

BLM GJFO Travel Plan Route Report

– Route: E202

– Segment: 2799

Designation [?](#)

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class II
- Vegetation Public Land Health Standard not meeting biotic standard
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Closed

Alternative C (Conservation): Closed

Alternative D (Development): Closed

Designation [?](#)

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation VRM Class II
- Vegetation Public Land Health Standard not meeting biotic standard
- Water Stream Crossing
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class II
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Needs More Data

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling

Cultural Resource Concern

- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class II
- Vegetation Designated Critical Habitat
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on listed species and in designated critical habitat for threatened and endangered plants.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Public Comments On Route: E210

Commenter Name: Siegfried, Brandon

Organization: Grand Mesa Jeep Club

Submission Code: cfc0090

Recommened: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone E should remain open to the general public for all forms of use including motorized/OHV use. Routes E: 141; 142; 20; 152; 150;23;21;27; 160;168;185; 89; 30; 260; 253; 255; 32; 234; 217; 37; 194; 195; 211; 212; 204; 206; 207; 210; 201; 41. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone E routes above.

– Route: F100**– Segment: 2695****Designation** 

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Energy Access COGCC well
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Designated Critical Habitat
- Water Stream Crossing
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain administrative access to active oil and gas wells, but limit public access to provide for public safety at active well sites.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on listed species and in designated critical habitat for threatened and endangered plants.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Submission Code: cfc0089

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone F should remain open to the general public for all forms of use including motorized/OHV use. Routes F: 125; 115; 117; 122; 120;171;119;134;93;108; 100;104;94;107;138;140; 159;152;153;155;172; 196;174;195; 655; 556; 602; 649; 555; 560; 571; 595; 598; 599; 569; 612; 613; 518; 517; 519; 527; 580; 616; 764; 575; 615; 620; 630; 538; 502; 572; 549; 715; 753; 758; 277; 264; 769; 500; 284; 288; 684; 351; 329; 348; 338, 340; 339; 316; 311; 685; 200; 202; 211; 203; 206; 216; 218; 222; 232; 375; 376; 92; 290; 235; 247; 301; 295; 416; 412; 425. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone F routes above.

Commenter Name: Rechel, Eric

Organization:

Submission Code: rmc0049

Recommended: Closed

Zone F: Close all BLM roads into Coon Hollow because of the threatened plant Debeque phacelia, and west and north of Pyramid Rock. Because there are scattered individuals of the Colorado Hookless Cactus around Pyramid Rock all roads south of Pyramid Rock should also be closed. Need to close all roads of north of South Shale LWWC e.g., F155,F153,F107,F104,F100, F140, F159,F152, and F93.

– Route: F138

– Segment: 2689

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Drainage Crossing

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Other Considerations County Vested Interest
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species In or Through (20m points)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Designated Critical Habitat
- Wildlife Mule Deer Winter Range
- Lands and Realty ROW
- Range Development

Rationale for Decision

- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

Submission Code: rmc0087

Recommened: Open (All modes of travel)

De Beque Trail Numbers: (These are some of the most important trails): F356, F376, F572, F571, F549, F380 & F375. Administrative Routes that should be opened: F772, F138, F140, F159, F153, F155, F211, F409, F416, F669, F772. The De Beque area is used by motorized recreationist three seasons out of the year and is home to the De Beque Poker Ride. It is an area especially important to motorized.

Submission Code: cfc0089

Recommened: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone F should remain open to the general public for all forms of use including motorized/OHV use. Routes F: 125; 115; 117; 122; 120;171;119;134;93;108; 100;104;94;107;138;140; 159;152;153;155;172; 196;174;195; 655; 556; 602; 649; 555; 560; 571; 595; 598; 599; 569; 612; 613; 518; 517; 519; 527; 580; 616; 764; 575; 615; 620; 630; 538; 502; 572; 549; 715; 753; 758; 277; 264; 769; 500; 284; 288; 684; 351; 329; 348; 338, 340; 339; 316; 311; 685; 200; 202; 211; 203; 206; 216; 218; 222; 232; 375; 376; 92; 290; 235; 247; 301; 295; 416; 412; 425. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone F routes above.

– Route: F152

– Segment: 580

Designation [?](#)

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Reroute
- Maintenance
- Drainage Crossing

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations County Vested Interest
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Designated Critical Habitat
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Range Development

Rationale for Decision

- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Energy Access COGCC well
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation ACEC
- Special Designation VRM Class II
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to maintain administrative access to active oil and gas wells, but limit public access to provide for public safety at active well sites.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Public Comments On Route: F152

Commenter Name: Rechel, Eric

Organization:

Submission Code: rmc0049

Reccomended: Closed

Zone F: Close all BLM roads into Coon Hollow because of the threatened plant Debeque phacelia, and west and north of Pyramid Rock. Because there are scattered individuals of the Colorado Hookless Cactus around Pyramid Rock all roads south of Pyramid Rock should also be closed. Need to close all roads of north of South Shale LWWC e.g., F155,F153,F107,F104,F100, F140, F159,F152, and F93.

Commenter Name: Siegfried, Brandon

Designation

Proposed Designation: Admin/Permitted Use Only
Seasonal Limitations: None

Designation Following Mitigation: Closed
Seasonal Limitations: None

Mitigation

- Once Well is Abandoned

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route

- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species In or Through (20m points)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Designated Critical Habitat
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce as much as practicable route density (miles/square mile) within 200 meters of known Threatened and Endangered plant occurrences throughout the field office.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on listed species and in designated critical habitat for threatened and endangered plants.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Routes F1 95-F196 To F172 This is the Coon Hollow area. Alternative B shows it becoming a 50" route. Due to the remote feeling of this route, combined with the ruggedness, views and great break locations, we believe this route should remain open to all users. The main users are jeeps and ATVers. It is an adventure to climb to the top and should be experienced by all.

Commenter Name: Grossman, David

Organization: Grand Valley Trails Alliance

Submission Code: emc0719

Recommened: Open (All modes of travel)

The historic, unique Coon Hollow Road (F655, F195) transects the proposed South Shale Ridge ACEC and the DWG proposes that it be "Cherry Stemmed" into the ACEC to allow recreational access via a narrow corridor. We ask that the GJFO of the BLM give serious consideration to managing the proposed Coon Hollow corridor as a limited "Primitive" road/trail, with all motorized vehicular use being the "Primary" recreational use. The recreation corridor within Coon Hollow to be a narrow management section to not infringe on the backcountry characteristics of the surrounding area any more than it currently does. The DWG was unable to reach a consensus on the details of the Coon Hollow Road/Trail with conservation focused members only willing to concede the lower section of the Coon Hollow Road (F655 to F195). The Quiet Trails Group representatives, with the exception of the Backcountry Horsemen, expressed concern about allowing a trail along the ridge and deep into an area with wild characteristics. The OHV and Backcountry Horsemen members of the DWG feel that the Coon Hollow Trail (F196 to F172) is of exceptional nature and in experience and challenge with a rating of 6 on their off-road scale which is unique to the region and that the Coon Hollow Road in the bottom has little value other than access.

Submission Code: emc0773

Recommened: Open (All modes of travel)

Coon Hollow Jeep Road/Trail (North and West of De Beque, CO) Area F -- F195; F196; F172; F655; F609; and others 1. Some trail history: The Coon Hollow Jeep Road/Trail is a very significant and extremely rare kind of experience for Jeep-size vehicles and other OHVs in the entire GJFO jurisdiction and/or in the entire western U.S. In the GJFO management area, there are only three roads/trails that meet the following criteria: i. Primitive class 6 or 7 for difficulty and over 4-miles in length ii. Scenic, yet not easily seen or offensive from the immediate area iii. Challenge the drivers skills and the capabilities of their vehicle The Coon Hollow Road/Trail has been on BLM maps much longer than the South Shale Ridge has been inventoried as a "Wilderness Characteristics". Even though "Cherry Stemmed" within a Wilderness Characteristic area, the BLM has continued to identify it as a "Jeep Trail", the Affected Environment has shown no, or very little detrimental effects from the long time existence of the Coon Hollow Jeep Road/Trail. If allowed, the adoption of this trail may actually enhance the area with some work to slow the rate of erosion in key areas. The Coon Hollow road/trail has been added to the requested road/trail inventory for Special Recreation Permits (SRP) for the Grand Mesa Jeep Clubs annual "Rock Junction 2013" event. (On this SRP, we were turned down). The Coon Hollow Jeep Road/Trail has been documented on BLM maps for many years as a "Jeep Trail". The Grand Mesa Jeep Club may formally submit to the BLM for "Adopt-A-Trail" status of the Coon Hollow Jeep Road/Trail. This would allow the Grand Mesa Jeep Club to maintain this road/trail through volunteerism This would keep maintenance costs to a minimum for the BLM. It is expected that the brush growth encroaching on the trail will continue to be a serious problem for the next several years. The Mayor of De Beque (Wayne Klahn) vehemently supports keeping the Coon Hollow Jeep Road/Trail open to all motorized use. The community of De Beque will benefit directly socially and economically from keeping the Coon Hollow Jeep Road/Trail open to all motorized use. The Coon Hollow road/trail is relatively close to Interstate 70. Access from the interstate would be easy. As the Coon Hollow Jeep Road/Trail gains in notoriety, more traffic can be anticipated, as it would have "quick access" from an Interstate Highway. The findings in the Environmental Consequences chapter of this DRMP indicate that there are no natural resources at risk under the existing situation¹, therefore, there is no compelling need for drastic cutbacks. Unreasonable cutbacks in access are not warranted by the facts. 2. Expected Experiences At the west end of the trail there is a saddle that one crosses. As you top the saddle, your

heart will skip a beat or two as the view goes from one of relative close and confined to a panorama that expands before you showing a very wide view of western Colorado and into Utah. It is truly an experience that should be mandatory in everyones lifetime. The driving experience of the Coon Hollow Jeep Road/Trail going up is totally different than the coming down experience, making it two entirely unique experiences. Going up you see primarily blue sky and the narrow road through the trees and brush off the sides of the ridge. Going up you are unfamiliar with the trail and the obstacles. Your main focus is on the trail. Occasionally, your gaze will wander and you will become mesmerized by the beauty surrounding you. Coming down, the view through your windshield opens to a panorama of grand vistas clear to and over the town of De Begue to the Battlement Mesa. Your familiarity with the trail and the angle of the view before you makes you want to stop often for "Kodak Moments". Your appreciation for what God has made grows with every turn and crest overcome. As a "Cherry-stemmed" road/trail into an area with "Wilderness Characteristics", the Coon Hollow Jeep Road/Trail is extremely unique. This experience is rarely found anywhere. Anyone with a vehicle capable of accessing the upper Coon Hollow Jeep Road/Trail or who may ride with those that do, will have the opportunity to have a true "Wilderness Experience" without the need for all the personal physical exertion normally required. This access would allow people with disabilities, youth and/or the elderly not up to walking these distances and steep grades the pleasures of a true "Wilderness Experience" in a truly beautiful setting. The opportunity for "Quiet Users" to "get away from it all" will be much easier than they can experience in most designated Wilderness Areas. Their access to a "Wilderness Experience" of this magnitude without the exertion normally expected will draw many of them to accept the very occasional disturbance of a motorized vehicle and maybe become more tolerant of the slight disturbance. As a BLM identified "Cherry-stemmed" road/trail into an area with "Wilderness Characteristics", the existence of the Coon Hollow Jeep Road/Trail should have disallowed the surrounding area as qualified for "Wilderness Characteristics". Wilderness should have no significant signs of man and a road/trail is a significant sign of mans presence. We ask that the BLM give serious consideration to changing the 2013 RMP/TMP management of the entire length of the Coon Hollow Jeep Road/Trail as an Open, "Primitive" road/trail, with ALL Motorized vehicular use being the "Primary" recreational use under the designation of Special Recreation Management Area (SRMA).

It is a truly amazing thing to enter into Coon Hollow, the very heart of South Shale Ridge, there is not a sound but you and the birds, you are engulfed by two massive ridgelines (that is until you climb to the ridge top), the colors are incredible, the views are 360 degrees. We saw tons of evidence of wildlife. Elk and cat tracks were everywhere. And on a few occasions we would locate a nearby highpoint and then find our way to it. The solitude, silence, wildlife, and challenges are second to none. Also the plants are awesome. Please designate and manage as LWC to protect the cultural, wildlife, solitude, and primitive recreation resources. As well please designate and manage ACEC from Alt. C in your final plan. Please, close routes F196, F195, F172 to motorized and leave them open t foot horse and possibly mechanized. The wilderness experience would be greatly disrupted by motorized note.

Recommened: Foot/Horse/Mechanized

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. Routes in Coon Hollow remain open to mechanized access. F655, F195, F196, F176, F172, F555, F556, and unnumbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled.

When I still lived in Silt I would bring my dogs and ride Coon Hollow for a day ride, before my wife retired. I've camped at different times in this area and rode most of the roads and trails in zone F. I've GPS a lot of the rides that I rode for the last ten years or more. Please keep the roads, double tracks and single track trail open OHV travel. This public land should be open for all the people to enjoy. Alternative B with trails F195, F185, F174, F196, f172, 50" or less can give the ATV and driver a work-out at different times. There are deer and other wildlife in this area. 360* scenic views are everywhere. Being able to ride in the fresh air make one feel alive and friends to talk to makes it even better. As the population increases, they need to have a place to play. Maybe the BLM office would be a place to go to play.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations Inventoried Lands with Wilderness Characteristics
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation ACEC
- Special Designation VRM Class II

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental

concern.

Coon Hollow Trail to top of Shale Ridge Overlook, This trail provides an adventuresome trip along a steep rocky road to a inspirational overlook of the DeBeque BLM area. It should be labeled open to motorize use because of the experience it allows for all forms of recreation. This road provides access to the head of Horseshoe Canyon. It is a picnic destination with the option of hiking down into the canyon. The road should be labeled open to motorized travel because it provides an primitive experience into a beautiful area.

Submission Code: emc0595

Organization: Grand Mesa Jeep Club

Recommended: Open (All modes of travel)

Other Comment (what is your desired outcome for this trail, additional ideas to be considered): I would like to see the BLM designate this trail as open to full-size motorized users. Trail Number(s): F195, F655, F609, F196, F172
Trail Name: Coon Hollow

Commenter Name: Potterveld, Jan

Submission Code: emc0634

Organization: Back Country Horsemen of Colorado

Recommended: Open (All modes of travel)

Trails F655 and F195 should continue to be open for all use. Trail F196 should remain open for ATV use as well as all quiet use. Trail F599 is a well maintained road and with its extension onto F555 leads to an abandoned Oil and Gas site. This provides excellent parking for horse trailers and can serve as a Trail Head for rides in the Coon Hollow area. The upper part of F555 should be changed to All Vehicles [Black]. The lower part of F555 which leads back to F655, Coon Hollow Rd, is suitable only for ATV and below. Trail F556 is at best an ATV track and perhaps only horse and foot. Consideration should be given to leaving F571 and F549 open to all as this provides an off road section to avoid the traffic on V.2 road. Off of V.2 road there is one short trail that I have explored in my Jeep SUV and it should stay open to all as it leads to some great views of Hoodoos in the ridge to the north. The is Trail F284 and F278 as shown in Alt. D.

Submission Code: emc0013

Organization: Western Slope ATV Association

Recommended: Open (All modes of travel)

Routes F1 95-F196 To F172 This is the Coon Hollow area. Alternative B shows it becoming a 50" route. Due to the remote feeling of this route, combined with the ruggedness, views and great break locations, we believe this route should remain open to all users. The main users are jeeps and ATVers. It is an adventure to climb to the top and should be experienced by all.

Commenter Name: Grossman, David

Submission Code: emc0719

Organization: Grand Valley Trails Alliance

Recommended: Open (All modes of travel)

The historic, unique Coon Hollow Road (F655, F195) transects the proposed South Shale Ridge ACEC and the DWG proposes that it be "Cherry Stemmed" into the ACEC to allow recreational access via a narrow corridor. We ask that the GJFO of the BLM give serious consideration to managing the proposed Coon Hollow corridor as a limited "Primitive" road/trail, with all motorized vehicular use being the "Primary" recreational use. The recreation corridor within Coon Hollow to be a narrow management section to not infringe on the backcountry characteristics of the surrounding area any more than it currently does. The DWG was unable to reach a consensus on the details of the Coon Hollow Road/Trail with conservation focused members only willing to concede the lower section of the Coon Hollow Road (F655 to F195). The Quiet Trails Group representatives, with the exception of the Backcountry Horsemen, expressed concern about allowing a trail along the ridge and deep into an area with wild characteristics. The OHV and Backcountry Horsemen members of the DWG feel that the Coon Hollow Trail (F196 to F172) is of exceptional nature and in experience and challenge with a rating of 6 on their off-road scale which is unique to the region and that the Coon Hollow Road in the bottom has little value other than access.

Commenter Name: Smith, Jerry

Submission Code: emc0773

Organization:

Recommended: Open (All modes of travel)

Coon Hollow Jeep Road/Trail (North and West of De Beque, CO) Area F -- F195; F196; F172; F655; F609; and others 1. Some trail history: The Coon Hollow Jeep Road/Trail is a very significant and extremely rare kind of experience for Jeep-size vehicles and other OHVs in the entire GJFO jurisdiction and/or in the entire western U.S. In the GJFO management area, there are only three roads/trails that meet the following criteria: i. Primitive class 6

or 7 for difficulty and over 4-miles in length ii. Scenic, yet not easily seen or offensive from the immediate area iii. Challenge the drivers skills and the capabilities of their vehicle The Coon Hollow Road/Trail has been on BLM maps much longer than the South Shale Ridge has been inventoried as a "Wilderness Characteristics". Even though "Cherry Stemmed" within a Wilderness Characteristic area, the BLM has continued to identify it as a "Jeep Trail", the Affected Environment has shown no, or very little detrimental effects from the long time existence of the Coon Hollow Jeep Road/Trail. If allowed, the adoption of this trail may actually enhance the area with some work to slow the rate of erosion in key areas. The Coon Hollow road/trail has been added to the requested road/trail inventory for Special Recreation Permits (SRP) for the Grand Mesa Jeep Clubs annual "Rock Junction 2013" event. (On this SRP, we were turned down). The Coon Hollow Jeep Road/Trail has been documented on BLM maps for many years as a "Jeep Trail". The Grand Mesa Jeep Club may formally submit to the BLM for "Adopt-A-Trail" status of the Coon Hollow Jeep Road/Trail. This would allow the Grand Mesa Jeep Club to maintain this road/trail through volunteerism This would keep maintenance costs to a minimum for the BLM. It is expected that the brush growth encroaching on the trail will continue to be a serious problem for the next several years. The Mayor of De Beque (Wayne Klahn) vehemently supports keeping the Coon Hollow Jeep Road/Trail open to all motorized use. The community of De Beque will benefit directly socially and economically from keeping the Coon Hollow Jeep Road/Trail open to all motorized use. The Coon Hollow road/trail is relatively close to Interstate 70. Access from the interstate would be easy. As the Coon Hollow Jeep Road/Trail gains in notoriety, more traffic can be anticipated, as it would have "quick access" from an Interstate Highway. The findings in the Environmental Consequences chapter of this DRMP indicate that there are no natural resources at risk under the existing situation¹, therefore, there is no compelling need for drastic cutbacks. Unreasonable cutbacks in access are not warranted by the facts. 2. Expected Experiences At the west end of the trail there is a saddle that one crosses. As you top the saddle, your heart will skip a beat or two as the view goes from one of relative close and confined to a panorama that expands before you showing a very wide view of western Colorado and into Utah. It is truly an experience that should be mandatory in everyones lifetime. The driving experience of the Coon Hollow Jeep Road/Trail going up is totally different than the coming down experience, making it two entirely unique experiences. Going up you see primarily blue sky and the narrow road through the trees and brush off the sides of the ridge. Going up you are unfamiliar with the trail and the obstacles. Your main focus is on the trail. Occasionally, your gaze will wander and you will become mesmerized by the beauty surrounding you. Coming down, the view through your windshield opens to a panorama of grand vistas clear to and over the town of De Begue to the Battlement Mesa. Your familiarity with the trail and the angle of the view before you makes you want to stop often for "Kodak Moments". Your appreciation for what God has made grows with every turn and crest overcome. As a "Cherry-stemmed" road/trail into an area with "Wilderness Characteristics", the Coon Hollow Jeep Road/Trail is extremely unique. This experience is rarely found anywhere. Anyone with a vehicle capable of accessing the upper Coon Hollow Jeep Road/Trail or who may ride with those that do, will have the opportunity to have a true "Wilderness Experience" without the need for all the personal physical exertion normally required. This access would allow people with disabilities, youth and/or the elderly not up to walking these distances and steep grades the pleasures of a true "Wilderness Experience" in a truly beautiful setting. The opportunity for "Quiet Users" to "get away from it all" will be much easier than they can experience in most designated Wilderness Areas. Their access to a "Wilderness Experience" of this magnitude without the exertion normally expected will draw many of them to accept the very occasional disturbance of a motorized vehicle and maybe become more tolerant of the slight disturbance. As a BLM identified "Cherry-stemmed" road/trail into an area with "Wilderness Characteristics", the existence of the Coon Hollow Jeep Road/Trail should have disallowed the surrounding area as qualified for "Wilderness Characteristics". Wilderness should have no significant signs of man and a road/trail is a significant sign of mans presence. We ask that the BLM give serious consideration to changing the 2013 RMP/TMP management of the entire length of the Coon Hollow Jeep Road/Trail as an Open, "Primitive" road/trail, with ALL Motorized vehicular use being the "Primary" recreational use under the designation of Special Recreation Management Area (SRMA).

