- Special Designation WSA
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to preserve the visual character of the existing landscape, limit or reduce the number of routes in areas managed as VRM Class I
- Designation was considered when protecting Wilderness Study Areas values.
- Designation was considered to reduce impairment of wilderness characteristics in areas managed for wilderness characteristics.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

U701, 317, 703, 345, 11, 13, 14, 417, 15, 19, 20, 17, 18, 23, 25, 27, 343, 28, 30: I object to the closure of all these limited side roads into the Palisade WSA. Closure of these roads would effectively eliminate all access to the WSA. I also object to greatly expanding the area of the Palisade WSA. This area already has limited access by the public. Closing these roads will shut out public access to a large swath of area.

Commenter Name: Potterveld, Jan

Organization: Back Country Horsemen of Colorado

Submission Code: emc0634

Recommended: Open (All modes of travel)

There are two routes generally opposite County 6.3 road that should stay open for a short distance to a parking area and trail head for departures up 6.3 road via ATV or Horse. This would also provide nice staging area and perhaps interpretive signage to the connection to the Pickett Trail and the Ute Creek Trail. Specifically U27 and U28 should remain open to all users for mile [a quarter mile at most - with active barriers to further motorized/mechanized travel].

Zone U Recommend U75 and U666 (near Granite Creek) be open to at least non-motorized (including mountain bike) use. Recommend U27 and U28 (off Hwy 141 near The Narrows) be left open for dispersed camping opportunities due to lack of these opportunities in the area.

Commenter Name: Bertolacci, Jason

Organization: International Mountain Bicycling Association

Submission Code: emc0912

Recommended: Open (All modes of travel)

Mountain bicyclist would greatly benefit by the allowance of future development west of the Gateway Canyons

resort to include trails downstream on the Dolores River paralleling the road, upstream on West Creek to join the Picket Trail and upstream across the Dolores river and up on the near bench. The trail system currently has fewer miles than most areas that are attractive to mountain bike users. The comments below reflect a need for non-motorized trails that are still open to all quiet uses. There are several large areas designated as off limits to mountain bikes (The Palisade WSA, Sewemup Mesa Wilderness and others) that provide other quiet users (hikers, horseback) with opportunities for experiences without mountain bikes present. Preserving mountain bike access to the remaining backcountry singletrack trails is very important for future generations. Zone U Recommend U75 and U666 (near Granite Creek) be open to non-motorized use. Recommend U27 and U28 (off Hwy 141 near The Narrows) be left open for dispersed camping opportunities due to lack of these opportunities in the area. Zone V Recommend non-motorized use be allowed on V2691 and 1939 Pickett trail. Mountain bicyclists have been maintaining and using this trail for at least two decades. Due to the terrain, motorized use is NOT RECOMMENDED as it will require excessive costs and labor to maintain trail to safe standards. FOREST SERVICE: Recommend non-motorized use be allowed on Lower Ute/Birch Creek trail (no number on map) due to the encouragement of local Forest Service District for mountain bike use to occur on upper portion of trail that crosses Forest Lands. Maintenance and use by mountain bikes has been occurring on this trail for the last 2 decades. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized travel be allowed on V592. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. This trail provides for a "quiet experience" in the midst of a predominantly motorized area. Recommend non-motorized use be allowed on V1007 and V1067 the portion of trail following Blue Creek above the ranch to make a loop. V1007 is an amazing mountain bike ride with incredible trees growing out of the canyon and the tops ending right near the trail. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized use on V803 allowing access to non-motorized trails on Forest Lands. This trail would allow non-motorized access to the Divide Road which is connection to their highly desirable mountain bike opportunities. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized use on the complete length of V930 allowing access to non-motorized trails on Forest Lands. There is also a need to add existing trail (has been submitted previously) into inventory extending from the end of V930 at Forest Boundary north to allow access to non-motorized trails on Forest Lands. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience. Formal trail designation for any use is not recommended for trail following Blue Creek from the Blue Creek ranch downstream to the Dolores river due to trail access at private property, damage to cultural resources and high cost of trail maintenance. Recommend V2810 and V2811 remain open to non-motorized use. The remote nature, solitude provided and interesting band of smooth rock offers a unique and important mountain bike experience. Also allowing use of V2820 and uninventoried route (previously submitted) following the midlevel of cliff band would make a VERY desirable loop with V2810 and V2811. This loop would require a 60 foot section of difficult trail which is not horse or motorized use friendly. There is mining and homestead remains along the trail that would be of great historic interest. Recommend non-motorized use on trail connecting Maverick Canyon and V2626. Recommend non-motorized use on V822 (from Blue Creek ranch), V1421, V1107, V1109 and trail connecting to county road above Mesa Creek. This would allow a good loop opportunity using V1007 and V1067 to return to Blue Creek ranch. The entire length of V822 could be added to this area for a shorter loop option. Recommend non-motorized use on V1151. Although a dead end, it would provide a great easier beginner/kid ride option especially attractive here due to several popular camping spots in the near vicinity. The water availability for pets and the "all downhill" return would be very attractive for a family ride or a shorter evening ride from camp. Recommend non-motorized use on V3062 extending down Maverick Canyon. Although a dead end, it provides a spectacular view and would be a good mellow family ride due to the lack of elevation change, solitude and quiet use of the trail. With a short hike, a glimpse of Juanita Arch adds to the experience. We would really like to see V567 administrative road and then remaining V567 trail into Calamity Canyon open to non-motorized use as depicted in Alternative D. It is an old road down the hill and then follows the drainage to the private property boundary. There is then an uninventoried trail leading up the slope to the east then connecting with road V923 then V922 on a higher bench. This area is perfect to find solitude and ride a single track trail. Zone W Recommend W103 and W217 be left open to at least non-motorized use as it will be the only public access to the small parcel of Forest land. The climb on a mountain bike is very rewarding, the view from the top is magnificent and usually solitude can be found here. Even though it is an out and back, this ride is very rewarding for a seasoned mountain bike user. Allowing only non-motorized use on W213, W214 and W218 would definitely add to the experience of these desired trail options for the mountain bike user. The addition of a new trail from the end of W218 connecting with W213 or W214 would really increase the value of the area for mountain bike use. This would

create a different return or approach route for the BIG climb up W103. Recommend leaving routes W49, W78, W112, W89, W127, W190, W194, W195 (even if deemed administrative) open to non-motorized use for the exploration and solitude this area is known for.

Recommended: Open (All modes of travel)

However, we would support the creation of a staging area/trail head/interpretive sign directly across from 6.3 Rd at the mouth of U28 to allow for parking of motorized and horse trailers and to provide the public with information about the Palisade WSA and the public lands accessible from 6.3 Rd (such as where they can go, who came before them, and how best to leave no trace in this wild landscape). There could also be some dispersed motorized camping, where appropriate. However, this would only work if motorized offtrail travel is forbidden and there is a physical barrier maybe mile from Highway 141, to actively stop motorized and mechanized traffic from entering into the WSA. Thus motorized would be permitted back to a few dispersed camping spots along U28 but still close to the

highway.

– Segment: 14095

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Wilderness Natural Area:** Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-highway vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Special Designation ACEC
- Special Designation VRM Class I
- Special Designation WSA
- Water Stream Crossing
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to preserve the visual character of the existing landscape, limit or reduce the number of routes in areas managed as VRM Class I
- Designation was considered when protecting Wilderness Study Areas values.
- Designation was considered to reduce impairment of wilderness characteristics in areas managed for wilderness characteristics.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: U30

Commenter Name: Weber, Patricia

Organization:

Submission Code: emc0459

Recommended: Open (All modes of travel)

U701, 317, 703, 345, 11, 13, 14, 417, 15, 19, 20, 17, 18, 23, 25, 27, 343, 28, 30: I object to the closure of all these limited side roads into the Palisade WSA. Closure of these roads would effectively eliminate all access to the WSA. I also object to greatly expanding the area of the Palisade WSA. This area already has limited access by the public. Closing these roads will shut out public access to a large swath of area.

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0075

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone U should remain open to the general public for all forms of use including motorized/OHV use. Routes!!: 710, 720, 717, 715, 712,722,725, 75,197,199,664,662,665, 759, 666, 202, 671, 234, 235, 232, 315, 25, 17, 20, 27, 28, 30, 19, 15, 14, 11, 345, 703, 317, 701, 315, 676, 682, 681, 677, 680, 35, 170, 355, 294, 594, 645, 543, 472, 309, 110, 497, 387, 110, 423, 63, 95, 520, 637. RS 2477 Right of Ways (ROWS) and Prescriptive ROW's have been legally established on the entire list of Zone!! routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Route: U315

– Segment: 13911

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Maintenance
- Drainage Crossing

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural Resource Concern
- Other Considerations County Vested Interest
- Recreation Access Dispersed Campsite
- Soils Slope Greater than 40%
- Soils Fragile soils
- Special Designation VRM Class III
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Range Study Site

Rationale for Decision

- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.
- Designation was considered to provide access to undeveloped campsites that exist along dead-end spur roads.

Public Comments On Route: U315

Commenter Name: Potterveld, Jan

Submission Code: emc0634

Organization: Back Country Horsemen of Colorado

Recommened: Open (All modes of travel)

There seems to be significant differences between the BLM data set on County Roads in this area and the inventory furnished by the County, particularly with regard to the extension of MS road past 5 7/10 road into the Granite Creek area. This road segment is marked as #U197. This should be clarified as access to Granite Creek is severely limited from the Colorado side unless this is open to the public. # U315, should be open to the public from 4.2 road

along the northern edge of the Dolores. The BLM data shows this as blocked by private access. If so, access to the Sheep Creek trail needs to be negotiated. Permitted access to U315 should be obtained from 4.2 road to provide legal access to the Sheep Creek Trail.

Commenter Name: Znamenacek, Dale
Submission Code: emc0668

Organization: Grand Mesa Jeep Club
Recommended: Open (All modes of travel)

Trail Number(s): Q338, Q479, Q478, U111, U715, U197, U662, U202, U671, U315 **Trail Name:** Glade Park to Gateway **Trail Description (challenges, viewpoints, terrain type, etc.):** This is an incredibly scenic route and unique in that you can travel from Glade Park to Gateway without getting on the highway **Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping):** This trail has been permitted for the Grand Mesa Jeep Clubs Rock Junction event in 2012 and 2013. It has been a popular route. **Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views):** I like that this trail offers scenic views and the thrill of several switchbacks as it snakes its way down to the Dolores River Valley. I like that it offers a backroads adventurous way to get from Glade Park to Gateway. **Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness):** This trail offers a remote "off the beaten path" way to get to Gateway. **Other Comment (what is your desired outcome for this trail, additional ideas to be considered):** I would like to see this trail remain open to all vehicles, including the U197 spur road.

Commenter Name: Shepherd, Janice
Submission Code: emc0835

Organization: The Quiet Trails Group
Recommended: Open (All modes of travel)

We would also like to ensure that public access is maintained to Sheep Creek via U315 off 4.2 Road. We understand the historic multiuse nature of this trail and support motorized use on this trail. For similar reasons, we support leaving U197 open to full motorized, if public access can be assured through Two V Basin on Pinon Mesa. If this access can be secured then it would be helpful to leave U197 open to all as a means of providing public access from above without having to travel all the way into Utah. We would also like to see U666 open to mechanized, horse and foot travel.

– Route: U319

– Segment: 16622

Designation

Proposed Designation: Foot/Horse/Mechanized
Seasonal Limitations: None

Mitigation

- Potential cultural interpretation

Rationale

Designation Criteria

- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.

No public comments for this Route

– Route: U343

– Segment: 14107

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Wilderness Natural Area:** Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-highway vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Special Designation ACEC
- Special Designation VRM Class I
- Special Designation WSA
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to preserve the visual character of the existing landscape, limit or reduce the number of routes in areas managed as VRM Class I
- Designation was considered when protecting Wilderness Study Areas values.
- Designation was considered to reduce impairment of wilderness characteristics in areas managed for wilderness characteristics.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: U343

Commenter Name: Weber, Patricia

Organization:

Submission Code: emc0459

Recommended: Open (All modes of travel)

U701, 317, 703, 345, 11, 13, 14, 417, 15, 19, 20, 17, 18, 23, 25, 27, 343, 28, 30: I object to the closure of all these limited side roads into the Palisade WSA. Closure of these roads would effectively eliminate all access to the WSA. I also object to greatly expanding the area of the Palisade WSA. This area already has limited access by the public. Closing these roads will shut out public access to a large swath of area.

Commenter Name: Hundtroft, Thomas

– Segment: 15158

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Potential cultural interpretation

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area

- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

Public Comments On Route: U355

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommended: Foot/Horse/Mechanized/Motorcycle

The routes in the south western portion of Zone U are shown as Admin. In Alt B,D and closed in Alt C. These routes provide extraordinary scenery and a variety of OHV experiences, from graded county roads to challenging single track trails. The routes are remnants of mining roads constructed in the 1950s. They are well established and stable. The surfaces are mostly rock and primitive. The season of use is short due to the elevation and snow pack. Contacts with other people are rare. The area is sparsely vegetated and views of the cliffs and river valleys are amazing. Good food and drink is located at the bottom of John Brown Rd. My friends and I visit this area about twice a year. It is an important part of our social life.

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0075

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone U should remain open to the general public for all forms of use including motorized/OHV use. Routes!!: 710, 720, 717, 715, 712,722,725, 75,197,199,664,662,665, 759, 666, 202, 671, 234, 235, 232, 315, 25, 17, 20, 27, 28, 30, 19, 15, 14, 11, 345, 703, 317, 701, 315, 676, 682, 681, 677, 680, 35, 170, 355, 294, 594, 645, 543, 472, 309, 110, 497, 387, 110, 423, 63, 95, 520, 637. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone!! routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Alternative C (Conservation): Limited to Vehicles Under 50" wide

Alternative D (Development): Open (All modes of travel)

— Segment: 14233

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Slope Greater than 40%
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

Public Comments On Route: U37

Commenter Name: Znamenacek, Dale

Submission Code: emc0728

Organization: Grand Mesa Jeep Club

Recommened: Open (All modes of travel)

Trail Number(s): U110, U181, U32, U37, U35, U44, U423, U72, U730, U731, U425, U655, U61, U63, U170, U177
 Trail Name: John Brown Canyon to Dolores Point, South Beaver Mesa Trail Description (challenges, viewpoints, terrain type, etc.): These roads make up interesting and scenic side routes to explore from John Brown Canyon Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): My family enjoys exploring this area in our 4WD vehicle. I enjoy photographing the scenic vistas. Theres nothing like being parked out on some of these points, sitting on the tailgate, enjoying a picnic lunch, and admiring the views. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I enjoy the views from these trails. The scenery in the area surrounding Gateway is fantastic, especially when you can drive to the edge of the mesas and look down into the canyons that feed the Dolores River and see the Dolores River Valley itself. In areas like this one, the little spur routes that go out to the edge and to the high points are essential to the experience. I think its part of human nature to want to get close to the edge and look down at whats there and to climb to the highest points for the best view. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): These routes give me the chance to get out and explore with my family. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): The BLM should leave these routes open to fullwidth motorized vehicles.

Reduce fragmentation, better enforcement

– Route: U380**– Segment: 14286****Designation** ?**Proposed Designation:** Closed**Seasonal Limitations:** None**Mitigation**

- No Mitigation prescribed for this route segment

Rationale**Designation Criteria**

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Slope Greater than 40%
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with slopes exceeding 40 percent.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Slope Greater than 40%
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with slopes exceeding 40 percent.

Recommended: Foot/Horse/Mechanized/Motorcycle

The routes in the south western portion of Zone U are shown as Admin. In Alt B,D and closed in Alt C. These routes provide extraordinary scenery and a variety of OHV experiences, from graded county roads to challenging single track trails. The routes are remnants of mining roads constructed in the 1950s. They are well established and stable. The surfaces are mostly rock and primitive. The season of use is short due to the elevation and snow pack. Contacts with other people are rare. The area is sparsely vegetated and views of the cliffs and river valleys are amazing. Good food and drink is located at the bottom of John Brown Rd. My friends and I visit this area about twice a year. It is

an important part of our social life.

– Route: U4

– Segment: 14113

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their

habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation ACEC
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Riparian proximate (100 ft)
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce livestock and recreation impacts to riparian areas.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Submission Code: emc0728

Organization: Grand Mesa Jeep Club

Recommended: Open (All modes of travel)

Trail Number(s): U110, U181, U32, U37, U35, U44, U423, U72, U730, U731, U425, U655, U61, U63, U170, U177
 Trail Name: John Brown Canyon to Dolores Point, South Beaver Mesa Trail Description (challenges, viewpoints, terrain type, etc.): These roads make up interesting and scenic side routes to explore from John Brown Canyon Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): My family enjoys exploring this area in our 4WD vehicle. I enjoy photographing the scenic vistas. There's nothing like being parked out on some of these points, sitting on the tailgate, enjoying a picnic lunch, and admiring the views. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I enjoy the views from these trails. The scenery in the area surrounding Gateway is fantastic, especially when you can drive to the edge of the mesas and look down into the canyons that feed the Dolores River and see the Dolores River Valley itself. In areas like this one, the little spur routes that go out to the edge and to the high points are essential to the experience. I think it's part of human nature to want to get close to the edge and look down at what's there and to climb to the highest points for the best view. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): These routes give me the chance to get out and explore with my family. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): The BLM should leave these routes open to fullwidth motorized vehicles.

- Range Development

Rationale for Decision

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with slopes exceeding 40 percent.

Public Comments On Route: U439

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Reccomended: Foot/Horse/Mechanized/Motorcycle

The routes in the south western portion of Zone U are shown as Admin. In Alt B,D and closed in Alt C. These routes provide extraordinary scenery and a variety of OHV experiences, from graded county roads to challenging single track trails. The routes are remnants of mining roads constructed in the 1950s. They are well established and stable. The surfaces are mostly rock and primitive. The season of use is short due to the elevation and snow pack. Contacts with other people are rare. The area is sparsely vegetated and views of the cliffs and river valleys are amazing. Good food and drink is located at the bottom of John Brown Rd. My friends and I visit this area about twice a year. It is an important part of our social life.

