writing to keep road access to Road K64 and access (Ottos Ridge fly-site), Roads O736, O737, O738 (Reeder Mesa fly-site), Road E27 and access (Peanut Point). These roads are essential for paraglider pilots to have safe access to these unique spots. As a beginner pilot these are some of the only areas with consistent smooth winds which novices can learn safely. In addition these sites allow year-round flying. Many pilots from all over the country visit these sites as it is so unique and scenic. These sites already have been established for many years and are insured with the US Hang Gliding and Paragliding Association. Please maintain access to the roads stated above.

Commenter Name: Christian, Paul

Submission Code: emc0441

Recommended: Open (All modes of travel)

I am a paraglider and I am requesting that Road K64 and access (Ottos Ridge fly-site), Roads O736, O737, O738 (Reeder Mesa fly-site), and Road E27 and access (Peanut Point) remain open.

Commenter Name: Dumont, Loren

Organization:

Submission Code: emc0512

Recommended: Open (All modes of travel)

Reeder Mesa Paraglider pilots need O736 and (O936 where it connects to O736 to the southwest) to remain open because this is the only road we have to access the Reeder Mesa launch site. O737 is a side road that does not affect us. We currently have permission from the land owners to drive down their driveway to access the southern end of O936, as long as we drive slowly down their driveway. Reeder Mesa launch site is an intermediate paragliding area that has a ridge about 1 mile long. Reeder Mesa launch is located at 38 58'44.01"N 108 19'36.21"W. I got these coordinates from Google Earth.

Zone O = Whitewater Hill OHV open area While a smaller area than the Grand Valley OHV area, it has many similar characteristics, and besides "open" riding, offers trail riding through the rocks and desert shrubbery. These are great trails! Not too technical, but enough to make it fun. We have started rides with friends and family off Hwy 50, just South/East of 32 Road intersection and then traveled on the rocky & diverse trails over to Kannah Creek Rd/Lands End Rd. There is one trail (# unknown) that is a technical, rocky, continuously inclining route, which climbs its way upward above Palisade. It does dead end at an administrative use gate, but the view was spectacular and the ride exhilarating. We do not want to see any closures in this area. We would like to see Alternative A or Alternative D routes remain open for this area. Some trails in Alternative B, slated for administrative use that we'd like to have remain open for public use are O736, O937, O812, O434 & O440, O1046, O104, as these and others that have recreation value. This zone should also remain an intensive OHV use area.

Commenter Name: Rossman, Jack

Submission Code: cfc0198

Organization: US Hangliding and Paragliding Assoc.

Recommended: Open (All modes of travel)

These comments pertain to the area's around Roads K64, O736, O737, O738, and E27 and maintaining full access to paragliders. The sport of Paragliding requires a very small amount of access with limited to low impact on the land. We want to use existing roads to these areas known as Otto's Ridge, Reeder's Mesa and Peanut Point, which are established insured flying sights with US Hang Gliding and Paragliding Association.

– Route: O74

– Segment: 10878

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Federally Listed vegetation species In or Through (20m points)
- Vegetation Federally Listed vegetation species proximate (200m)

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce as much as practicable route density (miles/square mile) within 200 meters of known Threatened and Endangered plant occurrences throughout the field office.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize

direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: Winter Closure

Mitigation

- Cultural

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations during critical periods.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Foot/Horse/Mechanized

Alternative C (Conservation): Foot/Horse/Mechanized

Alternative D (Development): Limited to Vehicles Under 50" wide, Winter Closure

— Segment: 12920

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Designation Following Mitigation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Energy Access COGCC well
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Wildlife Elk Winter Range
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: 0822

Commenter Name: Barker, Bradley

Submission Code: cfc0050

Organization:

Recommended: Open (All modes of travel)

While I use other routes within the RMP area, I will restrict my current comments to Zone 'O.' I travel routes 0813, 0822, 0825, 0829, 0830, 0831, 0833, 0836, 02033, 02037, 02060, 02067 and 02089 multiple times a year. . . If this area was closed we would have to travel miles to find another suitable recreation area.

Commenter Name: Barker, Bradley

Submission Code: rmc0025

Organization: Grand Mesa Jeep Club

Recommended: Open (All modes of travel)

Trail Description: These trails offer a varied riding experience and great views of the valley. Historical Use: I use these routes multiple times per year as routes to picnics, hunting, and general recreation. Why you like this trail: These trails are very close to my parent's home and keeps us from needing to load and travel long distances to ride. Benefits: These trails provide opportunity for me, my friends, and family to enjoy the outdoors away from the

crowds of the big city. Closure of these trails will increase density of use in other areas and thus become a safety risk and increase impact on environment in other areas.

Organization: Colorado Parks and Wildlife
Recommended: Open (All modes of travel)

Zone 0 Road 0822 and 0813. In Alternative B (preferred alternative) the BLM is proposing to keep 822 open with current winter timing stipulations, and close and rehab 813. Currently, BLM does not have a legal access easement to use 822. and the United States Forest Service does have a legal easement to use 813. This mixed use of access roads needs to be cleared up and finalized/memorialized in a document and depict it in the BLMs travel management plan. If BLM cannot get an easement for 822, it should be closed & rehabbed, and 813 opened. Road 0822. The BLM proposes to turn 0822 into a foot, horse, and bike trail in Alternative B & C; CPW does not support this change in any alternative. This area is not used by mountain bikers or hikers, and is used primarily by hunters. Currently hunters can drive an ATV to the BLM USFS boundary, and must hike from there. There is also an extensive road that takes off from 0822 (generally at the center of S8. T13S, R97W) to old habitat treatments that is not labeled in any alternative. This road should remain open with a big game winter season closure (December 1 to April 15). Roads 02033, 02036, 02035, 0833, 0827. & 0825. The main route driven by hunters to get from Kannah Creek to Hwy 50 has many sections that show up as administrative only. 02033, 02036, 02035, 0833, 0827, & 0825 are the main access roads, and they should remain open. Road 02034. This road leads to a campsite and probably doesn't need to be designated but should remain open. Road 0825. In Alternative D 0825 is an ATV only trail, this is a good road, that can easily handle truck traffic. CPW recommends that it be designated as open to all vehicles. Roads 0 836 and 0831. There arc many roads that essentially go the same place as other existing roads, the BLM proposes to make many of them administrative in Alternative B For example 0836, and 0831 will continue to be used by the public unless they are closed and rehabbed. CPW would like to see expanded implementation of administratively closed roads in Zone 0. Road 0832. In Alternative B, there would be no legal public access to Cheney Reservoir, an area used by waterfowl and small game hunters. CPW recommends that Road 0832 be designated as open, and the remaining roads in close proximity to Cheney be closed and rehabbed. Roads 0762 and 0731. Roads 0762 and 0731 are power line roads. CPW recommends that these roads and other power line roads be designated as Administrative so that maintenance can be done if needed. The roads should be closed to the general public. Road 0659. Road 0659 leads to an imigation structure for the City of Grand Junction, Alternative B shows this road be closed and rehabbed CPW recommends that the road be designated as Administrative. Road 0292 leads to the trailhead for the Whitevater Creek Trail onto the forest, most of this road is open, and there is no good reason to stop the public from driving all the way to the gate/forest boundary. CPW recommends that the road remain open. Road 0980 and 0983. Roads 0980 and 0983 are proposed to be closed and rehabbed in Alternative B near Palisade Point. The roads are administrative and should be designated as such.

Commenter Name: Edwards, William
Submission Code: rmc0086

Organization: USDA
Recommended: Closed

Route 0822: Does the BLM have legal access across the private land crossed by that road? If not, maybe that route could be closed and Route 0813 used instead because there is provable legal public access on that route.

– Route: 0825

– Segment: 13096

Designation

Proposed Designation: Open (All modes of travel)
Seasonal Limitations: Winter Closure

Mitigation

- Needs More Data
- Maintainence
- Drainage Crossing
- Cultural survey and possible mitigation

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Recreation Access Dispersed Campsite
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to provide access to undeveloped campsites that exist along dead-end spur roads.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Admin/Permitted Use Only

Alternative C (Conservation): Admin/Permitted Use Only

Key Routes we Would Like to See Remain Open to Bicycles 0830/831/833 and 0825/02060 0293/0292 should have complete connection to Whitewater basin (NFS boundary) 01219/01131 - should remain accessible, form loop route. 01029 - retain as open to mechanized travel for continued access off of the Mesa top 0141/0226/0239 form nice spur loop 01213 should be continuous 01108 provides nice high access for later connection 0305 - serves as connector to trails in the flats 075 - access North from ridgeline road connects to 01794, which allows for loop creation, and its existing trail. Existing trail not on map to the West of 075, and South of E-W road across the hill 01794, 0132, and 0113 are all part of that loop and make good connectivity around Horse Mtn Route is missing off of existing north 075 wrapping clockwise and intersecting 018 to the east. 057 provide access northward from upper reaches of Blowout - very important ridgeline to long range route options. 014 is a nice established route providing entrance from the lower Cottonwood Creek area Accurate Pal Rim trail needs to be added to map 01045 and 01 (Cottonwood & Rapid Creek Roads) are critical access to Mesa direction and upper altitudes. In Zone M, the town of Palisade will focus on mountain bike and trail based recreation around the Bookcliffs. The Bookcliff area offers quick access to little used terrain that is immediately adjacent to the Grand Valley and yet not visibly connected until one reaches the ridgeline of the Bookcliff range. This isolation and eventual visual connection is a unique aspect of Bookcliff area riding. The only local access to this region of Zone M is through Cameo and Coal Canyon Road (M13). There is ongoing work to connect the town of Palisade to Cameo and Island Acres Campground via trail, as well as efforts to access the private lands on the bench south of Cameo as the Xcel power plant is decommissioned in that area. This connection will create yet another access from town directly to trails in these areas. With an established trailhead on M13, some resources are already in place to support improvement of existing routes and expansion of new routes in the area.

Commenter Name: Monholland, Landon

Organization:

Submission Code: emc0922

Reccomended: Foot/Horse/Mechanized

Zone O from a Bicycle perspective: Zone O offers the opportunity to connect to the Grand Mesa via bordering lands with NFS. Zone O also includes the Palisade Rims, The Blowout, Mesa Slopes, and Horse Mountain. These regions together form contiguous parcels to the east, southeast, and south of the town of Palisade. These areas have trail access via many points, and together could be made to form a recreation area that would be an amazing boon to the economy and quality of life for the town of Palisade. It will be important to assure access to-andfrom the Zone to nearby lands, and to establish a Recreation Management Area which will plan future trail development. I would like to see this area turned into an SRMA for multiple types of trail based recreation. Route Comments: Southern region - dont limit access off of Indian Point area. O830/831/833 should be bike accessible O825/O2060 should be bike accessible. Whitewater Basin area O293/O292 should have complete connection to Whitewater basin (NFS boundary) O1219/O1131 - should remain accessible, form loop route. Upper Mesa O1029 - retain as open to mechanized travel for continued access off of the Mesa top Mesa Slopes O141/O226/O239 form nice spur loop O1213 should be continuous O1108 provides nice high access for later connection Flats; south of Horse Mtn O305 - serves as connector to trails in the flats Horse Mtn area O75 - access North from ridgeline road connects to O1794, which allows for loop creation, and its existing trail. Existing trail not on map to the West of O75, and South of E-W road across the hill O1794, O132, and O113 are all part of that loop and make good connectivity around Horse Mtn Route is missing off of existing north O75 wrapping clockwise and intersecting O18 to the east.

– Route: 0828

– Segment: 12025

Designation [?](#)

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.

- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to eliminate duplicative or redundant routes with slump areas.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native

plant communities to support wildlife and livestock.

- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Submission Code: rmc0025

Organization: Grand Mesa Jeep Club

Recommended: Open (All modes of travel)

Trail Description: These trails offer a varied riding experience and great views of the valley. Historical Use: I use these routes multiple times per year as routes to picnics, hunting, and general recreation. Why you like this trail: These trails are very close to my parent's home and keeps us from needing to load and travel long distances to ride. Benefits: These trails provide opportunity for me, my friends, and family to enjoy the outdoors away from the crowds of the big city. Closure of these trails will increase density of use in other areas and thus become a safety risk

and increase impact on environment in other areas.

Southern region - dont limit access off of Indian Point area. This area is great for getting down off of the Grand Mesa, and is remote and rugged, though easily accessible on top via roads and existing trails (Mesa Top, Flowing Park). 0830/831/833 should be bike accessible 0825/02060 should be bike accessible.