Commenter Name: Shepherd, Janice

Submission Code: emc0835

Organization: The Quiet Trails Group

Recommended: Open (All modes of travel)

We have strong concerns about the ATV trail (F196) off of Coon Hollow road (F195) and recommend that the BLM takes some action to prevent this road from expanding into a sensitive area. That could be closing it down seasonally to protect wildlife in the WEA, cherry stemming it at the intersection, erecting barriers to prevent its expansion, or simply changing it to nonmotorized use. Aside from its impacts on an area with wilderness characteristics, wildlife and sensitive plants, we are concerned about F196s long term sustainability as a motorized trail and would recommend emphasis on foot, horse and mechanized travel in this area.

Trail Description (challenges, viewpoints, terrain type, etc.): Rock crawling having fun in my Jeep. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): A few times a year, rock crawling. Why you like this trait(challenges you vehicle, close to home, wildlife, history characteristics views): Close to home and have fun in my Jeep. Easy access from GJ. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): To spend time with my friends and families. Please leave Coon Hollow open to all motor vehicles.

Submission Code: rmc0084

Recommended: Foot/Horse/Mechanized

It is a truly amazing thing to enter into Coon Hollow, the very heart of South Shale Ridge, there is not a sound but you and the birds, you are engulfed by two massive ridgelines (that is until you climb to the ridge top), the colors are incredible, the views are 360 degrees. We saw tons of evidence of wildlife. Elk and cat tracks were everywhere. And on a few occasions we would locate a nearby highpoint and then find our way to it. The solitude, silence, wildlife, and challenges are second to none. Also the plants are awesome. Please designate and manage as LWC to protect the cultural, wildlife, solitude, and primitive recreation resources. As well please designate and manage ACEC from Alt. C in your final plan. Please, close routes F196, F195, F172 to motorized and leave them open t foot horse and possibly mechanized. The wilderness experience would be greatly disrupted by motorized note.

580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. Routes in Coon Hollow remain open to mechanized access. F655, F195, F196, F176, F172, F555, F556, and unnumbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled.

Commenter Name: Bertolacci, Jason

Organization: International Mountain Bicycling Association

Submission Code: emc0912

Recommended: Foot/Horse/Mechanized

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to

meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

When I still lived in Silt I would bring my dogs and ride Coon Hollow for a day ride, before my wife retired. I've camped at different times in this area and rode most of the roads and trails in zone F. I've GPS a lot of the rides that I rode for the last ten years or more. Please keep the roads, double tracks and single track trail open OHV travel. This public land should be open for all the people to enjoy. Alternative B with trails F195, F185, F174, F196, f172, 50" or less can give the ATV and driver a work-out at different times. There are deer and other wildlife in this area. 360* scenic views are everywhere. Being able to ride in the fresh air make one feel alive and friends to talk to makes it even better. As the population increases, they need to have a place to play. Maybe the BLM office would be a place to go to play.

— Route: F209

— Segment: 5979

Designation

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Wilderness Natural Area:** Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-highway vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class IV
- Special Designation WSA
- Vegetation Public Land Health Standard not meeting biotic standard
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered when protecting Wilderness Study Areas values.
- Designation was considered to reduce impairment of wilderness characteristics in areas managed for wilderness characteristics.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Recommened: Foot/Horse/Mechanized/Motorcycle

The series of stacked loops currently present within the proposed Castle Rock SRMA provide a challenging singletrack trail experience for motorized, mechanical and foot based recreation. We request the GJFO of the BLM give serious consideration to including the existing trails within the Castle Rock SRMA and to work with representatives of singletrack trail organizations and the DWG to reroute or mitigate any issues before any trail is considered for closure. The DWG recognizes that many of the existing routes and trails within the Castle Rock SRMA exemplify the goals and objectives of this SRMA and should be considered both individually and as a system of trails allowing for challenging singletrack experiences including; F744, F722, F620, F579, F268, F633, F758, F580, and F762.

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations Inventoried Lands with Wilderness Characteristics
- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation ACEC
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)
- Range Development

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

Alternative D (Development): Open (All modes of travel)

– Segment: 21929

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Needs More Data
- Cultural and Special Status Species Plants

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations Inventoried Lands with Wilderness Characteristics
- Paleo Paleontological site Proximate (200m Buffer)
- Recreation County identified recreation vested interest route
- Recreation Access Dispersed Campsite
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation ACEC
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Range Development

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to provide access to undeveloped campsites that exist along dead-end spur roads.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Open (All modes of travel)

— Segment: 4058

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations Inventoried Lands with Wilderness Characteristics
- Paleo Paleontological site Proximate (200m Buffer)
- Recreation County identified recreation vested interest route

- Recreation Access Dispersed Campsite
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation ACEC
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Vegetation Designated Critical Habitat
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to reduce ongoing damage to known paleontological sites, close routes that are inside or pass through sensitive paleontological sites, or identify mitigation necessary to protect sites.
- Designation was considered to reduce the potential for vandalism or collection of paleontological sites and reduce the number of routes in proximity to known paleontological localities.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on listed species and in designated critical habitat for threatened and endangered plants.

Public Comments On Route: F284

Commenter Name: Grossman, David

Submission Code: emc0719

Spur roads F284 and F278 off V.2 Road provide access to view some exceptional Hoodoos and get vehicles off of V.2 Road and the busy oil and gas traffic.

Organization: Grand Valley Trails Alliance

Reccomended: Open (All modes of travel)

Commenter Name: Potterveld, Jan

Submission Code: emc0634

Trails F655 and F195 should continue to be open for all use. Trail F196 should remain open for ATV use as well as all quiet use. Trail F599 is a well maintained road and with its extension onto F555 leads to an abandoned Oil and Gas site. This provides excellent parking for horse trailers and can serve as a Trail Head for rides in the Coon Hollow area. The upper part of F555 should be changed to All Vehicles [Black]. The lower part of F555 which leads back to F655, Coon Hollow Rd, is suitable only for ATV and below. Trail F556 is at best an ATV track and perhaps only horse and foot. Consideration should be given to leaving F571 and F549 open to all as this provides an off road section to avoid the traffic on V.2 road. Off of V.2 road there is one short trail that I have explored in my Jeep SUV and it should stay open to all as it leads to some great views of Hoodoos in the ridge to the north. The is Trail F284 and F278 as shown in Alt. D.

F356 to F376 This is a VERY IMPORTANT ATV route. Alternative B does show it as a proposed 50" route and it should be. It is used as a club ride fall, winter and spring. This route is especially appealing on ATVs. It connects two larger roads and really increases the recreational experience for ATV users.

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Energy Access COGCC well
- Forestry Access Firewood/Post & Pole Gathering
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Range Study Site
- Range Development

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood,

post and pole gathering, and Christmas tree cutting areas.

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Open (All modes of travel)

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Open (All modes of travel)

— Segment: 5314

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Reroute
- Maintenance
- Drainage Crossing
- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Known Cultural Site Visible or Nuisance
- Forestry Access Firewood/Post & Pole Gathering
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Water Stream Crossing
- Lands and Realty ROW

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.

- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to protect shallow pipeline infrastructure, maintain administrative access (only) over pipeline facilities.

Recommended: Open (All modes of travel)

De Beque Trail Numbers: (These are some of the most important trails): F356, F376, F572, F571, F549, F380 & F375. Administrative Routes that should be opened: F772, F138, F140, F159, F153, F155, F211, F409, F416, F669, F772. The De Beque area is used by motorized recreationist three seasons out of the year and is home to the De Beque Poker Ride. It is an area especially important to motorized.

Recommended: Foot/Horse/Mechanized

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to maintain administrative access to active oil and gas wells, but limit public access to provide for public safety at active well sites.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.

Public Comments On Route: F398

Commenter Name: Bertolacci, Jason

Organization: International Mountain Bicycling Association

Submission Code: emc0912

Recommended: Foot/Horse/Mechanized

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

Designation ?

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Forestry Access Firewood/Post & Pole Gathering
- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation VRM Class IV
- Range Development

Rationale for Decision

- Designation was considered to maintain motorized access to forestry product gathering areas, such as, firewood, post and pole gathering, and Christmas tree cutting areas.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.

Public Comments On Route: F416

Commenter Name: Siegfried, Brandon
Submission Code: cfc0089

Organization: Grand Mesa Jeep Club
Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone F should remain open to the general public for all forms of use including motorized/OHV use. Routes F: 125; 115; 117; 122; 120;171;119;134;93;108; 100;104;94;107;138;140; 159;152;153;155;172; 196;174;195; 655; 556; 602; 649; 555; 560; 571; 595; 598; 599; 569; 612; 613; 518; 517; 519; 527; 580; 616; 764; 575; 615; 620; 630; 538; 502; 572; 549; 715; 753; 758; 277; 264; 769; 500; 284; 288; 684; 351; 329; 348; 338, 340; 339; 316; 311; 685; 200; 202; 211; 203; 206; 216; 218; 222; 232; 375; 376; 92; 290; 235; 247; 301; 295; 416; 412; 425. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone F routes above.

De Beque Trail Numbers: (These are some of the most important trails): F356, F376, F572, F571, F549, F380 & F375. Administrative Routes that should be opened: F772, F138, F140, F159, F153, F155, F211, F409, F416, F669, F772. The De Beque area is used by motorized recreationist three seasons out of the year and is home to the De Beque Poker Ride. It is an area especially important to motorized.

Commenter Name: Chapel, Steve
Submission Code: rmc0013

Organization: Western Slope ATV Association
Recommended: Open (All modes of travel)

F772 This area is shown as an Administrative route in Alt. B but should be open to allow access to the wilderness area. It shows open on alt. D. It should also be open so as to allow the possibility of future connection to F416, thereby forming loop access to the wilderness area.

– Route: F430

– Segment: 2597

Designation

Proposed Designation: Admin/Permitted Use Only
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Range Study Site
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or

Tribes.

- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to maintain a minimum of administrative access to range study sites.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Public Comments On Route: F430

Commenter Name: Winans, Scott

Submission Code: emc0868

Organization:

Recommened: Foot/Horse/Mechanized

All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. These all allow for access into this area, where drivers are seldom found/heard. And perhaps in the future we can connect further south to trails in Zone M. O F430, F316, F319, F351, F364, F352, F353 corridor o F323, F348, F339 corridor o F356, F376, F375 corridor o F398, F400, F391, F379 corridor o F218, F222, F223, F226, F233, F232 corridor o F216, F234, F230 corridor o F213, F200, F203, F206 corridor o F425

Commenter Name: Bertolacci, Jason

Organization: International Mountain Bicycling Association

Submission Code: emc0912

Recommended: Foot/Horse/Mechanized

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

Commenter Name: Herron, Lydia

Organization:

Submission Code: emc0806

Recommened: Open (All modes of travel)

Zone F - Debeque With reference to routes proposed as closures in Alternative B: F500 is an alternative route vs. taking the main county road Westward. Slated for closure in Alt B, F758, F753, F755, F715, F579, F633, F615, F496 gives OHV users a loop ride option. F571 & F549 are used to connect two traileed areas vs. using the County Road. ATV users love trails and well take any old dirt road over nothing, but sure would rather take a fun trail, with diverse riding terrain vs. a graded flat dirt road. F772 is slated for administrative use in Alt B. This gives public access into the Bookcliffs Wilderness Study Area, therefore having a purpose to leave open for public use.

Public Comments On Route: F500

Commenter Name: Herron, Lydia

Organization:

Submission Code: emc0806

Recommended: Open (All modes of travel)

Zone F - Debeque With reference to routes proposed as closures in Alternative B: F500 is an alternative route vs. taking the main county road Westward. Slated for closure in Alt B, F758, F753, F755, F715, F579, F633, F615, F496 gives OHV users a loop ride option. F571 & F549 are used to connect two trailed areas vs. using the County Road. ATV users love trails and well take any old dirt road over nothing, but sure would rather take a fun trail, with diverse riding terrain vs. a graded flat dirt road. F772 is slated for administrative use in Alt B. This gives public access into the Bookcliffs Wilderness Study Area, therefore having a purpose to leave open for public use.

RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone F routes above.

– Route: F501

– Segment: 6930

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails

- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

[Trails Preservation Alliance - www.coloradotpa.org][Subject: Combined input to the BLM RMP, from the TPA and COHVCO.] In sections 11 and 12, just south west of the Pyramid Rock ACEC is a system of single track routes that are used primarily by motorcycle trials riders. (specifically F551-F572-F502-F538-F536-F602-F575-F573-F580-F633-F579-F503-F715-F615) This is a very valuable recreation opportunity. We would like to see this opportunity developed for trials motorcyclists. It provides an opportunity for both casual use and organized competition of a very high caliber. The natural freatures of rock and slick rock are highly sought after for a quality trials location.

This region provides a unique terrain and trail experience for the area, with mixed open country routes, small canyons, slickrock, and technically challenging terrain, a sense of wilderness and solitude while experiencing terrain found nowhere else in close proximity to communities in Mesa County. The Castle Rock area can serve as the core area for a mechanized singletrack trail system with developed trailhead areas off of V.2 Road. This would allow access for the development of singletrack trails going east and south to the Colorado River rim and west and south to the Little BookCliffs Wilderness Study Area boundary (but mechanized travel should not have to cease at that boundary). This would be complimentary to trail development conceived of for nearby Zones M, N, and O. Development in this region would be a substantial economic benefit to the nearby town of Debeque. In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. I would like to see this remain accessible to mechanized use. This area has vast open areas in a very remote setting and allows for biking/exploring opportunities where it things are quiet. Key Points: Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area.

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

Zone F Castle Rocks Coon Hollow F 196 and its spurs - please close this little- used cherry stem to block up a bigger S. Shale Roadless area RMRI has been tracking Castle Rocks for a number of years as lack of enforcement has increased impacts from trials dirt bikes and mountain bikes on rare geological, paleontological, biological resources including special status plant and animal species such as sage grouse and cactus. We recommend closures of all recently created mt bike and dirt bike trails, including F551- F572- F502- F538- F536- F602- F575- F573- F580- F633- F579- F503- F715- F615. Castle Rocks should open to foot and horse only.

[Trails Preservation Alliance - www.coloradotpa.org][Subject: Combined input to the BLM RMP, from the TPA and COHVCO.] In sections 11 and 12, just south west of the Pyramid Rock ACEC is a system of single track routes that are used primarily by motorcycle trials riders. (specifically F551- F572- F502- F538- F536- F602- F575- F573- F580-

F633-F579-F503-F715-F615) This is a very valuable recreation opportunity. We would like to see this opportunity developed for trials motorcyclists. It provides an opportunity for both casual use and organized competition of a very high caliber. The natural features of rock and slick rock are highly sought after for a quality trials location.

– Route: F508

– Segment: 4051

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Energy Access COGCC well
- Other Considerations Inventoried Lands with Wilderness Characteristics
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation ACEC
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Energy Access COGCC well
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class II
- Vegetation Public Land Health Standard not meeting biotic standard
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain administrative access to active oil and gas wells, but limit public access to provide for public safety at active well sites.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class II
- Vegetation Federally Listed vegetation species In or Through (20m points)
- Vegetation Federally Listed vegetation species proximate (200m)
- Water Stream Crossing
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce as much as practicable route density (miles/square mile) within 200 meters of known Threatened and Endangered plant occurrences throughout the field office.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Previous Alternatives Analyzed

Alternative C (Conservation): Closed

Alternative D (Development): Open (All modes of travel)

— Segment: 7113

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class II

- Vegetation Federally Listed vegetation species In or Through (20m points)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to reduce as much as practicable route density (miles/square mile) within 200 meters of known Threatened and Endangered plant occurrences throughout the field office.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

– Segment: 4378

Designation ?

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class II
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor
- Range Study Site

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.

Public Comments On Route: F536

Commenter Name: McClellan, Roz
Submission Code: emc0846

Organization: Rocky Mountain Recreation Initiative
Reccomended: Foot/Horse

Zone F Castle Rocks Coon Hollow F 196 and its spurs - please close this little- used cherry stem to block up a biger

S. Shale Roadless area RMRI has been tracking Castle Rocks for a number of years as lack of enforcement has increased impacts from trials dirt bikes and mountain bikes on rare geological, paleontological, biological resources including special status plant and animal species such as sage grouse and cactus. We recommend closures of all recently created mt bike and dirt bike trails, including F551- F572-F502-F538-F536-F602-F575-F573-F580-F633-F579-F503-F715-F615. Castle Rocks should open to foot and horse only.

Recommended: Foot/Horse/Mechanized/Motorcycle

[Trails Preservation Alliance - www.coloradotpa.org][Subject: Combined input to the BLM RMP, from the TPA and COHVCO.] In sections 11 and 12, just south west of the Pyramid Rock ACEC is a system of single track routes that are used primarily by motorcycle trials riders. (specifically F551-F572-F502-F538-F536-F602-F575-F573-F580-F633-F579-F503-F715-F615) This is a very valuable recreation opportunity. We would like to see this opportunity developed for trials motorcyclists. It provides an opportunity for both casual use and organized competition of a very high caliber. The natural features of rock and slick rock are highly sought after for a quality trials location.

- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern

- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class IV
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

OHV trail F571 when combined with F572, F550 and F546 provides a trail connecting Coon Hollow Road to the Castle Rock trail system. F571 provides a much needed safe bypass of busy V.2 Road. This route gives access to views of Hoodoos and improves the length and trail experience away from the oil and gas traffic on V.2 Road.

Public Comments On Route: F555

Commenter Name: Solomon, James

Organization:

Submission Code: emc0614

Recommended: Open (All modes of travel)

Trails: (F555, F571, F572, F560): These trails connect V.2 road and the Coon Hollow area. They provide an important link between these two roads and allow for a much enhanced experience as opposed to riding down the gas roads. There are areas of slick rock and challenges that add a great deal to the recreation experience. This two-track trail enhances the recreation experience and adds a great deal to the overall enjoyment of this area. The Option B, Preferred Alternative closes these routes to motorized recreation. There is no documented proof exhibited in the EIS that shows substantial evidence that there are resource issues impacted by motorized travel. The BLM has made an error in closing these trails and a much better option would be Option A, no action.

Commenter Name: Potterveld, Jan

Organization: Back Country Horsemen of Colorado

Submission Code: emc0634

Recommended: Open (All modes of travel)

Trails F655 and F195 should continue to be open for all use. Trail F196 should remain open for ATV use as well as all quiet use. Trail F599 is a well maintained road and with its extension onto F555 leads to an abandoned Oil and Gas site. This provides excellent parking for horse trailers and can serve as a Trail Head for rides in the Coon Hollow area. The upper part of F555 should be changed to All Vehicles [Black]. The lower part of F555 which leads back to F655, Coon Hollow Rd, is suitable only for ATV and below. Trail F556 is at best an ATV track and perhaps only horse and foot. Consideration should be given to leaving F571 and F549 open to all as this provides an off road section to avoid the traffic on V.2 road. Off of V.2 road there is one short trail that I have explored in my Jeep SUV and it should stay open to all as it leads to some great views of Hoodoos in the ridge to the north. The is Trail F284 and F278 as shown in Alt. D.