– Route: U44

– Segment: 14175

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.

Public Comments On Route: U44

Commenter Name: Znamenacek, Dale

Submission Code: emc0728

Organization: Grand Mesa Jeep Club

Recommened: Open (All modes of travel)

Trail Number(s): U110, U181, U32, U37, U35, U44, U423, U72, U730, U731, U425, U655, U61, U63, U170, U177
 Trail Name: John Brown Canyon to Dolores Point, South Beaver Mesa Trail Description (challenges, viewpoints, terrain type, etc.): These roads make up interesting and scenic side routes to explore from John Brown Canyon Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): My family enjoys exploring this area in our 4WD vehicle. I enjoy photographing the scenic vistas. Theres nothing like being parked out on some of these points, sitting on the tailgate, enjoying a picnic lunch, and admiring the views. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I enjoy the views from these trails. The scenery in the area surrounding Gateway is fantastic, especially when you can drive to the edge of the mesas and look down into the canyons that feed the Dolores River and see the Dolores River Valley itself. In areas like this one, the little spur routes that go out to the edge and to the high points are essential to the experience. I think its part of human nature to want to get close to the edge and look down at whats there and to climb to the

highest points for the best view. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): These routes give me the chance to get out and explore with my family. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): The BLM should leave these routes open to fullwidth motorized vehicles.

- Vegetation Public Land Health Standard not meeting biotic standard

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.

Reccomended: Foot/Horse/Mechanized/Motorcycle

The routes in the south western portion of Zone U are shown as Admin. In Alt B,D and closed in Alt C. These routes provide extraordinary scenery and a variety of OHV experiences, from graded county roads to challenging single track trails. The routes are remnants of mining roads constructed in the 1950s. They are well established and stable. The surfaces are mostly rock and primitive. The season of use is short due to the elevation and snow pack. Contacts with other people are rare. The area is sparsely vegetated and views of the cliffs and river valleys are amazing. Good food and drink is located at the bottom of John Brown Rd. My friends and I visit this area about twice a year. It is an important part of our social life.

– Route: U520

– Segment: 17071

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Potential cultural interpretation

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard
- Water Stream Crossing
- Range Development

Rationale for Decision

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

Commenter Name: Siegfried, Brandon**Organization:****Submission Code:** cfc0075**Recommended:** Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone U should remain open to the general public for all forms of use including motorized/OHV use. Routes!!: 710, 720, 717, 715, 712,722,725, 75,197,199,664,662,665, 759, 666, 202, 671, 234, 235, 232, 315, 25, 17, 20, 27, 28, 30, 19, 15, 14, 11, 345, 703, 317, 701, 315, 676, 682, 681, 677, 680, 35, 170, 355, 294, 594, 645, 543, 472, 309, 110, 497, 387, 110, 423, 63, 95, 520, 637. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone!! routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Extensive Recreation Management Area
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.

Public Comments On Route: U594

Commenter Name: Hundtroft,
Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommened: Foot/Horse/Mechanized/Motorcycle

The routes in the south western portion of Zone U are shown as Admin. In Alt B,D and closed in Alt C. These routes provide extraordinary scenery and a variety of OHV experiences, from graded county roads to challenging single track trails. The routes are remnants of mining roads constructed in the 1950s. They are well established and stable. The surfaces are mostly rock and primitive. The season of use is short due to the elevation and snow pack. Contacts with other people are rare. The area is sparsely vegetated and views of the cliffs and river valleys are amazing. Good food and drink is located at the bottom of John Brown Rd. My friends and I visit this area about twice a year. It is

an important part of our social life.

Commenter Name: Siegfried, Brandon

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone U should remain open to the general public for all forms of use including motorized/OHV use. Routes!!: 710, 720, 717, 715, 712,722,725, 75,197,199,664,662,665, 759, 666, 202, 671, 234, 235, 232, 315, 25, 17, 20, 27, 28, 30, 19, 15, 14, 11, 345, 703, 317, 701, 315, 676, 682, 681, 677, 680, 35, 170, 355, 294, 594, 645, 543, 472, 309, 110, 497, 387, 110, 423, 63, 95, 520, 637. RS 2477 Right of Ways (ROWS) and Prescriptive ROW's have been legally established on the entire list of Zone!! routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Trail Number(s): U110, U181, U32, U37, U35, U44, U423, U72, U730, U731, U425, U655, U61, U63, U170, U177
 Trail Name: John Brown Canyon to Dolores Point, South Beaver Mesa Trail Description (challenges, viewpoints, terrain type, etc.): These roads make up interesting and scenic side routes to explore from John Brown Canyon Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): My family enjoys exploring this area in our 4WD vehicle. I enjoy photographing the scenic vistas. Theres nothing like being parked out on some of these points, sitting on the tailgate, enjoying a picnic lunch, and admiring the views. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I enjoy the views from these trails. The scenery in the area surrounding Gateway is fantastic, especially when you can drive to the edge of the mesas and look down into the canyons that feed the Dolores River and see the Dolores River Valley itself. In areas like this one, the little spur routes that go out to the edge and to the high points are essential to the experience. I think its part of human nature to want to get close to the edge and look down at whats there and to climb to the highest points for the best view. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): These routes give me the chance to get out and explore with my family. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): The BLM should leave these routes open to fullwidth motorized vehicles.

– Segment: 16756

Designation [?](#)

Proposed Designation: Foot/Horse/Mechanized

Seasonal Limitations: None

Mitigation

- Potential cultural interpretation

Rationale

Designation Criteria

- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling

- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

Public Comments On Route: U638

Commenter Name: Hundtroft,
Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Reccomended: Foot/Horse/Mechanized/Motorcycle

The routes in the south western portion of Zone U are shown as Admin. In Alt B,D and closed in Alt C. These routes provide extraordinary scenery and a variety of OHV experiences, from graded county roads to challenging single track trails. The routes are remnants of mining roads constructed in the 1950s. They are well established and stable. The surfaces are mostly rock and primitive. The season of use is short due to the elevation and snow pack. Contacts with other people are rare. The area is sparsely vegetated and views of the cliffs and river valleys are amazing. Good food and drink is located at the bottom of John Brown Rd. My friends and I visit this area about twice a year. It is an important part of our social life.

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0075

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone U should remain open to the

general public for all forms of use including motorized/OHV use. Routes!!: 710, 720, 717, 715, 712,722,725, 75,197,199,664,662,665, 759, 666, 202, 671, 234, 235, 232, 315, 25, 17, 20, 27, 28, 30, 19, 15, 14, 11, 345, 703, 317, 701, 315, 676, 682, 681, 677, 680, 35, 170, 355, 294, 594, 645, 543, 472, 309, 110, 497, 387, 110, 423, 63, 95, 520, 637. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone!! routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Route: U654

– Segment: 13501

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Recreation Access Dispersed Campsite
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.

Resources and / or Uses Present

- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Water Stream Crossing
- Range Development

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

Public Comments On Route: U662

Commenter Name: Weber, Patricia

Organization:

Submission Code: emc0459

Recommended: Open (All modes of travel)

U662 - strongly object to changing from Open to Closed/Administrative use. This eliminates ability to travel into Zone Q in this quadrant through what is currently a series of private roads.

Commenter Name: Znamenacek, Dale

Organization: Grand Mesa Jeep Club

Trail Number(s): Q338, Q479, Q478, U111, U715, U197, U662, U202, U671, U315 Trail Name: Glade Park to Gateway Trail Description (challenges, viewpoints, terrain type, etc.): This is an incredibly scenic route and unique in that you can travel from Glade Park to Gateway without getting on the highway Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This trail has been permitted for the Grand Mesa Jeep Clubs Rock Junction event in 2012 and 2013. It has been a popular route. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that this trail offers scenic views and the thrill of several switchbacks as it snakes its way down to the Dolores River Valley. I like that it offers a backroads adventurous way to get from Glade Park to Gateway. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This trail offers a remote "off the beaten path" way to get to Gateway. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): I would like to see this trail remain open to all vehicles, including the U197 spur road.

Submission Code: rmc0025

Recommended: Open (All modes of travel)

Trail Description (challenges, viewpoints, terrain type, etc.): These trails make an awesome connector route from glade park and Pinion Mesa to Gateway. This is a remote trail that can be very challenging while having some great scenic views of many types of terrain. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): I usually travel part of this trail at least once a year and have done the whole trail probable 5-6 times in the last 8 years. I just like this trail fro the remoteness and lack of people. Why you like this trait(challenges you vehicle, close to home, wildlife, history characteristics views): I really enjoy the lack of people in this area and the fact that takes you to gateway or you can split off and head into Utah and to Moab. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This trail offers a great getaway, hunting access, hiking, and remoteness. This is one of a very few trails that allows travel to another town without using a highway. This is truly a gem. It would be horrible it this trail or side spurs were closed to make admin routes.

[Trails Preservation Alliance - www.coloradotpa.org][Subject: Combined input to the BLM RMP, from the TPA and COHVCO.] It is vitally important that Sheep Creek Rd. (U676) and the connecting routes at the top of the mesa remain open to motorized access. These routes along with U199-U664-U675-U662-U665-U671 - provide high quality OHV adventure and long distance opportunity. The remote nature of Ryan Park and Granite Creek are highly prized by the OHV community. These are the only unpaved connectors linking Gateway to Glade Park and Grand Junction. In addition these routes connect to even more scenic adventure opportunities to the west on Grand County roads in Utah.

– Route: U666

– Segment: 13029

Designation [?](#)

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

GRANITE CREEK AREA U666, U712, U710, U717, U685, U691, U699, U681,U723, U722, U712 All of these routes are currently providing hunting access. Most of have easy access which makes them available to the average person. Many of these also provide great view points for the recreational user as well as the hunter. This is a remote area and it serves no useful purpose to close routes that will never see enforcement due to the remoteness. In other words they will be used whether they are listed as closed or open.

Regarding Zone U we like alternative B because #666 should be closed for the elk, and #665 should be closed to full size rigs and #75, 199, 759, 715, 111 all connect in Utah to provide a wonderful roundtrip.

Commenter Name: Shepherd, Janice

Organization: The Quiet Trails Group

Submission Code: emc0835

Recommended: Foot/Horse/Mechanized

We would also like to ensure that public access is maintained to Sheep Creek via U315 off 4.2 Road. We understand the historic multiuse nature of this trail and support motorized use on this trail. For similar reasons, we support leaving U197 open to full motorized, if public access can be assured through Two V Basin on Pinon Mesa. If this access can be secured then it would be helpful to leave U197 open to all as a means of providing public access from above without having to travel all the way into Utah. We would also like to see U666 open to mechanized, horse and foot travel.

Commenter Name: Bertolacci, Jason

Organization: International Mountain Bicycling Association

Submission Code: emc0912

Recommended: Foot/Horse/Mechanized

Mountain bicyclist would greatly benefit by the allowance of future development west of the Gateway Canyons resort to include trails downstream on the Dolores River paralleling the road, upstream on West Creek to join the Picket Trail and upstream across the Dolores river and up on the near bench. The trail system currently has fewer miles than most areas that are attractive to mountain bike users. The comments below reflect a need for non-motorized trails that are still open to all quiet uses. There are several large areas designated as off limits to mountain bikes (The Palisade WSA, Sewemup Mesa Wilderness and others) that provide other quiet users (hikers, horseback) with opportunities for experiences without mountain bikes present. Preserving mountain bike access to the remaining backcountry singletrack trails is very important for future generations. Zone U Recommend U75 and U666 (near Granite Creek) be open to non-motorized use. Recommend U27 and U28 (off Hwy 141 near The Narrows) be left open for dispersed camping opportunities due to lack of these opportunities in the area. Zone V Recommend non-motorized use be allowed on V2691 and 1939 Pickett trail. Mountain bicyclists have been maintaining and using this trail for at least two decades. Due to the terrain, motorized use is NOT RECOMMENDED as it will require excessive costs and labor to maintain trail to safe standards. FOREST SERVICE: Recommend non-motorized use be allowed on Lower Ute/Birch Creek trail (no number on map) due to the encouragement of local Forest Service District for mountain bike use to occur on upper portion of trail that crosses Forest Lands. Maintenance and use by mountain bikes has been occurring on this trail for the last 2 decades. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized travel be allowed on V592. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. This trail provides for a "quiet experience" in the midst of a predominantly motorized area. Recommend non-motorized use be allowed on V1007 and V1067 the portion of trail following Blue Creek above the ranch to make a loop. V1007 is an amazing mountain bike ride with incredible trees growing out of the canyon and the tops ending right near the trail. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized use on V803 allowing access to non-motorized trails on Forest Lands. This trail would allow non-motorized access to the Divide Road which is connection to their highly desirable mountain bike opportunities. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized use on the complete length of V930 allowing access to non-motorized trails on Forest Lands. There is also a need to add existing trail (has been submitted previously) into inventory extending from the end of V930 at Forest Boundary north to allow access to non-motorized trails on Forest Lands. Due to the remote nature and solitude provided by this trail, allowing

motorized use is HIGHLY discouraged. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience. Formal trail designation for any use is not recommended for trail following Blue Creek from the Blue Creek ranch downstream to the Dolores river due to trail access at private property, damage to cultural resources and high cost of trail maintenance. Recommend V2810 and V2811 remain open to non-motorized use. The remote nature, solitude provided and interesting band of smooth rock offers a unique and important mountain bike experience. Also allowing use of V2820 and uninventoried route (previously submitted) following the midlevel of cliff band would make a VERY desirable loop with V2810 and V2811. This loop would require a 60 foot section of difficult trail which is not horse or motorized use friendly. There is mining and homestead remains along the trail that would be of great historic interest. Recommend non-motorized use on trail connecting Maverick Canyon and V2626. Recommend non-motorized use on V822 (from Blue Creek ranch), V1421, V1107, V1109 and trail connecting to county road above Mesa Creek. This would allow a good loop opportunity using V1007 and V1067 to return to Blue Creek ranch. The entire length of V822 could be added to this area for a shorter loop option. Recommend non-motorized use on V1151. Although a dead end, it would provide a great easier beginner/kid ride option especially attractive here due to several popular camping spots in the near vicinity. The water availability for pets and the "all downhill" return would be very attractive for a family ride or a shorter evening ride from camp. Recommend non-motorized use on V3062 extending down Maverick Canyon. Although a dead end, it provides a spectacular view and would be a good mellow family ride due to the lack of elevation change, solitude and quiet use of the trail. With a short hike, a glimpse of Juanita Arch adds to the experience. We would really like to see V567 administrative road and then remaining V567 trail into Calamity Canyon open to non-motorized use as depicted in Alternative D. It is an old road down the hill and then follows the drainage to the private property boundary. There is then an uninventoried trail leading up the slope to the east then connecting with road V923 then V922 on a higher bench. This area is perfect to find solitude and ride a single track trail. Zone W Recommend W103 and W217 be left open to at least non-motorized use as it will be the only public access to the small parcel of Forest land. The climb on a mountain bike is very rewarding, the view from the top is magnificent and usually solitude can be found here. Even though it is an out and back, this ride is very rewarding for a seasoned mountain bike user. Allowing only non-motorized use on W213, W214 and W218 would definitely add to the experience of these desired trail options for the mountain bike user. The addition of a new trail from the end of W218 connecting with W213 or W214 would really increase the value of the area for mountain bike use. This would create a different return or approach route for the BIG climb up W103. Recommend leaving routes W49, W78, W112, W89, W127, W190, W194, W195 (even if deemed administrative) open to non-motorized use for the exploration and solitude this area is known for.

– Route: U68

– Segment: 13505

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard
- Range Development

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

– Segment: 13898

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation VRM Class III
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

I feel strongly that these high value recreational routes (route segments) in Zone U should remain open to the general public for all forms of use including motorized/OHV use. Routes!!: 710, 720, 717, 715, 712,722,725, 75,197,199,664,662,665, 759, 666, 202, 671, 234, 235, 232, 315, 25, 17, 20, 27, 28, 30, 19, 15, 14, 11, 345, 703, 317, 701, 315, 676, 682, 681, 677, 680, 35, 170, 355, 294, 594, 645, 543, 472, 309, 110, 497, 387, 110, 423, 63, 95, 520, 637. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone!! routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Commenter Name: Hundtroft,
Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommened: Foot/Horse/Mechanized/Motorcycle

The routes in the south western portion of Zone U are shown as Admin. In Alt B,D and closed in Alt C. These routes provide extraordinary scenery and a variety of OHV experiences, from graded county roads to challenging single track trails. The routes are remnants of mining roads constructed in the 1950s. They are well established and stable. The surfaces are mostly rock and primitive. The season of use is short due to the elevation and snow pack. Contacts with other people are rare. The area is sparsely vegetated and views of the cliffs and river valleys are amazing. Good food and drink is located at the bottom of John Brown Rd. My friends and I visit this area about twice a year. It is an important part of our social life.

Zone U: Granite Creek Close Sheep Creek and road 4.02 to motorized recreational access to protect Granite Creek quiet natural values RMRI supports closures of U199-U664-U675-U662-U665-U671- U520-U544-U605-U599-U135-U110-U107-U382-U380-U379-U71-U37-U35-U36-U38-U47- U77-U80-U84-U731-U425-U69-U422-U56-U730.

– Route: U699

– Segment: 13487

Designation

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Special Designation ACEC
- Special Designation VRM Class II
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: U699

Commenter Name: Chapel, Steve

Submission Code: rmc0013

Organization: Western Slope ATV Association

Recommended: Open (All modes of travel)

GRANITE CREEK AREA U666, U712, U710, U717, U685, U691, U699, U681,U723, U722, U712 All of these routes are currently providing hunting access. Most of have easy access which makes them available to the average person. Many of these also provide great view points for the recreational user as well as the hunter. This is a remote area and it serves no useful purpose to close routes that will never see enforcement due to the remoteness. In other words they will be used whether they are listed as closed or open.