Key Routes we Would Like to See Remain Open to Bicycles 0830/831/833 and 0825/02060 0293/0292 should have complete connection to Whitewater basin (NFS boundary) 01219/01131 - should remain accessible, form loop route. 01029 - retain as open to mechanized travel for continued access off of the Mesa top 0141/0226/0239 form nice spur loop 01213 should be continuous 01108 provides nice high access for later connection 0305 - serves as connector to trails in the flats 075 - access North from ridgeline road connects to 01794, which allows for loop creation, and its existing trail. Existing trail not on map to the West of 075, and South of E-W road across the hill 01794, 0132, and 0113 are all part of that loop and make good connectivity around Horse Mtn Route is missing off of existing north 075 wrapping clockwise and intersecting 018 to the east. 057 provide access northward from upper reaches of Blowout - very important ridgeline to long range route options. 014 is a nice established route providing entrance from the lower Cottonwood Creek area Accurate Pal Rim trail needs to be added to map 01045 and 01 (Cottonwood & Rapid Creek Roads) are critical access to Mesa direction and upper altitudes. In Zone M, the town of Palisade will focus on mountain bike and trail based recreation around the Bookcliffs. The Bookcliff area offers quick access to little used terrain that is immediately adjacent to the Grand Valley and yet not visibly connected until one reaches the ridgeline of the Bookcliff range. This isolation and eventual visual connection is a unique aspect of Bookcliff area riding. The only local access to this region of Zone M is through Cameo and Coal Canyon Road (M13). There is ongoing work to connect the town of Palisade to Cameo and Island Acres Campground via trail, as well as efforts to access the private lands on the bench south of Cameo as the Xcel power plant is decommissioned in that area. This connection will create yet another access from town directly to trails in these areas. With an established trailhead on M13, some resources are already in place to support improvement of existing routes and expansion of new routes in the area.

Recommended: Closed

Zone 0 Road 0822 and 0813. In Alternative B (preferred alternative) the BLM is proposing to keep 822 open with current winter timing stipulations, and close and rehab 813. Currently, BLM does not have a legal access easement to use 822, and the United States Forest Service does have a legal easement to use 813. This mixed use of access roads needs to be cleared up and finalized/memorialized in a document and depict it in the BLMs travel management plan. If BLM cannot get an easement for 822, it should be closed & rehabbed, and 813 opened. Road 0822. The BLM proposes to turn 0822 into a foot, horse, and bike trail in Alternative B & C; CPW does not support this change in any alternative. This area is not used by mountain bikers or hikers, and is used primarily by hunters. Currently hunters can drive an ATV to the BLM USFS boundary, and must hike from there. There is also an extensive road that takes off from 0822 (generally at the center of S8. T13S, R97W) to old habitat treatments that is not labeled in any alternative. This road should remain open with a big game winter season closure (December 1 to April 15). Roads 02033, 02036, 02035, 0833, 0827, & 0825. The main route driven by hunters to get from Kannah Creek to Hwy 50 has many sections that show up as administrative only. 02033, 02036, 02035, 0833, 0827, & 0825 are the main access roads, and they should remain open. Road 02034. This road leads to a campsite and probably doesn't need to be designated but should remain open. Road 0825. In Alternative D 0825 is an ATV only trail, this is a good road, that can easily handle truck traffic. CPW recommends that it be designated as open to all vehicles. Roads 0 836 and 0831. There are many roads that essentially go the same place as other existing roads, the BLM proposes to make many of them administrative in Alternative B For example 0836, and 0831 will continue to be used by the public unless they are closed and rehabbed. CPW would like to see expanded implementation of administratively closed roads in Zone 0. Road 0832. In Alternative B, there would be no legal public access to Cheney Reservoir, an area used by waterfowl and small game hunters. CPW recommends that Road 0832 be designated as open, and the remaining roads in close proximity to Cheney be closed and rehabbed. Roads 0762 and 0731. Roads 0762 and 0731 are power line roads. CPW recommends that these roads and other power line roads be designated as Administrative so that maintenance can be done if needed. The roads should be closed to the general public. Road 0659. Road 0659 leads to an irrigation structure for the City of Grand Junction, Alternative B shows this road be closed and rehabbed CPW recommends that the road be designated as Administrative. Road 0292 leads to the trailhead for the Whitewater Creek Trail onto the forest, most of this road is open, and there is no good reason to stop the public from driving all the way to the gate/forest boundary. CPW recommends that the road remain open. Road 0980 and 0983. Roads 0980 and 0983 are proposed to be closed and rehabbed in Alternative B near Palisade Point. The roads are administrative and should be designated as such.

Zone 0 from a Bicycle perspective: Zone 0 offers the opportunity to connect to the Grand Mesa via bordering lands with NFS. Zone 0 also includes the Palisade Rims, The Blowout, Mesa Slopes, and Horse Mountain. These regions together form contiguous parcels to the east, southeast, and south of the town of Palisade. These areas have trail access via many points, and together could be made to form a recreation area that would be an amazing boon to the economy and quality of life for the town of Palisade. It will be important to assure access to-and-from the Zone to nearby lands, and to establish a Recreation Management Area which will plan future trail development. I would like to see this area turned into an SRMA for multiple types of trail based recreation. Route Comments: Southern region - dont limit access off of Indian Point area. 0830/831/833 should be bike accessible 0825/02060 should be bike accessible. Whitewater Basin area 0293/0292 should have complete connection to Whitewater basin (NFS boundary) 01219/01131 - should remain accessible, form loop route. Upper Mesa 01029 - retain as open to mechanized travel for continued access off of the Mesa top Mesa Slopes 0141/0226/0239 form nice spur loop 01213 should be continuous 01108 provides nice high access for later connection Flats; south of Horse Mtn 0305 - serves as connector to trails in the flats Horse Mtn area 075 - access North from ridgeline road connects to 01794, which allows for loop creation, and its existing trail. Existing trail not on map to the West of 075, and South of E-W road across the hill 01794, 0132, and 0113 are all part of that loop and make good connectivity around Horse Mtn Route is missing off of existing north 075 wrapping clockwise and intersecting 018 to the east.

Designation [?](#)

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Soils Not Meeting Public Land health Standard (1)
- Special Designation VRM Class IV
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meet Public Land Health Standard Hydro
- Water Stream Crossing
- Wildlife Pronghorn Antelope Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Admin/Permitted Use Only

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Open (All modes of travel)

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Reroute
- Maintenance
- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Soils Not Meeting Public Land health Standard (1)
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Wildlife Pronghorn Antelope Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Public Comments On Route: 0832

Commenter Name: Rechel, Eric

Submission Code: rmc0049

Organization:

Reccomended: Closed

Need to keep motorized travel limited to roads that are graded and maintained otherwise there will be an increase in dust, especially with the drought. I approve of closing roads 02022, and 02025. Close roads around Chenny Reservoir e.g. 0840,0832, and 02003.

Commenter Name: Velarde, Ron

Submission Code: rmc0074

Organization: Colorado Parks and Wildlife

Reccomended: Open (All modes of travel)

Zone 0 Road 0822 and 0813. In Alternative B (preferred alternative) the BLM is proposing to keep 822 open with current winter timing stipulations, and close and rehab 813. Currently, BLM does not have a legal access easement to use 822. and the United States Forest Service does have a legal easement to use 813. This mixed use of access roads needs to be cleared up and finalized/memorialized in a document and depict it in the BLMs travel management plan. If BLM cannot get an easement for 822, it should be closed & rehabbed, and 813 opened. Road 0822. The BLM proposes to turn 0822 into a foot, horse, and bike trail in Alternative B & C; CPW does not support this change in any alternative. This area is not used by mountain bikers or hikers, and is used primarily by hunters. Currently hunters can drive an ATV to the BLM USFS boundary, and must hike from there. There is also an extensive road that takes off from 0822 (generally at the center of S8. T13S, R97W) to old habitat treatments that is not labeled in any alternative. This road should remain open with a big game winter season closure (December 1 to April 15). Roads 02033, 02036, 02035, 0833, 0827, & 0825. The main route driven by hunters to get from Kannah Creek to Hwy 50 has many sections that show up as administrative only. 02033, 02036, 02035, 0833, 0827, & 0825 are the main access roads, and they should remain open. Road 02034. This road leads to a campsite and probably doesn't need to be designated but should remain open. Road 0825. In Alternative D 0825 is an ATV only trail, this is a good road, that can easily handle truck traffic. CPW recommends that it be designated as open to all vehicles. Roads 0 836 and 0831. There arc many roads that essentially go the same place as other existing roads, the BLM proposes to make many of them administrative in Alternative B For example 0836, and 0831 will continue to be

used by the public unless they are closed and rehabbed. CPW would like to see expanded implementation of administratively closed roads in Zone O. Road 0832. In Alternative B, there would be no legal public access to Cheney Reservoir, an area used by waterfowl and small game hunters. CPW recommends that Road 0832 be designated as open, and the remaining roads in close proximity to Cheney be closed and rehabbed. Roads 0762 and 0731. Roads 0762 and 0731 are power line roads. CPW recommends that these roads and other power line roads be designated as Administrative so that maintenance can be done if needed. The roads should be closed to the general public. Road 0659. Road 0659 leads to an irrigation structure for the City of Grand Junction, Alternative B shows this road be closed and rehabbed CPW recommends that the road be designated as Administrative. Road 0292 leads to the trailhead for the Whitewater Creek Trail onto the forest, most of this road is open, and there is no good reason to stop the public from driving all the way to the gate/forest boundary. CPW recommends that the road remain open. Road 0980 and 0983. Roads 0980 and 0983 are proposed to be closed and rehabbed in Alternative B near Palisade Point. The roads are administrative and should be designated as such.

Currently, BLM does not have a legal access easement to use 822. and the United States Forest Service does have a legal easement to use 813. This mixed use of access roads needs to be cleared up and finalized/memorialized in a document and depict it in the BLMs travel management plan. If BLM cannot get an easement for 822, it should be closed & rehabbed, and 813 opened. Road 0822. The BLM proposes to turn 0822 into a foot, horse, and bike trail in Alternative B & C; CPW does not support this change in any alternative. This area is not used by mountain bikers or hikers, and is used primarily by hunters. Currently hunters can drive an ATV to the BLM USFS boundary, and must hike from there. There is also an extensive road that takes off from 0822 (generally at the center of S8. T13S, R97W) to old habitat treatments that is not labeled in any alternative. This road should remain open with a big game winter season closure (December 1 to April 15). Roads 02033, 02036, 02035, 0833, 0827. & 0825. The main route driven by hunters to get from Kannah Creek to Hwy 50 has many sections that show up as administrative only. 02033, 02036, 02035, 0833, 0827, & 0825 are the main access roads, and they should remain open. Road 02034. This road leads to a campsite and probably doesn't need to be designated but should remain open. Road 0825. In Alternative D 0825 is an ATV only trail, this is a good road, that can easily handle truck traffic. CPW recommends that it be designated as open to all vehicles. Roads 0 836 and 0831. There are many roads that essentially go the same place as other existing roads, the BLM proposes to make many of them administrative in Alternative B For example 0836, and 0831 will continue to be used by the public unless they are closed and rehabbed. CPW would like to see expanded implementation of administratively closed roads in Zone 0. Road 0832. In Alternative B, there would be no legal public access to Cheney Reservoir, an area used by waterfowl and small game hunters. CPW recommends that Road 0832 be designated as open, and the remaining roads in close proximity to Cheney be closed and rehabbed. Roads 0762 and 0731. Roads 0762 and 0731 are power line roads. CPW recommends that these roads and other power line roads be designated as Administrative so that maintenance can be done if needed. The roads should be closed to the general public. Road 0659. Road 0659 leads to an irrigation structure for the City of Grand Junction, Alternative B shows this road be closed and rehabbed CPW recommends that the road be designated as Administrative. Road 0292 leads to the trailhead for the Whitewater Creek Trail onto the forest, most of this road is open, and there is no good

reason to stop the public from driving all the way to the gate/forest boundary. CPW recommends that the road remain open. Road 0980 and 0983. Roads 0980 and 0983 are proposed to be closed and rehabbed in Alternative B near Palisade Point. The roads are administrative and should be designated as such.