Commenter Name: Winans, Scott
Submission Code: emc0868

Organization:
Recommended: Foot/Horse/Mechanized

Routes in Coon Hollow remain open to mechanized access. F655, F195, F196, F176, F172, F555, F556, and unnumbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled.

Commenter Name: Grossman, David
Submission Code: emc0719

Organization: Grand Valley Trails Alliance
Recommended: Open (All modes of travel)

Trails F599 and F555 provide excellent access along the Eastern boundary of the proposed South Shale Ridge ACEC and North/South access in the area as well as a good trail experience. F555 terminates to the North at an old oil well pad that allows for good access for hikes into the proposed ACEC as well as an important staging area for horse trailers and horseback adventures.

Commenter Name: Potter, Monte
Submission Code: emc0926

Organization:
Recommended: Open (All modes of travel)

Castle Rock Trail System Zone (F): Option (D) which allows the trail system to stay open and stay intact meets most of the Route Designation Criteria as summarized on p. M-11, Appendix M. The trail system creates a loop trail. The system is recognized in local maps and social media. The trail resolves user conflicts because of remoteness and proximity to Grand Junction. The trail was not previously designated but developed in an area that was labeled Open to Cross Country Travel. We would encourage the BLM to keep this trail system open and follow a planned process to mitigate any problem areas within the existing trail system. Trails: (F555, F571, F572, F560): We recommend Alternative (A). These trails connect V.2 road and the Coon Hollow area. They provide an important link between these two roads and allow for a much enhanced experience as opposed to riding down the gas roads. There are areas of slick rock and challenges that add a great deal to the recreation experience. This two-track trail enhances the recreation experience and adds a great deal to the overall enjoyment of this area. The Option B, Preferred Alternative closes these routes to motorized recreation. There is no documented proof exhibited in the EIS that shows substantial evidence that there are resource issues impacted by motorized travel. The BLM has made an error in closing these trails and a much better option would be Option A, no action. Zone (H) North of Coal Gulch: Option (D) Trail (H)52, & (H)40, complete the loop between Coal Gulch and Garvey Canyon. It is important to keep this connection open for >50" motorized travel. Zone (I) 21 Road-Hwy 139A: Option (D) Trail (I)1027, provides a loop ride from Coal Gulch to Garvey Canyon and back on 16 Road. This is a desirable option for >50" motorized travel. This trail provides a scenic view and remote feeling traversing between canyons. This is an important route for ATV's, Motorcycles and possibly mountain bikes. Zone (M) Cameo/Coal Canyon and Main Canyon area: M420, M410, & M414 are listed as "Vested Interest" by Mesa County Roads and Right of Way. This road may have been inadvertently closed without proper authority granted by the Mesa County Commissioners. Please comment on this issue. If the road was inappropriately closed, then it should be reopened to motorized travel immediately. In Zone (P) Bangs Canyon/Snyder Flats area: Trails P450, P288, P286, P440, P309, P315, P312, P308, & P314 should be left open to motorized travel. These routes access areas above Snyder Flats which adds diversity and interest to other recreation options in the BLM Field office area. Trails P291 and P402, should remain open to motorized travel as option (D) would allow. This route offers a full day of exploring in a very unusual area. The slick rock formations and canyons area some of the highlights. To traverse the length of this route is a good days journey and allows a fulfilling social outing with friends. Zone (V) Gateway: This area features interesting mining history, outstanding scenery, and is a great place for people to explore. The area is very remote, with a feeling of being back in another time period. Our comment pertains to keeping as many of the routes open in this area simply because of the experiences that they provide. Many old roads lead back into mining areas or scenic overlooks into Maverick canyon. Closing these routes would create significant administrative problems for the BLM. Just the signing of closed routes would probably take years at great expense and then the enforcement of these closures would be difficult. A much better option would be to leave the roads open and let the people enjoy the possibilities of exploring this incredible country.

Recommended: Foot/Horse/Mechanized

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to

meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. Routes in Coon Hollow remain open to mechanized access. F655, F195, F196, F176, F172, F555, F556, and unnumbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled.

– Route: F560

– Segment: 2578

Designation

Proposed Designation: Admin/Permitted Use Only
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Special Designation ACEC
- Special Designation VRM Class II
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Vegetation Designated Critical Habitat
- Water Stream Crossing

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on listed species and in designated critical habitat for threatened and endangered plants.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Trails: (F555, F571, F572, F560): These trails connect V.2 road and the Coon Hollow area. They provide an important link between these two roads and allow for a much enhanced experience as opposed to riding down the gas roads. There are areas of slick rock and challenges that add a great deal to the recreation experience. This two-track trail enhances the recreation experience and adds a great deal to the overall enjoyment of this area. The Option B, Preferred Alternative closes these routes to motorized recreation. There is no documented proof exhibited in the EIS that shows substantial evidence that there are resource issues impacted by motorized travel. The BLM has made an error in closing these trails and a much better option would be Option A, no action.

Castle Rock Trail System Zone (F): Option (D) which allows the trail system to stay open and stay intact meets most of the Route Designation Criteria as summarized on p. M-11, Appendix M. The trail system creates a loop trail. The system is recognized in local maps and social media. The trail resolves user conflicts because of remoteness and proximity to Grand Junction. The trail was not previously designated but developed in an area that was labeled Open to Cross Country Travel. We would encourage the BLM to keep this trail system open and follow a planned process to mitigate any problem areas within the existing trail system. Trails: (F555, F571, F572, F560): We recommend Alternative (A). These trails connect V.2 road and the Coon Hollow area. They provide an important link between these two roads and allow for a much enhanced experience as opposed to riding down the gas roads. There are areas of slick rock and challenges that add a great deal to the recreation experience. This two-track trail enhances the recreation experience and adds a great deal to the overall enjoyment of this area. The Option B, Preferred Alternative closes these routes to motorized recreation. There is no documented proof exhibited in the EIS that shows substantial evidence that there are resource issues impacted by motorized travel. The BLM has made an error in closing these trails and a much better option would be Option A, no action. Zone (H) North of Coal Gulch: Option (D) Trail (H)52, & (H)40, complete the loop between Coal Gulch and Garvey Canyon. It is important to keep this connection open for >50" motorized travel. Zone (I) 21 Road-Hwy 139A: Option (D) Trail (I)1027, provides a loop ride from Coal Gulch to Garvey Canyon and back on 16 Road. This is a desirable option for >50" motorized travel. This trail provides a scenic view and remote feeling traversing between canyons. This is an important route for ATV's, Motorcycles and possibly mountain bikes. Zone (M) Cameo/Coal Canyon and Main Canyon area: M420, M410, & M414 are listed as "Vested Interest" by Mesa County Roads and Right of Way. This road may have been inadvertently closed without proper authority granted by the Mesa County Commissioners. Please comment on this issue. If the road was inappropriately closed, then it should be reopened to motorized travel immediately. In Zone (P) Bangs Canyon/Snyder Flats area: Trails P450, P288, P286, P440, P309, P315, P312, P308, & P314 should be left open to motorized travel. These routes access areas above Snyder Flats which adds diversity and interest to other recreation options in the BLM Field office area. Trails P291 and P402, should remain open to motorized travel as option (D) would allow. This route offers a full day of exploring in a very unusual area. The slick rock formations and canyons area some of the highlights. To traverse the length of this route is a good days journey and allows a fulfilling social outing with friends. Zone (V) Gateway: This area features interesting mining history, outstanding scenery, and is a great place for people to explore. The area is very remote, with a feeling of being back in another time period. Our comment pertains to keeping as many of the routes open in this area simply because of the experiences that they provide. Many old roads lead back into mining areas or scenic overlooks into Maverick canyon. Closing these routes would create significant administrative problems for the BLM. Just the signing of closed routes would probably take years at great expense and then the enforcement of these closures would be difficult. A much better option would be to leave the roads open and let the people enjoy the possibilities of exploring

this incredible country.

Trails: (F555, F571, F572, F560): These trails connect V.2 road and the Coon Hollow area. They provide an important link between these two roads and allow for a much enhanced experience as opposed to riding down the gas roads. There are areas of slick rock and challenges that add a great deal to the recreation experience. This two-track trail enhances the recreation experience and adds a great deal to the overall enjoyment of this area. The Option B, Preferred Alternative closes these routes to motorized recreation. There is no documented proof exhibited in the EIS that shows substantial evidence that there are resource issues impacted by motorized travel. The BLM has made an error in closing these trails and a much better option would be Option A, no action.

OHV trail F571 when combined with F572, F550 and F546 provides a trail connecting Coon Hollow Road to the Castle Rock trail system. F571 provides a much needed safe bypass of busy V.2 Road. This route gives access to views of Hoodoos and improves the length and trail experience away from the oil and gas traffic on V.2 Road.

Commenter Name: Herron, Lydia
Submission Code: emc0806

Organization:
Recommended: Open (All modes of travel)

Zone F - Debeque With reference to routes proposed as closures in Alternative B: F500 is an alternative route vs. taking the main county road Westward. Slated for closure in Alt B, F758, F753, F755, F715, F579, F633, F615, F496 gives OHV users a loop ride option. F571 & F549 are used to connect two trailed areas vs. using the County Road. ATV users love trails and well take any old dirt road over nothing, but sure would rather take a fun trail, with diverse riding terrain vs. a graded flat dirt road. F772 is slated for administrative use in Alt B. This gives public access into the Bookcliffs Wilderness Study Area, therefore having a purpose to leave open for public use.

These routes access areas above Snyder Flats which adds diversity and interest to other recreation options in the BLM Field office area. Trails P291 and P402, should remain open to motorized travel as option (D) would allow. This route offers a full day of exploring in a very unusual area. The slick rock formations and canyons area some of the highlights. To traverse the length of this route is a good days journey and allows a fulfilling social outing with friends. Zone (V) Gateway: This area features interesting mining history, outstanding scenery, and is a great place for people to explore. The area is very remote, with a feeling of being back in another time period. Our comment pertains to keeping as many of the routes open in this area simply because of the experiences that they provide. Many old roads lead back into mining areas or scenic overlooks into Maverick canyon. Closing these routes would create significant administrative problems for the BLM. Just the signing of closed routes would probably take years at great expense and then the enforcement of these closures would be difficult. A much better option would be to leave the roads open and let the people enjoy the ossibilities of exploring this incredible country.

These trails connect V.2 road and the Coon Hollow area. They provide an important link between these two roads and allow for a much enhanced experience as opposed to riding down the gas roads. There are areas of slick rock and challenges that add a great deal to the recreation experience. This two-track trail enhances the recreation experience and adds a great deal to the overall enjoyment of this area. The Option B, Preferred Alternative closes these routes to motorized recreation. There is no documented proof exhibited in the EIS that shows substantial evidence that there are resource issues impacted by motorized travel. The BLM has made an error in closing these trails and a much better option would be Option A, no action.

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

Recommended: Open (All modes of travel)

Trails F655 and F195 should continue to be open for all use. Trail F196 should remain open for ATV use as well as all quiet use. Trail F599 is a well maintained road and with its extension onto F555 leads to an abandoned Oil and Gas site. This provides excellent parking for horse trailers and can serve as a Trail Head for rides in the Coon Hollow area. The upper part of F555 should be changed to All Vehicles [Black]. The lower part of F555 which leads back to F655, Coon Hollow Rd, is suitable only for ATV and below. Trail F556 is at best an ATV track and perhaps only horse and foot. Consideration should be given to leaving F571 and F549 open to all as this provides an off road section to avoid the traffic on V.2 road. Off of V.2 road there is one short trail that I have explored in my Jeep SUV

and it should stay open to all as it leads to some great views of Hoodoos in the ridge to the north. The is Trail F284 and F278 as shown in Alt. D.

This region provides a unique terrain and trail experience for the area, with mixed open country routes, small canyons, slickrock, and technically challenging terrain, a sense of wilderness and solitude while experiencing terrain found nowhere else in close proximity to communities in Mesa County. The Castle Rock area can serve as the core area for a mechanized singletrack trail system with developed trailhead areas off of V.2 Road. This would allow access for the development of singletrack trails going east and south to the Colorado River rim and west and south to the Little BookCliffs Wilderness Study Area boundary (but mechanized travel should not have to cease at that boundary). This would be complimentary to trail development conceived of for nearby Zones M, N, and O. Development in this region would be a substantial economic benefit to the nearby town of Debeque. In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. I would like to see this remain accessible to mechanized use. This area has vast open areas in a very remote setting and allows for biking/exploring opportunities where it things are quiet. Key Points: Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area.

— **Route: F572**

— **Segment: 4062**

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Other Considerations Inventoried Lands with Wilderness Characteristics
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation ACEC
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Vegetation Designated Critical Habitat

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on listed species and in designated critical habitat for threatened and endangered plants.

OHV trail F571 when combined with F572, F550 and F546 provides a trail connecting Coon Hollow Road to the Castle Rock trail system. F571 provides a much needed safe bypass of busy V.2 Road. This route gives access to views of Hoodoos and improves the length and trail experience away from the oil and gas traffic on V.2 Road.

Commenter Name: Potter, Monte

Organization:

Submission Code: emc0926

Recommended: Open (All modes of travel)

Castle Rock Trail System Zone (F): Option (D) which allows the trail system to stay open and stay intact meets most of the Route Designation Criteria as summarized on p. M-11, Appendix M. The trail system creates a loop trail. The system is recognized in local maps and social media. The trail resolves user conflicts because of remoteness and proximity to Grand Junction. The trail was not previously designated but developed in an area that was labeled Open to Cross Country Travel. We would encourage the BLM to keep this trail system open and follow a planned process to mitigate any problem areas within the existing trail system. Trails: (F555, F571, F572, F560): We recommend Alternative (A). These trails connect V.2 road and the Coon Hollow area. They provide an important link between these two roads and allow for a much enhanced experience as opposed to riding down the gas roads. There are areas of slick rock and challenges that add a great deal to the recreation experience. This two-track trail enhances the recreation experience and adds a great deal to the overall enjoyment of this area. The Option B, Preferred Alternative closes these routes to motorized recreation. There is no documented proof exhibited in the EIS that shows substantial evidence that there are resource issues impacted by motorized travel. The BLM has made an error in closing these trails and a much better option would be Option A, no action. Zone (H) North of Coal Gulch: Option (D) Trail (H)52, & (H)40, complete the loop between Coal Gulch and Garvey Canyon. It is important to keep this connection open for >50" motorized travel. Zone (I) 21 Road-Hwy 139A: Option (D) Trail (I)1027, provides a loop ride from Coal Gulch to Garvey Canyon and back on 16 Road. This is a desirable option for >50" motorized

travel. This trail provides a scenic view and remote feeling traversing between canyons. This is an important route for ATV's, Motorcycles and possibly mountain bikes. Zone (M) Cameo/Coal Canyon and Main Canyon area: M420, M410, & M414 are listed as "Vested Interest" by Mesa County Roads and Right of Way. This road may have been inadvertently closed without proper authority granted by the Mesa County Commissioners. Please comment on this issue. If the road was inappropriately closed, then it should be reopened to motorized travel immediately. In Zone (P) Bangs Canyon/Snyder Flats area: Trails P450, P288, P286, P440, P309, P315, P312, P308, & P314 should be left open to motorized travel. These routes access areas above Snyder Flats which adds diversity and interest to other recreation options in the BLM Field office area. Trails P291 and P402, should remain open to motorized travel as option (D) would allow. This route offers a full day of exploring in a very unusual area. The slick rock formations and canyons area some of the highlights. To traverse the length of this route is a good days journey and allows a fulfilling social outing with friends. Zone (V) Gateway: This area features interesting mining history, outstanding scenery, and is a great place for people to explore. The area is very remote, with a feeling of being back in another time period. Our comment pertains to keeping as many of the routes open in this area simply because of the experiences that they provide. Many old roads lead back into mining areas or scenic overlooks into Maverick canyon. Closing these routes would create significant administrative problems for the BLM. Just the signing of closed routes would probably take years at great expense and then the enforcement of these closures would be difficult. A much better option would be to leave the roads open and let the people enjoy the possibilities of exploring this incredible country.

Seasonal Limitations: None

Mitigation

- Potential Tribal access needs

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Energy Access COGCC well
- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation VRM Class II
- Vegetation Public Land Health Standard not meeting biotic standard
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain administrative access to active oil and gas wells, but limit public access to provide for public safety at active well sites.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Organization: Rocky Mountain Recreation Initiative

Recommended: Foot/Horse

Zone F Castle Rocks Coon Hollow F 196 and its spurs - please close this little- used cherry stem to block up a bigger S. Shale Roadless area RMRI has been tracking Castle Rocks for a number of years as lack of enforcement has increased impacts from trials dirt bikes and mountain bikes on rare geological, paleontological, biological resources including special status plant and animal species such as sage grouse and cactus. We recommend closures of all recently created mt bike and dirt bike trails, including F551- F572-F502-F538-F536-F602-F575-F573-F580-F633-F579-F503-F715-F615. Castle Rocks should open to foot and horse only.

[Trails Preservation Alliance - www.coloradotpa.org][Subject: Combined input to the BLM RMP, from the TPA and COHVCO.] In sections 11 and 12, just south west of the Pyramid Rock ACEC is a system of single track routes that are used primarily by motorcycle trials riders. (specifically F551-F572-F502-F538-F536-F602-F575-F573-F580-F633-F579-F503-F715-F615) This is a very valuable recreation opportunity. We would like to see this opportunity developed for trials motorcyclists. It provides an opportunity for both casual use and organized competition of a very high caliber. The natural features of rock and slick rock are highly sought after for a quality trials location.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class II
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or

Tribes.

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

This region provides a unique terrain and trail experience for the area, with mixed open country routes, small canyons, slickrock, and technically challenging terrain, a sense of wilderness and solitude while experiencing terrain found nowhere else in close proximity to communities in Mesa County. The Castle Rock area can serve as the core area for a mechanized singletrack trail system with developed trailhead areas off of V.2 Road. This would allow access for the development of singletrack trails going east and south to the Colorado River rim and west and south to the Little BookCliffs Wilderness Study Area boundary (but mechanized travel should not have to cease at that boundary). This would be complimentary to trail development conceived of for nearby Zones M, N, and O. Development in this region would be a substantial economic benefit to the nearby town of Debeque. In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. I would like to see this remain accessible to mechanized use. This area has vast open areas in a very remote setting and allows for biking/exploring opportunities where it things are quiet. Key Points: Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area.

My comments are focused on Zone F. I support Alternative D for Zone F, which calls for designation of the Castle Rock SRMA in the triangular area bordered by V.2 Road on the North and S Road (referred to as CV1 Road on the Zone F maps). I urge the BLM to not adopt Alternatives B or C for this area because these alternatives appear to close off completely the unique recreation opportunities offered by this area. Although Alternative B proposes the establishment of an ERMA for the Castle Rock area, the alternative recommends closing the single track trail network. The single track trail network is which is one of the key reasons for creating a recreation management area in the first place. I have used the single track trails in the proposed SRMA for mountain biking. I value the feeling of remoteness, the lack of crowds, the unique terrain and the high desert environment. In particular, the terrain offers a high degree of difficulty and unique rock features concentrated in a relatively small area that are not available together in other areas managed by the Grand Junction Field Office. The single track trails in the proposed SRMA have been compared favorably to Gooseberry Mesa, Utah, a world famous mountain biking destination. In an area already renowned for mountain biking opportunities, the Castle Rock trails offer an experience that should be preserved. Although my particular use of the Castle Rock single track trails is for mountain biking, I support the designation of these trails as "motorcycle" in Alternative D. The "motorcycle" designation allows multi-purpose use of these trails, which allows more user groups to experience these trails. Alternative D represents the management goals that I would like to see adopted for this area, in particular the continued availability of the single track trails system within the proposed SRMA boundary. The trail names are hard to distinguish on the Zone F map; however, the single track trails appear to be designated as follows: F579, F580, F615, F633, F715, F753, F756, F758 and F764.