The following is a partial list of roads, that should remain open and usable, that are listed for closure or restriction in the proposed RMP Alternative B, C and or D. U13, U14, U11, U699, U345, U701, U317, U701, U317, U680, U681, U682 U15, U17, U23, U20, U18, U666, U723, U725, U712, W221, W2, W225, W222, W218, W60, W27, W57, W51, W33, W53, W176. W174, W118, W125, W126, W120, W192, W194, W195, W198, Q121, Q338, Q448, Q450, Q479, Q256, Q673, Q529, Q517, Q528, Q535, Q537, Q539, Q115, Q623, Q771, Q737, Q763, Q835

– Route: U701

– Segment: 14087

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Wilderness Natural Area:** Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-highway vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Recreation Access Dispersed Campsite
- Soils Fragile soils
- Special Designation ACEC
- Special Designation VRM Class I
- Special Designation WSA
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Range Study Site

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to preserve the visual character of the existing landscape, limit or reduce the number of routes in areas managed as VRM Class I
- Designation was considered when protecting Wilderness Study Areas values.
- Designation was considered to reduce impairment of wilderness characteristics in areas managed for wilderness characteristics.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to range study sites.

Public Comments On Route: U701

Commenter Name: Weber, Patricia

Submission Code: emc0459

Organization:

Recommended: Open (All modes of travel)

U701, 317, 703, 345, 11, 13, 14, 417, 15, 19, 20, 17, 18, 23, 25, 27, 343, 28, 30: I object to the closure of all these limited side roads into the Palisade WSA. Closure of these roads would effectively eliminate all access to the WSA. I also object to greatly expanding the area of the Palisade WSA. This area already has limited access by the public. Closing these roads will shut out public access to a large swath of area.

Commenter Name: Siegfried, Brandon

Submission Code: cfc0075

Organization:

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone U should remain open to the general public for all forms of use including motorized/OHV use. Routes!!: 710, 720, 717, 715, 712,722,725, 75,197,199,664,662,665, 759, 666, 202, 671, 234, 235, 232, 315, 25, 17, 20, 27, 28, 30, 19, 15, 14, 11, 345, 703, 317, 701, 315, 676, 682, 681, 677, 680, 35, 170, 355, 294, 594, 645, 543, 472, 309, 110, 497, 387, 110, 423, 63, 95, 520, 637. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone!! routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

- Recreation County identified recreation vested interest route
- Recreation Access Dispersed Campsite
- Special Designation VRM Class III
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Organization:

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone U should remain open to the general public for all forms of use including motorized/OHV use. Routes!!: 710, 720, 717, 715, 712,722,725, 75,197,199,664,662,665, 759, 666, 202, 671, 234, 235, 232, 315, 25, 17, 20, 27, 28, 30, 19, 15, 14, 11, 345, 703, 317, 701, 315, 676, 682, 681, 677, 680, 35, 170, 355, 294, 594, 645, 543, 472, 309, 110, 497, 387, 110, 423, 63, 95, 520, 637. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone!! routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

– Route: U717

– Segment: 13627

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- Potential cultural mitigation

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural Resource Concern
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Recreation Access Dispersed Campsite
- Special Designation VRM Class III
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

- Cultural Resource Concern
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard
- Water Stream Crossing
- Range Development

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

Public Comments On Route: U72

Commenter Name: Znamenacek, Dale

Submission Code: emc0728

Organization: Grand Mesa Jeep Club

Recommended: Open (All modes of travel)

Trail Number(s): U110, U181, U32, U37, U35, U44, U423, U72, U730, U731, U425, U655, U61, U63, U170, U177
 Trail Name: John Brown Canyon to Dolores Point, South Beaver Mesa Trail Description (challenges, viewpoints, terrain type, etc.): These roads make up interesting and scenic side routes to explore from John Brown Canyon Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): My family enjoys exploring this area in our 4WD vehicle. I enjoy photographing the scenic vistas. Theres nothing like being parked out on some of these points, sitting on the tailgate, enjoying a picnic lunch, and admiring the views. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I enjoy the views from these trails. The scenery in the area surrounding Gateway is fantastic, especially when you can drive to the edge of the mesas and look down into the canyons that feed the Dolores River and see the Dolores River Valley itself. In areas like this one, the little spur routes that go out to the edge and to the high points are essential to the experience. I think its part of human nature to want to get close to the edge and look down at whats there and to climb to the highest points for the best view. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): These routes give me the chance to get out and explore with my family. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): The BLM should leave these routes open to fullwidth motorized vehicles.

Alternative D (Development): Open (All modes of travel)

– Segment: 14150

Designation

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- Harden campsite, define access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Special Recreation Management Area
- Recreation County identified recreation vested interest route
- Recreation Access Dispersed Campsite
- Soils Fragile soils
- Special Designation ACEC
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species proximate (100m)
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Develop trails and parking away from the river bank. Close all but a few access points to the river. There are already many. This is beautiful stretch of river I first visited in the mid 90s. Being a bird watcher and naturalist I recommend no trails motor

I feel strongly that these high value recreational routes (route segments) in Zone U should remain open to the general public for all forms of use including motorized/OHV use. Routes!!: 710, 720, 717, 715, 712,722,725, 75,197,199,664,662,665, 759, 666, 202, 671, 234, 235, 232, 315, 25, 17, 20, 27, 28, 30, 19, 15, 14, 11, 345, 703, 317, 701, 315, 676, 682, 681, 677, 680, 35, 170, 355, 294, 594, 645, 543, 472, 309, 110, 497, 387, 110, 423, 63, 95, 520, 637. RS 2477 Right of Ways (ROWS) and Prescriptive ROW's have been legally established on the entire list of Zone!! routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Public Comments On Route: V1007

Commenter Name: Winans, Scott

Organization:

Submission Code: emc0868

Recommended: Foot/Horse/Mechanized

Recommend non-motorized (including mountain bike) use be allowed on V1007 and V1067 the portion of trail following Blue Creek above the ranch to make a loop. V1007 is an amazing mountain bike ride with incredible trees growing out of the canyon and the tops ending right near the trail. This is part of a non--motorized (including mountain bike) trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged.

Commenter Name: Winans, Scott

Organization:

Submission Code: emc0868

Recommended: Foot/Horse/Mechanized

Recommend non-motorized (including mountain bike) use on V822 (from Blue Creek ranch), V1421, V1107, V1109 and trail connecting to county road above Mesa Creek. This would allow a good loop opportunity using V1007 and V1067 to return to Blue Creek ranch. The entire length of V822 could be added to this area for a shorter loop option.

Commenter Name: Monholland, Landon

I would like mountain bikes to be allowed on V592. This trail provides for a "quiet experience" in the midst of a mostly motorized area. I would like mountain bikes to be allowed to use V1007 and V1067 and the portion of trail following Blue Creek above the ranch to make a loop. V1007 is an amazing mountain bike ride with incredible trees growing out of the canyon and the tops ending right near the trail. This is part of a non--motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience. I would like mountain bikes to be allowed to use V803 allowing access to non-motorized trails on Forest Lands. This trail would allow non-motorized access to the Divide Road which is a connection to other mountain bike trails in the area. I would like mountain bikes to be allowed to use the complete length of V930 allowing access to non-motorized trails on Forest Lands. I would like mountain bike access on V2810 and V2811 to remain open. The remote nature, solitude provided and interesting band of smooth rock makes this area a favorite. Also allowing use of V2820 an un-inventoried route

following the mid level of cliff band would make a desirable loop with V2810 and V2811. I would like mountain bikes be able to use the trail connecting Maverick Canyon and V2626. I would like mountain bike access on V822 (from Blue Creek ranch), V1421, V1107, V1109 and trail connecting to county road above Mesa Creek. This would allow a good loop opportunity using V1007 and V1067 to return to Blue Creek ranch. The entire length of V822 could be added to this area for a shorter loop option. I would like mountain bike access on V1151. Although a dead end, it would provide a great easier beginner/kid ride option especially attractive here due to several popular camping spots in the near vicinity. The quiet use, creek crossing (always fun), water availability for pets and the all downhill return would be very attractive for a family ride or a shorter evening ride from camp. I would like mountain bike access on V3062 extending down Maverick Canyon. Although a dead end, it provides a spectacular view and would be a good mellow family ride due to the lack of elevation change, solitude and quiet use of the trail. With a short hike, a glimpse of Juanita Arch can be had if one knows where to look.

Trail Number(s): (V813, V1010, V1007) (V3266, V3263, V3277, V3282) (V3266, V1471, V1470) Trail Name: Blue Mesa Trail Description (challenges, viewpoints, terrain type, etc.): The road numbers in () form somewhat of a route. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is an area my family likes to explore in a combined group of ATVs and UTVs. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that this area has a more remote feeling and offers many miles of trails and loop opportunities. I enjoy many of the little spurs that take off from the loops and go out to the scenic overlooks. The two track roads make for a good place to go with an ATV/UTV group. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This makes for a fun ride with the family in a more primitive setting. Its a place to get away from the more crowded riding areas closer to Grand Junction. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): Keep these roads open to all motorized users.

Commenter Name: Cox, Kris

Specifically regarding the Blue Creek Trail Complex outside the Maverick LWC (V930, V1067, V1011, V803, V1007), we support the plan as laid out in Alternative D outside the LWC.

Commenter Name: Bertolacci, Jason

Organization: International Mountain Bicycling Association

Submission Code: emc0912

Recommended: Foot/Horse/Mechanized

Mountain bicyclist would greatly benefit by the allowance of future development west of the Gateway Canyons resort to include trails downstream on the Dolores River paralleling the road, upstream on West Creek to join the Picket Trail and upstream across the Dolores river and up on the near bench. The trail system currently has fewer miles than most areas that are attractive to mountain bike users. The comments below reflect a need for non-motorized trails that are still open to all quiet uses. There are several large areas designated as off limits to mountain bikes (The Palisade WSA, Sewemup Mesa Wilderness and others) that provide other quiet users (hikers, horseback) with opportunities for experiences without mountain bikes present. Preserving mountain bike access to the remaining backcountry singletrack trails is very important for future generations. Zone U Recommend U75 and U666 (near Granite Creek) be open to non-motorized use. Recommend U27 and U28 (off Hwy 141 near The Narrows) be left open for dispersed camping opportunities due to lack of these opportunities in the area. Zone V Recommend non-motorized use be allowed on V2691 and 1939 Pickett trail. Mountain bicyclists have been maintaining and using this trail for at least two decades. Due to the terrain, motorized use is NOT RECOMMENDED as it will require excessive costs and labor to maintain trail to safe standards. FOREST SERVICE: Recommend non-motorized use be allowed on Lower Ute/Birch Creek trail (no number on map) due to the encouragement of local Forest Service District for mountain bike use to occur on upper portion of trail that crosses Forest Lands. Maintenance and use by mountain bikes has been occurring on this trail for the last 2 decades. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized travel be allowed on V592. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. This trail provides for a "quiet experience" in the midst of a predominantly motorized area. Recommend non-motorized use be allowed on V1007 and V1067 the portion of trail following Blue Creek above the ranch to make a loop. V1007 is an amazing mountain bike ride with incredible trees growing out of the canyon and the tops ending right near the trail. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized use on V803 allowing access to non-motorized trails on Forest Lands. This trail would allow non-motorized access to the Divide Road which is connection to ther highly desirable mountain bike opportunities. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized use on the complete length of V930 allowing access to non-motorized trails on Forest Lands. There is also a need to add existing trail (has been submitted previously) into inventory extending from the end of V930 at Forest Boundary north to allow access to non-motorized trails on Forest Lands. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience. Formal trail designation for any use is not recommended for trail following Blue Creek from the Blue Creek ranch downstream to the Dolores river due to trail access at private property, damage to cultural resources and high cost of trail maintenance. Recommend V2810 and V2811 remain open to non-motorized us. The remote nature, solitude provided and interesting band of smooth rock offers a unique and important mountain bike experience. Also allowing use of V2820 and uninventoried route (previously submitted) following the midlevel of cliff band would make a VERY desirable loop with V2810 and V2811. This loop would

require a 60 foot section of difficult trail which is not horse or motorized use friendly. There is mining and homestead remains along the trail that would be of great historic interest. Recommend non-motorized use on trail connecting Maverick Canyon and V2626. Recommend non-motorized use on V822 (from Blue Creek ranch), V1421, V1107, V1109 and trail connecting to county road above Mesa Creek. This would allow a good loop opportunity using V1007 and V1067 to return to Blue Creek ranch. The entire length of V822 could be added to this area for a shorter loop option. Recommend non-motorized use on V1151. Although a dead end, it would provide a great easier beginner/kid ride option especially attractive here due to several popular camping spots in the near vicinity. The water availability for pets and the "all downhill" return would be very attractive for a family ride or a shorter evening ride from camp. Recommend non-motorized use on V3062 extending down Maverick Canyon. Although a dead end, it provides a spectacular view and would be a good mellow family ride due to the lack of elevation change, solitude and quiet use of the trail. With a short hike, a glimpse of Juanita Arch adds to the experience. We would really like to see V567 administrative road and then remaining V567 trail into Calamity Canyon open to non-motorized use as depicted in Alternative D. It is an old road down the hill and then follows the drainage to the private property boundary. There is then an uninventoried trail leading up the slope to the east then connecting with road V923 then V922 on a higher bench. This area is perfect to find solitude and ride a single track trail. Zone W Recommend W103 and W217 be left open to at least non-motorized use as it will be the only public access to the small parcel of Forest land. The climb on a mountain bike is very rewarding, the view from the top is magnificent and usually solitude can be found here. Even though it is an out and back, this ride is very rewarding for a seasoned mountain bike user. Allowing only non-motorized use on W213, W214 and W218 would definitely add to the experience of these desired trail options for the mountain bike user. The addition of a new trail from the end of W218 connecting with W213 or W214 would really increase the value of the area for mountain bike use. This would create a different return or approach route for the BIG climb up W103. Recommend leaving routes W49, W78, W112, W89, W127, W190, W194, W195 (even if deemed administrative) open to non-motorized use for the exploration and solitude this area is known for.

These recommendations are particularly salient as they relate to the Maverick Canyon LWC unit and the corridor along the Byway and the Dolores River. While we believe the wilderness qualities of Maverick Canyon should be preserved - via an LWC designation and a predominantly Closed Travel Area Designation - we do feel that minimal mountain bike use and low-impact trail use in the lower (northern) end of the unit would may be consistent with LWC management and so should be accommodated via a Limited to Designated Routes for Horse, Foot and Mechanized (Closed to Motorized) Travel Area Designation. Route Specific Travel Designations: We support the route-specific travel designations from Alternative B with the following exceptions: - V 1939, V 2691: Given the historical legacy of The Pickett Trail we would like to see these routes designated for Foot & Horse travel as included in Alternative C. Travel management decisions should thoughtfully consider the following information. O This historic trail, developed by a mule train, is additionally significant as the only defined singletrack hiking/equestrian trail in the region directly connects the regions low country to the mesa tops above. The soil is often loose and the trail steep. It is a challenging and rewarding historic hike through the wilderness. This trail should be clearly marked at the intersection of 1939 and 6.3 rd and again from the top as 2691 begins its descent. Markers should include specific information about travel restrictions. An interpretive kiosk at the mouth of Wright Draw should include information about the trails historic relevance. V 930, V 1067, V 1011, V 803, V 1007: As there are limited opportunities to mountain bike on routes which are closed to motorized use, we support the recommendation, as included in Alternative D, that these routes be designated for Foot, Horse and Bike. This being said, we do ask that travel along the lower section of Blue Creek, west of the private property and within the Maverick LWC, be designated for Horse and Foot as outlined in Alternative B. This is particularly important given the cultural resources located here and the need to keep the number of visitors low.

Zone V Recommend non-motorized (including mountain bike) use on V803 allowing access to non-motorized trails on Forest Lands. This trail would allow non-motorized (including mountain bike) access to the Divide Road which is connection to other highly desirable mountain bike opportunities. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized (including mountain bike) use on the complete length of V930 allowing access to non-motorized trails on Forest Lands. Also

need to add existing trail (has been submitted previously) into inventory extending from the end of V930 at Forest Boundary north to allow access to non-motorized trails on Forest Lands. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. This is part of a non-motorized (including mountain bike) trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience. Formal trail designation for any use is not recommended for trail following Blue Creek from the Blue Creek ranch downstream to the Dolores river due to trail access at private property, damage to cultural resources and high cost of trail maintenance. Recommend non-motorized (including mountain bike) use on trail connecting Maverick Canyon and V2626. Recommend non-motorized (including mountain bike) use on V822 (from Blue Creek ranch), V1421, V1107, V1109 and trail connecting to county road above Mesa Creek. This would allow a good loop opportunity using V1007 and V1067 to return to Blue Creek ranch. The entire length of V822 could be added to this area for a shorter loop option. Recommend non-motorized (including mountain bike) use on V1151. Although a dead end, it would provide a great easier beginner/kid ride option especially attractive here due to several popular camping spots in the near vicinity. The quiet use, creek crossing (always fun), water availability for pets and the all downhill return would be very attractive for a family ride or a shorter evening ride from camp. Recommend non-motorized (including mountain bike) use on V3062 extending down Maverick Canyon. Although a dead end, it provides a spectacular view and would be a good mellow family ride due to the lack of elevation change, solitude and quiet use of the trail. With a short hike, a glimpse of Juanita Arch can be had if one knows where to look. Would really like to see V567 administrative road and then remaining V567 trail into Calamity Canyon open to non-motorized (including mountain bikes) use as depicted in Alternative D. It is an old road down the hill and then follows the drainage to the private property boundary. There is then an uninventoried trail leading up the slope to the east then connecting with road V923 then V922 on a higher bench. This area is perfect to explore old mining ruins, find solitude and ride a single track trail.