– Route: 0840

– Segment: 13576

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Reroute
- Maintenance
- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Not Meeting Public Land health Standard (1)
- Soils Mancos Shale areas
- Soils Slumping soils
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meet Public Land Health Standard Hydro
- Wildlife Pronghorn Antelope Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to eliminate duplicative or redundant routes with slump areas.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Previous Alternatives Analyzed

Public Comments On Route: 0840

Commenter Name: Rechel, Eric

Organization:

Submission Code: rmc0049

Reccomended: Closed

Need to keep motorized travel limited to roads that are graded and maintained otherwise there will be an increase in dust, especially with the drought. I approve of closing roads 02022, and 02025. Close roads around Chenny Reservoir e.g. 0840,0832, and 02003.

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to eliminate duplicative or redundant routes with slump areas.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of

roads, routes and trails.

- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Admin/Permitted Use Only

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Open (All modes of travel)

— Segment: 13606

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Recreation Access Dispersed Campsite
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Water Stream Crossing
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to provide access to undeveloped campsites that exist along dead-end spur roads.

Public Comments On Route: 0846

Commenter Name: Edwards, William

Submission Code: rmc0086

Organization: USDA

Recommened: Closed

Route 0846: Who would use that administrative access? Is it designated the same in the Uncompahgre Basin Field Office's RMP? There is a Forest Service Mesa Point Communication Site just across the Mesa-Delta County line and

a road leading to the site. The area of the forest that appears to be accessed by that route is within the Kannah Creek CRA.

Public Comments On Route: 0882

Commenter Name: Rechel, Eric

Organization:

Submission Code: rmc0049

Recommended: Closed

Zone 0: Roads 0887,0885,0882,0731, should be closed. The entire area where these roads are located should be off limits to motorized travel because of presence of Colorado Hookless cactus.

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0080

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone 0 should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Vegetation Federally Listed vegetation species In or Through (20m points)
- Vegetation Federally Listed vegetation species proximate (200m)

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in

areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.

- Designation was considered to reduce as much as practicable route density (miles/square mile) within 200 meters of known Threatened and Endangered plant occurrences throughout the field office.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations Managed Lands with Wilderness Characteristics
- Other Considerations Inventoried Lands with Wilderness Characteristics
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Bald Eagle Nest (0.5 miles)

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to reduce route density in areas where long-term management is designed to protect

wilderness characteristics.

- Designation was considered to minimize surface disturbing activities such that the natural quality of the area is maintained. Also to maintain opportunities for solitude and primitive recreation where they occur in the areas.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: 0937

Commenter Name: Herron, Lydia

Organization:

Submission Code: emc0806

Recommended: Open (All modes of travel)

Zone O = Whitewater Hill OHV open area While a smaller area than the Grand Valley OHV area, it has many similar characteristics, and besides "open" riding, offers trail riding through the rocks and desert shrubbery. These are great trails! Not too technical, but enough to make it fun. We have started rides with friends and family off Hwy 50, just South/East of 32 Road intersection and then traveled on the rocky & diverse trails over to Kannah Creek Rd/Lands End Rd. There is one trail (# unknown) that is a technical, rocky, continuously inclining route, which climbs its way upward above Palisade. It does dead end at an administrative use gate, but the view was spectacular and the ride exhilarating. We do not want to see any closures in this area. We would like to see Alternative A or Alternative D routes remain open for this area. Some trails in Alternative B, slated for administrative use that we'd like to have remain open for public use are O736, O937, O812, O434 & O440, O1046, O104, as these and others that have recreation value. This zone should also remain an intensive OHV use area.

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0080

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone O should remain open to the general public for all forms of use including motorized/OHV use. Routes Q: 1,4, 5, 9, 1046, 1045, 193, 205, 206, 32, 83, 57,146, 89, 1838, 127, 1108, 239, 244, 952, 75, 126, 18, 113, 1794,90, 1779, 209, 1152, 1210, 305, 1711, 308, 322, 424, 912, 1092, 659, 292, 293, 937, 486, 595, 1156, 659, 730, 1131, 1685, 713, 1812, 434, 440, 731, 882, 885, 887, 774, 749, 936, 69, 457, 468, 405, 457, 1133, 490, 432, 1125, 266, 367, 358, 330, 388, 310, 263, 527, 525, 1756, 1544, 118, 1752, 1750, 636, 250, 225, 230, 296. RS 2477 Right of Ways (ROWS) and Prescriptive ROW's have been legally established on the entire list of Zone Q routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Slope Greater than 40%
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with slopes exceeding 40 percent.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and

sensitive plant species.

- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Paleo Paleontological site Proximate (200m Buffer)
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)

Rationale for Decision

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to reduce ongoing damage to known paleontological sites, close routes that are inside or pass through sensitive paleontological sites, or identify mitigation necessary to protect sites.
- Designation was considered to reduce the potential for vandalism or collection of paleontological sites and reduce the number of routes in proximity to known paleontological localities.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Designation Following Mitigation: Foot/Horse/Mechanized

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II

- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Range Development

Rationale for Decision

- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Public Comments On Route: P1182

Commenter Name: Siegfried, Brandon

Submission Code: cfc0079

Organization:

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone P should remain open to the general public for all forms of use including motorized/OHV use. Routes P: 212, 219, 16, 12, 888, 889, 887, 703, 702, 704, 705, 697, 270, 1182, 792, 793, 572, 571, 569, 273, 2007, 251, 8, 855, 450, 451, 394, 393, 297, 296, 298, 410. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone P routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing

Rationale for Decision

- Designation was considered to provide and protect recreation related opportunities.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Previous Alternatives Analyzed

Alternative A (Current): Foot/Horse/Mechanized

Alternative B (Preferred): Foot/Horse/Mechanized

Alternative C (Conservation): Foot/Horse/Mechanized

Alternative D (Development): Foot/Horse/Mechanized

— Segment: 9302

Designation

Proposed Designation: Foot/Horse/Mechanized

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing

Rationale for Decision

- Designation was considered to provide and protect recreation related opportunities.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation ACEC
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species proximate (100m)
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and

setting characteristics of cultural sites).

- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: P12

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0079

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone P should remain open to the general public for all forms of use including motorized/OHV use. Routes P: 212, 219, 16, 12, 888, 889, 887, 703, 702, 704, 705, 697, 270, 1182, 792, 793, 572, 571, 569, 273, 2007, 251, 8, 855, 450, 451, 394, 393, 297, 296, 298, 410. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone P routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Trail Number(s): P12, P336, P2, P1 Trail Name: Tabeguache and Windmill Loop Trail Description (challenges, viewpoints, terrain type, etc.): These trails offer a variety of terrain, from rocky areas, to smoother faster sections. They offer something for a variety of trail users. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): I have traveled these roads in both a full-size Jeep and a UTV (> 50 wide). Ive also used my vehicle to get farther along the trail before parking and exploring on foot. The playground area is a fun challenge for a variety of vehicles. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): This trail is fun and close to home. I enjoy the views of the Gunnison River from the Windmill Loop Road. I enjoy the rockiness of the Tabeguache Trail. It makes for a nice challenge in my UTV. The Tabeguache would make a fantastic day trip for jeeps and other licensed 4WD vehicles if the road were opened up all the way to Hwy 141 like the BLM has talked about in the past. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): The Tabeguache offers a feeling of remoteness, while the Windmill Loop offers a shorter loop. The Windmill Loop offers important access to a variety of trails rock crawling in Billings Canyon, ATV trails, and mountain biking. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): I would like to see the BLM connect the Tabeguache Trail all the way through to Hwy 141 for full size 4WDs. I would like to see more signage installed at the playground area that indicates the ledges are ok to drive on. Often, hikers coming back from Rough Canyon hike by and are under the wrong impression that 4WD users are driving where they arent supposed to.

Area P. One area we are interested in is the P291-P402 area. None of the plans proposed are preferred, here's why. For example, even the least restrictive plan calls it a Hunting Season Road. There is no reason to publicize this as a Hunter Access Road. This road should be open year round and the label of ~ Hunting SeasonD is not specific and should be eliminated. Do you mean turkey season, small game, big game seasons? It's ambiguous and unneeded. In this area, as well as many other areas you are proposing to close roads and limit public use, the end result will eliminate public use and allow private landowners to continue use (and they most assuredly will). This is completely contrary to your mission and purpose. Absolutely NO to alternatives C & D. A & B are better, but still too restrictive. Please leave as is. Regarding the Tabeguache Trail/Road, P12 and P281 should be left as is now.

The Snyder Flats Rd. (P-291 P-402) is a scenic opportunity for day motorized use and provides access to nature and hiking experiences in a remote undeveloped landscape. The listed routes are critical to the recreation experiences described in Appendix M of the RMP.

[Area 6 Tabeguache Trail & A B C D & E Synder Flats Hunter Access & Tabeguache Trail] The area on both sides of North East Creek (between P291 and P12) is remote enough that it is somewhat hard to get into (that's a good thing), and yet close to Grand Junction. Its significance is the diversity of awesome terrain- canyons and mesas. We have viewed a wide range of wildlife - birds (including turkey), elk, deer, bear, coyote, mountain lion (several times), bobcat and small rodents. We have also hiked into a number of chipping grounds and seen evidence of past Native American life. Our family has hunted big game in this area for the past 45 years. We have also enjoyed hiking, mountain biking, 4 wheel driving, ATV, horseback riding and camping in the area.

Recommendations: If BLM proceeds with petitioning the Interior Secretary to designate the Tabeguache Trail as a National Recreation Trail, then the agency should adopt Alternative C, in which BLM would not seek to acquire vehicle access from Little Park Road to Colorado State Highway 141. The Tabeguache Trail should be managed to promote high-quality non-motorized recreation experiences in and around Bangs Canyon.

Refers to Tahaguache and Bangs Canyon area and Windmill loop I use it as a quick day trip to test out new modifications (bought at local vendors) and test and [tame] other peoples [rigs]. It provides beautiful photographs

and offers areas to challenge all skill levels. Super pretty views, seasonal waterfall, close to home, good day trip. Wild life and wild flowers viewing, teaching my children to enjoy the outdoors and exercise teaching them to respect wildlife and nature, to be thankful for all they can experience. Traveling as a club or as an individual, picnicing, quick trail runs during the week enjoyment of nature, beautiful place to exercise and keep fit and healthy. I believe it is perfectly feasible to keep this trail open and operating due to the support or local off road and ATV groups pitching in to help maintain the trail as needed. Which I am sure they would do for any trail that needs it.

Recommened: Open (All modes of travel)

Tabequache Trail This is a good trail for a nice day trip or even to go camping. It does have difficult parts but nothing a stock vehicle can't do. This trail is close to home and the wildlife is wonderful. This trail is great for socializing with friends and family that gets you out of town and away from the rest of the world. This is a great trail that you can make as long or as short as possible. That allows families to enjoy there time together.

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Slope Greater than 40%
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas with slopes exceeding 40 percent.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.

Public Comments On Route: P1258

Commenter Name: Cranston, Ryan

Organization:

Submission Code: emc0651

Reccomended: Foot/Horse/Mechanized

The experience that is most important to me is mountain biking in remote areas. I enjoy the popular trail systems that exist, Palisade, Lunch Loop, Kokopelli, and 18 Road, but I'm really drawn to linking back roads, and back country singletrack together in order to form 30-50 mile backcountry rides that I can access by riding out of my garage. This comment pertains to most of the zones in the outlying area, but in particular, zones P, Q, S, and I, and O. So much opportunity exists to create these "epic" adventures, and we need a management plan that supports this. I believe that shared use single-track (motorcycle and MTB) are great ways to accomplish this and fill the needs of more than one user group. Closing existing routes does not help this at all. P 251 should remain open to bikes P 1258 should remain open to bikes Connect P 558 to P 681 and open to bikes

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations Managed Lands with Wilderness Characteristics
- Other Considerations Inventoried Lands with Wilderness Characteristics
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Wildlife Bald Eagle Nest (0.5 miles)
- Lands and Realty Utility corridor
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to reduce route density in areas where long-term management is designed to protect wilderness characteristics.
- Designation was considered to minimize surface disturbing activities such that the natural quality of the area is maintained. Also to maintain opportunities for solitude and primitive recreation where they occur in the areas.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone P should remain open to the general public for all forms of use including motorized/OHV use. Routes P: 212, 219, 16, 12, 888, 889, 887, 703, 702, 704, 705, 697, 270, 1182, 792, 793, 572, 571, 569, 273, 2007, 251, 8, 855, 450, 451, 394, 393, 297, 296, 298, 410. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone P routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Trail Description (challenges, viewpoints, terrain type, etc.): The above areas are special to me, my family and many others. They represent unique view opportunities and driving challenges and the spurrs above offer great camping and view points Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): Exploring, 4x4 driving, a big appeal to driving these less traveled roads and spurrs is the feeling of exploration that

is often lost when channelized onto major routes. Why you like this trait(challenges you vehicle, close to home, wildlife, history characteristics views): The big appeal of these trails is to get away from others and experience the solitude of the outdoors the views and camping are amazing. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): The solitude and sence of adventure are the big draws for me for these areas. They are unmatched in Colorado. These areas currently receive very light traffic. The vast majority of users are respectful to the ecology, the history and other users.