Submission Code: emc0719

Recommended: Foot/Horse/Mechanized/Motorcycle

The series of stacked loops currently present within the proposed Castle Rock SRMA provide a challenging singletrack trail experience for motorized, mechanical and foot based recreation. We request the GJFO of the BLM give serious consideration to including the existing trails within the Castle Rock SRMA and to work with representatives of singletrack trail organizations and the DWG to reroute or mitigate any issues before any trail is considered for closure. The DWG recognizes that many of the existing routes and trails within the Castle Rock SRMA exemplify the goals and objectives of this SRMA and should be considered both individually and as a system of trails allowing for challenging singletrack experiences including; F744, F722, F620, F579, F268, F633, F758, F580, and F762.

Recommended: Open (All modes of travel)

Zone F - Debeque With reference to routes proposed as closures in Alternative B: F500 is an alternative route vs. taking the main county road Westward. Slated for closure in Alt B, F758, F753, F755, F715, F579, F633, F615, F496 gives OHV users a loop ride option. F571 & F549 are used to connect two trailed areas vs. using the County Road. ATV users love trails and well take any old dirt road over nothing, but sure would rather take a fun trail, with diverse riding terrain vs. a graded flat dirt road. F772 is slated for administrative use in Alt B. This gives public access into the Bookcliffs Wilderness Study Area, therefore having a purpose to leave open for public use.

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Designation [?](#)

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Potential Tribal access needs

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native

plant communities to support wildlife and livestock.

- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.

Designation [?](#)

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- Potential Tribal access needs

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Energy Access COGCC well
- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation VRM Class II
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Wildlife Mule Deer Winter Range
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to maintain administrative access to active oil and gas wells, but limit public access to provide for public safety at active well sites.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Organization:

Recommened: Foot/Horse/Mechanized

This region provides a unique terrain and trail experience for the area, with mixed open country routes, small canyons, slickrock, and technically challenging terrain, a sense of wilderness and solitude while experiencing terrain

found nowhere else in close proximity to communities in Mesa County. The Castle Rock area can serve as the core area for a mechanized singletrack trail system with developed trailhead areas off of V.2 Road. This would allow access for the development of singletrack trails going east and south to the Colorado River rim and west and south to the Little BookCliffs Wilderness Study Area boundary (but mechanized travel should not have to cease at that boundary). This would be complimentary to trail development conceived of for nearby Zones M, N, and O. Development in this region would be a substantial economic benefit to the nearby town of Debeque. In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. I would like to see this remain accessible to mechanized use. This area has vast open areas in a very remote setting and allows for biking/exploring opportunities where it things are quiet. Key Points: Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area.

My comments are focused on Zone F. I support Alternative D for Zone F, which calls for designation of the Castle Rock SRMA in the triangular area bordered by V.2 Road on the North and S Road (referred to as CV1 Road on the Zone F maps). I urge the BLM to not adopt Alternatives B or C for this area because these alternatives appear to close off completely the unique recreation opportunities offered by this area. Although Alternative B proposes the establishment of an ERMA for the Castle Rock area, the alternative recommends closing the single track trail network. The single track trail network is which is one of the key reasons for creating a recreation management area in the first place. I have used the single track trails in the proposed SRMA for mountain biking. I value the feeling of remoteness, the lack of crowds, the unique terrain and the high desert environment. In particular, the terrain offers a high degree of difficulty and unique rock features concentrated in a relatively small area that are not available together in other areas managed by the Grand Junction Field Office. The single track trails in the proposed SRMA have been compared favorably to Gooseberry Mesa, Utah, a world famous mountain biking destination. In an area already renowned for mountain biking opportunities, the Castle Rock trails offer an experience that should be preserved. Although my particular use of the Castle Rock single track trails is for mountain biking, I support the designation of these trails as "motorcycle" in Alternative D. The "motorcycle" designation allows multi-purpose use of these trails, which allows more user groups to experience these trails. Alternative D represents the management goals that I would like to see adopted for this area, in particular the continued availability of the single track trails system within the proposed SRMA boundary. The trail names are hard to distinguish on the Zone F map; however, the single track trails appear to be designated as follows: F579, F580, F615, F633, F715, F753, F756, F758 and F764.

Recommended: Foot/Horse/Mechanized/Motorcycle

The series of stacked loops currently present within the proposed Castle Rock SRMA provide a challenging singletrack trail experience for motorized, mechanical and foot based recreation. We request the GJFO of the BLM give serious consideration to including the existing trails within the Castle Rock SRMA and to work with representatives of singletrack trail organizations and the DWG to reroute or mitigate any issues before any trail is considered for closure. The DWG recognizes that many of the existing routes and trails within the Castle Rock SRMA exemplify the goals and objectives of this SRMA and should be considered both individually and as a system of trails allowing for challenging singletrack experiences including; F744, F722, F620, F579, F268, F633, F758, F580, and F762.

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone F should remain open to the general public for all forms of use including motorized/OHV use. Routes F: 125; 115; 117; 122; 120;171;119;134;93;108; 100;104;94;107;138;140; 159;152;153;155;172; 196;174;195; 655; 556; 602; 649; 555; 560; 571; 595; 598; 599; 569; 612; 613; 518; 517; 519; 527; 580; 616; 764; 575; 615; 620; 630; 538; 502; 572; 549; 715; 753; 758; 277; 264; 769; 500; 284; 288; 684; 351; 329; 348; 338, 340; 339; 316; 311; 685; 200; 202; 211; 203; 206; 216; 218; 222; 232; 375; 376; 92; 290; 235; 247; 301; 295; 416; 412; 425. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone F routes above.

Zone F (De Beque) - I started riding at the De Beque trail system near Castle Rock about three years ago. The single track trails that are offered in Zone F are some of the best single track trails I have ever ridden. They are tight, twisty, technical, beautiful, challenging and well laid out. Also, the trails are never really that far away from a road just in case someone gets hurt it's easy to get them back to the truck. Since these trails are tight, twist and technical, the speeds are kept to a minimum, resulting in a much more sustainable trail. I truly believe the single track trails offered in Zone F are very sustainable due to how well they were laid out. Another reason De Beque single track is unique is because it periodically offers slick rock style riding where you get on a huge slab of rock and the trail twists its way around the slick rock. Nowhere else near Grand Junction can you ride something like this. The closest place to slick rock riding is Moab, Utah. The De Beque trails that I use most are F649, F758, and F580. There may be more trails I use but the map was hard to distinguish which number went with what trail. Anyway, I believe these are the trails that comprise up a terrific 40-mile single track loop that takes about 2-3 hours to complete on a motorcycle. I've ridden all over Colorado, Idaho, and Wyoming at different trail networks and I got to say that this 40-mile loop in De Beque is about the best single track trail I have ever ridden. It flows, it's sustainable, it's challenging, it's unique. For Zone F, I prefer and recommend that the BLM adopt Alternative D for the RMP.

Recommended: Foot/Horse/Mechanized/Motorcycle

In the Castle Rock quadrant, Option (D) should be the preferred option as a basis for maintaining a workable, sustainable trail system. The existing single track trail system fulfills the need for the type of recreation opportunities that the riders are seeking. As indicated in the SRMA planning chart, this is a unique area that has features, challenges, views, and opportunities that are not available anywhere else in the GJ FO. See Appendix K, Castle Rock SRMA, Table 8, Alternative D, (Page K-35). Also, consistent with the BLM's "Outcomes-Based Recreation Management Philosophy" that focuses on the positive and beneficial outcomes derived from recreational activities, rather than emphasizing the recreation activities themselves, this trail system is high up on the scale for meeting this criteria.

Recommended: Foot/Horse/Mechanized/Motorcycle

[Trails Preservation Alliance - www.coloradotpa.org][Subject: Combined input to the BLM RMP, from the TPA and COHVCO.] In sections 11 and 12, just south west of the Pyramid Rock ACEC is a system of single track routes that are used primarily by motorcycle trials riders. (specifically F551-F572-F502-F538-F536-F602-F575-F573-F580-F633-F579-F503-F715-F615) This is a very valuable recreation opportunity. We would like to see this opportunity developed for trials motorcyclists. It provides an opportunity for both casual use and organized competition of a very high caliber. The natural features of rock and slick rock are highly sought after for a quality trials location.

– Route: F603

– Segment: 3448

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations Inventoried Lands with Wilderness Characteristics
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation ACEC
- Special Designation VRM Class II
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Designated Critical Habitat
- Water Stream Crossing
- Range Study Site
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on listed species and in designated critical habitat for threatened and endangered plants.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone F should remain open to the general public for all forms of use including motorized/OHV use. Routes F: 125; 115; 117; 122; 120;171;119;134;93;108; 100;104;94;107;138;140; 159;152;153;155;172; 196;174;195; 655; 556; 602; 649; 555; 560; 571; 595; 598; 599; 569; 612; 613; 518; 517; 519; 527; 580; 616; 764; 575; 615; 620; 630; 538; 502; 572; 549; 715; 753; 758; 277; 264; 769; 500; 284; 288; 684; 351; 329; 348; 338, 340; 339; 316; 311; 685; 200; 202; 211; 203; 206; 216; 218; 222; 232; 375; 376; 92; 290; 235; 247; 301; 295; 416; 412; 425. – Route: F614**– Segment: 4383****Designation ?**

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class II
- Vegetation Public Land Health Standard not meeting biotic standard
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

– Route: F615

– Segment: 4506

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance

- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class II
- Vegetation Federally Listed vegetation species In or Through (20m points)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to reduce as much as practicable route density (miles/square mile) within 200 meters of known Threatened and Endangered plant occurrences throughout the field office.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: F615

Commenter Name: Howe, John

Organization:

Submission Code: cfc0133

Recommended: Foot/Horse/Mechanized/Motorcycle

My comments are focused on Zone F. I support Alternative D for Zone F, which calls for designation of the Castle Rock SRMA in the triangular area bordered by V.2 Road on the North and S Road (referred to as CV1 Road on the Zone F maps). I urge the BLM to not adopt Alternatives B or C for this area because these alternatives appear to close off completely the unique recreation opportunities offered by this area. Although Alternative B proposes the establishment of an ERMA for the Castle Rock area, the alternative recommends closing the single track trail network. The single track trail network is which is one of the key reasons for creating a recreation management area in the first place. I have used the single track trails in the proposed SRMA for mountain biking. I value the feeling of remoteness, the lack of crowds, the unique terrain and the high desert environment. In particular, the terrain offers a high degree of difficulty and unique rock features concentrated in a relatively small area that are not available together in other areas managed by the Grand Junction Field Office. The single track trails in the proposed SRMA have been compared favorably to Gooseberry Mesa, Utah, a world famous mountain biking destination. In an area already renowned for mountain biking opportunities, the Castle Rock trails offer an experience that should be preserved. Although my particular use of the Castle Rock single track trails is for mountain biking, I support the designation of these trails as "motorcycle" in Alternative D. The "motorcycle" designation allows multi-purpose use

of these trails, which allows more user groups to experience these trails. Alternative D represents the management goals that I would like to see adopted for this area, in particular the continued availability of the single track trails system within the proposed SRMA boundary. The trail names are hard to distinguish on the Zone F map; however, the single track trails appear to be designated as follows: F579, F580, F615, F633, F715, F753, F756, F758 and F764.

Zone F - Debeque With reference to routes proposed as closures in Alternative B: F500 is an alternative route vs. taking the main county road Westward. Slated for closure in Alt B, F758, F753, F755, F715, F579, F633, F615, F496 gives OHV users a loop ride option. F571 & F549 are used to connect two trailed areas vs. using the County Road. ATV users love trails and will take any old dirt road over nothing, but sure would rather take a fun trail, with diverse riding terrain vs. a graded flat dirt road. F772 is slated for administrative use in Alt B. This gives public access into the Bookcliffs Wilderness Study Area, therefore having a purpose to leave open for public use.

Zone F Castle Rocks Coon Hollow F 196 and its spurs - please close this little-used cherry stem to block up a bigger S. Shale Roadless area RMRI has been tracking Castle Rocks for a number of years as lack of enforcement has increased impacts from trials dirt bikes and mountain bikes on rare geological, paleontological, biological resources including special status plant and animal species such as sage grouse and cactus. We recommend closures of all recently created mt bike and dirt bike trails, including F551- F572-F502-F538-F536-F602-F575-F573-F580-F633-F579-F503-F715-F615. Castle Rocks should open to foot and horse only.

[Trails Preservation Alliance - www.coloradotpa.org][Subject: Combined input to the BLM RMP, from the TPA and COHVCO.] In sections 11 and 12, just south west of the Pyramid Rock ACEC is a system of single track routes that are used primarily by motorcycle trials riders. (specifically F551-F572-F502-F538-F536-F602-F575-F573-F580-F633-F579-F503-F715-F615) This is a very valuable recreation opportunity. We would like to see this opportunity developed for trials motorcyclists. It provides an opportunity for both casual use and organized competition of a very high caliber. The natural features of rock and slick rock are highly sought after for a quality trials location.

In the Castle Rock quadrant, Option (D) should be the preferred option as a basis for maintaining a workable, sustainable trail system. The existing single track trail system fulfills the need for the type of recreation opportunities that the riders are seeking. As indicated in the SRMA planning chart, this is a unique area that has features, challenges, views, and opportunities that are not available anywhere else in the GJ FO. See Appendix K,

Castle Rock SRMA, Table 8, Alternative D, (Page K-35). Also, consistent with the BLM's "Outcomes-Based Recreation Management Philosophy" that focuses on the positive and beneficial outcomes derived from recreational activities, rather than emphasizing the recreation activities themselves, this trail system is high up on the scale for meeting this criteria.

— Segment: 4233

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class IV
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Submission Code: emc0868

Recommended: Foot/Horse/Mechanized

This region provides a unique terrain and trail experience for the area, with mixed open country routes, small canyons, slickrock, and technically challenging terrain, a sense of wilderness and solitude while experiencing terrain found nowhere else in close proximity to communities in Mesa County. The Castle Rock area can serve as the core area for a mechanized singletrack trail system with developed trailhead areas off of V.2 Road. This would allow access for the development of singletrack trails going east and south to the Colorado River rim and west and south to the Little BookCliffs Wilderness Study Area boundary (but mechanized travel should not have to cease at that boundary). This would be complimentary to trail development conceived of for nearby Zones M, N, and O. Development in this region would be a substantial economic benefit to the nearby town of Debeque. In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. I would like to see this remain accessible to mechanized use. This area has vast open areas in a very remote setting and allows for biking/exploring opportunities where it things are quiet. Key Points: Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area.

Commenter Name: Grossman, David **Organization:** Grand Valley Trails Alliance

Submission Code: emc0719

Recommended: Foot/Horse/Mechanized/Motorcycle

The series of stacked loops currently present within the proposed Castle Rock SRMA provide a challenging singletrack trail experience for motorized, mechanical and foot based recreation. We request the GJFO of the BLM give serious consideration to including the existing trails within the Castle Rock SRMA and to work with representatives of singletrack trail organizations and the DWG to reroute or mitigate any issues before any trail is considered for closure. The DWG recognizes that many of the existing routes and trails within the Castle Rock SRMA exemplify the goals and objectives of this SRMA and should be considered both individually and as a system of trails allowing for challenging singletrack experiences including; F744, F722, F620, F579, F268, F633, F758, F580, and F762.

F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. Routes in Coon Hollow remain open to mechanized access. F655, F195, F196, F176, F172, F555, F556, and unnumbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled.

Commenter Name: Bertolacci, Jason

Organization: International Mountain Bicycling Association

Submission Code: emc0912

Recommended: Foot/Horse/Mechanized

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key

Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

Commenter Name: Siegfried, Brandon

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone F should remain open to the general public for all forms of use including motorized/OHV use. Routes F: 125; 115; 117; 122; 120;171;119;134;93;108; 100;104;94;107;138;140; 159;152;153;155;172; 196;174;195; 655; 556; 602; 649; 555; 560; 571; 595; 598; 599; 569; 612; 613; 518; 517; 519; 527; 580; 616; 764; 575; 615; 620; 630; 538; 502; 572; 549; 715; 753; 758; 277; 264; 769; 500; 284; 288; 684; 351; 329; 348; 338, 340; 339; 316; 311; 685; 200; 202; 211; 203; 206; 216; 218; 222; 232; 375; 376; 92; 290; 235; 247; 301; 295; 416; 412; 425. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone F routes above.

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommended: Foot/Horse/Mechanized/Motorcycle

In the Castle Rock quadrant, Option (D) should be the preferred option as a basis for maintaining a workable, sustainable trail system. The existing single track trail system fulfills the need for the type of recreation opportunities that the riders are seeking. As indicated in the SRMA planning chart, this is a unique area that has features, challenges, views, and opportunities that are not available anywhere else in the GJ FO. See Appendix K, Castle Rock SRMA, Table 8, Alternative D, (Page K-35). Also, consistent with the BLM's "Outcomes-Based Recreation Management Philosophy" that focuses on the positive and beneficial outcomes derived from recreational activities, rather than emphasizing the recreation activities themselves, this trail system is high up on the scale for meeting this criteria.

- Special Designation VRM Class II
- Vegetation Public Land Health Standard not meeting biotic standard
- Wildlife Mule Deer Winter Range
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Soils Severe Erosion Hazard roads and trails

- Soils Fragile soils
- Special Designation VRM Class II

This region provides a unique terrain and trail experience for the area, with mixed open country routes, small canyons, slickrock, and technically challenging terrain, a sense of wilderness and solitude while experiencing terrain found nowhere else in close proximity to communities in Mesa County. The Castle Rock area can serve as the core area for a mechanized singletrack trail system with developed trailhead areas off of V.2 Road. This would allow access for the development of singletrack trails going east and south to the Colorado River rim and west and south to the Little BookCliffs Wilderness Study Area boundary (but mechanized travel should not have to cease at that boundary). This would be complimentary to trail development conceived of for nearby Zones M, N, and O. Development in this region would be a substantial economic benefit to the nearby town of Debeque. In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. I would like to see this remain accessible to mechanized use. This area has vast open areas in a very remote setting and allows for biking/exploring opportunities where it things are quiet. Key Points: Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system

accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area.

My comments are focused on Zone F. I support Alternative D for Zone F, which calls for designation of the Castle Rock SRMA in the triangular area bordered by V.2 Road on the North and S Road (referred to as CV1 Road on the Zone F maps). I urge the BLM to not adopt Alternatives B or C for this area because these alternatives appear to close off completely the unique recreation opportunities offered by this area. Although Alternative B proposes the establishment of an ERMA for the Castle Rock area, the alternative recommends closing the single track trail network. The single track trail network is which is one of the key reasons for creating a recreation management area in the first place. I have used the single track trails in the proposed SRMA for mountain biking. I value the feeling of remoteness, the lack of crowds, the unique terrain and the high desert environment. In particular, the terrain offers a high degree of difficulty and unique rock features concentrated in a relatively small area that are not available together in other areas managed by the Grand Junction Field Office. The single track trails in the proposed SRMA have been compared favorably to Gooseberry Mesa, Utah, a world famous mountain biking destination. In an area already renowned for mountain biking opportunities, the Castle Rock trails offer an experience that should be preserved. Although my particular use of the Castle Rock single track trails is for mountain biking, I support the designation of these trails as "motorcycle" in Alternative D. The "motorcycle" designation allows multi-purpose use of these trails, which allows more user groups to experience these trails. Alternative D represents the management goals that I would like to see adopted for this area, in particular the continued availability of the single track trails system within the proposed SRMA boundary. The trail names are hard to distinguish on the Zone F map; however, the single track trails appear to be designated as follows: F579, F580, F615, F633, F715, F753, F756, F758 and F764.

Recommended: Foot/Horse/Mechanized/Motorcycle

The series of stacked loops currently present within the proposed Castle Rock SRMA provide a challenging singletrack trail experience for motorized, mechanical and foot based recreation. We request the GJFO of the BLM give serious consideration to including the existing trails within the Castle Rock SRMA and to work with representatives of singletrack trail organizations and the DWG to reroute or mitigate any issues before any trail is considered for closure. The DWG recognizes that many of the existing routes and trails within the Castle Rock SRMA exemplify the goals and objectives of this SRMA and should be considered both individually and as a system of trails allowing for challenging singletrack experiences including; F744, F722, F620, F579, F268, F633, F758, F580, and F762.