– Segment: 21017

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Zone V routes are shown essentially closed to all public access in all of the action alternatives. This is a shame. The opportunities for touring, exploring, adventure at cliff top elevation is unmatched in the western United States. The loss of this remote and hard to access adventure Would be heartbreaking. The routes are rugged remains of mining roads constructed in the 1950s (pre FLPMA). Most routes have a stable solid rock surface, grades are mild once on top of the mesas. The exploring, views and history are unmatched. Gateway (zone V) is a treasure. The area has been used by outfitters and tour guides under permit. Gateway has a short season of use due to the two access roads being steep and snow bound about 6 months a year. We have rarely met other people while visiting Gateway. User numbers are very low except for during big game hunting season. The loss of hunter access would be significant. Gateway is a unique beautiful and exciting location. It would be a disaster to me and my friends to lose legal access. The notion of implementing any of the action alternatives by BLM in Zone V is unrealistic. A cooperative agreement with an OHV nonprofit organization to jointly develop, manage Zone V travel plan and implementation is a more practical approach. This would necessitate a trail plan that is more visitor friendly than the proposed action alternatives in order to get support from a nonprofit. This more visitor friendly plan could be cooperatively developed with the OHV nonprofit.

Recommended: Open (All modes of travel)

Trail Number(s): (V507, V509) (V108, V88) (V490, V491, V493, V495, V494, V500, V502, V495, V499, V497) (V772, V602, V775, V600, V596, V113, V112, V116, V622, V622, V128, V127, V126, V121) (V621, V795, V922, V928) V86, V1061, V621, V600, V127, V126, V130, V108, V490, V472, V475 Trail Name: Outlaw Mesa Trail Description (challenges, viewpoints, terrain type, etc.): Numbers within () are somewhat of a route. This area offers a primitive backcountry experience with a variety of rocky and off-camber terrain. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is a great area to explore both in my jeep and in my UTV. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that this area contains a variety of routes and spurs to explore the backcountry. I like that the numerous two track roads allow me to follow my husbands ATV in my UTV. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This trail gives me an enjoyable experience in exploring the backcountry with other motorized users, both ATV width and full-width. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): V604, V619, V620 are spur routes off the more main V621 route that offer scenic viewpoints of Calamity Creek. They are not just meaningless dead-end roads that dont go anywhere. I would like to see these remain open to all vehicles. I would like to see all the roads on Outlaw Mesa remain open to all motorized and non-motorized users. I see no reason to redesignate the existing two-track roads as ATVwidth only. Taking a jeep-width trail and redesignating it as ATV-width does nothing to enhance the ATV experience and the BLM gives no justification for this redesignation. The area, as it is now, supports a wide variety of users without user conflict. It offers users a chance to get farther from civilization and the many routes allow for less contact with other users.

– Route: V1067**– Segment: 21317****Designation** 

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Cultural and range to work together on irrigation

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Vegetation Riparian proximate (100 ft)
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to reduce livestock and recreation impacts to riparian areas.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Organization:

Recommended: Foot/Horse/Mechanized

I would like mountain bikes to be allowed on V592. This trail provides for a "quiet experience" in the midst of a mostly motorized area. I would like mountain bikes to be allowed to use V1007 and V1067 and the portion of trail following Blue Creek above the ranch to make a loop. V1007 is an amazing mountain bike ride with incredible trees growing out of the canyon and the tops ending right near the trail. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience. I would like mountain bikes to be allowed to use V803 allowing access to non-motorized trails on Forest Lands. This trail would allow non-motorized access to the Divide Road which is a connection to other mountain bike trails in the area. I would like mountain bikes to be allowed to use the complete length of V930 allowing access to non-motorized trails on Forest Lands. I would like mountain bike access on V2810 and V2811 to remain open. The remote nature, solitude provided and interesting band of smooth rock makes this area a favorite. Also allowing use of V2820 an un-inventoried route following the mid level of cliff band would make a desirable loop with V2810 and V2811. I would like mountain bikes be able to use the trail connecting Maverick Canyon and V2626. I would like mountain bike access on V822 (from Blue Creek ranch), V1421, V1107, V1109 and trail connecting to county road above Mesa Creek. This would allow a good loop opportunity using V1007 and V1067 to return to Blue Creek ranch. The entire length of V822 could be added to this area for a shorter loop option. I would like mountain bike access on V1151. Although a dead end, it would provide a great easier beginner/kid ride option especially attractive here due to several popular camping spots in the near vicinity. The quiet use, creek crossing (always fun), water availability for pets and the all downhill return would be very attractive for a family ride or a shorter evening ride from camp. I would like mountain bike access on V3062 extending down Maverick Canyon. Although a dead end, it provides a spectacular view and would be a good mellow family ride due to the lack of elevation change, solitude and quiet use of the trail. With a short hike, a glimpse of Juanita Arch can be had if one knows where to look.

Zone V Recommend non-motorized (including mountain bikes) use be allowed on V2691 and 1939 Pickett trail. Mountain bike users have been maintaining and using this trail for at least 2 decades. Due to the terrain, motorized use is NOT RECOMMENDED as it will require excessive costs and labor to maintain trail to safe standards. Recommend non-motorized travel be allowed on V592. Due to the remote nature and solitude provided by the trail, allowing motorized use is HIGHLY discouraged. This trail provides for a "quiet experience" in the midst of a predominately motorized area. Recommend non-motorized (including mountain bike) use be allowed on V1007 and V1067 the portion of trail following Blue Creek above the ranch to make a loop. V1007 is an amazing ountain bike ride with incredible trees growing out of the canyon and the tops ending right near the trail. This is part of a non motorized (including mountain bike) trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged.

Zone V Recommend non-motorized (including mountain bike) use on V803 allowing access to non-motorized trails on Forest Lands. This trail would allow non-motorized (including mountain bike) access to the Divide Road which is connection to other highly desirable mountain bike opportunities. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized (including mountain bike) use on the complete length of V930 allowing access to non-motorized trails on Forest Lands. Also need to add existing trail (has been submitted previously) into inventory extending from the end of V930 at Forest Boundary north to allow access to non-motorized trails on Forest Lands. Due to the remote nature and solitude

provided by this trail, allowing motorized use is HIGHLY discouraged. This is part of a non-motorized (including mountain bike) trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience. Formal trail designation for any use is not recommended for trail following Blue Creek from the Blue Creek ranch downstream to the Dolores river due to trail access at private property, damage to cultural resources and high cost of trail maintenance. Recommend non-motorized (including mountain bike) use on trail connecting Maverick Canyon and V2626. Recommend non-motorized (including mountain bike) use on V822 (from Blue Creek ranch), V1421, V1107, V1109 and trail connecting to county road above Mesa Creek. This would allow a good loop opportunity using V1007 and V1067 to return to Blue Creek ranch. The entire length of V822 could be added to this area for a shorter loop option. Recommend non-motorized (including mountain bike) use on V1151. Although a dead end, it would provide a great easier beginner/kid ride option especially attractive here due to several popular camping spots in the near vicinity. The quiet use, creek crossing (always fun), water availability for pets and the all downhill return would be very attractive for a family ride or a shorter evening ride from camp. Recommend non-motorized (including mountain bike) use on V3062 extending down Maverick Canyon. Although a dead end, it provides a spectacular view and would be a good mellow family ride due to the lack of elevation change, solitude and quiet use of the trail. With a short hike, a glimpse of Juanita Arch can be had if one knows where to look. Would really like to see V567 administrative road and then remaining V567 trail into Calamity Canyon open to non-motorized (including mountain bikes) use as depicted in Alternative D. It is an old road down the hill and then follows the drainage to the private property boundary. There is then an uninventoried trail leading up the slope to the east then connecting with road V923 then V922 on a higher bench. This area is perfect to explore old mining ruins, find solitude and ride a single track trail.

Specifically regarding the Blue Creek Trail Complex outside the Maverick LWC (V930, V1067, V1011, V803, V1007), we support the plan as laid out in Alternative D outside the LWC.

Recommended: Foot/Horse/Mechanized

Mountain bicyclist would greatly benefit by the allowance of future development west of the Gateway Canyons resort to include trails downstream on the Dolores River paralleling the road, upstream on West Creek to join the Picket Trail and upstream across the Dolores river and up on the near bench. The trail system currently has fewer miles than most areas that are attractive to mountain bike users. The comments below reflect a need for non-motorized trails that are still open to all quiet uses. There are several large areas designated as off limits to mountain bikes (The Palisade WSA, Sewemup Mesa Wilderness and others) that provide other quiet users (hikers, horseback) with opportunities for experiences without mountain bikes present. Preserving mountain bike access to the remaining backcountry singletrack trails is very important for future generations. Zone U Recommend U75 and U666 (near Granite Creek) be open to non-motorized use. Recommend U27 and U28 (off Hwy 141 near The Narrows) be left open for dispersed camping opportunities due to lack of these opportunities in the area. Zone V Recommend non-motorized use be allowed on V2691 and 1939 Pickett trail. Mountain bicyclists have been maintaining and using this trail for at least two decades. Due to the terrain, motorized use is NOT RECOMMENDED as it will require excessive costs and labor to maintain trail to safe standards. FOREST SERVICE: Recommend non-motorized use be allowed on Lower Ute/Birch Creek trail (no number on map) due to the encouragement of local Forest Service District for mountain bike use to occur on upper portion of trail that crosses Forest Lands. Maintenance and use by mountain bikes has been occurring on this trail for the last 2 decades. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized travel be allowed on V592. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. This trail provides for a "quiet experience" in the midst of a predominantly motorized area. Recommend non-motorized use be allowed on V1007 and V1067 the portion of trail following Blue Creek above the ranch to make a loop. V1007 is an amazing mountain bike ride with incredible trees growing out of the canyon and the tops ending right near the trail. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized use on V803 allowing access to non-motorized trails on Forest Lands. This trail would allow non-motorized access to the Divide Road which is connection to their highly desirable mountain bike opportunities. Due to the remote nature and solitude provided by

this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized use on the complete length of V930 allowing access to non-motorized trails on Forest Lands. There is also a need to add existing trail (has been submitted previously) into inventory extending from the end of V930 at Forest Boundary north to allow access to non-motorized trails on Forest Lands. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience. Formal trail designation for any use is not recommended for trail following Blue Creek from the Blue Creek ranch downstream to the Dolores river due to trail access at private property, damage to cultural resources and high cost of trail maintenance. Recommend V2810 and V2811 remain open to non-motorized use. The remote nature, solitude provided and interesting band of smooth rock offers a unique and important mountain bike experience. Also allowing use of V2820 and uninventoried route (previously submitted) following the midlevel of cliff band would make a VERY desirable loop with V2810 and V2811. This loop would require a 60 foot section of difficult trail which is not horse or motorized use friendly. There is mining and homestead remains along the trail that would be of great historic interest. Recommend non-motorized use on trail connecting Maverick Canyon and V2626. Recommend non-motorized use on V822 (from Blue Creek ranch), V1421, V1107, V1109 and trail connecting to county road above Mesa Creek. This would allow a good loop opportunity using V1007 and V1067 to return to Blue Creek ranch. The entire length of V822 could be added to this area for a shorter loop option. Recommend non-motorized use on V1151. Although a dead end, it would provide a great easier beginner/kid ride option especially attractive here due to several popular camping spots in the near vicinity. The water availability for pets and the "all downhill" return would be very attractive for a family ride or a shorter evening ride from camp. Recommend non-motorized use on V3062 extending down Maverick Canyon. Although a dead end, it provides a spectacular view and would be a good mellow family ride due to the lack of elevation change, solitude and quiet use of the trail. With a short hike, a glimpse of Juanita Arch adds to the experience. We would really like to see V567 administrative road and then remaining V567 trail into Calamity Canyon open to non-motorized use as depicted in Alternative D. It is an old road down the hill and then follows the drainage to the private property boundary. There is then an uninventoried trail leading up the slope to the east then connecting with road V923 then V922 on a higher bench. This area is perfect to find solitude and ride a single track trail. Zone W Recommend W103 and W217 be left open to at least non-motorized use as it will be the only public access to the small parcel of Forest land. The climb on a mountain bike is very rewarding, the view from the top is magnificent and usually solitude can be found here. Even though it is an out and back, this ride is very rewarding for a seasoned mountain bike user. Allowing only non-motorized use on W213, W214 and W218 would definitely add to the experience of these desired trail options for the mountain bike user. The addition of a new trail from the end of W218 connecting with W213 or W214 would really increase the value of the area for mountain bike use. This would create a different return or approach route for the BIG climb up W103. Recommend leaving routes W49, W78, W112, W89, W127, W190, W194, W195 (even if deemed administrative) open to non-motorized use for the exploration and solitude this area is known for.

Recommended: Foot/Horse/Mechanized

These recommendations are particularly salient as they relate to the Maverick Canyon LWC unit and the corridor along the Byway and the Dolores River. While we believe the wilderness qualities of Maverick Canyon should be preserved - via an LWC designation and a predominantly Closed Travel Area Designation - we do feel that minimal mountain bike use and low-impact trail use in the lower (northern) end of the unit would may be consistent with LWC management and so should be accommodated via a Limited to Designated Routes for Horse, Foot and Mechanized (Closed to Motorized) Travel Area Designation. Route Specific Travel Designations: We support the route-specific travel designations from Alternative B with the following exceptions: - V 1939, V 2691: Given the historical legacy of The Pickett Trail we would like to see these routes designated for Foot & Horse travel as included in Alternative C. Travel management decisions should thoughtfully consider the following information. O This historic trail, developed by a mule train, is additionally significant as the only defined singletrack hiking/equestrian trail in the region directly connects the regions low country to the mesa tops above. The soil is often loose and the trail steep. It is a challenging and rewarding historic hike through the wilderness. This trail should be clearly marked at the intersection of 1939 and 6.3 rd and again from the top as 2691 begins its descent. Markers should include specific information about travel restrictions. An interpretive kiosk at the mouth of Wright Draw should include information about the trails historic relevance. V 930, V 1067, V 1011, V 803, V 1007: As there are limited opportunities to mountain bike on routes which are closed to motorized use, we support the recommendation, as included in Alternative D, that these routes be designated for Foot, Horse and Bike. This being said, we do ask that travel along the lower section of Blue Creek, west of the private property and within the Maverick LWC, be

designated for Horse and Foot as outlined in Alternative B. This is particularly important given the cultural resources located here and the need to keep the number of visitors low.

Zone V routes are shown essentially closed to all public access in all of the action alternatives. This is a shame. The opportunities for touring, exploring, adventure at cliff top elevation is unmatched in the western United States. The loss of this remote and hard to access adventure Would be heartbreaking. The routes are rugged remains of mining roads constructed in the 1950s (pre FLPMA). Most routes have a stable solid rock surface, grades are mild once on top of the mesas. The exploring, views and history are unmatched. Gateway (zone V) is a treasure. The area has been used by outfitters and tour guides under permit. Gateway has a short season of use due to the two access roads being steep and snow bound about 6 months a year. We have rarely met other people while visiting Gateway. User numbers are very low except for during big game hunting season. The loss of hunter access would be significant. Gateway is a unique beautiful and exciting location. It would be a disaster to me and my friends to lose legal access. The notion of implementing any of the action alternatives by BLM in Zone V is unrealistic. A cooperative agreement with an OHV nonprofit organization to jointly develop, manage Zone V travel plan and implementation is a more practical approach. This would necessitate a trail plan that is more visitor friendly than the proposed action alternatives in order to get support from a nonprofit. This more visitor friendly plan could be cooperatively developed with the OHV nonprofit.

Designation

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native

- plant communities to support wildlife and livestock.
- Designation was considered to reduce livestock and recreation impacts to riparian areas.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Closed

Alternative C (Conservation): Closed

Alternative D (Development): Limited to Vehicles Under 50" wide

— Segment: 21258

Designation

Proposed Designation: Limited to Vehicles Under 50" wide

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Riparian proximate (100 ft)
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

– Segment: 21420

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Slope Greater than 40%
- Special Designation VRM Class II
- Vegetation Riparian proximate (100 ft)
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with slopes exceeding 40 percent.
- Designation was considered to reduce livestock and recreation impacts to riparian areas.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Zone V routes are shown essentially closed to all public access in all of the action alternatives. This is a shame. The opportunities for touring, exploring, adventure at cliff top elevation is unmatched in the western United States. The loss of this remote and hard to access adventure Would be heartbreaking. The routes are rugged remains of mining roads constructed in the 1950s (pre FLPMA). Most routes have a stable solid rock surface, grades are mild once on top of the mesas. The exploring, views and history are unmatched. Gateway (zone V) is a treasure. The area has been used by outfitters and tour guides under permit. Gateway has a short season of use due to the two access roads being steep and snow bound about 6 months a year. We have rarely met other people while visiting Gateway. User numbers are very low except for during big game hunting season. The loss of hunter access would be significant. Gateway is a unique beautiful and exciting location. It would be a disaster to me and my friends to lose legal access. The notion of implementing any of the action alternatives by BLM in Zone V is unrealistic. A cooperative agreement with an OHV nonprofit organization to jointly develop, manage Zone V travel plan and implementation is a more practical approach. This would necessitate a trail plan that is more visitor friendly than the proposed action alternatives in order to get support from a nonprofit. This more visitor friendly plan could be cooperatively developed with the OHV nonprofit.

Public Comments On Route: V1470

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0074

Recommened: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone V should remain open to the general public for all forms of use including motorized/OHV use. Based on Colorado Law and County Regulations, RS 2477 Right of Ways (ROWS) and Prescriptive ROW's have been legally established on the entire list of Zone V routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Commenter Name: Znamenacek, Dale

Organization: Grand Mesa Jeep Club

Submission Code: emc0728

Recommened: Open (All modes of travel)

Trail Number(s): (V813, V1010, V1007) (V3266, V3263, V3277, V3282) (V3266, V1471, V1470) Trail Name: Blue Mesa Trail Description (challenges, viewpoints, terrain type, etc.): The road numbers in () form somewhat of a route. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is an area my family likes to explore in a combined group of ATVs and UTVs. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that this area has a more remote feeling and offers many miles of trails and loop opportunities. I enjoy many of the little spurs that take off from the loops and go out to the scenic overlooks. The two track roads make for a good place to go with an ATV/UTV group. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This makes for a fun ride with the family in a more primitive setting. Its a place to get away from the more crowded riding areas closer to Grand Junction. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): Keep these roads open to all motorized users.

- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: V1762

Commenter Name: Siegfried, Brandon

Submission Code: cfc0074

Organization:

Reccomended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone V should remain open to the general public for all forms of use including motorized/OHV use. Based on Colorado Law and County Regulations, RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone V routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Commenter Name: Hundtroft, Thomas
Submission Code: emc0693

Organization: Bookcliff Rattlers
Recommened: Limited to Vehicles Under 50" wide

Zone V routes are shown essentially closed to all public access in all of the action alternatives. This is a shame. The opportunities for touring, exploring, adventure at cliff top elevation is unmatched in the western United States. The loss of this remote and hard to access adventure Would be heartbreaking. The routes are rugged remains of mining roads constructed in the 1950s (pre FLPMA). Most routes have a stable solid rock surface, grades are mild once on top of the mesas. The exploring, views and history are unmatched. Gateway (zone V) is a treasure. The area has been used by outfitters and tour guides under permit. Gateway has a short season of use due to the two access roads being steep and snow bound about 6 months a year. We have rarely met other people while visiting Gateway. User numbers are very low except for during big game hunting season. The loss of hunter access would be significant. Gateway is a unique beautiful and exciting location. It would be a disaster to me and my friends to lose legal access. The notion of implementing any of the action alternatives by BLM in Zone V is unrealistic. A cooperative agreement with an OHV nonprofit organization to jointly develop, manage Zone V travel plan and implementation is a more practical approach. This would necessitate a trail plan that is more visitor friendly than the proposed action alternatives in order to get support from a nonprofit. This more visitor friendly plan could be cooperatively developed with the OHV nonprofit.

– Route: V1765

– Segment: 21524

Designation

Proposed Designation: Admin/Permitted Use Only
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in

areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Reccomended: Limited to Vehicles Under 50" wide

Zone V routes are shown essentially closed to all public access in all of the action alternatives. This is a shame. The

opportunities for touring, exploring, adventure at cliff top elevation is unmatched in the western United States. The loss of this remote and hard to access adventure Would be heartbreaking. The routes are rugged remains of mining roads constructed in the 1950s (pre FLPMA). Most routes have a stable solid rock surface, grades are mild once on top of the mesas. The exploring, views and history are unmatched. Gateway (zone V) is a treasure. The area has been used by outfitters and tour guides under permit. Gateway has a short season of use due to the two access roads being steep and snow bound about 6 months a year. We have rarely met other people while visiting Gateway. User numbers are very low except for during big game hunting season. The loss of hunter access would be significant. Gateway is a unique beautiful and exciting location. It would be a disaster to me and my friends to lose legal access. The notion of implementing any of the action alternatives by BLM in Zone V is unrealistic. A cooperative agreement with an OHV nonprofit organization to jointly develop, manage Zone V travel plan and implementation is a more practical approach. This would necessitate a trail plan that is more visitor friendly than the proposed action alternatives in order to get support from a nonprofit. This more visitor friendly plan could be cooperatively developed with the OHV nonprofit.

Public Comments On Route: V2127

Commenter Name: Znamenacek, Dale

Submission Code: emc0668

Organization: Grand Mesa Jeep Club

Recommended: Open (All modes of travel)

Trail Number(s): (V407, V1932, V2690, V1881, V409, V408,) (V3225, V400) (V1180) (V2155, V2127, V2146) (V2010, V2145) (V2328, V2635) (V2626, V1695, V1400) (V2720, V2718) (V3113) (V2505) (V3000, V3080, V3050, V3055) (V904, V2455) (V2086, V882, V882, V881, V3034, V3035, V3036, V2442, V2446, V2447, V1885) (V3105, V3550, V374, V370, V377, V379, V3058, V3057, V2214, V2216, V385, V387, V1321, V3060,) (V2680, V2562) (V2660) (V3140, V1198, V1115, V1849, V1207, V3373) Trail Name: Tenderfoot Mesa Trail Description (challenges, viewpoints, terrain type, etc.): The numbers within parentheses each form a route. V3040 goes out to an overlook of the Dolores River Valley. These routes make up a spur road off of the V3550 that go out to an overlook of the Dolores River Valley: V1321, V387, V385, V2216, V2214, V3057, V379, V377, V370, V374. V3536 & V1325 also make up a spur road off of V2660 that go out to an overlook of the Dolores River Valley. V2680 & V3572 make up a spur road off of V3564 that go out to an overlook of Larsen Canyon. V3373, V1859, V1999, V1998 form a loop out to an

overlook of Unaweep Canyon. V1198 is a spur road out to the Vanaking No 1 Mine. V3350 is a connector from 10 8/10 Rd to V3140 that follows closer to the edge of the mesa, offering better scenic vistas. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This area offers primitive backcountry exploration. The spur routes add to the experience of the area, being able to drive closer to the edge of the canyons and giving me more to explore. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like the remote feeling of this trail and the scenic views. The numerous spurs are fun to explore. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): I get a feeling of remoteness in this area. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): I would like to see all these roads remain open to all vehicles. The spur roads add to the experience. I like to be able to drive closer to the edge of the mesa and admire the views.

Public Comments On Route: V2170

Commenter Name: Siegfried, Brandon

Submission Code: cfc0074

Organization:

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone V should remain open to the general public for all forms of use including motorized/OHV use. Based on Colorado Law and County Regulations, RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone V routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

Recommended: Open (All modes of travel)

Trail Number(s): V2810, V2170, V2816, V2811, V2820, V3286, V2806, V1459 Trail Name: Blue Mesa Shelf Roads Trail Description (challenges, viewpoints, terrain type, etc.): Rocky shelf roads overhanging the Dolores River Valley with spurs to viewpoints of the river and highway Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is a great scenic trip for a combined group of ATVs and UTVs. The

various short spurs take you to scenic viewpoints of the river and canyon. These spurs provide good opportunities for photographs and great places to stop for lunch while enjoying the views. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that the entire length of this trail provides spectacular views of the Dolores River Valley and that you can loop back around to 19 Rd in a variety of ways, allowing you the option to extend your ride. The trail is easily accessed from Hwy 141 by P12 Rd with ample room along P12 to park an atv/utv trailer. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): It is a thrilling ride to skirt the edge of the mesa. These trails offer non-stop scenic views. It offers the unique opportunity to ride "so close, yet so far" from the highway with a birds-eye perspective. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): These routes should remain open to all motorized vehicles.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Wildlife Elk Winter Range
- Wildlife Wildlife Emphasis Area
- Range Study Site
- Range Development

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

Designation

Proposed Designation: Limited to Vehicles Under 50" wide
Seasonal Limitations: None

Mitigation

- Needs More Data
- Cultural

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern

Public Comments On Route: V232

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommened: Limited to Vehicles Under 50" wide

Zone V routes are shown essentially closed to all public access in all of the action alternatives. This is a shame. The opportunities for touring, exploring, adventure at cliff top elevation is unmatched in the western United States. The loss of this remote and hard to access adventure Would be heartbreaking. The routes are rugged remains of mining roads constructed in the 1950s (pre FLPMA). Most routes have a stable solid rock surface, grades are mild once on top of the mesas. The exploring, views and history are unmatched. Gateway (zone V) is a treasure. The area has been used by outfitters and tour guides under permit. Gateway has a short season of use due to the two access roads being steep and snow bound about 6 months a year. We have rarely met other people while visiting Gateway. User numbers are very low except for during big game hunting season. The loss of hunter access would be significant. Gateway is a unique beautiful and exciting location. It would be a disaster to me and my friends to lose legal access. The notion of implementing any of the action alternatives by BLM in Zone V is unrealistic. A cooperative agreement with an OHV nonprofit organization to jointly develop, manage Zone V travel plan and implementation is a more practical approach. This would necessitate a trail plan that is more visitor friendly than the proposed action alternatives in order to get support from a nonprofit. This more visitor friendly plan could be cooperatively developed with the OHV nonprofit.

[Grand Mesa Jeep Club, Absolute Off Road, LLC] 4. 10.8 Road to "Picture Point". 10.8 Road; V31; V3372; V3373; V1168; V2344; V2429; V3350; This Jeep Road takes one to some spectacular views of the Delores Valley, Gateway, and the Palisade WSA. Add in the mining remnants and you have a wonderful Jeep road. Largely because of the mining, the area is loaded with good access to motorized users, but still has many opportunities for non-motorized users. The area has a large number of elk, deer, bear, and many other species. The history within the area is nearly unlimited and should be protected and preserved. Saving as much of the existing mining influence remnants should be high on the priority list. Kiosks with historical facts would be a real blessing as well. Access from the Divide Road much earlier in the spring would be a real help. All that would be required to do this would be for the Forest Service to change the location of their winter closure to the intersection of the "Uranium Road" or change the opening date of the Divide Road. One other possibility would be for Mesa County to open 6.3 Road near the top by dozing through the snow drifts that accumulate there. These drifts last well past when the majority of the area has already lost its snowpack. Trails within the area are proposed and being permitted for a commercial event with the Gateway Canyons Resort in June '09 and probably for years thereafter. We look forward to working with the BLM this spring to doing some necessary maintenance on these trails to make them safer for the event entrants.

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Open (All modes of travel)

— Segment: 15896

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Not Meeting Public Land health Standard (1)
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard
- Water Does not meets Public Land Health Standard Hydro
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: V2657

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommened: Limited to Vehicles Under 50" wide

Zone V routes are shown essentially closed to all public access in all of the action alternatives. This is a shame. The opportunities for touring, exploring, adventure at cliff top elevation is unmatched in the western United States. The loss of this remote and hard to access adventure Would be heartbreaking. The routes are rugged remains of mining roads constructed in the 1950s (pre FLPMA). Most routes have a stable solid rock surface, grades are mild once on top of the mesas. The exploring, views and history are unmatched. Gateway (zone V) is a treasure. The area has been used by outfitters and tour guides under permit. Gateway has a short season of use due to the two access roads being steep and snow bound about 6 months a year. We have rarely met other people while visiting Gateway. User numbers are very low except for during big game hunting season. The loss of hunter access would be significant. Gateway is a unique beautiful and exciting location. It would be a disaster to me and my friends to lose legal access. The notion of implementing any of the action alternatives by BLM in Zone V is unrealistic. A cooperative agreement with an OHV nonprofit organization to jointly develop, manage Zone V travel plan and implementation is a more practical approach. This would necessitate a trail plan that is more visitor friendly than the proposed action alternatives in order to get support from a nonprofit. This more visitor friendly plan could be cooperatively developed with the OHV nonprofit.

– Route: V2680

– Segment: 15675

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route

- Special Designation VRM Class III
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

— Segment: 15583

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: V2680

Commenter Name: Znamenacek, Dale

Organization: Grand Mesa Jeep Club

Submission Code: emc0668

Reccomended: Open (All modes of travel)

Trail Number(s): (V407, V1932, V2690, V1881, V409, V408,) (V3225, V400) (V1180) (V2155, V2127, V2146) (V2010, V2145) (V2328, V2635) (V2626, V1695, V1400) (V2720, V2718) (V3113) (V2505) (V3000, V3080, V3050, V3055) (V904, V2455) (V2086, V882, V882, V881, V3034, V3035, V3036, V2442, V2446, V2447, V1885) (V3105, V3550, V374, V370, V377, V379, V3058, V3057, V2214, V2216, V385, V387, V1321, V3060,) (V2680, V2562) (V2660) (V3140, V1198, V1115, V1849, V1207, V3373) Trail Name: Tenderfoot Mesa Trail Description (challenges, viewpoints, terrain type, etc.): The numbers within parentheses each form a route. V3040 goes out to an overlook of the Dolores River Valley. These routes make up a spur road off of the V3550 that go out to an overlook of the Dolores River Valley: V1321, V387, V385, V2216, V2214, V3057, V379, V377, V370, V374. V3536 & V1325 also make up a spur road off of V2660 that go out to an overlook of the Dolores River Valley. V2680 & V3572 make up a spur road off of V3564 that go out to an overlook of Larsen Canyon. V3373, V1859, V1999, V1998 form a loop out to an overlook of Unaweep Canyon. V1198 is a spur road out to the Vanaking No 1 Mine. V3350 is a connector from 10 8/10 Rd to V3140 that follows closer to the edge of the mesa, offering better scenic vistas. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This area offers primitive backcountry exploration. The spur routes add to the experience of the area, being able to drive closer to the edge of the canyons and giving me more to explore. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like the remote feeling of this trail and the scenic views. The numerous spurs are fun to explore. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): I get a feeling of remoteness in this area. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): I would like to see all these roads remain open to all vehicles. The spur roads add to the experience. I like to be able to drive closer to the edge of the mesa and admire the views.

Public Comments On Route: V278

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommended: Limited to Vehicles Under 50" wide

Zone V routes are shown essentially closed to all public access in all of the action alternatives. This is a shame. The opportunities for touring, exploring, adventure at cliff top elevation is unmatched in the western United States. The loss of this remote and hard to access adventure Would be heartbreaking. The routes are rugged remains of mining roads constructed in the 1950s (pre FLPMA). Most routes have a stable solid rock surface, grades are mild once on top of the mesas. The exploring, views and history are unmatched. Gateway (zone V) is a treasure. The area has been used by outfitters and tour guides under permit. Gateway has a short season of use due to the two access roads being steep and snow bound about 6 months a year. We have rarely met other people while visiting Gateway. User numbers are very low except for during big game hunting season. The loss of hunter access would be significant. Gateway is a unique beautiful and exciting location. It would be a disaster to me and my friends to lose legal access. The notion of implementing any of the action alternatives by BLM in Zone V is unrealistic. A cooperative agreement with an OHV nonprofit organization to jointly develop, manage Zone V travel plan and implementation is a more practical approach. This would necessitate a trail plan that is more visitor friendly than the proposed action alternatives in order to get support from a nonprofit. This more visitor friendly plan could be cooperatively developed with the OHV nonprofit.

– Route: V3036

– Segment: 16816

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III

- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

Public Comments On Route: V3036

Commenter Name: Znamenacek, Dale
Submission Code: emc0668

Organization: Grand Mesa Jeep Club
Recommended: Open (All modes of travel)

Trail Number(s): (V407, V1932, V2690, V1881, V409, V408,) (V3225, V400) (V1180) (V2155, V2127, V2146) (V2010, V2145) (V2328, V2635) (V2626, V1695, V1400) (V2720, V2718) (V3113) (V2505) (V3000, V3080, V3050, V3055) (V904, V2455) (V2086, V882, V882, V881, V3034, V3035, V3036, V2442, V2446, V2447, V1885) (V3105, V3550, V374, V370, V377, V379, V3058, V3057, V2214, V2216, V385, V387, V1321, V3060,) (V2680, V2562) (V2660) (V3140, V1198, V1115, V1849, V1207, V3373) Trail Name: Tenderfoot Mesa Trail Description (challenges, viewpoints, terrain type, etc.): The numbers within parentheses each form a route. V3040 goes out to an overlook of the Dolores River Valley. These routes make up a spur road off of the V3550 that go out to an overlook of the Dolores River Valley: V1321, V387, V385, V2216, V2214, V3057, V379, V377, V370, V374. V3536 & V1325 also make up a spur road off of V2660 that go out to an overlook of the Dolores River Valley. V2680 & V3572 make up a spur road off of V3564 that go out to an overlook of Larsen Canyon. V3373, V1859, V1999, V1998 form a loop out to an overlook of Unaweep Canyon. V1198 is a spur road out to the Vanaking No 1 Mine. V3350 is a connector from 10 8/10 Rd to V3140 that follows closer to the edge of the mesa, offering better scenic vistas. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This area offers primitive backcountry exploration. The spur routes add to the experience of the area, being able to drive closer to the edge of the canyons and giving me more to explore. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like the remote feeling of this trail and the scenic views. The numerous spurs are fun to explore. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): I get a feeling of remoteness in this area. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): I would like to see all these roads remain open to all vehicles. The spur roads add to the experience. I like to be able to drive closer to the edge of the mesa and admire the views.

– Route: V3050

– Segment: 16823

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood,

post and pole gathering, and Christmas tree cutting areas.

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Open (All modes of travel)

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Open (All modes of travel)

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

Public Comments On Route: V31

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommended: Limited to Vehicles Under 50" wide

Zone V routes are shown essentially closed to all public access in all of the action alternatives. This is a shame. The opportunities for touring, exploring, adventure at cliff top elevation is unmatched in the western United States. The loss of this remote and hard to access adventure Would be heartbreaking. The routes are rugged remains of mining roads constructed in the 1950s (pre FLPMA). Most routes have a stable solid rock surface, grades are mild once on top of the mesas. The exploring, views and history are unmatched. Gateway (zone V) is a treasure. The area has been used by outfitters and tour guides under permit. Gateway has a short season of use due to the two access roads being steep and snow bound about 6 months a year. We have rarely met other people while visiting Gateway. User numbers are very low except for during big game hunting season. The loss of hunter access would be significant. Gateway is a unique beautiful and exciting location. It would be a disaster to me and my friends to lose legal access. The notion of implementing any of the action alternatives by BLM in Zone V is unrealistic. A cooperative agreement with an OHV nonprofit organization to jointly develop, manage Zone V travel plan and implementation is a more practical approach. This would necessitate a trail plan that is more visitor friendly than the proposed action alternatives in order to get support from a nonprofit. This more visitor friendly plan could be cooperatively developed with the OHV nonprofit.