– Segment: 11650

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: P184

Commenter Name: Shepherd, Janice

Organization:

Submission Code: rmc0089

Reccomended: Closed

I walked on P184 and P185 recently and they have not been used by a vehicle in years. As the area is otherwise listed as being closed to mechanized and motorized vehicles it does not make sense to keep these as open. Since P339 where P184 (and P185) come from is a private road, the private owner can park on their private road and walk to the designated trail. They dont need a motorized road for such access. They should be changed to closed.

Submission Code: emc0788

Recommended: Foot/Horse/Mechanized

P212 should remain accessible to mechanized use. Existing trail planning already identifies this as a portion of a larger future eastward route. P219 should be considered for continued mechanized access to enable access to more remote areas. P251 should remain accessible to mechanized use - allowing for access parallel to the Unaweep Cyn drainage, and westward connectivity to the higher elevations in that direction. P450, P286, P440, P309, P315, P312, P308 corridor - same westward connectivity P291, P402 corridor - same westward connectivity

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route

- Special Designation VRM Class II
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Previous Alternatives Analyzed

Alternative C (Conservation): Open (All modes of travel)

Alternative D (Development): Open (All modes of travel)

— Segment: 10251

Designation ?

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: P251

Commenter Name: Znamenacek, Dale

Submission Code: emc0631

Organization: Grand Mesa Jeep Club

Recommended: Open (All modes of travel)

Trail Number(s): P8, P251 Trail Name: East Creek Trail Description (challenges, viewpoints, terrain type, etc.): Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is an area I enjoy exploring using a variety of methods: full size 4WD, UTV, and ATV. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that this trail is close to home. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This makes a nice shorter trip, good for exploring and enjoyable for the whole family. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): Please leave this trail open to full size 4WD year round.

Commenter Name: Potterveld, Jan

Submission Code: emc0634

Organization: Back Country Horsemen of Colorado

Recommended: Foot/Horse/Mechanized

Trails P8 and P251 could be left open to bike, horse and foot travel. There is no apparent reason to close this down.

Commenter Name: Cranston, Ryan

Submission Code: emc0651

Organization:

Recommended: Foot/Horse/Mechanized

The experience that is most important to me is mountain biking in remote areas. I enjoy the popular trail systems that exist, Palisade, Lunch Loop, Kokopelli, and 18 Road, but I'm really drawn to linking back roads, and back country singletrack together in order to form 30-50 mile backcountry rides that I can access by riding out of my garage. This comment pertains to most of the zones in the outlying area, but in particular, zones P, Q, S, and I, and O. So much opportunity exists to create these "epic" adventures, and we need a management plan that supports this.

I believe that shared use single-track (motorcycle and MTB) are great ways to accomplish this and fill the needs of more than one user group. Closing existing routes does not help this at all. P 251 should remain open to bikes P 1258 should remain open to bikes Connect P 558 to P 681 and open to bikes

Commenter Name: Winans, Scott

Organization:

Submission Code: emc0868

Recommended: Foot/Horse/Mechanized

P251 should remain accessible to mechanized use - allowing for access parallel to the Unaweep Cyn drainage, and westward connectivity to the higher elevations in that direction. P450, P286, P440, P309, P315, P312, P308 corridor - same westward connectivity P291, P402 corridor - same westward connectivity

Commenter Name: Cox, Kris

Organization: COPMOBA- Grand Valley Canyons Chapter

Submission Code: emc0788

Recommended: Foot/Horse/Mechanized

P212 should remain accessible to mechanized use. Existing trail planning already identifies this as a portion of a larger future eastward route. P219 should be considered for continued mechanized access to enable access to more remote areas. P251 should remain accessible to mechanized use - allowing for access parallel to the Unaweep Cyn drainage, and westward connectivity to the higher elevations in that direction. P450, P286, P440, P309, P315, P312, P308 corridor - same westward connectivity P291, P402 corridor - same westward connectivity

Commenter Name: Shepherd, Janice

Organization: The Quiet Trails Group

Submission Code: emc0835

Recommended: Open (All modes of travel)

As far as specific routes, we would like to see P251 on East Creek open to motorized use up until just after the creek crossing, then limited to mechanized/foot/horse use, as shown in Alternative D. For routes P291 and P402, we support Alternative B, leaving it open seasonally to motorized use for hunting, but would like to see it open year round for mechanized, foot and horse travel.

Commenter Name: Bertolacci, Jason

Organization: International Mountain Bicycling Association

Submission Code: emc0912

Recommended: Foot/Horse/Mechanized

P212 should remain open to mountain bike use. Existing trail planning already identifies this as a portion of a larger future eastward route. P219 should be considered for continued mountain bike use to enable access to more remote areas. P251 should remain open to mountain bike use - allowing for access parallel to the Unaweep Canyon drainage, and westward connectivity to the higher elevations. P450, P286, P440, P309, P315, P312, P308 corridor - should remain open to bikes as they provide westward connectivity P291, P402 corridor - should remain open to bikes as they provide westward connectivity

Commenter Name: Atencio, James

Organization: Grand Mesa Jeep Club

Submission Code: rmc0025

Recommended: Open (All modes of travel)

Historical use: picnics, rock crawling, photography, exercising, pets, use 1-2 times per week. Like because it is close to home, scenic views, wildlife. Benefits are family time, exercise, solitude. Leave open to full sized vehicles, hiking, atvs.

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommended: Foot/Horse/Mechanized/Motorcycle

The Snyder Flats Rd. (P-291 P-402) is a scenic opportunity for day motorized use and provides access to nature and hiking experiences in a remote undeveloped landscape. The listed routes are critical to the recreation experiences described in Appendix M of the RMP.

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommended: Open (All modes of travel)

East Creek P8, P251 Leave Open to full size, nice short trip for exploring

Commenter Name: Shepherd, Janice

Organization:

Submission Code: rmc0089

Recommended: Foot/Horse/Mechanized

Closed roads can make great hiking/horse trails as walking or riding side-by-side allows for easier conversation than a single does. Consider converting some of the roads scheduled to be closed to hiking or hiking/horse trails. The bulk of P251 is an example of a road that Alt B lists as to be closed but would make a great Quiet use Trail (Bicycle, horse and foot).

Commenter Name: Shepherd, Janice

Organization:

Submission Code: rmc0089

Recommended: Foot/Horse/Mechanized

P251 to the first parking spot near 12 S 675233 4313515 and P249 should be kept open to allow people to enjoy the shade of the cottonwoods by East Creek. This is a great spot for families to hang out on a hot spring/summer day. Because it is well below the level of the highway young children can enjoy the area without concern for fast traffic going by. The area should be a no camping area however. The road also allows rock/boulder climbers to get across the creek to access a wide spectrum of climbing spots. As per my earlier comment the rest of P251 should be changed to a bicycle/horse/foot trail.

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0079

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone P should remain open to the general public for all forms of use including motorized/OHV use. Routes P: 212, 219, 16, 12, 888, 889, 887, 703, 702, 704, 705, 697, 270, 1182, 792, 793, 572, 571, 569, 273, 2007, 251, 8, 855, 450, 451, 394, 393, 297, 296, 298, 410. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone P routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone P should remain open to the general public for all forms of use including motorized/OHV use. Routes P: 212, 219, 16, 12, 888, 889, 887, 703, 702, 704, 705, 697, 270, 1182, 792, 793, 572, 571, 569, 273, 2007, 251, 8, 855, 450, 451, 394, 393, 297, 296, 298, 410. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone P routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes

– Route: P270

– Segment: 12703

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations Managed Lands with Wilderness Characteristics
- Other Considerations Inventoried Lands with Wilderness Characteristics
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Wildlife Mule Deer Winter Range
- Range Study Site

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to reduce route density in areas where long-term management is designed to protect wilderness characteristics.
- Designation was considered to minimize surface disturbing activities such that the natural quality of the area is maintained. Also to maintain opportunities for solitude and primitive recreation where they occur in the areas.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to range study sites.

[Area 6 Tabeguache Trail & A B C D & E Synder Flats Hunter Access & Tabeguache Trail] The area on both sides of North East Creek (between P291 and P12) is remote enough that it is somewhat hard to get into (that's a good thing), and yet close to Grand Junction. Its significance is the diversity of awesome terrain- canyons and mesas. We have viewed a wide reange of wildlife - birds (inclucing turkey), elk, deer, bear, coyote, mountain lion (several times), bobcat and small rodents. We have also hiked into a number of chipping grounds and seen evidence of pas Native Americna life. Our family has hunted big game in this area for the past 45 years. We have also enjoyed hiking, mountain biking, 4 wheel driving, ATV, horseback riding and camping in the area.

Organization:

Submission Code: emc0926

Recommended: Open (All modes of travel)

Castle Rock Trail System Zone (F): Option (D) which allows the trail system to stay open and stay intact meets most of the Route Designation Criteria as summarized on p. M-11, Appendix M. The trail system creates a loop trail. The system is recognized in local maps and social media. The trail resolves user conflicts because of remoteness and proximity to Grand Junction. The trail was not previously designated but developed in an area that was labeled Open to Cross Country Travel. We would encourage the BLM to keep this trail system open and follow a planned process to mitigate any problem areas within the existing trail system. Trails: (F555, F571, F572, F560): We recommend Alternative (A). These trails connect V.2 road and the Coon Hollow area. They provide an important link between these two roads and allow for a much enhanced experience as opposed to riding down the gas roads. There are areas of slick rock and challenges that add a great deal to the recreation experience. This two-track trail enhances the recreation experience and adds a great deal to the overall enjoyment of this area. The Option B, Preferred Alternative closes these routes to motorized recreation. There is no documented proof exhibited in the EIS that shows substantial evidence that there are resource issues impacted by motorized travel. The BLM has made an error in closing these trails and a much better option would be Option A, no action. Zone (H) North of Coal Gulch: Option (D) Trail (H)52, & (H)40, complete the loop between Coal Gulch and Garvey Canyon. It is important to keep this connection open for >50" motorized travel. Zone (I) 21 Road-Hwy 139A: Option (D) Trail (I)1027, provides a loop ride from Coal Gulch to Garvey Canyon and back on 16 Road. This is a desirable option for >50" motorized travel. This trail provides a scenic view and remote feeling traversing between canyons. This is an important route for ATV's, Motorcycles and possibly mountain bikes. Zone (M) Cameo/Coal Canyon and Main Canyon area: M420,

M410, & M414 are listed as "Vested Interest" by Mesa County Roads and Right of Way. This road may have been inadvertently closed without proper authority granted by the Mesa County Commissioners. Please comment on this issue. If the road was inappropriately closed, then it should be reopened to motorized travel immediately. In Zone (P) Bangs Canyon/Snyder Flats area: Trails P450, P288, P286, P440, P309, P315, P312, P308, & P314 should be left open to motorized travel. These routes access areas above Snyder Flats which adds diversity and interest to other recreation options in the BLM Field office area. Trails P291 and P402, should remain open to motorized travel as option (D) would allow. This route offers a full day of exploring in a very unusual area. The slick rock formations and canyons area some of the highlights. To traverse the length of this route is a good days journey and allows a fulfilling social outing with friends. Zone (V) Gateway: This area features interesting mining history, outstanding scenery, and is a great place for people to explore. The area is very remote, with a feeling of being back in another time period. Our comment pertains to keeping as many of the routes open in this area simply because of the experiences that they provide. Many old roads lead back into mining areas or scenic overlooks into Maverick canyon. Closing these routes would create significant administrative problems for the BLM. Just the signing of closed routes would probably take years at great expense and then the enforcement of these closures would be difficult. A much better option would be to leave the roads open and let the people enjoy the possibilities of exploring this incredible country.

North East Creek P314, P312, P315, P309, P310, P311, P286, P450, P288 This has been landlocked for a long time, a connector from P311 to P291 would open this up for New areas to explorer (see Snyder Flats).