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key

Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

Organization: Rocky Mountain Recreation Initiative

Submission Code: emc0846

Recommended: Foot/Horse

Zone F Castle Rocks Coon Hollow F 196 and its spurs - please close this little- used cherry stem to block up a bigger S. Shale Roadless area RMRI has been tracking Castle Rocks for a number of years as lack of enforcement has increased impacts from trials dirt bikes and mountain bikes on rare geological, paleontological, biological resources including special status plant and animal species such as sage grouse and cactus. We recommend closures of all recently created mt bike and dirt bike trails, including F551- F572- F502- F538- F536- F602- F575- F573- F580- F633- F579- F503- F715- F615. Castle Rocks should open to foot and horse only.

Commenter Name: Herron, Lydia

Organization:

Submission Code: emc0806

Recommended: Open (All modes of travel)

Zone F - Debeque With reference to routes proposed as closures in Alternative B: F500 is an alternative route vs. taking the main county road Westward. Slated for closure in Alt B, F758, F753, F755, F715, F579, F633, F615, F496 gives OHV users a loop ride option. F571 & F549 are used to connect two trailed areas vs. using the County Road. ATV users love trails and well take any old dirt road over nothing, but sure would rather take a fun trail, with diverse riding terrain vs. a graded flat dirt road. F772 is slated for administrative use in Alt B. This gives public access into the Bookcliffs Wilderness Study Area, therefore having a purpose to leave open for public use.

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommended: Foot/Horse/Mechanized/Motorcycle

In the Castle Rock quadrant, Option (D) should be the preferred option as a basis for maintaining a workable, sustainable trail system. The existing single track trail system fulfills the need for the type of recreation opportunities that the riders are seeking. As indicated in the SRMA planning chart, this is a unique area that has features, challenges, views, and opportunities that are not available anywhere else in the GJ FO. See Appendix K, Castle Rock SRMA, Table 8, Alternative D, (Page K-35). Also, consistent with the BLM's "Outcomes-Based Recreation Management Philosophy" that focuses on the positive and beneficial outcomes derived from recreational activities, rather than emphasizing the recreation activities themselves, this trail system is high up on the scale for meeting this criteria.

Commenter Name: No Record

Organization: No Record

Submission Code: No Record

Recommened: Foot/Horse/Mechanized/Motorcycle

[Trails Preservation Alliance - www.coloradotpa.org][Subject: Combined input to the BLM RMP, from the TPA and COHVCO.] In sections 11 and 12, just south west of the Pyramid Rock ACEC is a system of single track routes that are used primarily by motorcycle trials riders. (specifically F551-F572-F502-F538-F536-F602-F575-F573-F580-F633-F579-F503-F715-F615) This is a very valuable recreation opportunity. We would like to see this opportunity developed for trials motorcyclists. It provides an opportunity for both casual use and organized competition of a very high caliber. The natural freatures of rock and slick rock are highly sought after for a quality trials location.

Designation [?](#)

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Soils Fragile soils
- Special Designation VRM Class II
- Vegetation Public Land Health Standard not meeting biotic standard
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: F655

Commenter Name: Znamenacek, Dale

Organization: Grand Mesa Jeep Club

Submission Code: emc0595

Recommended: Open (All modes of travel)

Other Comment (what is your desired outcome for this trail, additional ideas to be considered): I would like to see the BLM designate this trail as open to full-size motorized users. Trail Number(s): F195, F655, F609, F196, F172
Trail Name: Coon Hollow

Commenter Name: Potterveld, Jan

Organization: Back Country Horsemen of Colorado

Submission Code: emc0634

Recommended: Open (All modes of travel)

Trails F655 and F195 should continue to be open for all use. Trail F196 should remain open for ATV use as well as all quiet use. Trail F599 is a well maintained road and with its extension onto F555 leads to an abandoned Oil and Gas site. This provides excellent parking for horse trailers and can serve as a Trail Head for rides in the Coon Hollow area. The upper part of F555 should be changed to All Vehicles [Black]. The lower part of F555 which leads back to F655, Coon Hollow Rd, is suitable only for ATV and below. Trail F556 is at best an ATV track and perhaps only horse and foot. Consideration should be given to leaving F571 and F549 open to all as this provides an off road section to avoid the traffic on V.2 road. Off of V.2 road there is one short trail that I have explored in my Jeep SUV and it should stay open to all as it leads to some great views of Hoodoos in the ridge to the north. The is Trail F284 and F278 as shown in Alt. D.

The historic, unique Coon Hollow Road (F655, F195) transects the proposed South Shale Ridge ACEC and the DWG proposes that it be "Cherry Stemmed" into the ACEC to allow recreational access via a narrow corridor. We ask that the GJFO of the BLM give serious consideration to managing the proposed Coon Hollow corridor as a limited "Primitive" road/trail, with all motorized vehicular use being the "Primary" recreational use. The recreation corridor within Coon Hollow to be a narrow management section to not infringe on the backcountry characteristics of the surrounding area any more than it currently does. The DWG was unable to reach a consensus on the details of the Coon Hollow Road/Trail with conservation focused members only willing to concede the lower section of the Coon Hollow Road (F655 to F195). The Quiet Trails Group representatives, with the exception of the Backcountry Horsemen, expressed concern about allowing a trail along the ridge and deep into an area with wild characteristics. The OHV and Backcountry Horsemen members of the DWG feel that the Coon Hollow Trail (F196 to F172) is of exceptional nature and in experience and challenge with a rating of 6 on their off-road scale which is unique to the region and that the Coon Hollow Road in the bottom has little value other than access.

Coon Hollow Jeep Road/Trail (North and West of De Beque, CO) Area F -- F195; F196; F172; F655; F609; and others 1. Some trail history: The Coon Hollow Jeep Road/Trail is a very significant and extremely rare kind of experience for Jeep-size vehicles and other OHVs in the entire GJFO jurisdiction and/or in the entire western U.S. In the GJFO management area, there are only three roads/trails that meet the following criteria: i. Primitive class 6 or 7 for difficulty and over 4-miles in length ii. Scenic, yet not easily seen or offensive from the immediate area iii. Challenge the drivers skills and the capabilities of their vehicle The Coon Hollow Road/Trail has been on BLM maps much longer than the South Shale Ridge has been inventoried as a "Wilderness Characteristics". Even though "Cherry Stemmed" within a Wilderness Characteristic area, the BLM has continued to identify it as a "Jeep Trail", the Affected Environment has shown no, or very little detrimental effects from the long time existence of the Coon Hollow Jeep Road/Trail. If allowed, the adoption of this trail may actually enhance the area with some work to slow

the rate of erosion in key areas. The Coon Hollow road/trail has been added to the requested road/trail inventory for Special Recreation Permits (SRP) for the Grand Mesa Jeep Clubs annual "Rock Junction 2013" event. (On this SRP, we were turned down). The Coon Hollow Jeep Road/Trail has been documented on BLM maps for many years as a "Jeep Trail". The Grand Mesa Jeep Club may formally submit to the BLM for "Adopt-A-Trail" status of the Coon Hollow Jeep Road/Trail. This would allow the Grand Mesa Jeep Club to maintain this road/trail through volunteerism. This would keep maintenance costs to a minimum for the BLM. It is expected that the brush growth encroaching on the trail will continue to be a serious problem for the next several years. The Mayor of De Beque (Wayne Klahn) vehemently supports keeping the Coon Hollow Jeep Road/Trail open to all motorized use. The community of De Beque will benefit directly socially and economically from keeping the Coon Hollow Jeep Road/Trail open to all motorized use. The Coon Hollow road/trail is relatively close to Interstate 70. Access from the interstate would be easy. As the Coon Hollow Jeep Road/Trail gains in notoriety, more traffic can be anticipated, as it would have "quick access" from an Interstate Highway. The findings in the Environmental Consequences chapter of this DRMP indicate that there are no natural resources at risk under the existing situation¹, therefore, there is no compelling need for drastic cutbacks. Unreasonable cutbacks in access are not warranted by the facts. 2. Expected Experiences At the west end of the trail there is a saddle that one crosses. As you top the saddle, your heart will skip a beat or two as the view goes from one of relative close and confined to a panorama that expands before you showing a very wide view of western Colorado and into Utah. It is truly an experience that should be mandatory in everyones lifetime. The driving experience of the Coon Hollow Jeep Road/Trail going up is totally different than the coming down experience, making it two entirely unique experiences. Going up you see primarily blue sky and the narrow road through the trees and brush off the sides of the ridge. Going up you are unfamiliar with the trail and the obstacles. Your main focus is on the trail. Occasionally, your gaze will wander and you will become mesmerized by the beauty surrounding you. Coming down, the view through your windshield opens to a panorama of grand vistas clear to and over the town of De Begue to the Battlement Mesa. Your familiarity with the trail and the angle of the view before you makes you want to stop often for "Kodak Moments". Your appreciation for what God has made grows with every turn and crest overcome. As a "Cherry-stemmed" road/trail into an area with "Wilderness Characteristics", the Coon Hollow Jeep Road/Trail is extremely unique. This experience is rarely found anywhere. Anyone with a vehicle capable of accessing the upper Coon Hollow Jeep Road/Trail or who may ride with those that do, will have the opportunity to have a true "Wilderness Experience" without the need for all the personal physical exertion normally required. This access would allow people with disabilities, youth and/or the elderly not up to walking these distances and steep grades the pleasures of a true "Wilderness Experience" in a truly beautiful setting. The opportunity for "Quiet Users" to "get away from it all" will be much easier than they can experience in most designated Wilderness Areas. Their access to a "Wilderness Experience" of this magnitude without the exertion normally expected will draw many of them to accept the very occasional disturbance of a motorized vehicle and maybe become more tolerant of the slight disturbance. As a BLM identified "Cherry-stemmed" road/trail into an area with "Wilderness Characteristics", the existence of the Coon Hollow Jeep Road/Trail should have disallowed the surrounding area as qualified for "Wilderness Characteristics". Wilderness should have no significant signs of man and a road/trail is a significant sign of mans presence. We ask that the BLM give serious consideration to changing the 2013 RMP/TMP management of the entire length of the Coon Hollow Jeep Road/Trail as an Open, "Primitive" road/trail, with ALL Motorized vehicular use being the "Primary" recreational use under the designation of Special Recreation Management Area (SRMA).

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

My comments are focused on Zone F. I support Alternative D for Zone F, which calls for designation of the Castle Rock SRMA in the triangular area bordered by V.2 Road on the North and S Road (referred to as CV1 Road on the Zone F maps). I urge the BLM to not adopt Alternatives B or C for this area because these alternatives appear to close off completely the unique recreation opportunities offered by this area. Although Alternative B proposes the establishment of an ERMA for the Castle Rock area, the alternative recommends closing the single track trail network. The single track trail network is which is one of the key reasons for creating a recreation management area in the first place. I have used the single track trails in the proposed SRMA for mountain biking. I value the feeling of remoteness, the lack of crowds, the unique terrain and the high desert environment. In particular, the terrain offers a high degree of difficulty and unique rock features concentrated in a relatively small area that are not available together in other areas managed by the Grand Junction Field Office. The single track trails in the proposed SRMA have been compared favorably to Gooseberry Mesa, Utah, a world famous mountain biking destination. In an area

already renowned for mountain biking opportunities, the Castle Rock trails offer an experience that should be preserved. Although my particular use of the Castle Rock single track trails is for mountain biking, I support the designation of these trails as "motorcycle" in Alternative D. The "motorcycle" designation allows multi-purpose use of these trails, which allows more user groups to experience these trails. Alternative D represents the management goals that I would like to see adopted for this area, in particular the continued availability of the single track trails system within the proposed SRMA boundary. The trail names are hard to distinguish on the Zone F map; however, the single track trails appear to be designated as follows: F579, F580, F615, F633, F715, F753, F756, F758 and F764.

Zone F - Debeque With reference to routes proposed as closures in Alternative B: F500 is an alternative route vs. taking the main county road Westward. Slated for closure in Alt B, F758, F753, F755, F715, F579, F633, F615, F496 gives OHV users a loop ride option. F571 & F549 are used to connect two trailed areas vs. using the County Road. ATV users love trails and well take any old dirt road over nothing, but sure would rather take a fun trail, with diverse riding terrain vs. a graded flat dirt road. F772 is slated for administrative use in Alt B. This gives public access into the Bookcliffs Wilderness Study Area, therefore having a purpose to leave open for public use.

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone F should remain open to the general public for all forms of use including motorized/OHV use. Routes F: 125; 115; 117; 122; 120;171;119;134;93;108; 100;104;94;107;138;140; 159;152;153;155;172; 196;174;195; 655; 556; 602; 649; 555; 560; 571; 595; 598; 599; 569; 612; 613; 518; 517; 519; 527; 580; 616; 764; 575; 615; 620; 630; 538; 502; 572; 549; 715; 753; 758; 277; 264; 769; 500; 284; 288; 684; 351; 329; 348; 338, 340; 339; 316; 311; 685; 200; 202; 211; 203; 206; 216; 218; 222; 232; 375; 376; 92; 290; 235; 247; 301; 295; 416; 412; 425. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone F routes above.

Commenter Name: Hundtroft, Thomas

Submission Code: emc0693

Recommended: Foot/Horse/Mechanized/Motorcycle

In the Castle Rock quadrant, Option (D) should be the preferred option as a basis for maintaining a workable, sustainable trail system. The existing single track trail system fulfills the need for the type of recreation opportunities that the riders are seeking. As indicated in the SRMA planning chart, this is a unique area that has features, challenges, views, and opportunities that are not available anywhere else in the GJ FO. See Appendix K, Castle Rock SRMA, Table 8, Alternative D, (Page K-35). Also, consistent with the BLM's "Outcomes-Based Recreation Management Philosophy" that focuses on the positive and beneficial outcomes derived from recreational activities, rather than emphasizing the recreation activities themselves, this trail system is high up on the scale for meeting this criteria.

[Trails Preservation Alliance - www.coloradotpa.org][Subject: Combined input to the BLM RMP, from the TPA and COHVCO.] In sections 11 and 12, just south west of the Pyramid Rock ACEC is a system of single track routes that

are used primarily by motorcycle trials riders. (specifically F551-F572-F502-F538-F536-F602-F575-F573-F580-F633-F579-F503-F715-F615) This is a very valuable recreation opportunity. We would like to see this opportunity developed for trials motorcyclists. It provides an opportunity for both casual use and organized competition of a very high caliber. The natural features of rock and slick rock are highly sought after for a quality trials location.

– Route: F722

– Segment: 3936

Designation [?](#)

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Public Comments On Route: F722

Commenter Name: Winans, Scott

Submission Code: emc0868

Organization:

Recommened: Foot/Horse/Mechanized

This region provides a unique terrain and trail experience for the area, with mixed open country routes, small canyons, slickrock, and technically challenging terrain, a sense of wilderness and solitude while experiencing terrain found nowhere else in close proximity to communities in Mesa County. The Castle Rock area can serve as the core area for a mechanized singletrack trail system with developed trailhead areas off of V.2 Road. This would allow access for the development of singletrack trails going east and south to the Colorado River rim and west and south to the Little BookCliffs Wilderness Study Area boundary (but mechanized travel should not have to cease at that boundary). This would be complimentary to trail development conceived of for nearby Zones M, N, and O. Development in this region would be a substantial economic benefit to the nearby town of Debeque. In addition,

north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. I would like to see this remain accessible to mechanized use. This area has vast open areas in a very remote setting and allows for biking/exploring opportunities where it things are quiet. Key Points: Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area.

Commenter Name: Grossman, David **Organization:** Grand Valley Trails Alliance

Submission Code: emc0719

Recommended: Foot/Horse/Mechanized/Motorcycle

The series of stacked loops currently present within the proposed Castle Rock SRMA provide a challenging singletrack trail experience for motorized, mechanical and foot based recreation. We request the GJFO of the BLM give serious consideration to including the existing trails within the Castle Rock SRMA and to work with representatives of singletrack trail organizations and the DWG to reroute or mitigate any issues before any trail is considered for closure. The DWG recognizes that many of the existing routes and trails within the Castle Rock SRMA exemplify the goals and objectives of this SRMA and should be considered both individually and as a system of trails allowing for challenging singletrack experiences including; F744, F722, F620, F579, F268, F633, F758, F580, and F762.

F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. Routes in Coon Hollow remain open to mechanized access. F655, F195, F196, F176, F172, F555, F556, and unnumbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled.

Commenter Name: Bertolacci, Jason

Organization: International Mountain Bicycling Association

Submission Code: emc0912

Recommended: Foot/Horse/Mechanized

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. Routes in Coon Hollow remain open to mechanized access. F655, F195, F196, F176, F172, F555, F556, and unnumbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled.

– Route: F729

– Segment: 4112

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Recommended: Foot/Horse/Mechanized

This region provides a unique terrain and trail experience for the area, with mixed open country routes, small canyons, slickrock, and technically challenging terrain, a sense of wilderness and solitude while experiencing terrain found nowhere else in close proximity to communities in Mesa County. The Castle Rock area can serve as the core area for a mechanized singletrack trail system with developed trailhead areas off of V.2 Road. This would allow

access for the development of singletrack trails going east and south to the Colorado River rim and west and south to the Little BookCliffs Wilderness Study Area boundary (but mechanized travel should not have to cease at that boundary). This would be complimentary to trail development conceived of for nearby Zones M, N, and O. Development in this region would be a substantial economic benefit to the nearby town of Debeque. In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. I would like to see this remain accessible to mechanized use. This area has vast open areas in a very remote setting and allows for biking/exploring opportunities where it things are quiet. Key Points: Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area.

Commenter Name: Grossman, David **Organization:** Grand Valley Trails Alliance

Submission Code: emc0719

Reccomended: Foot/Horse/Mechanized/Motorcycle

The series of stacked loops currently present within the proposed Castle Rock SRMA provide a challenging singletrack trail experience for motorized, mechanical and foot based recreation. We request the GJFO of the BLM give serious consideration to including the existing trails within the Castle Rock SRMA and to work with representatives of singletrack trail organizations and the DWG to reroute or mitigate any issues before any trail is considered for closure. The DWG recognizes that many of the existing routes and trails within the Castle Rock SRMA exemplify the goals and objectives of this SRMA and should be considered both individually and as a system of trails allowing for challenging singletrack experiences including; F744, F722, F620, F579, F268, F633, F758, F580, and F762.

Commenter Name: Howe, John**Organization:****Submission Code:** cfc0133**Recommended:** Foot/Horse/Mechanized/Motorcycle

My comments are focused on Zone F. I support Alternative D for Zone F, which calls for designation of the Castle Rock SRMA in the triangular area bordered by V.2 Road on the North and S Road (referred to as CV1 Road on the Zone F maps). I urge the BLM to not adopt Alternatives B or C for this area because these alternatives appear to close off completely the unique recreation opportunities offered by this area. Although Alternative B proposes the establishment of an ERMA for the Castle Rock area, the alternative recommends closing the single track trail network. The single track trail network is which is one of the key reasons for creating a recreation management area in the first place. I have used the single track trails in the proposed SRMA for mountain biking. I value the feeling of remoteness, the lack of crowds, the unique terrain and the high desert environment. In particular, the terrain offers a high degree of difficulty and unique rock features concentrated in a relatively small area that are not available together in other areas managed by the Grand Junction Field Office. The single track trails in the proposed SRMA have been compared favorably to Gooseberry Mesa, Utah, a world famous mountain biking destination. In an area already renowned for mountain biking opportunities, the Castle Rock trails offer an experience that should be preserved. Although my particular use of the Castle Rock single track trails is for mountain biking, I support the designation of these trails as "motorcycle" in Alternative D. The "motorcycle" designation allows multi-purpose use of these trails, which allows more user groups to experience these trails. Alternative D represents the management goals that I would like to see adopted for this area, in particular the continued availability of the single track trails system within the proposed SRMA boundary. The trail names are hard to distinguish on the Zone F map; however, the single track trails appear to be designated as follows: F579, F580, F615, F633, F715, F753, F756, F758 and F764.

Commenter Name: Herron, Lydia**Organization:****Submission Code:** emc0806**Recommended:** Open (All modes of travel)

Zone F - Debeque With reference to routes proposed as closures in Alternative B: F500 is an alternative route vs. taking the main county road Westward. Slated for closure in Alt B, F758, F753, F755, F715, F579, F633, F615, F496 gives OHV users a loop ride option. F571 & F549 are used to connect two trailed areas vs. using the County Road. ATV users love trails and well take any old dirt road over nothing, but sure would rather take a fun trail, with diverse riding terrain vs. a graded flat dirt road. F772 is slated for administrative use in Alt B. This gives public access into the Bookcliffs Wilderness Study Area, therefore having a purpose to leave open for public use.