[Grand Mesa Jeep Club, Absolute Off Road, LLC] 4. 10.8 Road to "Picture Point". 10.8 Road; V31; V3372; V3373; V1168; V2344; V2429; V3350; This Jeep Road takes one to some spectacular views of the Delores Valley, Gateway, and the Palisade WSA. Add in the mining remnants and you have a wonderful Jeep road. Largely because of the mining, the area is loaded with good access to motorized users, but still has many opportunities for non-motorized users. The area has a large number of elk, deer, bear, and many other species. The history within the area is nearly unlimited and should be protected and preserved. Saving as much of the existing mining influence remnants should be high on the priority list. Kiosks with historical facts would be a real blessing as well. Access from the Divide Road much earlier in the spring would be a real help. All that would be required to do this would be for the Forest Service to change the location of their winter closure to the intersection of the "Uranium Road" or change the opening date of the Divide Road. One other possibility would be for Mesa County to open 6.3 Road near the top by dozing through the snow drifts that accumulate there. These drifts last well past when the majority of the area has already lost its snowpack. Trails within the area are proposed and being permitted for a commercial event with the Gateway Canyons Resort in June '09 and probably for years thereafter. We look forward to working with the BLM this spring to doing some necessary maintenance on these trails to make them safer for the event entrants.

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range
- Range Study Site
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and

setting characteristics of cultural sites).

- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: V3125

Commenter Name: Hundtroft, Thomas

Submission Code: emc0693

Organization: Bookcliff Rattlers

Recommened: Limited to Vehicles Under 50" wide

Zone V routes are shown essentially closed to all public access in all of the action alternatives. This is a shame. The opportunities for touring, exploring, adventure at cliff top elevation is unmatched in the western United States. The loss of this remote and hard to access adventure Would be heartbreaking. The routes are rugged remains of mining roads constructed in the 1950s (pre FLPMA). Most routes have a stable solid rock surface, grades are mild once on top of the mesas. The exploring, views and history are unmatched. Gateway (zone V) is a treasure. The area has been used by outfitters and tour guides under permit. Gateway has a short season of use due to the two access roads being steep and snow bound about 6 months a year. We have rarely met other people while visiting Gateway. User numbers are very low except for during big game hunting season. The loss of hunter access would be significant. Gateway is a unique beautiful and exciting location. It would be a disaster to me and my friends to lose legal access. The notion of implementing any of the action alternatives by BLM in Zone V is unrealistic. A cooperative agreement with an OHV nonprofit organization to jointly develop, manage Zone V travel plan and implementation is a more practical approach. This would necessitate a trail plan that is more visitor friendly than the proposed action

alternatives in order to get support from a nonprofit. This more visitor friendly plan could be cooperatively developed with the OHV nonprofit.

– Route: V3150

– Segment: 15379

Designation

Proposed Designation: Foot/Horse/Mechanized/Motorcycle
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Wildlife Elk Winter Range
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.

Organization:

Submission Code: cfc0074

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone V should remain open to the general public for all forms of use including motorized/OHV use. Based on Colorado Law and County Regulations, RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone V routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes.

[Grand Mesa Jeep Club, Absolute Off Road, LLC] 4. 10.8 Road to "Picture Point". 10.8 Road; V31; V3372; V3373; V1168; V2344; V2429; V3350; This Jeep Road takes one to some spectacular views of the Delores Valley, Gateway, and the Palisade WSA. Add in the mining remnants and you have a wonderful Jeep road. Largely because of the mining, the area is loaded with good access to motorized users, but still has many opportunities for non-motorized users. The area has a large number of elk, deer, bear, and many other species. The history within the area is nearly unlimited and should be protected and preserved. Saving as much of the existing mining influence remnants should be high on the priority list. Kiosks with historical facts would be a real blessing as well. Access from the Divide Road much earlier in the spring would be a real help. All that would be required to do this would be for the Forest Service to change the location of their winter closure to the intersection of the "Uranium Road" or change the opening date of the Divide Road. One other possibility would be for Mesa County to open 6.3 Road near the top by dozing through the snow drifts that accumulate there. These drifts last well past when the majority of the area has already lost its snowpack. Trails within the area are proposed and being permitted for a commercial event with the Gateway Canyons Resort in June '09 and probably for years thereafter. We look forward to working with the BLM this spring to doing some necessary maintenance on these trails to make them safer for the event entrants.

Designation [?](#)

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Wildlife Elk Winter Range
- Wildlife Wildlife Emphasis Area
- Range Development

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Open (All modes of travel)

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Open (All modes of travel)

— Segment: 15384

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Forestry Access Firewood/Post & Pole Gathering
- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Water Stream Crossing
- Wildlife Elk Winter Range
- Wildlife Wildlife Emphasis Area
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: V406

Commenter Name: Hundtroft, Thomas
Submission Code: emc0693

Organization: Bookcliff Rattlers
Recommened: Limited to Vehicles Under 50" wide

Zone V routes are shown essentially closed to all public access in all of the action alternatives. This is a shame. The opportunities for touring, exploring, adventure at cliff top elevation is unmatched in the western United States. The loss of this remote and hard to access adventure Would be heartbreaking. The routes are rugged remains of mining roads constructed in the 1950s (pre FLPMA). Most routes have a stable solid rock surface, grades are mild once on top of the mesas. The exploring, views and history are unmatched. Gateway (zone V) is a treasure. The area has been used by outfitters and tour guides under permit. Gateway has a short season of use due to the two access roads being steep and snow bound about 6 months a year. We have rarely met other people while visiting Gateway. User numbers are very low except for during big game hunting season. The loss of hunter access would be significant. Gateway is a unique beautiful and exciting location. It would be a disaster to me and my friends to lose legal access. The notion of implementing any of the action alternatives by BLM in Zone V is unrealistic. A cooperative agreement with an OHV nonprofit organization to jointly develop, manage Zone V travel plan and implementation is a more practical approach. This would necessitate a trail plan that is more visitor friendly than the proposed action alternatives in order to get support from a nonprofit. This more visitor friendly plan could be cooperatively developed with the OHV nonprofit.

Recommended: Open (All modes of travel)

Trail Number(s): (V407, V1932, V2690, V1881, V409, V408,) (V3225, V400) (V1180) (V2155, V2127, V2146) (V2010, V2145) (V2328, V2635) (V2626, V1695, V1400) (V2720, V2718) (V3113) (V2505) (V3000, V3080, V3050, V3055) (V904, V2455) (V2086, V882, V882, V881, V3034, V3035, V3036, V2442, V2446, V2447, V1885) (V3105, V3550, V374, V370, V377, V379, V3058, V3057, V2214, V2216, V385, V387, V1321, V3060,) (V2680, V2562) (V2660) (V3140, V1198, V1115, V1849, V1207, V3373) Trail Name: Tenderfoot Mesa Trail Description (challenges, viewpoints, terrain type, etc.): The numbers within parentheses each form a route. V3040 goes out to an overlook of the Dolores River Valley. These routes make up a spur road off of the V3550 that go out to an overlook of the Dolores River Valley: V1321, V387, V385, V2216, V2214, V3057, V379, V377, V370, V374. V3536 & V1325 also make up a spur road off of V2660 that go out to an overlook of the Dolores River Valley. V2680 & V3572 make up a spur road off of V3564 that go out to an overlook of Larsen Canyon. V3373, V1859, V1999, V1998 form a loop out to an overlook of Unaweep Canyon. V1198 is a spur road out to the Vanaking No 1 Mine. V3350 is a connector from 10 8/10 Rd to V3140 that follows closer to the edge of the mesa, offering better scenic vistas. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This area offers primitive backcountry exploration. The spur routes add to the experience of the area, being able to drive closer to the edge of the canyons and giving me more to explore. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like the remote feeling of this trail and the scenic views. The numerous spurs are fun to explore. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): I get a feeling of remoteness in this area. Other Comment (what is your desired outcome for this trail, additional ideas to

be considered): I would like to see all these roads remain open to all vehicles. The spur roads add to the experience. I like to be able to drive closer to the edge of the mesa and admire the views.

[Grand Mesa Jeep Club, Absolute Off Road, LLC] [including snowmobiling] 6. From 11.5 Road - Calamity Camp to Blue Creek. 11.5 Road; V415; V316; V143; V550; V768; V566; V562; V563; V564; V992; V1152; V1156; This somewhat primitive Jeep road has several mine sites on spur roads making for a very interesting drive. For this and other reasons it is one we have picked to be permitted for the Gateway 4-Wheel Drive Rendezvous in June of 2009. Largely because of the mining, the area is loaded with good access to motorized users, but still has many opportunities for non-motorized users. The area has a large number of elk, deer, bear, and many other species. The history within the area is nearly unlimited and should be protected and preserved. Saving as much of the existing mining influence remnants should be high on the priority list. Kiosks with historical facts would be a real blessing as well. Access from the Divide Road much earlier in the spring would be a real help. All that would be required to do this would be for the Forest Service to change the location of their winter closure to the intersection of the "Uranium Road" or change the opening date of the Divide Road. One other possibility would be for Mesa County to open 6.3 Road near the top by dozing through the snow drifts that accumulate there. These drifts last well past when the majority of the area has already lost its snowpack. Trails within the area are proposed and being permitted for a commercial event with the Gateway Canyons Resort in June '09 and probably for years thereafter. We look forward to working with the BLM this spring to doing some necessary maintenance on these trails to make them safer for the event entrants.

– Route: V586

– Segment: 20640

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area

- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Recommened: Limited to Vehicles Under 50" wide

Zone V routes are shown essentially closed to all public access in all of the action alternatives. This is a shame. The opportunities for touring, exploring, adventure at cliff top elevation is unmatched in the western United States. The loss of this remote and hard to access adventure Would be heartbreaking. The routes are rugged remains of mining roads constructed in the 1950s (pre FLPMA). Most routes have a stable solid rock surface, grades are mild once on top of the mesas. The exploring, views and history are unmatched. Gateway (zone V) is a treasure. The area has been used by outfitters and tour guides under permit. Gateway has a short season of use due to the two access roads being steep and snow bound about 6 months a year. We have rarely met other people while visiting Gateway. User numbers are very low except for during big game hunting season. The loss of hunter access would be significant. Gateway is a unique beautiful and exciting location. It would be a disaster to me and my friends to lose legal access. The notion of implementing any of the action alternatives by BLM in Zone V is unrealistic. A cooperative agreement with an OHV nonprofit organization to jointly develop, manage Zone V travel plan and implementation is a more practical approach. This would necessitate a trail plan that is more visitor friendly than the proposed action alternatives in order to get support from a nonprofit. This more visitor friendly plan could be cooperatively developed with the OHV nonprofit.

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.

Public Comments On Route: V767

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommended: Limited to Vehicles Under 50" wide

Zone V routes are shown essentially closed to all public access in all of the action alternatives. This is a shame. The opportunities for touring, exploring, adventure at cliff top elevation is unmatched in the western United States. The loss of this remote and hard to access adventure Would be heartbreaking. The routes are rugged remains of mining roads constructed in the 1950s (pre FLPMA). Most routes have a stable solid rock surface, grades are mild once on top of the mesas. The exploring, views and history are unmatched. Gateway (zone V) is a treasure. The area has been used by outfitters and tour guides under permit. Gateway has a short season of use due to the two access roads being steep and snow bound about 6 months a year. We have rarely met other people while visiting Gateway. User numbers are very low except for during big game hunting season. The loss of hunter access would be significant. Gateway is a unique beautiful and exciting location. It would be a disaster to me and my friends to lose legal access. The notion of implementing any of the action alternatives by BLM in Zone V is unrealistic. A cooperative agreement with an OHV nonprofit organization to jointly develop, manage Zone V travel plan and implementation is a more practical approach. This would necessitate a trail plan that is more visitor friendly than the proposed action alternatives in order to get support from a nonprofit. This more visitor friendly plan could be cooperatively developed with the OHV nonprofit.

– Route: V772

– Segment: 20382

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Limited to Vehicles Under 50" wide

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Submission Code: emc0667

Recommended: Open (All modes of travel)

Trail Number(s): (V507, V509) (V108, V88) (V490, V491, V493, V495, V494, V500, V502, V495, V499, V497) (V772, V602, V775, V600, V596, V113, V112, V116, V622, V622, V128, V127, V126, V121) (V621, V795, V922, V928) V86, V1061, V621, V600, V127, V126, V130, V108, V490, V472, V475 Trail Name: Outlaw Mesa Trail Description (challenges, viewpoints, terrain type, etc.): Numbers within () are somewhat of a route. This area offers a primitive backcountry experience with a variety of rocky and off-camber terrain. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is a great area to explore both in my jeep and in my UTV. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that this area contains a variety of routes and spurs to explore the backcountry. I like that the numerous two track roads allow me to follow my husbands ATV in my UTV. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This trail gives me an enjoyable experience in exploring the backcountry with other motorized users, both ATV width and full-width. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): V604, V619, V620 are spur routes off the more main V621 route that offer scenic viewpoints of Calamity Creek. They are not just meaningless dead-end roads that dont go anywhere. I would like to see these remain open to all vehicles. I would like to see all the roads on Outlaw Mesa remain open to all motorized and non-motorized users. I see no reason to redesignate the existing two-track roads as ATVwidth only. Taking a jeep-width trail and redesignating it as ATV-width does nothing to enhance the ATV experience and the BLM gives no justification for this redesignation. The area, as it is now, supports a wide variety of users without user conflict. It offers users a chance to get farther from civilization and the many routes allow for less contact with other users.

Trail Number(s): (V813, V1010, V1007) (V3266, V3263, V3277, V3282) (V3266, V1471, V1470) Trail Name: Blue Mesa Trail Description (challenges, viewpoints, terrain type, etc.): The road numbers in () form somewhat of a route. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is an area my family likes to explore in a combined group of ATVs and UTVs. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that this area has a more remote feeling and offers many miles of trails and loop opportunities. I enjoy many of the little spurs that take off from the loops and go out to the scenic overlooks. The two track roads make for a good place to go with an ATV/UTV group. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This makes for a fun ride with the family in a more primitive setting. Its a place to get away from the more crowded riding areas closer to Grand Junction. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): Keep these roads open to all motorized users.

– Route: V822

– Segment: 21279

Designation [?](#)

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class II
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Riparian proximate (100 ft)
- Water Perennial Stream/Fishery
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or

Tribes.

- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce livestock and recreation impacts to riparian areas.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to reduce point and non-point source contributions of water quality contaminants from public lands by reducing disturbance footprints associated with travel infrastructure and other surface disturbing actions while also maintaining access and meeting resource use objectives.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Alternative B (Preferred): Limited to Vehicles Under 50" wide

Alternative C (Conservation): Foot/Horse/Mechanized

Alternative D (Development): Open (All modes of travel)

— Segment: 21276

Designation ?

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Vegetation Riparian proximate (100 ft)
- Water Stream Crossing
- Wildlife Mule Deer Winter Range

- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

Public Comments On Route: V822

Commenter Name: Monholland, Landon

Organization:

Submission Code: emc0922

Recommended: Foot/Horse/Mechanized

I would like mountain bikes to be allowed on V592. This trail provides for a "quiet experience" in the midst of a mostly motorized area. I would like mountain bikes to be allowed to use V1007 and V1067 and the portion of trail following Blue Creek above the ranch to make a loop. V1007 is an amazing mountain bike ride with incredible trees growing out of the canyon and the tops ending right near the trail. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience. I would like mountain bikes to be allowed to use V803 allowing access to non-motorized trails on Forest Lands. This trail would allow non-motorized access to the Divide Road which is a connection to other mountain bike trails in the area. I would like mountain bikes to be allowed to use the complete length of V930 allowing access to non-motorized trails on Forest Lands. I would like mountain bike access on V2810 and V2811 to remain open. The remote nature, solitude provided and interesting band of smooth rock makes this area a favorite. Also allowing use of V2820 an un-inventoried route following the mid level of cliff band would make a desirable loop with V2810 and V2811. I would like mountain bikes be able to use the trail connecting Maverick Canyon and V2626. I would like mountain bike access on V822 (from Blue Creek ranch), V1421, V1107, V1109 and trail connecting to county road above Mesa Creek. This would allow a good loop opportunity using V1007 and V1067 to return to Blue Creek ranch. The entire length of V822 could be added to this area for a shorter loop option. I would like mountain bike access on V1151. Although a dead end, it would provide a great easier beginner/kid ride option especially attractive here due to several popular camping spots in the near vicinity. The quiet use, creek crossing (always fun), water availability for pets and the "all downhill" return would be very attractive for a family ride or a shorter evening ride from camp. I would like mountain bike access on V3062 extending down Maverick Canyon. Although a dead end, it provides a spectacular view and would be a good mellow family ride due to the lack of elevation change, solitude and quiet use of the trail. With a short hike, a glimpse of Juanita Arch can be had if one knows where to look.

Zone V Recommend non-motorized (including mountain bike) use on V803 allowing access to non-motorized trails on Forest Lands. This trail would allow non-motorized (including mountain bike) access to the Divide Road which is connection to other highly desirable mountain bike opportunities. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized (including mountain bike) use on the complete length of V930 allowing access to non-motorized trails on Forest Lands. Also need to add existing trail (has been submitted previously) into inventory extending from the end of V930 at Forest Boundary north to allow access to non-motorized trails on Forest Lands. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. This is part of a non-motorized (including mountain bike) trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience. Formal trail designation for any use is not recommended for trail following Blue Creek from the Blue Creek ranch downstream to the Dolores river due to trail access at private property, damage to cultural resources and high cost of trail

maintenance. Recommend non-motorized (including mountain bike) use on trail connecting Maverick Canyon and V2626. Recommend non-motorized (including mountain bike) use on V822 (from Blue Creek ranch), V1421, V1107, V1109 and trail connecting to county road above Mesa Creek. This would allow a good loop opportunity using V1007 and V1067 to return to Blue Creek ranch. The entire length of V822 could be added to this area for a shorter loop option. Recommend non-motorized (including mountain bike) use on V1151. Although a dead end, it provides a spectacular view and would be a good mellow family ride due to the lack of elevation change, solitude and quiet use of the trail. With a short hike, a glimpse of Juanita Arch can be had if one knows where to look. Would really like to see V567 administrative road and then remaining V567 trail into Calamity Canyon open to non-motorized (including mountain bikes) use as depicted in Alternative D. It is an old road down the hill and then follows the drainage to the private property boundary. There is then an uninventoried trail leading up the slope to the east then connecting with road V923 then V922 on a higher bench. This area is perfect to explore old mining ruins, find solitude and ride a single track trail.