Commenter Name: Potter, Monte **Organization:**

Submission Code: emc0926 **Recommended:** Open (All modes of travel)

Castle Rock Trail System Zone (F): Option (D) which allows the trail system to stay open and stay intact meets most of the Route Designation Criteria as summarized on p. M-11, Appendix M. The trail system creates a loop trail. The system is recognized in local maps and social media. The trail resolves user conflicts because of remoteness and proximity to Grand Junction. The trail was not previously designated but developed in an area that was labeled Open to Cross Country Travel. We would encourage the BLM to keep this trail system open and follow a planned process to mitigate any problem areas within the existing trail system. Trails: (F555, F571, F572, F560): We recommend Alternative (A). These trails connect V.2 road and the Coon Hollow area. They provide an important link between these two roads and allow for a much enhanced experience as opposed to riding down the gas roads. There are areas of slick rock and challenges that add a great deal to the recreation experience. This two-track trail enhances the recreation experience and adds a great deal to the overall enjoyment of this area. The Option B, Preferred Alternative closes these routes to motorized recreation. There is no documented proof exhibited in the EIS that shows substantial evidence that there are resource issues impacted by motorized travel. The BLM has made an error in closing these trails and a much better option would be Option A, no action. Zone (H) North of Coal Gulch: Option (D) Trail (H)52, & (H)40, complete the loop between Coal Gulch and Garvey Canyon. It is important to keep this connection open for >50" motorized travel. Zone (I) 21 Road-Hwy 139A: Option (D) Trail (I)1027, provides a loop ride from Coal Gulch to Garvey Canyon and back on 16 Road. This is a desirable option for >50" motorized travel. This trail provides a scenic view and remote feeling traversing between canyons. This is an important route for ATV's, Motorcycles and possibly mountain bikes. Zone (M) Cameo/Coal Canyon and Main Canyon area: M420, M410, & M414 are listed as "Vested Interest" by Mesa County Roads and Right of Way. This road may have been inadvertently closed without proper authority granted by the Mesa County Commissioners. Please comment on this issue. If the road was inappropriately closed, then it should be reopened to motorized travel immediately. In Zone (P) Bangs Canyon/Snyder Flats area: Trails P450, P288, P286, P440, P309, P315, P312, P308, & P314 should be left open to motorized travel. These routes access areas above Snyder Flats which adds diversity and interest to other recreation options in the BLM Field office area. Trails P291 and P402, should remain open to motorized travel as option (D) would allow. This route offers a full day of exploring in a very unusual area. The slick rock formations and canyons area some of the highlights. To traverse the length of this route is a good days journey and allows a fulfilling social outing with friends. Zone (V) Gateway: This area features interesting mining history, outstanding scenery, and is a great place for people to explore. The area is very remote, with a feeling of being back in another time period. Our comment pertains to keeping as many of the routes open in this area simply because of the experiences that they provide. Many old roads lead back into mining areas or scenic overlooks into Maverick

canyon. Closing these routes would create significant administrative problems for the BLM. Just the signing of closed routes would probably take years at great expense and then the enforcement of these closures would be difficult. A much better option would be to leave the roads open and let the people enjoy the possibilities of exploring this incredible country.

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class II
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Castle Rock Trail System Zone (F): Option (D) which allows the trail system to stay open and stay intact meets most of the Route Designation Criteria as summarized on p. M-11, Appendix M. The trail system creates a loop trail. The system is recognized in local maps and social media. The trail resolves user conflicts because of remoteness and proximity to Grand Junction. The trail was not previously designated but developed in an area that was labeled Open to Cross Country Travel. We would encourage the BLM to keep this trail system open and follow a planned process to mitigate any problem areas within the existing trail system. Trails: (F555, F571, F572, F560): We recommend Alternative (A). These trails connect V.2 road and the Coon Hollow area. They provide an important link between these two roads and allow for a much enhanced experience as opposed to riding down the gas roads. There are areas of slick rock and challenges that add a great deal to the recreation experience. This two-track trail enhances the recreation experience and adds a great deal to the overall enjoyment of this area. The Option B,

Preferred Alternative closes these routes to motorized recreation. There is no documented proof exhibited in the EIS that shows substantial evidence that there are resource issues impacted by motorized travel. The BLM has made an error in closing these trails and a much better option would be Option A, no action. Zone (H) North of Coal Gulch: Option (D) Trail (H)52, & (H)40, complete the loop between Coal Gulch and Garvey Canyon. It is important to keep this connection open for >50" motorized travel. Zone (I) 21 Road-Hwy 139A: Option (D) Trail (I)1027, provides a loop ride from Coal Gulch to Garvey Canyon and back on 16 Road. This is a desirable option for >50" motorized travel. This trail provides a scenic view and remote feeling traversing between canyons. This is an important route for ATV's, Motorcycles and possibly mountain bikes. Zone (M) Cameo/Coal Canyon and Main Canyon area: M420, M410, & M414 are listed as "Vested Interest" by Mesa County Roads and Right of Way. This road may have been inadvertently closed without proper authority granted by the Mesa County Commissioners. Please comment on this issue. If the road was inappropriately closed, then it should be reopened to motorized travel immediately. In Zone (P) Bangs Canyon/Snyder Flats area: Trails P450, P288, P286, P440, P309, P315, P312, P308, & P314 should be left open to motorized travel. These routes access areas above Snyder Flats which adds diversity and interest to other recreation options in the BLM Field office area. Trails P291 and P402, should remain open to motorized travel as option (D) would allow. This route offers a full day of exploring in a very unusual area. The slick rock formations and canyons area some of the highlights. To traverse the length of this route is a good days journey and allows a fulfilling social outing with friends. Zone (V) Gateway: This area features interesting mining history, outstanding scenery, and is a great place for people to explore. The area is very remote, with a feeling of being back in another time period. Our comment pertains to keeping as many of the routes open in this area simply because of the experiences that they provide. Many old roads lead back into mining areas or scenic overlooks into Maverick canyon. Closing these routes would create significant administrative problems for the BLM. Just the signing of closed routes would probably take years at great expense and then the enforcement of these closures would be difficult. A much better option would be to leave the roads open and let the people enjoy the possibilities of exploring this incredible country.

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class II

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.

Previous Alternatives Analyzed

Designation [?](#)

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)

Rationale for Decision

- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.

- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

Designation was considered to maintain public access to areas identified as important for recreation.

- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Previous Alternatives Analyzed

Public Comments On Route: P397

No public comments for this Route

– Route: P450

– Segment: 13218

Designation ?

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class II
- Wildlife Mule Deer Winter Range
- Range Study Site

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to range study sites.

Designation

Proposed Designation: Admin/Permitted Use Only
Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class II
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Vegetation Riparian proximate (100 ft)
- Water Stream Crossing
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to reduce livestock and recreation impacts to riparian areas.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Bangs Canyon - Snyder Flats Area Trails: P440, P309, P315, P312, P308, P314, P450, P228, and P286. This area above Snyder Flats is covered with Juniper and Ponderosa Pine and affords riders a scenic experience that is unequalled. Trails: P402 & P291 afford the rider views of sandstone formations endemic to the area.

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommended: Open (All modes of travel)

North East Creek P314, P312, P315, P309, P310, P311, P286, P450, P288 This has been landlocked for a long time, a connector from P311 to P291 would open this up for New areas to explorer (see Snyder Flats).

Commenter Name: Shepherd, Janice

Organization:

Submission Code: rmc0089

Recommended: Open (All modes of travel)

P450 should stay open to motorized vehicles as it is a popular rock climbing / bouldering area with over 12 boulders being used in the area.

Commenter Name: Potter, Monte

Organization:

Submission Code: emc0926

Recommended: Open (All modes of travel)

Castle Rock Trail System Zone (F): Option (D) which allows the trail system to stay open and stay intact meets most of the Route Designation Criteria as summarized on p. M-11, Appendix M. The trail system creates a loop trail. The system is recognized in local maps and social media. The trail resolves user conflicts because of remoteness and proximity to Grand Junction. The trail was not previously designated but developed in an area that was labeled Open to Cross Country Travel. We would encourage the BLM to keep this trail system open and follow a planned process to mitigate any problem areas within the existing trail system. Trails: (F555, F571, F572, F560): We recommend Alternative (A). These trails connect V.2 road and the Coon Hollow area. They provide an important link between these two roads and allow for a much enhanced experience as opposed to riding down the gas roads. There are areas of slick rock and challenges that add a great deal to the recreation experience. This two-track trail enhances the recreation experience and adds a great deal to the overall enjoyment of this area. The Option B, Preferred Alternative closes these routes to motorized recreation. There is no documented proof exhibited in the EIS that shows substantial evidence that there are resource issues impacted by motorized travel. The BLM has made an error in closing these trails and a much better option would be Option A, no action. Zone (H) North of Coal Gulch: Option (D) Trail (H)52, & (H)40, complete the loop between Coal Gulch and Garvey Canyon. It is important to keep this connection open for >50" motorized travel. Zone (I) 21 Road-Hwy 139A: Option (D) Trail (I)1027, provides a loop ride from Coal Gulch to Garvey Canyon and back on 16 Road. This is a desirable option for >50" motorized travel. This trail provides a scenic view and remote feeling traversing between canyons. This is an important route for ATV's, Motorcycles and possibly mountain bikes. Zone (M) Cameo/Coal Canyon and Main Canyon area: M420, M410, & M414 are listed as "Vested Interest" by Mesa County Roads and Right of Way. This road may have been inadvertently closed without proper authority granted by the Mesa County Commissioners. Please comment on this issue. If the road was inappropriately closed, then it should be reopened to motorized travel immediately. In Zone (P) Bangs Canyon/Snyder Flats area: Trails P450, P288, P286, P440, P309, P315, P312, P308, & P314 should be left open to motorized travel. These routes access areas above Snyder Flats which adds diversity and interest to other recreation options in the BLM Field office area. Trails P291 and P402, should remain open to motorized travel as option (D) would allow. This route offers a full day of exploring in a very unusual area. The slick rock formations and canyons area some of the highlights. To traverse the length of this route is a good days journey and allows a fulfilling social outing with friends. Zone (V) Gateway: This area features interesting mining history, outstanding scenery, and is a great place for people to explore. The area is very remote, with a feeling of being back in another time period. Our comment pertains to keeping as many of the routes open in this area simply because of the experiences that they provide. Many old roads lead back into mining areas or scenic overlooks into Maverick canyon. Closing these routes would create significant administrative problems for the BLM. Just the signing of closed routes would probably take years at great expense and then the enforcement of these closures would be difficult. A much better option would be to leave the roads open and let the people enjoy the possibilities of exploring this incredible country.

Commenter Name: Siegfried, Brandon**Organization:****Submission Code: cfc0079****Recommended: Open (All modes of travel)**

I feel strongly that these high value recreational routes (route segments) in Zone P should remain open to the general public for all forms of use including motorized/OHV use. Routes P: 212, 219, 16, 12, 888, 889, 887, 703, 702, 704, 705, 697, 270, 1182, 792, 793, 572, 571, 569, 273, 2007, 251, 8, 855, 450, 451, 394, 393, 297, 296, 298, 410. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone P routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Designation

Proposed Designation: Closed**Seasonal Limitations: None**

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Vegetation Riparian proximate (100 ft)
- Wildlife Bighorn Sheep Production Area

- Wildlife Mule Deer Winter Range
- Wildlife Bighorn Sheep Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to reduce livestock and recreation impacts to riparian areas.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: P8

Commenter Name: Znamenacek, Dale

Submission Code: emc0631

Organization: Grand Mesa Jeep Club

Recommended: Open (All modes of travel)

Trail Number(s): P8, P251 Trail Name: East Creek Trail Description (challenges, viewpoints, terrain type, etc.): Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is an area I enjoy exploring using a variety of methods: full size 4WD, UTV, and ATV. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that this trail is close to home. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This makes a nice shorter trip, good for exploring and enjoyable for the whole family. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): Please leave this trail open to full size 4WD year round.

Commenter Name: Potterveld, Jan

Organization: Back Country Horsemen of Colorado

Submission Code: emc0634**Recommened: Foot/Horse/Mechanized**

Trails P8 and P251 could be left open to bike, horse and foot travel. There is no apparent reason to close this down.

Commenter Name: Atencio, James**Organization: Grand Mesa Jeep Club****Submission Code: rmc0025****Recommened: Open (All modes of travel)**

Historical use: picnics, rock crawling, photography, exersising, pets, use 1-2 times per week. Like because it is close to home, scenic views, wildlife. Benefits are family time, exercise, solitude. Leave open to full sized vehicles, hiking, atvs.

Commenter Name: Hundtroft, Thomas**Organization: Bookcliff Rattlers****Submission Code: emc0693****Recommened: Foot/Horse/Mechanized/Motorcycle**

The Snyder Flats Rd. (P-291 P-402) is a scenic opportunity for day motorized use and provides access to nature and hiking experiences in a remote undeveloped landscape. The listed routes are critical to the recreation experiences described in Appendix M of the RMP.