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor - F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

In the Castle Rock quadrant, Option (D) should be the preferred option as a basis for maintaining a workable, sustainable trail system. The existing single track trail system fulfills the need for the type of recreation opportunities that the riders are seeking. As indicated in the SRMA planning chart, this is a unique area that has features, challenges, views, and opportunities that are not available anywhere else in the GJ FO. See Appendix K, Castle Rock SRMA, Table 8, Alternative D, (Page K-35). Also, consistent with the BLM's "Outcomes-Based Recreation Management Philosophy" that focuses on the positive and beneficial outcomes derived from recreational activities, rather than emphasizing the recreation activities themselves, this trail system is high up on the scale for meeting this criteria.

– Route: F755

– Segment: 7116

Designation

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

This region provides a unique terrain and trail experience for the area, with mixed open country routes, small canyons, slickrock, and technically challenging terrain, a sense of wilderness and solitude while experiencing terrain found nowhere else in close proximity to communities in Mesa County. The Castle Rock area can serve as the core area for a mechanized singletrack trail system with developed trailhead areas off of V.2 Road. This would allow access for the development of singletrack trails going east and south to the Colorado River rim and west and south to the Little BookCliffs Wilderness Study Area boundary (but mechanized travel should not have to cease at that boundary). This would be complimentary to trail development conceived of for nearby Zones M, N, and O. Development in this region would be a substantial economic benefit to the nearby town of Debeque. In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. I would like to see this remain accessible to mechanized use. This area has vast open areas in a very remote setting and allows for biking/exploring opportunities where it things are quiet. Key Points: Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area.

Designation [?](#)

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class IV
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

My comments are focused on Zone F. I support Alternative D for Zone F, which calls for designation of the Castle Rock SRMA in the triangular area bordered by V.2 Road on the North and S Road (referred to as CV1 Road on the Zone F maps). I urge the BLM to not adopt Alternatives B or C for this area because these alternatives appear to close off completely the unique recreation opportunities offered by this area. Although Alternative B proposes the establishment of an ERMA for the Castle Rock area, the alternative recommends closing the single track trail network. The single track trail network is which is one of the key reasons for creating a recreation management area in the first place. I have used the single track trails in the proposed SRMA for mountain biking. I value the feeling of remoteness, the lack of crowds, the unique terrain and the high desert environment. In particular, the terrain offers a high degree of difficulty and unique rock features concentrated in a relatively small area that are not available together in other areas managed by the Grand Junction Field Office. The single track trails in the proposed SRMA have been compared favorably to Gooseberry Mesa, Utah, a world famous mountain biking destination. In an area

already renowned for mountain biking opportunities, the Castle Rock trails offer an experience that should be preserved. Although my particular use of the Castle Rock single track trails is for mountain biking, I support the designation of these trails as "motorcycle" in Alternative D. The "motorcycle" designation allows multi-purpose use of these trails, which allows more user groups to experience these trails. Alternative D represents the management goals that I would like to see adopted for this area, in particular the continued availability of the single track trails system within the proposed SRMA boundary. The trail names are hard to distinguish on the Zone F map; however, the single track trails appear to be designated as follows: F579, F580, F615, F633, F715, F753, F756, F758 and F764.

Zone F - Debeque With reference to routes proposed as closures in Alternative B: F500 is an alternative route vs. taking the main county road Westward. Slated for closure in Alt B, F758, F753, F755, F715, F579, F633, F615, F496 gives OHV users a loop ride option. F571 & F549 are used to connect two trailed areas vs. using the County Road. ATV users love trails and well take any old dirt road over nothing, but sure would rather take a fun trail, with diverse riding terrain vs. a graded flat dirt road. F772 is slated for administrative use in Alt B. This gives public access into the Bookcliffs Wilderness Study Area, therefore having a purpose to leave open for public use.

In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. We would like to see this to remain accessible to mountain bicyclists. This area provides users with the opportunity to experience vast open areas in a very remote setting and allows for opportunities in which users will find solitude and quiet. Our recommendation for this area is to leave the existing routes open to mountain bikes. Spur roads should be left open in the area for the use of parking and or camping. These roads should be posted with signs that say road ends in "X" distance. Key Routes: - Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. - F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. - F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. - F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area. - Routes in Coon Hollow remain open to mechanized access. - F655, F195, F196, F176, F172, F555, F556, and un-numbered route crossing F602 and nearly connecting to F555 remain open for access to Shale Ridge area - remote and seldom traveled. - All road and trail access generally south of S road remain accessible by mechanized traffic for remote access to Debeque Canyon region and for future connectivity to the Palisade area and deeper west. - F430, F316, F319, F351, F364, F352, F353 corridor - F323, F348, F339 corridor

- F356, F376, F375 corridor - F398, F400, F391, F379 corridor - F218, F222, F223, F226, F233, F232 corridor - F216, F234, F230 corridor - F213, F200, F203, F206 corridor - F425 Zones H, I, J, Zones H, I, and J functionally form much of the northern boundary of the Grand Valley, ignoring Zone L which is comprised primarily of a maze of motorized trails.

Zone F (De Beque) - I started riding at the De Beque trail system near Castle Rock about three years ago. The single track trails that are offered in Zone F are some of the best single track trails I have ever ridden. They are tight, twisty, technical, beautiful, challenging and well laid out. Also, the trails are never really that far away from a road just in case someone gets hurt it's easy to get them back to the truck. Since these trails are tight, twist and technical, the speeds are kept to a minimum, resulting in a must more sustainable trail. I truly believe the single track trails offered in Zone F are very sustainable due to how well they were laid out. Another reason De Beque single track is unique is because it periodically offers slick rock style riding where you get on a huge slab of rock and the trail twists its way around the slick rock. Nowhere else near Grand Junction can you ride something like this. The closest place to slick rock riding is Moab, Utah. The De Beque trails that I use most are F649, F758, and F580. There may be more trails I use but the map was hard to distinguish which number went with what trail. Anyway, I believe these are the trails that comprise up a terrific 40-mile single track loop that takes about 2-3 hours to complete on a motorcycle. Ive ridden all over Colorado, Idaho, and Wyoming at different trail networks and I got to say that this 40-mile loop in De Beque is about the best single track trail I have ever ridden. It flows, its sustainable, its challenging, its unique. For Zone F, I prefer and recommend that the BLM adopt Alternative D for the RMP.

In the Castle Rock quadrant, Option (D) should be the preferred option as a basis for maintaining a workable, sustainable trail system. The existing single track trail system fulfills the need for the type of recreation opportunities that the riders are seeking. As indicated in the SRMA planning chart, this is a unique area that has features, challenges, views, and opportunities that are not available anywhere else in the GJ FO. See Appendix K, Castle Rock SRMA, Table 8, Alternative D, (Page K-35). Also, consistent with the BLM's "Outcomes-Based Recreation Management Philosophy" that focuses on the positive and beneficial outcomes derived from recreational activities, rather than emphasizing the recreation activities themselves, this trail system is high up on the scale for meeting this criteria.

This region provides a unique terrain and trail experience for the area, with mixed open country routes, small canyons, slickrock, and technically challenging terrain, a sense of wilderness and solitude while experiencing terrain found nowhere else in close proximity to communities in Mesa County. The Castle Rock area can serve as the core area for a mechanized singletrack trail system with developed trailhead areas off of V.2 Road. This would allow access for the development of singletrack trails going east and south to the Colorado River rim and west and south to the Little BookCliffs Wilderness Study Area boundary (but mechanized travel should not have to cease at that boundary). This would be complimentary to trail development conceived of for nearby Zones M, N, and O. Development in this region would be a substantial economic benefit to the nearby town of Debeque. In addition, north of V.2 Road, Coon Hollow Road allows access to rather remote South Shale Ridge region. This area has characteristics of vast open space, Cedar trees and steep ridges. I would like to see this remain accessible to mechanized use. This area has vast open areas in a very remote setting and allows for biking/exploring opportunities where it things are quiet. Key Points: Major continuous singletrack routes bounded by V.2 and S Roads remain open to mechanized access. F580, F633, F753, F513, F579, F503, F620, F744, F722 - central routes remain open to mechanized travel. Several of these routes are already recognized by BLM. F755, F756, F758 system accessible with alterations as needed to meet environmental and cultural protection needs. F549 & F571 remain open to mechanized access to allow travel off of the main access road to the area.

– Route: F759

– Segment: 4253

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling

- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class IV
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

Recommended: Foot/Horse/Mechanized/Motorcycle

My comments are focused on Zone F. I support Alternative D for Zone F, which calls for designation of the Castle Rock SRMA in the triangular area bordered by V.2 Road on the North and S Road (referred to as CV1 Road on the Zone F maps). I urge the BLM to not adopt Alternatives B or C for this area because these alternatives appear to close off completely the unique recreation opportunities offered by this area. Although Alternative B proposes the establishment of an ERMA for the Castle Rock area, the alternative recommends closing the single track trail network. The single track trail network is which is one of the key reasons for creating a recreation management area in the first place. I have used the single track trails in the proposed SRMA for mountain biking. I value the feeling of remoteness, the lack of crowds, the unique terrain and the high desert environment. In particular, the terrain offers a high degree of difficulty and unique rock features concentrated in a relatively small area that are not available together in other areas managed by the Grand Junction Field Office. The single track trails in the proposed SRMA have been compared favorably to Gooseberry Mesa, Utah, a world famous mountain biking destination. In an area already renowned for mountain biking opportunities, the Castle Rock trails offer an experience that should be preserved. Although my particular use of the Castle Rock single track trails is for mountain biking, I support the designation of these trails as "motorcycle" in Alternative D. The "motorcycle" designation allows multi-purpose use of these trails, which allows more user groups to experience these trails. Alternative D represents the management goals that I would like to see adopted for this area, in particular the continued availability of the single track trails system within the proposed SRMA boundary. The trail names are hard to distinguish on the Zone F map; however, the single track trails appear to be designated as follows: F579, F580, F615, F633, F715, F753, F756, F758 and F764.

Recommended: Foot/Horse/Mechanized/Motorcycle

In the Castle Rock quadrant, Option (D) should be the preferred option as a basis for maintaining a workable, sustainable trail system. The existing single track trail system fulfills the need for the type of recreation opportunities that the riders are seeking. As indicated in the SRMA planning chart, this is a unique area that has features, challenges, views, and opportunities that are not available anywhere else in the GJ FO. See Appendix K, Castle Rock SRMA, Table 8, Alternative D, (Page K-35). Also, consistent with the BLM's "Outcomes-Based Recreation Management Philosophy" that focuses on the positive and beneficial outcomes derived from recreational activities, rather than emphasizing the recreation activities themselves, this trail system is high up on the scale for meeting this criteria.

Coon Hollow Trail to top of Shale Ridge Overlook, This trail provides an adventuresome trip along a steep rocky road to a inspirational overlook of the DeBeque BLM area. It should be labeled open to motorize use because of the experience it allows for all forms of recreation. This road provides access to the head of Horseshoe Canyon. It is a picnic destination with the option of hiking down into the canyon. The road should be labeled open to motorized travel because it provides an primitive experience into a beautiful area.

Commenter Name: Siegfried, Brandon

Public Comments On Route: F772

Commenter Name: Chapel, Steve

Submission Code: rmc0013

Organization: Western Slope ATV Association

Recommended: Open (All modes of travel)

F772 This area is shown as an Administrative route in Alt. B but should be open to allow access to the wilderness area. It shows open on alt. D. It should also be open so as to allow the possibility of future connection to F416, thereby forming loop access to the wilderness area.

Commenter Name: None

Submission Code: rmc0087

Organization: WSATVA

Recommended: Open (All modes of travel)

De Beque Trail Numbers: (These are some of the most important trails): F356, F376, F572, F571, F549, F380 & F375. Administrative Routes that should be opened: F772, F138, F140, F159, F153, F155, F211, F409, F416, F669, F772. The De Beque area is used by motorized recreationist three seasons out of the year and is home to the De Beque Poker Ride. It is an area especially important to motorized.

Commenter Name: Herron, Lydia

Submission Code: emc0806

Organization:

Recommended: Open (All modes of travel)

Zone F - Debeque With reference to routes proposed as closures in Alternative B: F500 is an alternative route vs. taking the main county road Westward. Slated for closure in Alt B, F758, F753, F755, F715, F579, F633, F615, F496 gives OHV users a loop ride option. F571 & F549 are used to connect two trailed areas vs. using the County Road. ATV users love trails and well take any old dirt road over nothing, but sure would rather take a fun trail, with diverse riding terrain vs. a graded flat dirt road. F772 is slated for administrative use in Alt B. This gives public access into the Bookcliffs Wilderness Study Area, therefore having a purpose to leave open for public use.

– Route: F773

- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Bald Eagle Roost Site
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Cultural Known Cultural Site Visible or Nuisance
- Energy Access COGCC well
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Water Stream Crossing
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Range Study Site
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to

erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.

- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

I feel strongly that these high value recreational routes (route segments) in Zone F should remain open to the general public for all forms of use including motorized/OHV use. Routes F: 125; 115; 117; 122; 120;171;119;134;93;108; 100;104;94;107;138;140; 159;152;153;155;172; 196;174;195; 655; 556; 602; 649; 555; 560; 571; 595; 598; 599; 569; 612; 613; 518; 517; 519; 527; 580; 616; 764; 575; 615; 620; 630; 538; 502; 572; 549; 715; 753; 758; 277; 264; 769; 500; 284; 288; 684; 351; 329; 348; 338, 340; 339; 316; 311; 685; 200; 202; 211; 203; 206; 216; 218; 222; 232; 375; 376; 92; 290; 235; 247; 301; 295; 416; 412; 425. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone F routes above.

Commenter Name: Rechel, Eric

Organization:

Submission Code: rmc0049

Recommended: Closed

Zone F: Close all BLM roads into Coon Hollow because of the threatened plant Debeque phacelia, and west and north of Pyramid Rock. Because there are scattered individuals of the Colorado Hookless Cactus around Pyramid Rock all roads south of Pyramid Rock should also be closed. Need to close all roads of north of South Shale LWWC e.g., F155,F153,F107,F104,F100, F140, F159,F152, and F93.

- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Drainage Crossing
- Work with Land Owner on Public Access

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Recreation Access Dispersed Campsite
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III
- Water Stream Crossing

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or

Tribes.

- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Designation ?

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Drainage Crossing
- Work with Land Owner on Public Access

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Paleo Paleontological site In or Through
- Paleo Paleontological site Proximate (200m Buffer)

- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Soils Slumping soils
- Special Designation VRM Class III
- Water Stream Crossing
- Range Study Site

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to reduce ongoing damage to known paleontological sites, close routes that are inside or pass through sensitive paleontological sites, or identify mitigation necessary to protect sites.
- Designation was considered to reduce the potential for vandalism or collection of paleontological sites and reduce the number of routes in proximity to known paleontological localities.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to eliminate duplicative or redundant routes with slump areas.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to maintain a minimum of administrative access to range study sites.

Public Comments On Route: G142

Commenter Name: Cox, Tom

Submission Code: rmc0008

Organization:

Recommened: Open (All modes of travel)

Some of these roads are as follows G142, G148, G150, G50, G368, and G377. All of these roads are used for the cattle and hunting businesses. It would be very detrimental to us if any of these roads were closed.

Commenter Name: Siegfried, Brandon

Submission Code: cfc0088

Organization: Grand Mesa Jeep Club

Recommened: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone G should remain open to the general public for all forms of use including motorized/OHV use. Routes G: 13; 263; 264; 287; 300; 41; 64; 26; 29; 338; 384; 43; 340; 45; 92; 381; 377; 150; 148; 142; 167; 164; 229; 237; 239; 234; 178; 244; 188; 193; 194; 202. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone G routes listed above.

Recommened: Open (All modes of travel)

I feel strongly that these recreational routes (route segments) in Zone G should remain open to the general public for all forms of use including motorized/OHV use. Routes G: 244, 239, 229, 150, 6, 142, 114, 113, 117, 131, 127. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone G routes listed above. Additionally, in the State of Colorado routes that are built to provide access for mining and gas exploration are considered legal access routes for the public. I have identified some historically significant and high value recreation routes for me and my family. have used these routes since the mid 1990's. This area is located on or near South Shale Ridge in Mesa County. Although 90% of the land in this area are public lands, the 10% of private land blocks nearly all the access routes. With the exception of the route that go through the Bookcliff Wildhorse range, the route on South Shale Ridge (Spear Hunter Access Road) is the only other large motorized route open to

the public. These routes provide excellent camping and recreation opportunities and do not impact the areas environment. Also it is a good spring turkey hunting area. The BLM wishes to close the area in the spring and this would ruin a long time spring turkey hunting family tradition for us. The deer do not fawn in this area at a significant level as the areas private ranches (hay fields) offer much better conditions for fawning than the pinyon juniper covered public lands.

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations County Vested Interest
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Water Stream Crossing

Rationale for Decision

- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Open (All modes of travel), Spring Closure 2 (Soils)

Alternative C (Conservation): Open (All modes of travel), Spring Closure 2 (Soils)

Alternative D (Development): Open (All modes of travel)

— Segment: 6858

Designation ?

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Fence springs

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations County Vested Interest
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III
- Water Stream Crossing
- Range Study Site

Rationale for Decision

- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Open (All modes of travel), Spring Closure 2 (Soils)

Alternative C (Conservation): Open (All modes of travel), Spring Closure 2 (Soils)

Alternative D (Development): Open (All modes of travel)

Alternative B (Preferred): Open (All modes of travel), Spring Closure 2 (Soils)

Alternative C (Conservation): Open (All modes of travel), Spring Closure 2 (Soils)

Alternative D (Development): Open (All modes of travel)

— **Segment: 3176**

Designation 

Proposed Designation: Closed

Seasonal Limitations: None

Designation Following Mitigation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Needs More Data

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations Inventoried Lands with Wilderness Characteristics
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation ACEC
- Special Designation VRM Class II

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.

- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.

Previous Alternatives Analyzed

Public Comments On Route: G244

Commenter Name: Siegfried, Brandon

Submission Code: cfc0096

Organization: Grand Mesa Jeep Club

Recommened: Open (All modes of travel)

I feel strongly that these recreational routes (route segments) in Zone G should remain open to the general public for all forms of use including motorized/OHV use. Routes G: 244, 239, 229, 150, 6, 142, 114, 113, 117, 131, 127. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone G routes

listed above. Additionally, in the State of Colorado routes that are built to provide access for mining and gas exploration are considered legal access routes for the public. I have identified some historically significant and high value recreation routes for me and my family. have used these routes since the mid 1990's. This area is located on or near South Shale Ridge in Mesa County. Although 90% of the land in this area are public lands, the 10% of private land blocks nearly all the access routes. With the exception of the route that go through the Bookcliff Wildhorse range, the route on South Shale Ridge (Spear Hunter Access Road) is the only other large motorized route open to the public. These routes provide excellent camping and recreation opportunities and do not impact the areas environment. Also it is a good spring turkey hunting area. The BLM wishes to close the area in the spring and this would ruin a long time spring turkey hunting family tradition for us. The deer do not fawn in this area at a significant level as the areas private ranches (hay fields) offer much better conditions for fawning than the pinyon juniper covered public lands.

Commenter Name: Siegfried, Brandon
Submission Code: cfc0088

Organization: Grand Mesa Jeep Club
Recommened: **Open (All modes of travel)**

I feel strongly that these high value recreational routes (route segments) in Zone G should remain open to the general public for all forms of use including motorized/OHV use. Routes G: 13; 263; 264; 287; 300; 41; 64; 26; 29; 338; 384; 43; 340; 45; 92; 381; 377; 150; 148; 142; 167; 164; 229; 237; 239; 234; 178; 244; 188; 193; 194; 202. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone G routes listed above.

Designation [?](#)

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Work with Land Owner on Public Access

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Soils Slumping soils
- Special Designation VRM Class II

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to eliminate duplicative or redundant routes with slump areas.