Organization: International Mountain Bicycling Association

Submission Code: emc0912

Recommended: Foot/Horse/Mechanized

Mountain bicyclist would greatly benefit by the allowance of future development west of the Gateway Canyons resort to include trails downstream on the Dolores River paralleling the road, upstream on West Creek to join the Picket Trail and upstream across the Dolores river and up on the near bench. The trail system currently has fewer miles than most areas that are attractive to mountain bike users. The comments below reflect a need for non-motorized trails that are still open to all quiet uses. There are several large areas designated as off limits to mountain bikes (The Palisade WSA, Sewemup Mesa Wilderness and others) that provide other quiet users (hikers, horseback) with opportunities for experiences without mountain bikes present. Preserving mountain bike access to the remaining backcountry singletrack trails is very important for future generations. Zone U Recommend U75 and U666 (near Granite Creek) be open to non-motorized use. Recommend U27 and U28 (off Hwy 141 near The Narrows) be left open for dispersed camping opportunities due to lack of these opportunities in the area. Zone V Recommend non-motorized use be allowed on V2691 and 1939 Pickett trail. Mountain bicyclists have been maintaining and using this trail for at least two decades. Due to the terrain, motorized use is NOT RECOMMENDED as it will require excessive costs and labor to maintain trail to safe standards. FOREST SERVICE: Recommend non-motorized use be allowed on Lower Ute/Birch Creek trail (no number on map) due to the encouragement of local Forest Service District for mountain bike use to occur on upper portion of trail that crosses Forest Lands. Maintenance and use by mountain bikes has been occurring on this trail for the last 2 decades. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized travel be allowed on V592. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. This trail provides for a "quiet experience" in the midst of a predominantly motorized area. Recommend non-motorized use be allowed on V1007 and V1067 the portion of trail following Blue Creek above the ranch to make a loop. V1007 is an amazing mountain bike ride with incredible trees growing out of the canyon and the tops ending right near the trail. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized use on V803 allowing access to non-motorized trails on Forest Lands. non-motorized trails on Forest Lands. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience. Formal trail designation for any use is not recommended for trail following Blue Creek from the Blue Creek ranch downstream to the Dolores river due to trail access at private property, damage to cultural resources and high cost of trail maintenance. Recommend V2810 and V2811 remain open to non-motorized use. The remote nature, solitude provided and interesting band of smooth rock offers a unique and important mountain bike experience. Also allowing use of V2820 and uninventoried route (previously submitted) following the midlevel of cliff band would make a VERY desirable loop with V2810 and V2811. This loop would require a 60 foot section of difficult trail which is not horse or motorized use friendly. There is mining and homestead remains along the trail that would be of great historic interest. Recommend non-motorized use on trail connecting Maverick Canyon and V2626. Recommend non-motorized use on V822 (from Blue Creek ranch), V1421, V1107, V1109 and trail connecting to county road above Mesa Creek. This would allow a good loop opportunity using V1007 and V1067 to return to Blue Creek ranch. The entire length of V822 could be added to this area for a shorter loop option. Recommend non-motorized use on V1151. Although a dead end, it would provide a great easier beginner/kid ride option especially attractive here due to several popular camping spots in the near vicinity. The water availability for pets and the "all downhill" return would be very attractive for a family ride or a shorter evening ride from camp. Recommend non-motorized use on V3062 extending down Maverick Canyon. Although a dead end, it provides a spectacular view and would be a good mellow family ride due to the lack of elevation change, solitude and quiet use of the trail. With a short hike, a glimpse of Juanita Arch adds to the experience. We would really like to see V567 administrative road and then remaining V567 trail into Calamity Canyon open to non-motorized use as depicted in Alternative D. It is an old road down the hill and then follows the drainage to the private property boundary. There is then an uninventoried trail leading up the slope to the east then connecting with road V923 then V922 on a higher bench. This area is perfect to find solitude and ride a single track trail. Zone W Recommend W103 and W217 be left open to at least non-motorized use as it will be the only public access to the small parcel of Forest land. The climb on a mountain bike is very rewarding, the view from the top is magnificent and usually solitude can be found here. Even though it is an out and back, this ride is very rewarding for a seasoned mountain bike user. Allowing only non-motorized use on W213, W214 and W218 would definitely add to the experience of these desired trail options for the mountain bike user. The addition of a new trail from the end of W218 connecting with W213 or W214 would really increase the value of the area for mountain bike use. This would create a different return or approach route for the BIG climb up W103. Recommend leaving routes W49, W78, W112, W89, W127, W190, W194, W195 (even if deemed administrative) open to non-motorized use for the exploration and solitude this area is known for.

– Route: V930

– Segment: 21001

Designation

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Forestry Access Christmas Tree Cutting Area
- Recreation County identified recreation vested interest route
- Soils Slope Greater than 40%
- Special Designation VRM Class II
- Vegetation Riparian proximate (100 ft)
- Water Perennial Stream/Fishery
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas with slopes exceeding 40 percent.
- Designation was considered to reduce livestock and recreation impacts to riparian areas.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to reduce point and non-point source contributions of water quality contaminants from public lands by reducing disturbance footprints associated with travel infrastructure and other surface disturbing actions while also maintaining access and meeting resource use objectives.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Although a dead end, it provides a spectacular view and would be a good mellow family ride due to the lack of elevation change, solitude and quiet use of the trail. With a short hike, a glimpse of Juanita Arch can be had if one knows where to look. Would really like to see V567 administrative road and then remaining V567 trail into Calamity Canyon open to non-motorized (including mountain bikes) use as depicted in Alternative D. It is an old road down the hill and then follows the drainage to the private property boundary. There is then an uninventoried trail leading up the slope to the east then connecting with road V923 then V922 on a higher bench. This area is perfect to explore old mining ruins, find solitude and ride a single track trail.

Organization: The Quiet Trails Group
Recommended: Open (All modes of travel)

Specifically regarding the Blue Creek Trail Complex outside the Maverick LWC (V930, V1067, V1011, V803, V1007), we support the plan as laid out in Alternative D outside the LWC.

Commenter Name: Shepherd, Janice
Submission Code: emc0835

Organization: The Quiet Trails Group
Recommended: Foot/Horse/Mechanized

We would like to see V930, east of the LWC, open to mechanized, horse and foot travel and would suggest developing it as a loop trail.

Commenter Name: Bertolacci, Jason

Organization: International Mountain Bicycling

Association**Reccomended: Foot/Horse/Mechanized****Submission Code: emc0912**

Mountain bicyclist would greatly benefit by the allowance of future development west of the Gateway Canyons resort to include trails downstream on the Dolores River paralleling the road, upstream on West Creek to join the Picket Trail and upstream across the Dolores river and up on the near bench. The trail system currently has fewer miles than most areas that are attractive to mountain bike users. The comments below reflect a need for non-motorized trails that are still open to all quiet uses. There are several large areas designated as off limits to mountain bikes (The Palisade WSA, Sewemup Mesa Wilderness and others) that provide other quiet users (hikers, horseback) with opportunities for experiences without mountain bikes present. Preserving mountain bike access to the remaining backcountry singletrack trails is very important for future generations. Zone U Recommend U75 and U666 (near Granite Creek) be open to non-motorized use. Recommend U27 and U28 (off Hwy 141 near The Narrows) be left open for dispersed camping opportunities due to lack of these opportunities in the area. Zone V Recommend non-motorized use be allowed on V2691 and 1939 Pickett trail. Mountain bicyclists have been maintaining and using this trail for at least two decades. Due to the terrain, motorized use is NOT RECOMMENDED as it will require excessive costs and labor to maintain trail to safe standards. FOREST SERVICE: Recommend non-motorized use be allowed on Lower Ute/Birch Creek trail (no number on map) due to the encouragement of local Forest Service District for mountain bike use to occur on upper portion of trail that crosses Forest Lands. Maintenance and use by mountain bikes has been occurring on this trail for the last 2 decades. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized travel be allowed on V592. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. This trail provides for a "quiet experience" in the midst of a predominantly motorized area. Recommend non-motorized use be allowed on V1007 and V1067 the portion of trail following Blue Creek above the ranch to make a loop. V1007 is an amazing mountain bike ride with incredible trees growing out of the canyon and the tops ending right near the trail. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized use on V803 allowing access to non-motorized trails on Forest Lands. This trail would allow non-motorized access to the Divide Road which is connection to ther highly desirable mountain bike opportunities. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. Recommend non-motorized use on the complete length of V930 allowing access to non-motorized trails on Forest Lands. There is also a need to add existing trail (has been submitted previously) into inventory extending from the end of V930 at Forest Boundary north to allow access to non-motorized trails on Forest Lands. Due to the remote nature and solitude provided by this trail, allowing motorized use is HIGHLY discouraged. This is part of a non-motorized trail that extends from Mesa Creek to Indian Creek allowing a rare quiet experience. Formal trail designation for any use is not recommended for trail following Blue Creek from the Blue Creek ranch downstream to the Dolores river due to trail access at private property, damage to cultural resources and high cost of trail maintenance. Recommend V2810 and V2811 remain open to non-motorized us. The remote nature, solitude provided and interesting band of smooth rock offers a unique and important mountain bike experience. Also allowing use of V2820 and uninventoried route (previously submitted) following the midlevel of cliff band would make a VERY desirable loop with V2810 and V2811. This loop would require a 60 foot section of difficult trail which is not horse or motorized use friendly. There is mining and homestead remains along the trail that would be of great historic interest. Recommend non-motorized use on trail connecting Maverick Canyon and V2626. Recommend non-motorized use on V822 (from Blue Creek ranch), V1421, V1107, V1109 and trail connecting to county road above Mesa Creek. This would allow a good loop opportunity using V1007 and V1067 to return to Blue Creek ranch. The entire length of V822 could be added to this area for a shorter loop option. Recommend non-motorized use on V1151. Although a dead end, it would provide a great easier beginner/kid ride option especially attractive here due to several popular camping spots in the near vicinity. The water availability for pets and the "all downhill" return would be very attractive for a family ride or a shorter evening ride from camp. Recommend non-motorized use on V3062 extending down Maverick Canyon. Although a dead end, it provides a spectacular view and would be a good mellow family ride due to the lack of elevation change, solitude and quiet use of the trail. With a short hike, a glimpse of Juanita Arch adds to the experience. We would really like to see V567 administrative road and then remaining V567 trail into Calamity Canyon open to non-motorized use as depicted in Alternative D. It is an old road down the hill and then follows the drainage to the private property boundary. There is then an uninventoried trail leading up the slope to the east then connecting with road V923 then V922 on a higher bench. This area is perfect to find solitude and ride a single track trail. Zone W Recommend W103 and W217 be left open to at least non-motorized use as it will be the only public access to the small parcel of Forest land. The climb on a mountain bike is very rewarding, the view from the top is magnificent and usually solitude can be found here. Even though it is an out and back, this ride is very rewarding for a seasoned

mountain bike user. Allowing only non-motorized use on W213, W214 and W218 would definitely add to the experience of these desired trail options for the mountain bike user. The addition of a new trail from the end of W218 connecting with W213 or W214 would really increase the value of the area for mountain bike use. This would create a different return or approach route for the BIG climb up W103. Recommend leaving routes W49, W78, W112, W89, W127, W190, W194, W195 (even if deemed administrative) open to non-motorized use for the exploration and solitude this area is known for.

Commenter Name: Jespersion, Soren

Organization: The Wilderness Society

Submission Code: emc0917

Recommended: Foot/Horse/Mechanized

These recommendations are particularly salient as they relate to the Maverick Canyon LWC unit and the corridor along the Byway and the Dolores River. While we believe the wilderness qualities of Maverick Canyon should be preserved - via an LWC designation and a predominantly Closed Travel Area Designation - we do feel that minimal mountain bike use and low-impact trail use in the lower (northern) end of the unit would may be consistent with LWC management and so should be accommodated via a Limited to Designated Routes for Horse, Foot and Mechanized (Closed to Motorized) Travel Area Designation. Route Specific Travel Designations: We support the route-specific travel designations from Alternative B with the following exceptions: - V 1939, V 2691: Given the historical legacy of The Pickett Trail we would like to see these routes designated for Foot & Horse travel as included in Alternative C. Travel management decisions should thoughtfully consider the following information. O This historic trail, developed by a mule train, is additionally significant as the only defined singletrack hiking/equestrian trail in the region directly connects the regions low country to the mesa tops above. The soil is often loose and the trail steep. It is a challenging and rewarding historic hike through the wilderness. This trail should be clearly marked at the intersection of 1939 and 6.3 rd and again from the top as 2691 begins its descent. Markers should include specific information about travel restrictions. An interpretive kiosk at the mouth of Wright Draw should include information about the trails historic relevance. V 930, V 1067, V 1011, V 803, V 1007: As there are limited opportunities to mountain bike on routes which are closed to motorized use, we support the recommendation, as included in Alternative D, that these routes be designated for Foot, Horse and Bike. This being said, we do ask that travel along the lower section of Blue Creek, west of the private property and within the Maverick LWC, be designated for Horse and Foot as outlined in Alternative B. This is particularly important given the cultural resources located here and the need to keep the number of visitors low.

Route V930: It might be difficult to close the first 3 miles of this route to motorized use because it currently gets moderate public use but is heavily used by grazing permittees accessing the forest. Could we work together to authorize the grazing permittees to have administrative access?

[Forest Service comment] Could have possible loop potential onto FS

– Route: V982

– Segment: 21122

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

Public Comments On Route: V982

Commenter Name: Smith, Jerry

Organization:

Submission Code: emc0773

Reccomended: Open (All modes of travel)

The Calamity Mesa Airstrip road/trail Area V: V328; V668; V792; V791; V979; V985; V982; V989; Some history of the Calamity Mesa Airstrip road/trail: a. In September of 2009, Grand Mesa Jeep Club member Jerry Smith first explored this road/trail. The majority of the road/trail runs on the top of Calamity Mesa and is suitable for most SUVs with some high ground clearance. The only signs of use were some ATV tracks. The lower end of the road/trail drops down a canyon to the 11.5 Rd. (Calamity Mesa Loop). In the canyon, the road/trail crosses a wash several times. In this area, Gambel Oak had completely overgrown the road surface completely closing the route. The oak brush was cut and removed from the road surface and laced to act as erosion control. Once the 11.5 Rd is reached, any stock vehicles would be advised to return the way they came from. b. The Calamity Mesa Airstrip road/trail was included in the 2012 and again in the 2013 "Rock Junction" event BLM Special Use Permit. c. This Calamity Mesa Airstrip road/trail has several breath taking vistas including overlooking Flat Top Mesa, Little Maverick Canyon, the top of Sewemup Mesa, the upper La Sal mountain range just to mention a few. d. Though the top of Calamity Mesa is not as difficult, once on the Calamity Mesa Loop, the driver must either return the way they came from or be able to negotiate many of the very difficult "Named Obstacles" of the Calamity Mesa Loop. e. Because of the ease of access, the top of Calamity Mesa and the road/trail down to the point of entering the canyon would be a highly recommended area for "Quiet Users", mountain biking, equestrians, and other motorized uses. The serenity and the scenery together are simply awesome. Much of the hiking, horse riding, or mountain biking would be easy to moderate on the mesa top making for an excellent experience. We would ask that the BLM give serious consideration to revise the 2013 RMP/ TMP to include the top of Calamity Mesa in the SRMA for the Calamity Mesa Loop. We would also ask the BLM give serious consideration to revise the 2013 RMP/ TMP so that in the SRMA, the top of Calamity Mesa be managed with the possibility of single track hiking and/or bicycle trail(s) be established to provide less chance for user conflicts between motorized and nonmotorized user groups.

Trail Number(s): 11.5 Rd, V921, V3122, V976, V528, V138, V432, V3589, V700, V328, V668, V792, V791, V979, V985, V982, V989 Trail Name: Calamity Mesa Loop and Airstrip Trail Description (challenges, viewpoints, terrain type, etc.): The trail offers a nice variety of challenges for a standard 4WD vehicle, while also offering the chance to explore historic mining sites, and enjoy breathtaking scenery. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is a fantastic area to explore and take in the scenic views. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like that this trail offers a bit of everything - historic sites, fantastic views, fun to drive. V426 has an old mine truck. V792 has great views at the east end. V979 travels to good views to the east. This trail has been permitted by the BLM for the Grand Mesa Jeep Clubs Rock Junction Event in both 2012 and 2013 and has been incredibly popular. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, emoteness): This is a fun excursion, offering the fullsize 4WD a full day of exploring with friends. Even traveling in a group, the trail has a feeling of remoteness. The views are amazing. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): I would like to see these roads remain open to fullsize 4WD as well as ATV, UTV, and motorcycle. This area should be managed for primitive recreation of all forms.

[Grand Mesa Jeep Club, Absolute Off Road, LLC] [including snowmobiling] 8. From upper 11.5 Road - down the top of Calamity Mesa and back to 11.5 Road. 11.5 Road; V328; V668; V791; V979; V985; V982; V989; This loop Jeep road is a primitive road with some very challenging sections. It has some great views and historical sites to explore. It also connects to other primitive Jeep road loops. This Jeep road shows signs of heavy ATV use, especially during hunting season. Largely because of the mining, the area is loaded with good access to motorized users, but still has many opportunities for non-motorized users. The area has a large number of elk, deer, bear, and many other species. The history within the area is nearly unlimited and should be protected and preserved. Saving as much of the existing mining influence remnants should be high on the priority list. Kiosks with historical facts would be a real blessing as well. Access from the Divide Road much earlier in the spring would be a real help. All that would be required to do this would be for the Forest Service to change the location of their winter closure to the intersection of the "Uranium Road" or change the opening date of the Divide Road. One other possibility would be for Mesa County to open 6.3 Road near the top by dozing through the snow drifts that accumulate there. These drifts last well past when the majority of the area has already lost its snowpack. Trails within the area are proposed and being permitted for a commercial event with the Gateway Canyons Resort in June '09 and probably for years thereafter. We look forward to working with the BLM this spring to doing some necessary maintenance on these trails to make them safer for the event entrants.