Commenter Name: Hundtroft, Thomas**Organization: Bookcliff Rattlers****Submission Code: emc0693****Recommened: Open (All modes of travel)**

East Creek P8, P251 Leave Open to full size, nice short trip for exploring

Commenter Name: Siegfried, Brandon**Organization:****Submission Code: cfc0079****Recommened: Open (All modes of travel)**

I feel strongly that these high value recreational routes (route segments) in Zone P should remain open to the general public for all forms of use including motorized/OHV use. Routes P: 212, 219, 16, 12, 888, 889, 887, 703, 702, 704, 705, 697, 270, 1182, 792, 793, 572, 571, 569, 273, 2007, 251, 8, 855, 450, 451, 394, 393, 297, 296, 298, 410. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone P routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

["The Reservation" South of Sieber Canyon] I would to see that there are no changes or closures to these routes. We use these routes for hunting in the fall. There are elderly hunters in our party that will no longer be able to hunt this area if the routes are closed to vehicles.

Commenter Name: No Record**Organization: No Record****Submission Code: No Record****Recommended: Open (All modes of travel)**

I am writing this letter in regard to a decision that is about to be made regarding a relatively small piece of BLM controlled land on Glade Park in Western Slope of Colorado (RMP travel management update for the Grand Junction District: Q103, Q139, Q140, Q141, and Q149). The land I'm referencing is commonly known as "The Reservation". It is isolated by Sieber Canyon and is accessible by motorized vehicles only through private land. The BLM is on the verge of eliminating the use of motorized vehicles on the Reservation. I sincerely believe that regardless of claims to the contrary, the decision to close this country has already been made. (A year and a half ago, the malcontents who have been pressuring the local BLM office to close the Reservation to motorized vehicles bragged to all who would listen that they had been assured by the Grand Junction BLM office that the closure was a "done deal".) This decision would have a real, immediate, and detrimental impact on me and the other landowners whose land borders the Reservation. The fact is, the Reservation has been open to motorized vehicles for decades. Using vehicles on the Reservation would not be an issue if it were not for the loud, sustained and sometimes dishonest grumbling of two or three jealous malcontents who have apparently been able to catch your ear. In fact up until these malcontents were no longer allowed through our private property, it seems they thought the use of motorized vehicles was perfectly acceptable as evidenced by their use of their motorized vehicles on the Reservation. When they were no longer allowed access onto the Reservation through our private land*, an unauthorized trail was built on public land to accommodate four wheelers. The illegal trail was closed by the BLM, and shortly thereafter these few malcontents began their campaign. These jealous malcontents remind me of the little boy who destroys his neighbor's toy because he didn't have one. The very few people doing the complaining use the Reservation only during hunting season. The malcontents could access the Reservation at other times of the year, but don't. We (the landowners, their families, friends, and acquaintances) enjoy the Reservation all year around. Camping, picnicking, hiking, shed hunting, sight seeing with out of town visitors, caring for cows are some of the activities that take place on the Reservation. Because we can presently use motorized vehicles, small children and the elderly can also enjoy this country. I've attempted to calculate the number of people who can now enjoy the Reservation. I think that number is well over 100 thoughtful individuals, including children and older adults, all of whom take care of private and public lands. We have not been selfish in allowing responsible people access through our lands and onto the Reservation. If motorized vehicles are eliminated, only a handful of people will be able to enjoy the Reservations. Among those eliminated will be all of us who are getting up there in age (I'm 63). At least two 80+ year old landowner who have hunted this land and paid taxes on their land for over forty years will not be able to use the Reservation again. For us this is serious business. I must also add that it is the property owners and their guests who have kept the Reservation clean. We are the ones who pick up beer cans and other trash left by people in places on the Reservation where only peopl on horse back or hiking can reach. The littering always takes place during hunting season. (I have never known the malcontents to pick up even one beer can during their short visits to the Reservation.) We have been the only good stewards of that land. And we have been good stewards for decades. The roads on the Reserveration have been kept up by one of the landowners. Eliminating motorized vehicles from the Reservation is in fact declaring the Reservation a wilderness area. It is my understanding that a specific process is necessary to make such a declaration. In this instance that process has not been followed. If it is decided that motorized vehicles will no longer be allowed on the Reservation, that decision will be made to quiet the squeaking wheels, not because of any positive impact on the Reservation or the flora and fauna on that land. Thank you for your time and attention. * The access through our private land was restricted because the number of people using our lands kept increasing, and many of these people were tearing up the roads on our properties, leaving trash, and trespassing onto other portions of our deeded land. We attempted to eliminated only those who did not take care of the land.

Recommened: Foot/Horse/Mechanized/Motorcycle

A non motorized zone is proposed in Alt B that encompasses routes Q- 524, 526, 528, 529, 513, 514, 517, 539, 623, 324, 118, 287. The closure of these routes interrupts a good dual sport motorcycle opportunity and denies access to hunters in a good hunting location. A spring closure due to soil conditions would be more appropriate. As the entire Field Office will be managed as a designated routes limited zone the designation of non motorized zones is not necessary.

Public Comments On Route: Q121

Commenter Name: Weber, Patricia
Submission Code: emc0459

Organization:
Recommened: Open (All modes of travel)

Q121, Q479, Q448: object to "Administrative" classification of these roads. This eliminates possibility for public to make a nice "loop" drive with Q114 and Q481.

Commenter Name: Znamenacek, Dale
Submission Code: emc0668

Organization: Grand Mesa Jeep Club
Recommended: Open (All modes of travel)

Trail Number(s): Q114, Q457, Q461, Q208, Q451, Q461, Q437, Q445, Q121, Q450, Q479, Q338, Q480, Q448, Q121, Q117
Trail Name: Pinon Mesa Loop Trail Description (challenges, viewpoints, terrain type, etc.): This trail offers a mix of challenges and scenic views. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is a great area for exploration and getting away from the crowds. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that this trail is a little more remote. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This trail offers me a feeling of remoteness and is an enjoyable area to explore with my friends and family. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): I would like to see this trail remain open to all vehicles, including full-size. Q121 is needed to make the loop with Q114. I would like to see Q479, Q480, & Q448 remain open, as they offer further opportunities to explore and to take in the scenic viewpoints. These routes aren't just meaningless dead ends - they offer a place to get off the beaten path, take in the view, and find a spot to camp.

– Route: Q139

– Segment: 10385

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Water Stream Crossing
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Wildlife Mule Deer Winter Range
- Wildlife Wildlife Emphasis Area
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

I am writing this letter in regard to a decision that is about to be made regarding a relatively small piece of BLM controlled land on Glade Park in Western Slope of Colorado (RMP travel management update for the Grand Junction District: Q103, Q139, Q140, Q141, and Q149). The land I'm referencing is commonly known as "The Reservation". It is isolated by Sieber Canyon and is accessible by motorized vehicles only through private land. The BLM is on the verge of eliminating the use of motorized vehicles on the Reservation. I sincerely believe that regardless of claims to the contrary, the decision to close this country has already been made. (A year and a half ago, the malcontents who have been pressuring the local BLM office to close the Reservation to motorized vehicles bragged to all who would listen that they had been assured by the Grand Junction BLM office that the closure was a "done deal".) This decision would have a real, immediate, and detrimental impact on me and the other landowners whose land borders the Reservation. The fact is, the Reservation has been open to motorized vehicles for decades. Using vehicles on the Reservation would not be an issue if it were not for the loud, sustained and sometimes dishonest grumbling of two or three jealous malcontents who have apparently been able to catch your ear. In fact up until these malcontents were no longer allowed through our private property, it seems they thought the use of motorized vehicles was perfectly acceptable as evidenced by their use of their motorized vehicles on the Reservation. When they were no longer allowed access onto the Reservation through our private land*, an unauthorized trail was built on public land to accommodate four wheelers. The illegal trail was closed by the BLM, and shortly thereafter these few malcontents began their campaign. These jealous malcontents remind me of the little boy who destroys his neighbor's toy because he didn't have one. The very few people doing the complaining use the Reservation only during hunting season. The malcontents could access the Reservation at other times of the year, but don't. We (the landowners, their families, friends, and acquaintances) enjoy the Reservation all year around. Camping, picnicking, hiking, shed hunting, sight seeing with out of town visitors, caring for cows are some of the activities that take place on the Reservation. Because we can presently use motorized vehicles, small children and the elderly can also enjoy this country. I've attempted to calculate the number of people who can now enjoy the Reservation. I think that number is well over 100 thoughtful individuals, including children and older adults, all of whom take care of private and public lands. We have not been selfish in allowing responsible people access through our lands and onto the Reservation. If motorized vehicles are eliminated, only a handful of people will be able to enjoy the Reservations. Among those eliminated will be all of us who are getting up there in age (I'm 63). At least two 80+ year old landowner who have hunted this land and paid taxes on their land for over forty years will not be able to use the Reservation again. For us this is serious business. I must also add that it is the property owners and their guests who have kept the Reservation clean. We are the ones who pick up beer cans and other trash left by people in places on the Reservation where only peopl on horse back or hiking can reach. The littering always takes place during hunting season. (I have never known the malcontents to pick up even one beer can during their short visits to the Reservation.) We have been the only good stewards of that land. And we have been good stewards for decades. The roads on the Reserveration have been kept up by one of the landowners. Eliminating motorized vehicles from the Reservation is in fact declaring the Reservation a wilderness area. It is my understanding that a specific process is necessary to make such a declaration. In this instance that process has not been followed. If it is decided that motorized vehicles will no longer be allowed on the Reservation, that decision will be made to quiet the squeaking wheels, not because of any positive impact on the Reservation or the flora and fauna on that land. Thank you for your time and attention. * The access through our private land was restricted because the number of people using our lands kept increasing, and many of these people were tearing up the roads on our properties, leaving trash, and trespassing onto other portions of our deeded land. We attempted to eliminated only those who did not take care of the land.

Recommended: Limited to Vehicles Under 50" wide

– Route: Q184

– Segment: 11124

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range
- Wildlife Wildlife Emphasis Area
- Range Study Site
- Range Development

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

[Grand Mesa Jeep Club, Absolute Off Road, LLC] 2. Roads from Little Delores Rd. south and west, above the Little Delores Canyon. Q247; Q231; Q205; Q206; Q230; Q228; Q214; Q225; Q229; Q184; Q48; Q174; Q183; Q163; These Jeep roads offer lower elevation running that give people a place to go in late fall and early spring. This can help folks relieve tension from being hom bound through the winter months. There is much beautiful scenery and often wildlife to observe in the area as well. We have done several hours of maintenance on these Jeep Roads making them safer and cleaner for the public. The majority of these roads are not difficult to traverse, so many average vehicles may negotiate them. We (the above) use them nearly year-round and recommend them to others as well. This area is also used extensively for hunting by ATVs and 4-wheelers.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant

disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class II
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.

Recommended: Open (All modes of travel)

Trail Number(s): Q114, Q457, Q461, Q208, Q451, Q461, Q437, Q445, Q121, Q450, Q479, Q338, Q480, Q448, Q121, Q117 Trail Name: Pinon Mesa Loop Trail Description (challenges, viewpoints, terrain type, etc.): This trail offers a mix of challenges and scenic views. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is a great area for exploration and getting away from the crowds. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that this trail is a little more remote. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This trail offers me a feeling of remoteness and is an enjoyable area to explore with my friends and family. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): I would like to see this trail remain open to all vehicles, including full-size. Q121 is needed to make the loop with Q114. I would like to see Q479, Q480, & Q448 remain open, as they offer further opportunities to explore and to take in the scenic viewpoints. These routes aren't just meaningless dead ends - they offer a place to get off the beaten path, take in the view, and find a spot to camp.

[Map attached] Great views - unknown by most people - Has a lot of history from 1800s to early 1900s + with the "Water Jugs", the "Bisbuit" and "Doctors Point". IT is good route for beginners to advanced. Remote and away from most users. Used often by WSATVA members. Q247 to Q230 to Q228 to Q214 - back again and over to Q229 to Q184 to Q173 to Q174, Q183 and Q184 is all a popular ATV club route in Fall and Spring. A way to make some of it loop would be great.