[Trails Preservation Alliance - www.coloradotpa.org][Subject: Combined input to the BLM RMP, from the TPA and COHVCO.] Map G: Most of the routes north of South Shale Ridge are inaccessible to the public. For a variety of reasons the private land owners have found ways to block public access to this large area. We hope GJFO will prioritize the restoration of public access to this area in the RMP. (specifically G67-G142-G50-G92-G45-G26-G202-G14-G52)

– Route: H50

– Segment: 2677

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Designation Following Mitigation:

Limited to Vehicles Under 50" wide

Seasonal Limitations: Winter Closure

Mitigation

- Reroute
- Drainage Crossing

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III
- Water Stream Crossing
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Organization:

Submission Code: emc0868

Reccomended: Foot/Horse/Mechanized

H160 & 162 are easily accessible and necessary routes into Hunter Cyn - leave accessible to mechanized use. Routes H67, H70, H71, and H75 are nice back country extensions from routes in the Little Bookcliffs Wild Horse Mgmt area, and are beneficial for future route planning. These are remote, but usable - we need to retain access. In the area of Garvey Cyn, route H50 continues on into Zone O forming a link between Garvey and Coal Gulch. This is an uncommon route linkage and very helpful in accessing Garvey from existing areas of trail usage. Routes H46, H47, H49, and H52 should remain accessible to use. West of 16 Rd, and from Post Cyn to the south, some existing routes are not shown on the map. There is a descent from the terminus of H21 to 16 Rd. This route should be included and remain accessible. The Post and Lapham Cyn access will play a key role in the likely northern extent of the trail network emanating from the existing NFD SRMA. These routes are good climbs, and you seldom see anyone there. We need some good climbing routes into the upper reaches of this area. Routes H114 and H119 should remain open to allow connection to Hwy 139. Future network goals also include connections towards the Baxter Pass and northward towards Zone B. Westward connections out of Zone H will be very helpful. H2 provides backcountry access from Hwy 139 and should remain accessible.

Established trail area, and planned further expansion Dont reduce size of the existing NFD SRMA Expansion further north will involve Zone H, and connections to and through Zone H are important Connections from NFD trail area to Highline Lake area are important to long range planning for camping resources, long route terminus with services, and connections southward towards McKinnis Canyons NCA (Kokopelli and Rabbit Valley areas) Critical in large East-West route plan to connect Fruita to Palisade Route Comments: Several existing and approved routes are not shown in the NFD bicycle emphasis area (PBR, Mo Joes, Down Uppity, Zip-Off, and the trail replacing I1024 in the upper Bookcliff area) I1027 links with Zone H route H50 to form an important link between Coal Gulch and Garvey Cyn. This should remain accessible. I641 into Leyton Wash should remain accessible. Intrusions into the bluff Bookcliff face are valuable trail resources to penetrate the more remote areas and get away from the front country trail types and usage levels. This is a likely future connection to the Edge Loop portion of the trail system. I633 should remain accessible for the ability to obtain Hunter Cyn in Zone H. This connection will likely be important to an E-W corridor link. Zone I from a motorcycle perspective: I personally spend many hours a week on my motorcycle in the southern sections of Zone I. I often go West or East from 18Rd. The new signed single track built last Fall East of 18rd is excellent and a good example of what can happen in the whole NFD. Since the signing of the legal single track, the motorcycle users are staying on the trail and following the new routes instead of the old ones. If all the good routes that are out there are properly signed, and the bad ones closed it would be a more enjoyable, less land destructive experience for everyone. The problem as I see it is that most of the good single track is not on the maps. They are not even marked as red, they just are not on the maps period. Without a proper moto single track inventory this process will not turn out well. I feel this is why there is so much hostility from the motorized community. They know that if the lose "designated open" status out there all good single track that is not in inventory will be closed. Zone H from a bicycle perspective: Zone H is a link in the connectivity chain that could some day be a loop around the Grand Valley. It has one of the few canyons that is passable up and into the Bookcliffs. It also has good access via 21 road. Also the southern boundary that is up against Zone I holds the future possibility of expansion of trails coming out of the North Fruita Desert SRMA. Route comments H160 & 162 are easily accessible and necessary routes into Hunter Cyn Routes H67, H70, H71, and H75 are nice back country extensions from routes in the Little Bookcliffs Wild Horse Mgmt area, and are beneficial for future route planning. In the area of Garvey Cyn, route H50 continues on into Zone O forming a link between Garvey and Coal Gulch. This is an uncommon route linkage and very helpful in accessing Garvey from existing areas of trial usage. Routes H46, H47, H49, and H52 should remain accessible to use. West of 16 Rd, and from Post Cyn to the south, some existing

routes are not shown on the map. There is a descent from the terminus of H21 to 16 Rd. This route should be included and remain accessible. The Post and Lapham Cyn access will play a key role in the likely northern extent of the trail network emanating from the existing NFD SRMA. Routes H114 and H119 should remain open to allow connection to Hwy 139. Future network goals also include connections towards the Baxter Pass and northward towards Zone B. Westward connections out of Zone H will be very helpful. H2 provides back-country access from Hwy 139 and should remain accessible Zone H from a Motorcycle perspective: I enjoy climbing Hunter Canyon on my moto. When the new trail is finished (currently known as Sarnac, formerly known as Peekaboo) I would enjoy linking it via this route. Zone C comments from a bicycle perspective: I would like to see the trail known as the Flight of Icarus formalized. This is a remote back country trail and is an important get-away for riders who wish to remove themselves from the more highly traveled trail networks of the front country. Route comments Plan for accessible areas to allow trail network connection from NFD SRMA and Hwy 139 High altitude routes possible along and off of divide area. Shuttle oriented rides can attain elevation directly via Hwy 139. This is the only nearby paved elevation gain in the Fruita area. Route Comments: C94, C78, C91, C84 route should be accessible. C22, C95 and C23, C20, C24, C129, and C114 provide remote access and should remain accessible.

Organization: International Mountain Bicycling Association

Submission Code: emc0912

Reccomended: Foot/Horse/Mechanized

Zone H serves two primary functions. With the lower portion as an intermediate portion between Zones M and O, Zone H will be important to an east to west connection trail. In this portion of Zone H, Hunter Canyon (at 21 Rd) serves as a significant existing intrusion into the Bookcliffs. This canyon is adjacent to the eastern extent of the North Fruita Desert (NFD) SRMA, connects to existing trail on Ross Ridge, and can provide a connection to Zone M. This narrow link and Hunter Canyon will be an important link. In addition, Zone H contains the northern portion of the NFD SRMA. Currently the SRMA trails do not extend beyond Coal Gulch, but the natural evolution of that trail system likely involves utilizing areas in Zone H such as Garvey Canyon, which has some existing trail. The

Post and Lapham Canyon access will play a key role in the likely northern extent of the NFD trail network. Also in Garvey Canyon, route H50 continues on into Zone O forming a link between Garvey and Coal Gulch. This is an uncommon route linkage and very helpful in accessing Garvey from existing areas of trail usage. Key Routes: Access via major county road (21 Road) is a good established route. The southern boundary that abuts Zone I is a natural future area of extension for trails coming from the North Fruita Desert SRMA. H160 & 162 are easily accessible and necessary routes into Hunter Canyon Routes H67, H70, H71, and H75 are nice backcountry extensions from routes in the Little Bookcliffs Wild Horse Mgmt area, and are beneficial for future route planning. Routes H46, H47, H49, and H52 should remain accessible to use. West of 16 Rd, and from Post Canyon to the south, some existing routes are not shown on the map. There is a descent from the terminus of H21 to 16 Rd. This route should be included and remain accessible. Routes H114 and H119 should remain open to allow connection to Hwy 139. Future network goals also include connections towards the Baxter Pass and northward towards Zone B. Westward connections out of Zone H will be very helpful. H2 provides backcountry access from Hwy 139 and should remain accessible. Zone I contains the North Fruita Desert SRMA, commonly referred to as "18 Road", and the Bicycle Emphasis area within that SRMA. This is a significant trail resource which is also an excellent candidate for trail network expansion in the future. The town of Fruita is strongly in support of trail based recreation development. In the past three years, the Town of Fruita has made direct contributions to COPMOBA to support the planning and development of new routes in the proximity to town. COPMOBA has begun the process of a new comprehensive trail system plan for the existing North Fruita Desert area. Expansion in the area will be likely be targeted further northward and westward, and also create connections as possible out of the area. The City of Fruita has also planned for trail connections from town to the NFD area.

Recommended: Open (All modes of travel)

Castle Rock Trail System Zone (F): Option (D) which allows the trail system to stay open and stay intact meets most of the Route Designation Criteria as summarized on p. M-11, Appendix M. The trail system creates a loop trail. The system is recognized in local maps and social media. The trail resolves user conflicts because of remoteness and proximity to Grand Junction. The trail was not previously designated but developed in an area that was labeled Open to Cross Country Travel. We would encourage the BLM to keep this trail system open and follow a planned process to mitigate any problem areas within the existing trail system. Trails: (F555, F571, F572, F560): We recommend Alternative (A). These trails connect V.2 road and the Coon Hollow area. They provide an important link between these two roads and allow for a much enhanced experience as opposed to riding down the gas roads. There are areas of slick rock and challenges that add a great deal to the recreation experience. This two-track trail enhances the recreation experience and adds a great deal to the overall enjoyment of this area. The Option B, Preferred Alternative closes these routes to motorized recreation. There is no documented proof exhibited in the EIS that shows substantial evidence that there are resource issues impacted by motorized travel. The BLM has made an error in closing these trails and a much better option would be Option A, no action. Zone (H) North of Coal Gulch: Option (D) Trail (H)52, & (H)40, complete the loop between Coal Gulch and Garvey Canyon. It is important to keep this connection open for >50" motorized travel. Zone (I) 21 Road-Hwy 139A: Option (D) Trail (I)1027, provides a loop ride from Coal Gulch to Garvey Canyon and back on 16 Road. This is a desirable option for >50" motorized travel. This trail provides a scenic view and remote feeling traversing between canyons. This is an important route for ATV's, Motorcycles and possibly mountain bikes. Zone (M) Cameo/Coal Canyon and Main Canyon area: M420, M410, & M414 are listed as "Vested Interest" by Mesa County Roads and Right of Way. This road may have been inadvertently closed without proper authority granted by the Mesa County Commissioners. Please comment on this issue. If the road was inappropriately closed, then it should be reopened to motorized travel immediately. In Zone (P) Bangs Canyon/Snyder Flats area: Trails P450, P288, P286, P440, P309, P315, P312, P308, & P314 should be left open to motorized travel. These routes access areas above Snyder Flats which adds diversity and interest to other recreation options in the BLM Field office area. Trails P291 and P402, should remain open to motorized travel as option (D) would allow. This route offers a full day of exploring in a very unusual area. The slick rock formations and canyons area some of the highlights. To traverse the length of this route is a good days journey and allows a fulfilling social outing with friends. Zone (V) Gateway: This area features interesting mining history, outstanding scenery, and is a great place for people to explore. The area is very remote, with a feeling of being back in another time period. Our comment pertains to keeping as many of the routes open in this area simply because of the experiences that they provide. Many old roads lead back into mining areas or scenic overlooks into Maverick canyon. Closing these routes would create significant administrative problems for the BLM. Just the signing of closed routes would probably take years at great expense and then the enforcement of these closures would be difficult. A much better option would be to leave the roads open and let the people enjoy the possibilities of exploring this incredible country.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant

routes susceptible to cheatgrass and noxious weed infestations.

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Public Comments On Route: I100

Commenter Name: Bates, Jeff

Submission Code: emc0752

Organization:

Recommended: Open (All modes of travel)

I100 through I93 Should also be left open. The connection to Bureau of Reclamation is irrelevant. I284 through I111 Should be left open, as the closure is unwarranted. I276 through I303 Should be left open because so much was closed in the North Fruita Desert plan, there are very few routes left in this very actively used portion of the field office. I 905 was closed in the original plan, but shown as an administrative route in the Alternative B. If you are going to reopen it, open it to the public.

Commenter Name: Hundtroft, Thomas

Submission Code: emc0693

Organization: Bookcliff Rattlers

Recommended: Limited to Vehicles Under 50" wide

Alternative C shows County Road. 21 as closed where it enters Hunter Canyon. BLM does not have the authority to close a county road. In Alternatives B, and C a north south connector consisting of route I111, 433, 282, 284 and 287 are shown as closed. This route is a primary connector that completes a loop opportunity. It is the best north south route west of 18 Rd. The trail is a very enjoyable ride for intermediate level motorcyclists. It is completely on BLM lands. It is designated as open to motorized in the existing Decision, the North Fruita Desert Plan. Please leave this route open as the north south routes to the west will not accommodate ATVs. Riding the graded county road is not a pleasant recreation experience. The closure of routes I100, 95, 119, 118, 100, 972, 971 in combination denies public access between The North Fruita Desert SRMA and the Highline Lake State Recreation facilities. Highline offers shade, water and developed camping and sanitation facilities to the visitors to both opportunities. It is important to leave this access available in order to provide a wider variety of facilities and opportunities to the visitors. None of the alternative maps show the OHV open area in its present form, or the proposed size and location in any of the alternatives. We cannot see and compare what the BLM is proposing by looking at the maps. The proposed closure

of I920, 983, 186, and 380 eliminates important exit points from the OHV trailhead. The outcome is a concentration of traffic on fewer routes and higher potential for accidents and other impacts. The routes left open will not be able to handle the concentrated traffic around the trailhead.

Recommended: Foot/Horse/Mechanized/Motorcycle

The proposed closure of I- 282,283,284,433,440,111 as shown in Alt B would close a valuable single track located in a wash. This trail is the only trail north south connector. The trail is a very enjoyable ride for intermediate level motorcyclists. The other routes listed are critical to the goals of the TMB.

– Route: I1021

– Segment: 22145

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Minimize Harassment: Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Slope Greater than 40%
- Soils Fragile soils
- Special Designation VRM Class III
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with slopes exceeding 40 percent.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Reccomended: Open (All modes of travel)

I feel strongly that these recreational routes (route segments) in Zone I should remain open to the general public for all forms of use including motorized/OHV use. Routes I: 12, 1029, 905, 11, 904, 636, 630, 702, n1, 1027, 1024 and 1467. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone I routes listed above. Additionally, in the State of Colorado routes that are built to provide access for mining and gas exploration are considered legal access routes for the public.

Commenter Name: Monholland, Landon

Submission Code: emc0922

Organization:

Reccomended: Closed

Established trail area, and planned further expansion Dont reduce size of the existing NFD SRMA Expansion further north will involve Zone H, and connections to and through Zone H are important Connections from NFD trail area to Highline Lake area are important to long range planning for camping resources, long route terminus with services, and connections southward towards McKinnis Canyons NCA (Kokopelli and Rabbit Valley areas) Critical in large East-West route plan to connect Fruita to Palisade Route Comments: Several existing and approved routes are not shown in the NFD bicycle emphasis area (PBR, Mo Joes, Down Uppity, Zip-Off, and the trail replacing I1024 in the upper Bookcliff area) I1027 links with Zone H route H50 to form an important link between Coal Gulch and Garvey Cyn. This should remain accessible. I641 into Leyton Wash should remain accessible. Intrusions into the bluff Bookcliff face are valuable trail resources to penetrate the more remote areas and get away

from the front country trail types and usage levels. This is a likely future connection to the Edge Loop portion of the trail system. I633 should remain accessible for the ability to obtain Hunter Cyn in Zone H. This connection will likely be important to an E-W corridor link. Zone I from a motorcycle perspective: I personally spend many hours a week on my motorcycle in the southern sections of Zone I. I often go West or East from 18Rd. The new signed single track built last Fall East of 18rd is excellent and a good example of what can happen in the whole NFD. Since the signing of the legal single track, the motorcycle users are staying on the trail and following the new routes instead of the old ones. If all the good routes that are out there are properly signed, and the bad ones closed it would be a more enjoyable, less land destructive experience for everyone. The problem as I see it is that most of the good single track is not on the maps. They are not even marked as red, they just are not on the maps period. Without a proper moto single track inventory this process will not turn out well. I feel this is why there is so much hostility from the motorized community. They know that if the lose "designated open" status out there all good single track that is not in inventory will be closed. Zone H from a bicycle perspective: Zone H is a link in the connectivity chain that could some day be a loop around the Grand Valley. It has one of the few canyons that is passable up and into the Bookcliffs. It also has good access via 21 road. Also the southern boundary that is up against Zone I holds the future possibility of expansion of trails coming out of the North Fruita Desert SRMA. Route comments H160 & 162 are easily accessible and necessary routes into Hunter Cyn Routes H67, H70, H71, and H75 are nice back country extensions from routes in the Little Bookcliffs Wild Horse Mgmt area, and are beneficial for future route planning. In the area of Garvey Cyn, route H50 continues on into Zone O forming a link between Garvey and Coal Gulch. This is an uncommon route linkage and very helpful in accessing Garvey from existing areas of trial usage. Routes H46, H47, H49, and H52 should remain accessible to use. West of 16 Rd, and from Post Cyn to the south, some existing routes are not shown on the map. There is a descent from the terminus of H21 to 16 Rd. This route should be included and remain accessible. The Post and Lapham Cyn access will play a key role in the likely northern extent of the trail network emanating from the existing NFD SRMA. Routes H114 and H119 should remain open to allow connection to Hwy 139. Future network goals also include connections towards the Baxter Pass and northward towards Zone B. Westward connections out of Zone H will be very helpful. H2 provides back-country access from Hwy 139 and should remain accessible Zone H from a Motorcycle perspective: I enjoy climbing Hunter Canyon on my moto. When the new trail is finished (currently known as Sarnac, formerly known as Peekaboo) I would enjoy linking it via this route. Zone C comments from a bicycle perspective: I would like to see the trail known as the Flight of Icarus formalized. This is a remote back country trail and is an important get-away for riders who wish to remove themselves from the more highly traveled trail networks of the front country. Route comments Plan for accessible areas to allow trail network connection from NFD SRMA and Hwy 139 High altitude routes possible along and off of divide area. Shuttle oriented rides can attain elevation directly via Hwy 139. This is the only nearby paved elevation gain in the Fruita area. Route Comments: C94, C78, C91, C84 route should be accessible. C22, C95 and C23, C20, C24, C129, and C114 provide remote access and should remain accessible.

Zone I Several existing and approved routes are not shown in the NFD bicycle emphasis area (PBR, Mo Joes, Down Uppity, ZipOff, and the trail replacing I1024 in the upper Bookcliff area) I1027 links with Zone H route H50 to form an important link between Coal Gulch and Garvey Cyn. This should remain accessible. I641 into Leyton Wash should remain accessible. Intrusions into the bluff Bookcliff face are valuable trail resources to penetrate the more remote areas and get away from the front country trail types and usage levels. This is a likely future connection to the Edge Loop portion of the trail system. I633 should remain accessible for the ability to obtain Hunter Cyn in Zone H. This connection will likely be important to an EW corridor link.

This is a likely future connection to the Edge Loop portion of the trail system. I633 should remain accessible for the ability to obtain Hunter Cyn in Zone H. This connection will likely be important to an EW corridor link. Future trail development should include links that exist the upper portions of the network towards the lower elevations. These bailout options, and extended ride options will be needed to provide the long and challenging routes that are needed by a significant group of riders. Many riders seek out these epic trails - theyre large draws for a trail area.