I feel strongly that these high value recreational routes (route segments) in Zone W should remain open to the general public for all forms of use including motorized/OHV use. Routes W: 134, 198, 205, 49, 47, 33, 38, 32, 57, 31, 28, 27, 60, 131, 51, 53, 176, 127, 157, 174, 125, 191, 190, 126, 120, 184, 126, 192, 194, 196, 195, 118, 119, 80, 153, 151, 76, 149, 77, 78, 112, 90, 91, 146, 137, 89, 148, 141, 139, 86, 147, 140, 83, 84, 17, 18, 218, 103, 217, 103, 105, 219, 209, 212, 225, 222, 2, 25, 22, 226. Based on Colorado Law and County Regulations, RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone W routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes to public access.

Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is an area my family likes to explore. Typically, my husband rides an ATV whereas I drive a UTV that is greater than 50" wide. The two machines are wellmatched in speed, capabilities, and distances we can travel. I like driving the UTV because I can comfortably and safely carry my child with me. We seek out areas like this that offer plenty of trail distance and scenery to provide a full days adventure. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I love the views. What a scenic place to explore. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): I get to get outside and enjoy the scenery with my family and take a few photographs. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): Leave these routes open to fullsize 4WD. Redesignating twotrack roads as ATVwidth only trails does nothing to enhance the ATV experience and ignores the growing popularity of UTVs. The BLM fails to understand that ATVs and UTVs are wellmatched riding partners and it is quite common to have groups of ATVs and UTVs traveling together. Twotrack roads open to all motorized uses are essential to "mixed groups" such as these.

I feel strongly that these high value recreational routes (route segments) in Zone W should remain open to the general public for all forms of use including motorized/OHV use. Routes W: 134, 198, 205, 49, 47, 33, 38, 32, 57, 31, 28, 27, 60, 131, 51, 53, 176, 127, 157, 174, 125, 191, 190, 126, 120, 184, 126, 192, 194, 196, 195, 118, 119, 80, 153, 151, 76, 149, 77, 78, 112, 90, 91, 146, 137, 89, 148, 141, 139, 86, 147, 140, 83, 84, 17, 18, 218, 103, 217, 103, 105, 219, 209, 212, 225, 222, 2, 25, 22, 226. Based on Colorado Law and County Regulations, RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone W routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes to public access.

The following is a partial list of roads, that should remain open and usable, that are listed for closure or restriction in the proposed RMP Alternative B, C and or D. U13, U14, U11, U699, U345, U701, U317, U701, U317, U680, U681, U682 U15, U17, U23, U20, U18, U666, U723, U725, U712, W221, W2, W225, W222, W218, W60, W27, W57, W51, W33, W53, W176, W174, W118, W125, W126, W120, W192, W194, W195, W198, Q121, Q338, Q448, Q450, Q479, Q256, Q673, Q529, Q517, Q528, Q535, Q537, Q539, Q115, Q623, Q771, Q737, Q763, Q835

– Route: W134

– Segment: 19521

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None**Mitigation**

- No Mitigation prescribed for this route segment

Rationale**Designation Criteria**

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Wildlife Elk Production Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard
- Water Stream Crossing
- Wildlife Elk Production Area
- Range Development

Rationale for Decision

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

Refers to Pace Lake We enjoy exploring Colorado back country we especially enjoy trails that are challenging. We birdwatch, take photos, and camp on our trips. Great scenic drive getting to trail. The trail is narrow with challenging off camber sections. There are also large rock gardens that are challenging to negotiate. It is great to get to such a remote area in a day trip. It is great to go up and have lunch with friends. We would like to see W917 to W137 to make a loop back to John Brown Rd.

Trail Number(s): W217, W103, W17, W18, W19, W209 **Trail Name:** Pace Lake Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This trail was permitted by the BLM for the Grand Mesa Jeep Clubs Rock Junction event in 2013. It features a mix of challenging rock crawling with exploration, visiting historic sites, and viewing beautiful scenery. **Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views):** The views and the history of this area make it a great area to explore. **Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness):** This trail provides me with a feeling of remoteness while enjoying time with friends and family. This is an enjoyable trip to do with a small group of vehicles. **Other Comment (what is your desired outcome for this trail, additional ideas to be considered):** This trail should remain open to full-size 4WD vehicles for the entire length of the trail. I would like to see this trail connected to W217 to W137 to make a loop road back to John Brown Rd.

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Not Meeting Public Land health Standard (1)
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard
- Water Does not meets Public Land Health Standard Hydro
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

– **Route: W184**

– **Segment: 19104**

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Recreation Access Dispersed Campsite
- Special Designation VRM Class III
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Trail Number(s): W49, W199, W198 Trail Name: John Brown Canyon Overlook Trail Description (challenges, viewpoints, terrain type, etc.): A side trip off John Brown Canyon that goes out to a point overlooking John Brown Canyon Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): I enjoy exploring this area with my family. I enjoy photographing the scenic vistas. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I like the views of John Brown Canyon and also of the Dolores River Valley that can be seen from this route. Trails like this one provide great views and great photos. Being able to take a 4WD vehicle means that the whole family can come along. I doubt Id get much chance to photograph from places like this if my family wasnt able to come with me and enjoy the trip. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This trail lets me take the family out exploring and we all enjoy the scenic vistas. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): Leave these routes open to fullwidth motorized vehicles so families like mine can enjoy the views.

– Route: W2

– Segment: 21731

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Wilderness Natural Area:** Areas and trails shall not be located in officially designated wilderness areas or

primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-highway vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class I
- Special Designation WSA
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Range Study Site

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to preserve the visual character of the existing landscape, limit or reduce the number of routes in areas managed as VRM Class I
- Designation was considered when protecting Wilderness Study Areas values.
- Designation was considered to reduce impairment of wilderness characteristics in areas managed for wilderness characteristics.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: W2

Commenter Name: Potterveld, Jan

Organization: Back Country Horsemen of Colorado

Submission Code: emc0634

Reccomended: Foot/Horse

Area or trail name: Sinbad Valley and Sewemup Mesa, Zone W Describe the area and your historical use/knowledge of the area. Sewemup Mesa is an existing WSA and should continue under that designation because of remoteness, isolation and solitude it provides. Access is difficult at best and suitable only for hikers and very experienced horse persons. Sinbad Valley is important for historical and geologic reasons, being a salt anticline and home to the McCarty brothers cabins. I have ridden horseback in the southeast corner of this area, enjoying the beautiful scenery and solitude. The remainder of Zone W covers the mesas to the north up to John Brown Rd.

Why is the area important from your perspective? While much of the center of Sinbad Valley is private ranch land, the edges provide excellent hiking and horseback riding trails with some access to Sewemup Mesa. There is Country Road access via 7.2 road with public access granted over some private sections. This valley is also the Colorado access route to the Manti-La Sal National Forest. Trails extend into this Forest. Rare Fauna and Flora are to be found along the slopes. Because of all the public land and access issues, it is probably not appropriate to designate this as an LWC but we ought to manage it with those principals in mind. Indeed given the rare plants noted above, the cultural resources and of course the scenic view-shed of the cliff. The Sinbad Valley area should be managed as an Area of Critical Environmental Concern as outlined in Alternative C.

How would you like to see this area managed by BLM and why? With regard to travel, I would like to see this area managed for multiple use with the exception of the Sewemup Mesa. The McCarty Cabins should be preserved as a historical landmark. Alternative B provides a very workable mixture of trails and routes for all users. Route W22 is one of my favorites and it leads into the Manti-La Sal NF. Route W2 is marked to be closed. I would like to see W2 stay open for horse and hikers as route over the first ridge below the steep rise up to Sewemup Mesa . Additional Comments: Route W22 starts out as a route suitable for all users, but then as it progresses into the National forest its suitability narrows to bikers, and then to only hikers and horses, and finally only to hikers able to scale the walls and cliffs. All the depicted routes in Alt. B should be maintained for connectivity into the NFS and into the UTAH trail system providing access to the trail system on the mesas to the north. Also, none of the Alternatives show any trails from the Hwy 141 side up onto Sewemup Mesa. These exist and should be part of the inventory for Horse and Hiking.

Commenter Name: Shepherd, Janice

Organization: The Quiet Trails Group

Submission Code: emc0835

Recommended: Foot/Horse

We would also support keeping W49 open to foot, horse and bike travel but closed to motorized use. Once W49 narrows, it should then be limited to foot and horse travel. We also have questions about the W2 closure if there are not significant reasons for this closure, we would prefer to see it remain available to foot and horse travel.

Commenter Name: Bufkin, Bruce

Organization: Grand Mesa Jeep Club

Submission Code: rmc0025

Recommended: Open (All modes of travel)

Description: Step rocky accesses the southwest end of Sewemup Mesa. The only way to access to the top of the mesa. There is no water on the way up or on the top. **Historical Use:** I've Used these trails to access Sewemup Mesa for hunting. **Why you like it:** Without being able to 4 wheel to the top of W2, you cannot pack enough water to explore the top of the mesa. The top of Sewemup Mesa is very remote. Wildlife waters from the creek of the south end of the mesa. Extremely steep sides make for fantastic views. Without these trails the Sewemup Mesa Wilderness will essentially be unused.

Commenter Name: Siegfried, Brandon

The following is a partial list of roads, that should remain open and usable, that are listed for closure or restriction in the proposed RMP Alternative B, C and or D. U13, U14, U11, U699, U345, U701, U317, U701, U317, U680, U681, U682 U15, U17, U23, U20, U18, U666, U723, U725, U712, W221, W2, W225, W222, W218, W60, W27, W57, W51, W33, W53, W176. W174, W118, W125, W126, W120, W192, W194, W195, W198, Q121, Q338, Q448, Q450, Q479, Q256, Q673, Q529, Q517, Q528, Q535, Q537, Q539, Q115, Q623, Q771, Q737, Q763, Q835

— Route: W205

— Segment: 16652

Designation

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.

Public Comments On Route: W205

Commenter Name: Siegfried, Brandon

Submission Code: cfc0073

Organization:

Reccomended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone W should remain open to the general public for all forms of use including motorized/OHV use. Routes W: 134, 198, 205 ,49, 47, 33, 38, 32, 57, 31, 28, 27, 60, 131, 51, 53, 176, 127, 157, 174, 125, 191, 190, 126, 120, 184, 126, 192, 194, 196,195,118,119,80,153,151,76,149, 77, 78, 112, 90, 91, 146, 137, 89, 148, 141, 139, 86, 147, 140, 83, 84, 17, 18, 218, 103, 217, 103, 105, 219, 209, 212, 225, 222, 2, 25, 22, 226. Based on Colorado Law and County Regulations, RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone W routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes to public access.

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or

other resources of the public lands, and to prevent impairment of wilderness suitability.

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Admin/Permitted Use Only

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Admin/Permitted Use Only

— Segment: 18698

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or

other resources of the public lands, and to prevent impairment of wilderness suitability.

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative C (Conservation): Closed

Alternative D (Development): Admin/Permitted Use Only

— Segment: 18700

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Forestry Access Firewood/Post & Pole Gathering
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Slope Greater than 40%
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas with slopes exceeding 40 percent.

Public Comments On Route: W51

Commenter Name: Siegfried, Brandon

Organization:

Submission Code: cfc0073

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone W should remain open to the general public for all forms of use including motorized/OHV use. Routes W: 134, 198, 205, 49, 47, 33, 38, 32, 57, 31, 28, 27, 60, 131, 51, 53, 176, 127, 157, 174, 125, 191, 190, 126, 120, 184, 126, 192, 194, 196, 195, 118, 119, 80, 153, 151, 76, 149, 77, 78, 112, 90, 91, 146, 137, 89, 148, 141, 139, 86, 147, 140, 83, 84, 17, 18, 218, 103, 217, 103, 105, 219, 209, 212, 225, 222, 2, 25, 22, 226. Based on Colorado Law and County Regulations, RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone W routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes to public access.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Designation Following Mitigation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access
- Work with Land Owner on Right of Way

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Water Stream Crossing
- Wildlife Elk Production Area
- Wildlife Elk Winter Range
- Lands and Realty Route through disposal parcel

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Designation [?](#)

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

– Segment: 18401

Designation

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- Potential cultural interpretation

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

— Segment: 18596

Designation ?

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: Winter Closure

Mitigation

- Maintenance
- Drainage Crossing
- Potential cultural interpretation

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Wildlife Elk Winter Range
- Range Development

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations during critical periods.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Limited to Vehicles Under 50" wide

Alternative C (Conservation): Closed

Alternative D (Development): Open (All modes of travel)

— Segment: 20005

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering
- Forestry Access Christmas Tree Cutting Area
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Wildlife Elk Winter Range
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: W80

Commenter Name: Znamenacek, Dale
Submission Code: emc0728

Organization: Grand Mesa Jeep Club
Recommended: Open (All modes of travel)

Trail Number(s): W179, W157, W126, W122, W127, W197, W190, W191, W80, W118, W119, W192, W194, W195, W112, W78, W89 Trail Name: Dolores River Valley Overlooks Trail Description (challenges, viewpoints, terrain type, etc.): Several trails that lead to overlooks of the Dolores River Valley and surrounding areas. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): This is an area my family likes to explore. Typically, my husband rides an ATV whereas I drive a UTV that is greater than 50" wide. The two machines are wellmatched in speed, capabilities, and distances we can travel. I like driving the UTV because I can comfortably and safely carry my child with me. We seek out areas like this that offer plenty of trail distance and scenery to provide a full days adventure. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): I love the views. What a scenic place to explore. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): I get to get outside and enjoy the scenery with my family and take a few photographs. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): Leave these routes open to fullsize 4WD. Redesignating twotrack roads as ATVwidth only trails does nothing to enhance the ATV experience and ignores the growing popularity of UTVs. The BLM fails to understand that ATVs and UTVs are wellmatched riding partners and it is quite common to have groups of ATVs and UTVs traveling together. Twotrack roads open to all motorized uses are essential to "mixed groups" such as these.

Organization: The Quiet Trails Group
Recommended: Foot/Horse/Mechanized

We would like to see the ATV routes in Alternative B (W80, W126, W190, W191, W197, W127, W122, W178, W179, and W157 connecting all the way west back to the County Road) limited to foot, horse and mechanized travel - this is particularly important for quietuse recreation in a regional context given that throughout the northern Dolores the dominant use along the mesas is motorized. The October Benches could provide an important opportunity for quiet, trailbased, biking, hiking, and horseback riding.

Commenter Name: Jespersion, Soren

Organization: The Wilderness Society
Recommended: Foot/Horse/Mechanized

October Benches - From a wildlife perspective, the October Benches area supports several important wildlife habitats, including Colton milkvetch near the county road coming off John Brown road, and elk production area and severe winter range. In addition, October Benches is adjacent to black bear fall concentration area and elk production area immediately to the west. W 49: In addition to the aforementioned wildlife information, in a regional context there are very few opportunities for quiet, mechanized recreation on the mesa tops surrounding Gateway. Given this recreational reality and the aforementioned wildlife concerns we ask that this route be designated as open to Foot, Horse and Bike travel. W 80, W 126, W 191, W 190, W 127, W 157: Using the same logic articulated for route W49, alongside the presence of significant cultural resources in the southern portions of the Benches, we ask that these routes be designated as open to Foot, Horse and Bike travel. Sinbad Valley - Sinbad Valley encompasses an extremely diverse assemblage of natural habitats, with CNHP PCA "very high" biodiversity rankings of B2 for the Sinbad Valley, Salt Creek and Sewemup PCAs. Several of these habitats are especially sensitive to disturbance, including the rare plant habitat based on fragile gypsiferous soils and soil crusts associated with the collapsed salt dome of the valley; and the unusual riparian habitats along Salt Creek. Populations of Gypsum Valley Cateye (*Cryptantha gypsophila*, G2S2) near to W221 have reportedly previously been damaged by off-road vehicle travel In addition, Sinbad Valley supports the following significant ecological values: Dwarf sand verbena (vicinity of W221); New Mexico privet riparian vegetation community along Salt Creek; Long flower cateye; Mule Deer critical and severe winter range, winter concentration area, and migration route; , and Peregrine Falcon nesting areas. An informational kiosk with some of the above information, as well as historical information and travel restrictions should be located at the mouth of Sinbad Valley just adjacent to Highway 141. This can also be a site with specific relevance to visitors seeking information and guidance regarding a visit to Juanita Arch. W 213, W 214: Given the aforementioned resources and concerns regarding recreational routes dead-ending into private property, we encourage BLM to Close & Rehab these routes.

I feel strongly that these high value recreational routes (route segments) in Zone W should remain open to the

general public for all forms of use including motorized/OHV use. Routes W: 134, 198, 205 ,49, 47, 33, 38, 32, 57, 31, 28, 27, 60, 131, 51, 53, 176, 127, 157, 174, 125, 191, 190, 126, 120, 184, 126, 192, 194, 196,195,118,119,80,153,151,76,149, 77, 78, 112, 90, 91, 146, 137, 89, 148, 141, 139, 86, 147, 140, 83, 84, 17, 18, 218, 103, 217, 103, 105, 219, 209, 212, 225, 222, 2, 25, 22, 226. Based on Colorado Law and County Regulations, RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone W routes listed above, closing these routes would be arbitrary and capricious. The BLM cannot legally close these routes to public access.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Designation Following Mitigation:

Open (All modes of travel)

Seasonal Limitations: Spring Closure 3 (Elk Calving)

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation ACEC
- Special Designation VRM Class III
- Wildlife Elk Production Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