[Grand Mesa Jeep Club, Absolute Off Road, LLC] 2. Roads from Little Delores Rd. south and west, above the Little Delores Canyon. Q247; Q231; Q205; Q206; Q230; Q228; Q214; Q225; Q229; Q184; Q48; Q174; Q183; Q163; These Jeep roads offer lower elevation running that give people a place to go in late fall and early spring. This can help folks relieve tension from being home bound through the winter months. There is much beautiful scenery and often wildlife to observe in the area as well. We have done several hours of maintenance on these Jeep Roads making them safer and cleaner for the public. The majority of these roads are not difficult to traverse, so many average vehicles may negotiate them. We (the above) use them nearly year-round and recommend them to others as well. This area is also used extensively for hunting by ATVs and 4-wheelers.

— **Segment: 10169**

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Needs More Data
- Cultural

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class II
- Water Stream Crossing
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Range Study Site

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain public access to areas identified as important for recreation.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

- Cultural Resource Concern

Cultural Resource Concern

- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation VRM Class II
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Range Study Site

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.
- Designation was considered to maintain a minimum of administrative access to range study sites.

Public Comments On Route: Q287

Commenter Name: Hundtroft,
Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693**Recommened: Foot/Horse/Mechanized/Motorcycle**

A non motorized zone is proposed in Alt B that encompasses routes Q 526, 528, 529, 513, 517, 623, 324, and 287. The closure of these routes interrupts a good dual sport motorcycle opportunity and denies access to hunters in a good hunting location. A spring closure due to soil conditions would be more appropriate. Otherwise, this is added to 5,000 acre (in aggregate) withdrawal requiring Congressional approval.

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693**Recommened: Foot/Horse/Mechanized/Motorcycle**

A non motorized zone is proposed in Alt B that encompasses routes Q- 524, 526, 528, 529, 513, 514, 517, 539, 623, 324, 118, 287. The closure of these routes interrupts a good dual sport motorcycle opportunity and denies access to hunters in a good hunting location. A spring closure due to soil conditions would be more appropriate. As the entire Field Office will be managed as a designated routes limited zone the designation of non motorized zones is not necessary.

- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Wildlife Gunnison Sage Grouse Active Lek (4 miles)
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Wildlife Wildlife Emphasis Area
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to close duplicate or redundant routes within 4 miles of Gunnison or greater Sage-Grouse lek.
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Public Comments On Route: Q324

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommended: Foot/Horse/Mechanized/Motorcycle

A non motorized zone is proposed in Alt B that encompasses routes Q 526, 528, 529, 513, 517, 623, 324, and 287. The closure of these routes interrupts a good dual sport motorcycle opportunity and denies access to hunters in a good hunting location. A spring closure due to soil conditions would be more appropriate. Otherwise, this is added to 5,000 acre (in aggregate) withdrawal requiring Congressional approval.

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommened: Foot/Horse/Mechanized/Motorcycle

A non motorized zone is proposed in Alt B that encompasses routes Q- 524, 526, 528, 529, 513, 514, 517, 539, 623, 324, 118, 287. The closure of these routes interrupts a good dual sport motorcycle opportunity and denies access to hunters in a good hunting location. A spring closure due to soil conditions would be more appropriate. As the entire Field Office will be managed as a designated routes limited zone the designation of non motorized zones is not necessary.

– Route: Q437

– Segment: 13366

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: Spring Closure 1 (Sage Grouse)

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: Spring Closure 1 (Sage Grouse)

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Water Stream Crossing
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Wildlife Elk Production Area

Rationale for Decision

- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class II
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.

Trail Number(s): Q114, Q457, Q461, Q208, Q451, Q461, Q437, Q445, Q121, Q450, Q479, Q338, Q480, Q448, Q121, Q117 Trail Name: Pinon Mesa Loop Trail Description (challenges, viewpoints, terrain type, etc.): This trail offers a mix of challenges and scenic views. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is a great area for exploration and getting away from the crowds. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that this trail is a little more remote. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This trail offers me a feeling of remoteness and is an enjoyable area to explore with my friends and family. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): I would like to see this trail remain open to all vehicles, including full-size. Q121 is needed to make the loop with Q114. I would like to see Q479, Q480, & Q448 remain open, as they offer further opportunities to explore and to take in the scenic viewpoints. These routes arent just meaningless dead ends - they offer a place to get off the beaten path, take in the view, and find a spot to camp.

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Wildlife Wildlife Emphasis Area
- Range Study Site

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.
- Designation was considered to maintain a minimum of administrative access to range study sites.

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Wildlife Wildlife Emphasis Area
- Range Study Site
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.
- Designation was considered to maintain a minimum of administrative access to range study sites.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Trail Number(s): Q338, Q479, Q478, U111, U715, U197, U662, U202, U671, U315 Trail Name: Glade Park to Gateway Trail Description (challenges, viewpoints, terrain type, etc.): This is an incredibly scenic route and unique in that you can travel from Glade Park to Gateway without getting on the highway Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This trail has been permitted for the Grand Mesa Jeep Clubs Rock Junction event in 2012 and 2013. It has been a popular route. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that this trail offers scenic views and the thrill of several switchbacks as it snakes its way down to the Dolores River Valley. I like that it offers a backroads adventurous way to get from Glade Park to Gateway. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This trail offers a remote "off the beaten path" way to get to Gateway. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): I would like to see this trail remain open to all vehicles, including the U197 spur road.

Area Q: Q338, Q479, Q478 1. History: this road or trail begins at the end of DS Road at the border of Colorado/Utah. The vast majority of the actual trail is in Utah but crosses the border several times on its way down toward Gateway. 2. The Grand Mesa Jeep Club had a special use permit for the 2012 Rock Junction event. 3. This road/trail has been used for many years by the Jeep club and public. There are many Vista points along the way looking down toward the La Sal mountain range, Steamboat Mesa, and other mesas in the distance. 4. This road/trail is neither difficult nor rough and an SUV with high ground clearance can negotiate the trail with little problem. 5. We ask that the BLM give serious consideration to leaving this Road/trail "Open to all motorized vehicles" in the 2013 RMP/Travel Management Plan.

Trail Description: Long, intensive trail with much history. Historical use: lots of back country primitive camping. I simply like long trails in remote areas. Benefits: remoteness Remain open please.

Commenter Name: , Mitch
Submission Code: rmc0025

Organization: Grand Mesa Jeep Club
Recommended: Open (All modes of travel)

Trail Description (challenges, viewpoints, terrain type, etc.): These trails make an awesome connector route from glade park and Pinion Mesa to Gateway. This is a remote trail that can be very challenging while having some great scenic views of many types of terrain. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): I usually travel part of this trail at least once a year and have done the whole trail probable 5-6 times in the last 8 years. I just like this trail fro the remoteness and lack of people. Why you like this trait(challenges you vehicle, close to home, wildlife, history characteristics views): I really enjoy the lack of people in this area and the fact that takes you to gateway or you can split off and head into Utah and to Moab. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This trail offers a great getaway, hunting access, hiking, and remoteness. This is one of a very few trails that allows travel to another town without using a highway. This is truly a gem. It would be horrible it this trail or side spurs were closed to make admin routes.

Commenter Name: Harris, Jonathan
Submission Code: rmc0025

Trail Description (challenges, viewpoints, terrain type, etc.): The above areas are special to me, my family and many others. They represent unique view opportunities and driving challenges and the spurrs above offer great camping and view points Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): Exploring, 4x4 driving, a big appeal to driving these less traveled roads and spurrs is the feeling of exploration that is often lost when channelized onto major routes. Why you like this trait(challenges you vehicle, close to home, wildlife, history characteristics views): The big appeal of these trails is to get away from others and experience the solitude of the outdoors the views and camping are amazing. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): The solitude and sencse of adventure are the big draws for me for these areas. They are unmatched in Colorado. These areas currently receive very light traffic. The vast majority of users are respectful to the ecology, the history and other users.

This can help folks relieve tension from being home bound through the winter months. There is much beautiful scenery and often wildlife to observe in the area as well. We have done several hours of maintenance on these Jeep Roads making them safer and cleaner for the public. The majority of these roads are not difficult to traverse, so many average vehicles may negotiate them. We (the above) use them nearly year-round and recommend them to others as well. This area is also used extensively for hunting by ATVs and 4-wheelers.

Designation ?

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.

A non motorized zone is proposed in Alt B that encompasses routes Q 526, 528, 529, 513, 517, 623, 324, and 287. The closure of these routes interrupts a good dual sport motorcycle opportunity and denies access to hunters in a good hunting location. A spring closure due to soil conditions would be more appropriate. Otherwise, this is added to 5,000 acre (in aggregate) withdrawal requiring Congressional approval.

- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.

Organization: Bookcliff Rattlers

Recommended: Foot/Horse/Mechanized/Motorcycle

A non motorized zone is proposed in Alt B that encompasses routes Q- 524, 526, 528, 529, 513, 514, 517, 539, 623, 324, 118, 287. The closure of these routes interrupts a good dual sport motorcycle opportunity and denies access to hunters in a good hunting location. A spring closure due to soil conditions would be more appropriate. As the entire Field Office will be managed as a designated routes limited zone the designation of non motorized zones is not

necessary.

A non motorized zone is proposed in Alt B that encompasses routes Q 526, 528, 529, 513, 517, 623, 324, and 287. The closure of these routes interrupts a good dual sport motorcycle opportunity and denies access to hunters in a good hunting location. A spring closure due to soil conditions would be more appropriate. Otherwise, this is added to 5,000 acre (in aggregate) withdrawal requiring Congressional approval.

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Wildlife Gunnison Sage Grouse Active Lek (4 miles)
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to close duplicate or redundant routes within 4 miles of Gunnison or greater Sage-Grouse lek.
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.

- Designation was considered to minimize fragmentation of sagebrush vegetation.

The following is a partial list of roads, that should remain open and usable, that are listed for closure or restriction in the proposed RMP Alternative B, C and or D. U13, U14, U11, U699, U345, U701, U317, U701, U317, U680, U681, U682 U15, U17, U23, U20, U18, U666, U723, U725, U712, W221, W2, W225, W222, W218, W60, W27, W57, W51, W33, W53, W176. W174, W118, W125, W126, W120, W192, W194, W195, W198, Q121, Q338, Q448, Q450, Q479, Q256, Q673, Q529, Q517, Q528, Q535, Q537, Q539, Q115, Q623, Q771, Q737, Q763, Q835

– Route: Q539

– Segment: 12706

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation VRM Class III
- Wildlife Gunnison Sage Grouse Active Lek (4 miles)
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to close duplicate or redundant routes within 4 miles of Gunnison or greater Sage-Grouse lek.
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.

Recommended: Open (All modes of travel)

Trail Number(s): Q529, Q528, Q524, Q526, Q517, Q513, Q539, Q623 **Trail Name:** Miracle Rock Area Trail
Description (challenges, viewpoints, terrain type, etc.): This is currently a land locked area, but the BLM has shown the intent to acquire 2 pieces of private land within the area. If the BLM completes the land trade, it would open up the area to be able to explore it. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): The land locked status has prevented me from exploring this area. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): The BLM should keep these routes open to all motorized uses. The BLM does not present any analysis in the DRMP that supports its preferred alternative of making this area nonmotorized. It makes no sense that the BLM acquire additional public land for the sole purpose of keeping the public out of it.

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommended: Foot/Horse/Mechanized/Motorcycle

A non motorized zone is proposed in Alt B that encompasses routes Q- 524, 526, 528, 529, 513, 514, 517, 539, 623, 324, 118, 287. The closure of these routes interrupts a good dual sport motorcycle opportunity and denies access to hunters in a good hunting location. A spring closure due to soil conditions would be more appropriate. As the entire Field Office will be managed as a designated routes limited zone the designation of non motorized zones is not necessary.

– Route: Q623

– Segment: 12983

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or

other resources of the public lands, and to prevent impairment of wilderness suitability.

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III
- Wildlife Gunnison Sage Grouse Active Lek (4 miles)
- Wildlife Gunnison Sage Grouse Proposed Critical Habitat
- Wildlife Wildlife Emphasis Area
- Range Study Site

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to close duplicate or redundant routes within 4 miles of Gunnison or greater Sage-Grouse lek.
- Designation was considered to protect greater sage grouse habitats by reducing routes through sage brush parks.
- Designation was considered to minimize fragmentation of sagebrush vegetation.
- Designation was considered to maintain a minimum of administrative access to range study sites.

Public Comments On Route: Q835

Commenter Name: Shepherd, Janice

Organization:

Submission Code: rmc0089

Reccomended: Closed

Q835 is listed in alt B as Administrative/Permitted. This should be changed to closed past 12 S 698872 4320885. There are significant erosion problems on this route in the area to the west of 12 S 698828 4320902 (for example see images IMG_9205 and IMG_9206). Significant work would need to be done to keep this route viable for motorized use. Better to save limited resources and close the north portion of this route. If access is needed for purposes such as retrieving cattle, it should be done on foot or horseback.

Commenter Name: Moores, Craig

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

Public Comments On Route: U110

Commenter Name: Znamenacek, Dale

Organization: Grand Mesa Jeep Club

Submission Code: emc0728**Recommened: Open (All modes of travel)**

Trail Number(s): U110, U181, U32, U37, U35, U44, U423, U72, U730, U731, U425, U655, U61, U63, U170, U177
 Trail Name: John Brown Canyon to Dolores Point, South Beaver Mesa Trail Description (challenges, viewpoints, terrain type, etc.): These roads make up interesting and scenic side routes to explore from John Brown Canyon Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): My family enjoys exploring this area in our 4WD vehicle. I enjoy photographing the scenic vistas. Theres nothing like being parked out on some of these points, sitting on the tailgate, enjoying a picnic lunch, and admiring the views. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I enjoy the views from these trails. The scenery in the area surrounding Gateway is fantastic, especially when you can drive to the edge of the mesas and look down into the canyons that feed the Dolores River and see the Dolores River Valley itself. In areas like this one, the little spur routes that go out to the edge and to the high points are essential to the experience. I think its part of human nature to want to get close to the edge and look down at whats there and to climb to the highest points for the best view. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): These routes give me the chance to get out and explore with my family. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): The BLM should leave these routes open to fullwidth motorized vehicles.

- No Mitigation prescribed for this route segment

Rationale**Designation Criteria**

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Forestry Access Firewood/Post & Pole Gathering

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

The routes in the south western portion of Zone U are shown as Admin. In Alt B,D and closed in Alt C. These routes provide extraordinary scenery and a variety of OHV experiences, from graded county roads to challenging single track trails. The routes are remnants of mining roads constructed in the 1950s. They are well established and stable. The surfaces are mostly rock and primitive. The season of use is short due to the elevation and snow pack. Contacts with other people are rare. The area is sparsely vegetated and views of the cliffs and river valleys are amazing. Good food and drink is located at the bottom of John Brown Rd. My friends and I visit this area about twice a year. It is an important part of our social life.

– Route: U14

– Segment: 14041

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Wilderness Natural Area:** Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-highway vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation ACEC
- Special Designation VRM Class I
- Special Designation WSA
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to preserve the visual character of the existing landscape, limit or reduce the number of routes in areas managed as VRM Class I
- Designation was considered when protecting Wilderness Study Areas values.
- Designation was considered to reduce impairment of wilderness characteristics in areas managed for wilderness

characteristics.

- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

U701, 317, 703, 345, 11, 13, 14, 417, 15, 19, 20, 17, 18, 23, 25, 27, 343, 28, 30: I object to the closure of all these limited side roads into the Palisade WSA. Closure of these roads would effectively eliminate all access to the WSA. I also object to greatly expanding the area of the Palisade WSA. This area already has limited access by the public. Closing these roads will shut out public access to a large swath of area.

Recommended: Open (All modes of travel)

The following is a partial list of roads, that should remain open and usable, that are listed for closure or restriction in the proposed RMP Alternative B, C and or D. U13, U14, U11, U699, U345, U701, U317, U701, U317, U680, U681, U682 U15, U17, U23, U20, U18, U666, U723, U725, U712, W221, W2, W225, W222, W218, W60, W27, W57, W51, W33, W53, W176. W174, W118, W125, W126, W120, W192, W194, W195, W198, Q121, Q338, Q448, Q450, Q479, Q256, Q673, Q529, Q517, Q528, Q535, Q537, Q539, Q115, Q623, Q771, Q737, Q763, Q835

– Route: U152

– Segment: 17100

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Water Stream Crossing

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Admin/Permitted Use Only

Alternative C (Conservation): Closed

Alternative D (Development): Admin/Permitted Use Only

— Segment: 17101

Designation ?

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route

Public Comments On Route: U152

Commenter Name: Hundtroft,
Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Reccomended: Foot/Horse/Mechanized/Motorcycle

The routes in the south western portion of Zone U are shown as Admin. In Alt B,D and closed in Alt C. These routes provide extraordinary scenery and a variety of OHV experiences, from graded county roads to challenging single track trails. The routes are remnants of mining roads constructed in the 1950s. They are well established and stable. The surfaces are mostly rock and primitive. The season of use is short due to the elevation and snow pack. Contacts with other people are rare. The area is sparsely vegetated and views of the cliffs and river valleys are amazing. Good food and drink is located at the bottom of John Brown Rd. My friends and I visit this area about twice a year. It is an important part of our social life.

– Route: U17

– Segment: 13914

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Wilderness Natural Area:** Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-highway vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Special Designation ACEC
- Special Designation VRM Class I
- Special Designation WSA
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to preserve the visual character of the existing landscape, limit or reduce the number of routes in areas managed as VRM Class I
- Designation was considered when protecting Wilderness Study Areas values.
- Designation was considered to reduce impairment of wilderness characteristics in areas managed for wilderness characteristics.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: U17

Commenter Name: Weber, Patricia

Organization:

Submission Code: emc0459

Recommended: Open (All modes of travel)

U701, 317, 703, 345, 11, 13, 14, 417, 15, 19, 20, 17, 18, 23, 25, 27, 343, 28, 30: I object to the closure of all these limited side roads into the Palisade WSA. Closure of these roads would effectively eliminate all access to the WSA. I also object to greatly expanding the area of the Palisade WSA. This area already has limited access by the public. Closing these roads will shut out public access to a large swath of area.

Commenter Name: Znamenacek, Dale

Organization: Grand Mesa Jeep Club

Submission Code: emc0728

Recommended: Open (All modes of travel)

Trail Number(s): U110, U181, U32, U37, U35, U44, U423, U72, U730, U731, U425, U655, U61, U63, U170, U177
Trail Name: John Brown Canyon to Dolores Point, South Beaver Mesa Trail Description (challenges, viewpoints, terrain type, etc.): These roads make up interesting and scenic side routes to explore from John Brown Canyon Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): My family enjoys exploring this area in our 4WD vehicle. I enjoy photographing the scenic vistas. Theres nothing like being parked out on some of these points, sitting on the tailgate, enjoying a picnic lunch, and admiring the views. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I enjoy the views from these trails. The scenery in the area surrounding Gateway is fantastic, especially when you can drive to the edge of the mesas and look down into the canyons that feed the Dolores River and see the Dolores River Valley itself. In areas

like this one, the little spur routes that go out to the edge and to the high points are essential to the experience. I think its part of human nature to want to get close to the edge and look down at whats there and to climb to the highest points for the best view. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): These routes give me the chance to get out and explore with my family. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): The BLM should leave these routes open to fullwidth motorized vehicles.

– Segment: 14263

Designation [?](#)

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Wilderness Natural Area:** Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-highway vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation ACEC
- Special Designation VRM Class I
- Special Designation WSA
- Water Stream Crossing
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to preserve the visual character of the existing landscape, limit or reduce the number of routes in areas managed as VRM Class I
- Designation was considered when protecting Wilderness Study Areas values.
- Designation was considered to reduce impairment of wilderness characteristics in areas managed for wilderness characteristics.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Alternative C (Conservation): Closed

Alternative D (Development): Closed

— Segment: 14291

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Wilderness Natural Area:** Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-

highway vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation ACEC
- Special Designation VRM Class I
- Special Designation WSA
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to preserve the visual character of the existing landscape, limit or reduce the number of routes in areas managed as VRM Class I
- Designation was considered when protecting Wilderness Study Areas values.
- Designation was considered to reduce impairment of wilderness characteristics in areas managed for wilderness characteristics.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: U18

Commenter Name: Weber, Patricia

Submission Code: emc0459

Organization:

Recommended: Open (All modes of travel)

U701, 317, 703, 345, 11, 13, 14, 417, 15, 19, 20, 17, 18, 23, 25, 27, 343, 28, 30: I object to the closure of all these limited side roads into the Palisade WSA. Closure of these roads would effectively eliminate all access to the WSA. I also object to greatly expanding the area of the Palisade WSA. This area already has limited access by the public. Closing these roads will shut out public access to a large swath of area.

– Segment: 14718

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Potential wildlife mitigation (bat gate)

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural Resource Concern
- Cultural Resource Concern
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Slope Greater than 40%
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with slopes exceeding 40 percent.

Public Comments On Route: U181

Commenter Name: Znamenacek, Dale

Submission Code: emc0728

Organization: Grand Mesa Jeep Club

Reccomended: Open (All modes of travel)

Trail Number(s): U110, U181, U32, U37, U35, U44, U423, U72, U730, U731, U425, U655, U61, U63, U170, U177
 Trail Name: John Brown Canyon to Dolores Point, South Beaver Mesa Trail Description (challenges, viewpoints, terrain type, etc.): These roads make up interesting and scenic side routes to explore from John Brown Canyon Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): My family enjoys exploring this area in our 4WD vehicle. I enjoy photographing the scenic vistas. Theres nothing like being parked out on some of these points, sitting on the tailgate, enjoying a picnic lunch, and admiring the views. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I enjoy the views from these trails. The scenery in the area surrounding Gateway is fantastic, especially when you can drive to the edge of the mesas and look down into the canyons that feed the Dolores River and see the Dolores River Valley itself. In areas like this one, the little spur routes that go out to the edge and to the high points are essential to the experience. I think its part of human nature to want to get close to the edge and look down at whats there and to climb to the highest points for the best view. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): These routes give me the chance to get out and explore with my family. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): The BLM should leave these routes open to fullwidth motorized vehicles.

– Route: U2

– Segment: 14106

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation ACEC
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Wilderness Natural Area:** Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-highway vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation ACEC
- Special Designation VRM Class I
- Special Designation WSA
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to preserve the visual character of the existing landscape, limit or reduce the number of routes in areas managed as VRM Class I
- Designation was considered when protecting Wilderness Study Areas values.
- Designation was considered to reduce impairment of wilderness characteristics in areas managed for wilderness characteristics.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

U701, 317, 703, 345, 11, 13, 14, 417, 15, 19, 20, 17, 18, 23, 25, 27, 343, 28, 30: I object to the closure of all these limited side roads into the Palisade WSA. Closure of these roads would effectively eliminate all access to the WSA. I also object to greatly expanding the area of the Palisade WSA. This area already has limited access by the public. Closing these roads will shut out public access to a large swath of area.

Recommended: Foot/Horse/Mechanized/Motorcycle

The routes in the south western portion of Zone U are shown as Admin. In Alt B,D and closed in Alt C. These routes provide extraordinary scenery and a variety of OHV experiences, from graded county roads to challenging single track trails. The routes are remnants of mining roads constructed in the 1950s. They are well established and stable. The surfaces are mostly rock and primitive. The season of use is short due to the elevation and snow pack. Contacts with other people are rare. The area is sparsely vegetated and views of the cliffs and river valleys are amazing. Good food and drink is located at the bottom of John Brown Rd. My friends and I visit this area about twice a year. It is an important part of our social life.

I feel strongly that these high value recreational routes (route segments) in Zone U should remain open to the general public for all forms of use including motorized/OHV use. Routes!!: 710, 720, 717, 715, 712,722,725, 75,197,199,664,662,665, 759, 666, 202, 671, 234, 235, 232, 315, 25, 17, 20, 27, 28, 30, 19, 15, 14, 11, 345, 703, 317, 701, 315, 676, 682, 681, 677, 680, 35, 170, 355, 294, 594, 645, 543, 472, 309, 110, 497, 387, 110, 423, 63, 95, 520, 637. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone!! routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Segment: 16119

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.

Public Comments On Route: U264

Commenter Name: Hundtroft,
Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommened: Foot/Horse/Mechanized/Motorcycle

The routes in the south western portion of Zone U are shown as Admin. In Alt B,D and closed in Alt C. These routes provide extraordinary scenery and a variety of OHV experiences, from graded county roads to challenging single track trails. The routes are remnants of mining roads constructed in the 1950s. They are well established and stable. The surfaces are mostly rock and primitive. The season of use is short due to the elevation and snow pack. Contacts with other people are rare. The area is sparsely vegetated and views of the cliffs and river valleys are amazing. Good food and drink is located at the bottom of John Brown Rd. My friends and I visit this area about twice a year. It is an important part of our social life.

– Route: U27

– Segment: 13919

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Wilderness Natural Area:** Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-highway vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.