– Route: I1027

– Segment: 22165

Designation [?](#)

Proposed Designation: Closed
Seasonal Limitations: None

Designation Following Mitigation:
Seasonal Limitations: Winter Closure

Limited to Vehicles Under 50" wide

Mitigation

- Reroute
- Drainage Crossing

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III
- Vegetation Relic Vegetation
- Water Stream Crossing
- Wildlife Mule Deer Winter Range

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to reduce redundancies in routes to minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Castle Rock Trail System Zone (F): Option (D) which allows the trail system to stay open and stay intact meets most of the Route Designation Criteria as summarized on p. M-11, Appendix M. The trail system creates a loop trail. The system is recognized in local maps and social media. The trail resolves user conflicts because of remoteness and proximity to Grand Junction. The trail was not previously designated but developed in an area that was labeled Open to Cross Country Travel. We would encourage the BLM to keep this trail system open and follow a planned process to mitigate any problem areas within the existing trail system. Trails: (F555, F571, F572, F560): We recommend Alternative (A). These trails connect V.2 road and the Coon Hollow area. They provide an important link between these two roads and allow for a much enhanced experience as opposed to riding down the gas roads. There are areas of slick rock and challenges that add a great deal to the recreation experience. This two-track trail enhances the recreation experience and adds a great deal to the overall enjoyment of this area. The Option B, Preferred Alternative closes these routes to motorized recreation. There is no documented proof exhibited in the EIS that shows substantial evidence that there are resource issues impacted by motorized travel. The BLM has made an error in closing these trails and a much better option would be Option A, no action. Zone (H) North of Coal Gulch: Option (D) Trail (H)52, & (H)40, complete the loop between Coal Gulch and Garvey Canyon. It is important to keep this connection open for >50" motorized travel. Zone (I) 21 Road-Hwy 139A: Option (D) Trail (I)1027, provides a loop ride from Coal Gulch to Garvey Canyon and back on 16 Road. This is a desirable option for >50" motorized travel. This trail provides a scenic view and remote feeling traversing between canyons. This is an important route for ATV's, Motorcycles and possibly mountain bikes. Zone (M) Cameo/Coal Canyon and Main Canyon area: M420, M410, & M414 are listed as "Vested Interest" by Mesa County Roads and Right of Way. This road may have been inadvertently closed without proper authority granted by the Mesa County Commissioners. Please comment on this issue. If the road was inappropriately closed, then it should be reopened to motorized travel immediately. In Zone (P) Bangs Canyon/Snyder Flats area: Trails P450, P288, P286, P440, P309, P315, P312, P308, & P314 should be left open to motorized travel. These routes access areas above Snyder Flats which adds diversity and interest to other recreation options in the BLM Field office area. Trails P291 and P402, should remain open to motorized travel as option (D) would allow. This route offers a full day of exploring in a very unusual area. The slick rock formations and canyons area some of the highlights. To traverse the length of this route is a good days journey and allows a fulfilling social outing with friends. Zone (V) Gateway: This area features interesting mining history, outstanding scenery, and is a great place for people to explore. The area is very remote, with a feeling of being back in another time period. Our comment pertains to keeping as many of the routes open in this area simply because of the experiences that they provide. Many old roads lead back into mining areas or scenic overlooks into Maverick canyon. Closing these routes would create significant administrative problems for the BLM. Just the signing of closed routes would probably take years at great expense and then the enforcement of these closures would be difficult. A much better option would be to leave the roads open and let the people enjoy the possibilities of exploring this incredible country.

I feel strongly that these high value recreational routes (route segments) in Zone I should remain open to the general public for all forms of use including motorized!OHV use. Routes I: 17; 528; 1; 29; 330; 511;109;105;968; 106;971;972;97;448;540;547;653;450;977;973; 100;191;119;86; 118;88; 281; 117; 116; 111; 440; 436; 442; 951; 103; 433; 282; 284; 283; 287; 293; 294; 297; 303; 276; 560; 984; 940; 188;353;920;811;1024;467;721;12;1029;11;905;904;636; 1027; 704; 709; 900; 633; 630 .. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone I routes listed above.

– Route: I1029

– Segment: 22226

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Energy Access COGCC well
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Soils Slumping soils
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard
- Range Development

Rationale for Decision

- Designation was considered to maintain administrative access to active oil and gas wells, but limit public access to provide for public safety at active well sites.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to eliminate duplicative or redundant routes with slump areas.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Public Comments On Route: I1053

No public comments for this Route

— Route: I119

— Segment: 22698

Designation

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Range Study Site
- Range Development

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Soils Not Meeting Public Land health Standard (1)
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Range Development

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Public Comments On Route: I119

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Reccomended: Limited to Vehicles Under 50" wide

Alternative C shows County Road. 21 as closed where it enters Hunter Canyon. BLM does not have the authority to close a county road. In Alternatives B, and C a north south connector consisting of route I111, 433, 282, 284 and 287 are shown as closed. This route is a primary connector that completes a loop opportunity. It is the best north south route west of 18 Rd. The trail is a very enjoyable ride for intermediate level motorcyclists. It is completely on BLM lands. It is designated as open to motorized in the existing Decision, the North Fruita Desert Plan. Please leave this route open as the north south routes to the west will not accommodate ATVs. Riding the graded county road is not a pleasant recreation experience. The closure of routes I100, 95, 119, 118, 100, 972, 971 in combination denies public access between The North Fruita Desert SRMA and the Highline Lake State Recreation facilities. Highline offers shade, water and developed camping and sanitation facilities to the visitors to both opportunities. It is important to leave this access available in order to provide a wider variety of facilities and opportunities to the visitors. None of the alternative maps show the OHV open area in its present form, or the proposed size and location in any of the alternatives. We cannot see and compare what the BLM is proposing by looking at the maps. The proposed closure of I920, 983, 186, and 380 eliminates important exit points from the OHV trailhead. The outcome is a concentration of traffic on fewer routes and higher potential for accidents and other impacts. The routes left open will not be able to handle the concentrated traffic around the trailhead.

– Route: I284

– Segment: 22487

Designation

Proposed Designation: Foot/Horse/Mechanized/Motorcycle

Seasonal Limitations: None

Mitigation

- Drainage Crossing

Rationale

Designation Criteria

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.

- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Public Comments On Route: I294

Commenter Name: Siegfried, Brandon

Organization: Grand Mesa Jeep Club

Submission Code: cfc0086

Recommened: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone I should remain open to the general public for all forms of use including motorized/OHV use. Routes I: 17; 528; 1; 29; 330; 511;109;105;968; 106;971;972;97;448;540;547;653;450;977;973; 100;191;119;86; 118;88; 281; 117; 116; 111; 440; 436; 442; 951; 103; 433; 282; 284; 283; 287; 293; 294; 297; 303; 276; 560; 984; 940; 188;353;920;811;1024;467;721;12;1029;11;905;904;636; 1027; 704; 709; 900; 633; 630 .. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone I routes listed above.

– Route: I303**– Segment: 23082****Designation** 

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Reroute

Rationale**Designation Criteria**

- No Designation Criteria identified for this route segment

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Not Meeting Public Land health Standard (1)

- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Water Stream Crossing

Rationale for Decision

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.

Public Comments On Route: I303

Commenter Name: Lillo, Frank

Organization:

Submission Code: emc0740

Recommended: Open (All modes of travel)

I320, 304,303,309,288,283,284,282,440,433,111,450,971,j 307,312,311 form what is know as the pile of rocks trail. This trail also forms more loop options within the trail system.

Commenter Name: Bates, Jeff

Organization:

Submission Code: emc0752

Recommended: Open (All modes of travel)

I100 through I93 Should also be left open. The connection to Bureau of Reclamation is irrelevant. I284 through I111 Should be left open, as the closure is unwarranted. I276 through I303 Should be left open because so much was closed in the North Fruita Desert plan, there are very few routes left in this very actively used portion of the field office. I 905 was closed in the original plan, but shown as an administrative route in the Alternative B. If you are going to reopen it, open it to the public.

Commenter Name: Hundtroft, Thomas

Organization: Bookcliff Rattlers

Submission Code: emc0693

Recommended: Foot/Horse/Mechanized/Motorcycle

The proposed closure of I- 282,283,284,433,440,111 as shown in Alt B would close a valuable single track located in a wash. This trail is the only trail north south connector. The trail is a very enjoyable ride for intermediate level motorcyclists. The other routes listed are critical to the goals of the TMB.

Public Comments On Route: I40

No public comments for this Route

— Route: I400

— Segment: 22115

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Energy Access COGCC well
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Not Meeting Public Land health Standard (1)
- Soils Mancos Shale areas
- Soils Fragile soils
- Special Designation VRM Class II
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

No public comments for this Route

– Route: I44

– Segment: 22411

Designation ?

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Special Recreation Management Area
- Soils Mancos Shale areas
- Special Designation VRM Class II
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.

- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: I440

Commenter Name: Lillo, Frank

Submission Code: emc0740

I320, 304,303,309,288,283,284,282,440,433,111,450,971,j 307,312,311 form what is know as the pile of rocks trail. This trail also forms more loop options within the trail system.

Organization:

Reccomended: Open (All modes of travel)

Commenter Name: Hundtroft, Thomas

Submission Code: emc0693

The proposed closure of I- 282,283,284,433,440,111 as shown in Alt B would close a valuable single track located in a wash. This trail is the only trail north south connector. The trail is a very enjoyable ride for intermediate level motorcyclists. The other routes listed are critical to the goals of the TMB.

Organization: Bookcliff Rattlers

Reccomended: Foot/Horse/Mechanized/Motorcycle

Commenter Name: Siegfried, Brandon

Submission Code: cfc0086

I feel strongly that these high value recreational routes (route segments) in Zone I should remain open to the general public for all forms of use including motorized!OHV use. Routes I: 17; 528; 1; 29; 330; 511;109;105;968; 106;971;972;97;448;540;547;653;450;977;973; 100;191;119;86; 118;88; 281; 117; 116; 111; 440; 436; 442; 951; 103; 433; 282; 284; 283; 287; 293; 294; 297; 303; 276; 560; 984; 940; 188;353;920;811;1024;467;721;12;1029;11;905;904;636; 1027; 704; 709; 900; 633; 630 .. RS 2477 Right of Ways (ROWS) and Prescriptive ROW's have been legally established on the entire list of Zone I routes listed above.

Organization: Grand Mesa Jeep Club

Reccomended: Open (All modes of travel)

Commenter Name: No Record

Submission Code: No Record

Zone I: close at least the west part of 440.

Organization: No Record

Reccomended: Closed

– Route: I630

– Segment: 21595

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation:

Foot/Horse/Mechanized/Motorcycle

Seasonal Limitations: Winter Closure

Mitigation

- Potential weeds mitigation

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Energy Access COGCC well
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to maintain administrative access to active oil and gas wells, but limit public access to provide for public safety at active well sites.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.

Alternative C (Conservation): Closed

Alternative D (Development): Open (All modes of travel)

– Segment: 21584

Designation

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Soils Slumping soils
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to eliminate duplicative or redundant routes with slump areas.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.

Public Comments On Route: I636

Commenter Name: Siegfried, Brandon

Organization: Grand Mesa Jeep Club

Submission Code: cfc0095

Recommended: Open (All modes of travel)

I feel strongly that these recreational routes (route segments) in Zone I should remain open to the general public for all forms of use including motorized/OHV use. Routes I: 12, 1029, 905, 11, 904, 636, 630, 702, n1, 1027, 1024 and 1467. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone I routes listed above. Additionally, in the State of Colorado routes that are built to provide access for mining and gas exploration are considered legal access routes for the public.

Recommened: Foot/Horse/Mechanized/Motorcycle

The proposed closure of I- 282,283,284,433,440,111 as shown in Alt B would close a valuable single track located in a wash. This trail is the only trail north south connector. The trail is a very enjoyable ride for intermediate level motorcyclists. The other routes listed are critical to the goals of the TMB.

– Route: I9

– Segment: 22170

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Not Meeting Public Land health Standard (1)
- Soils Mancos Shale areas
- Special Designation VRM Class III
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Water Stream Crossing

- Wildlife Mule Deer Winter Range
- Wildlife Pronghorn Antelope Winter Range

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Designation Following Mitigation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Energy Access COGCC well
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Fragile soils
- Special Designation VRM Class III

Rationale for Decision

- Designation was considered to maintain administrative access to active oil and gas wells, but limit public access to provide for public safety at active well sites.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.

Submission Code: emc0693

Recommened: Foot/Horse/Mechanized/Motorcycle

The closure of routes I-100,91,119,118,100,973,977 in combination denies public access between The North Fruita Desert SRMA and the Highline Lake State Recreation facilities. Highline offers shade, water and developed camping and sanitation facilities to the visitors to both opportunities. It is important to leave this access available in order to provide a wider variety of facilities and opportunities to the visitors.

- Water Stream Crossing

Rationale for Decision

- Designation was considered to maintain recreation access to and through BLM lands by creating route connectivity and/or by creating loop trails.
- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Previous Alternatives Analyzed

Alternative A (Current): Foot/Horse/Mechanized/Motorcycle

Alternative B (Preferred): Foot/Horse/Mechanized/Motorcycle

Alternative C (Conservation): Foot/Horse/Mechanized/Motorcycle

Alternative D (Development): Foot/Horse/Mechanized/Motorcycle**— Segment: 23197****Designation** **Proposed Designation:** Closed**Seasonal Limitations:** None**Mitigation**

- No Mitigation prescribed for this route segment

Rationale**Designation Criteria**

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Not Meeting Public Land health Standard (1)
- Special Designation VRM Class III
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Water Does not meets Public Land Health Standard Hydro

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.

Recommended: Limited to Vehicles Under 50" wide

Alternative C shows County Road. 21 as closed where it enters Hunter Canyon. BLM does not have the authority to close a county road. In Alternatives B, and C a north south connector consisting of route I111, 433, 282, 284 and 287 are shown as closed. This route is a primary connector that completes a loop opportunity. It is the best north south route west of 18 Rd. The trail is a very enjoyable ride for intermediate level motorcyclists. It is completely on BLM lands. It is designated as open to motorized in the existing Decision, the North Fruita Desert Plan. Please leave this route open as the north south routes to the west will not accommodate ATVs. Riding the graded county road is not a pleasant recreation experience. The closure of routes I100, 95, 119, 118, 100, 972, 971 in combination denies public access between The North Fruita Desert SRMA and the Highline Lake State Recreation facilities. Highline offers shade, water and developed camping and sanitation facilities to the visitors to both opportunities. It is important to leave this access available in order to provide a wider variety of facilities and opportunities to the visitors. None of the alternative maps show the OHV open area in its present form, or the proposed size and location in any of the alternatives. We cannot see and compare what the BLM is proposing by looking at the maps. The proposed closure of 1920, 983, 186, and 380 eliminates important exit points from the OHV trailhead. The outcome is a concentration of traffic on fewer routes and higher potential for accidents and other impacts. The routes left open will not be able to handle the concentrated traffic around the trailhead.

– Route: I93

– Segment: 22633

Designation

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Plant communities susceptible to Cheatgrass Invasion

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.

- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

I100 through I93 Should also be left open. The connection to Bureau of Reclamation is irrelevant. I284 through I111 Should be left open, as the closure is unwarranted. I276 through I303 Should be left open because so much was closed in the North Fruita Desert plan, there are very few routes left in this very actively used portion of the field office. I 905 was closed in the original plan, but shown as an administrative route in the Alternative B. If you are going to reopen it, open it to the public.

Resources and / or Uses Present

- Energy Access COGCC well
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation ACEC
- Special Designation VRM Class III
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Pronghorn Antelope Winter Range
- Lands and Realty Utility corridor
- Range Development

Rationale for Decision

- Designation was considered to maintain administrative access to active oil and gas wells, but limit public access to provide for public safety at active well sites.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone J routes listed above.

– Route: J119

– Segment: 3170

Designation

Proposed Designation: Admin/Permitted Use Only
Seasonal Limitations: None

Designation Following Mitigation: Closed
Seasonal Limitations: None

Mitigation

- Once Well is Abandoned

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Not Meeting Public Land health Standard (1)
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Water Stream Crossing
- Wildlife Pronghorn Antelope Winter Range

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Vegetation Relic Vegetation
- Water Does not meets Public Land Health Standard Hydro
- Water Stream Crossing
- Lands and Realty ROW
- Lands and Realty Utility corridor
- Range Development

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.

Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

- Designation was considered to reduce redundancies in routes to minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to protect shallow pipeline infrastructure, maintain administrative access (only) over pipeline facilities.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

Public Comments On Route: J141

No public comments for this Route

– Route: J143

– Segment: 3358

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Not Meeting Public Land health Standard (1)
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Lands and Realty Utility corridor
- Range Development

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health

1.
 - Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
 - Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
 - Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
 - Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

No public comments for this Route

– Route: J146

– Segment: 2294

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Soils Fragile soils
- Special Designation VRM Class III
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Pronghorn Antelope Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native

plant communities to support wildlife and livestock.

- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Recommended: Foot/Horse/Mechanized/Motorcycle

The proposed closure of all the routes south of the WSA as shown in Alt B,C and D looks a lot like a Wilderness buffer zone. Wilderness buffer zones are specifically banned by the Wilderness Act of 1964 and confirmed by case law. These routes provide hunting access and backcountry experiences The closure s of J- 273,283,276,278,290,279 in the north east corner of zone J makes access to the few remaining open routes impossible

– Route: J308

– Segment: 2684

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Not Meeting Public Land health Standard (1)
- Soils Mancos Shale areas
- Soils Fragile soils
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Elk Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.

- Designation was considered to eliminate duplicative or redundant routes in areas not meeting Public Land Health 1.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to eliminate duplicative or redundant routes in areas with fragile soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Zone J J140 generally departs the Highline Lake area, making it a useful connector in an area where no other existing routes exist. Additional connectors such as J50, J161, J18, J185, J3, J179 serve similar purposes.

Commenter Name: Bertolacci, Jason

Organization: International Mountain Bicycling Association

Submission Code: emc0912

Recommended: Foot/Horse/Mechanized

Zone J is largely undeveloped for recreation and is a candidate for more trail resources. A project we would like to see is a long distance route to connect the Grand Valley to the Rangely area over the existing Baxter Pass route utilizing doubletrack and singletrack connections. Nearby municipalities benefit by connection destination trails such as these long distance routes. It would be helpful for the GJFO to plan connecting routes westward towards Baxter Pass Rd. A few good existing connections are J50, J161, J18, J185, J3, J179. Also, J140 generally departs the Highline Lake area, making it a useful connector in an area where no other existing routes exist.

Submission Code: emc0922

Recommended: Open (All modes of travel)

Zone K from a motorcycle perspective: This zone is very important to me for the wealth of motorcycle single track that is in it. Most of it seems to be closed or not properly mapped in most of the alternatives. This is some of the best motorized single track in the valley. Please sign it and legalize it. Zone K from a bicycle perspective: Most of the trails in this area aren't good mountain bike trails, but the terrain potential is there for some really good riding if it was built with the bicyclist in mind. I see this zone as a good possibility for future bicycle trail development. Zone J from a motorcycle perspective: This zone also contains some great motorcycle single track and is a connection to the good stuff in Zone K. In alternative C, J243 is closed. Please don't close it to motorcycle use or any of the other singletrack. Once again, I don't see most of the stuff I ride inventoried and on the maps. Zone J from a bicycle perspective is a good candidate for a long distance route to connect the Grand Valley to Rangely area over the existing Baxter Pass route. This would be similar to the Kokopelli style of trail, utilizing remote double track and

single track connections over long distances. We need to retain the ability to plan connecting routes. Municipalities benefit by connection destination trails such as these long distance routes. Please keep that in mind. Route Comments: J140 generally departs the Highline Lake area, making it a useful connector in an area where no other existing routes exist. Additional connectors such as J50, J161, J18, J185, J3, and J179 serve similar purposes.

- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing

Lands and Realty ROW

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

I feel strongly that these high value recreational routes (route segments) in Zone J should remain open to the general public for all forms of use including motorized!OHV use. Routes J: 273; 276; 283; 275; 268; 279; 264; 293; 284; 290; 292; 11; 289; 290; 291; 174; 294; 174; 203; 202; 295; 296; 165; 40; 51; 348; 19; 41; 347; 305; 306; 307; 308; 304; 55; 312; 311; 55; 310; 155; 60; 36; 104; 338; 206; 52; 50; 56; 79; 78; 58; 314; 316; 313; 315; 160; 319; 320; 98; 140; 243; 138; 131; 240; 100; 234; 116; 72; 88; 352; 95; 263; 135; 63; 1 46; 160; 318; 185; 179; 182; 137; 172; 345; 6; 343; 113; 24; 25; 212; 176; 213; 191; 193; 192; 3. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone J routes listed above.

– Route: J82**– Segment: 2867****Designation** 

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale**Designation Criteria**

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation ACEC
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Pronghorn Antelope Winter Range

- Range Study Site
- Range Development

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to protect and maintain unique ecological values in areas of critical and environmental concern.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to range study sites.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone J routes listed above.

– Route: K110

– Segment: 2894

Designation

Proposed Designation: Foot/Horse/Mechanized/Motorcycle

Seasonal Limitations: None

Mitigation

- Reroute
- Maintenance
- Drainage Crossing

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Energy Access COGCC well
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.

All of the action alternatives close all existing public access throughout the zone. This is not an adequate range of alternatives. The routes shown in Alt A act as connector routes between trails in the adjoining Moab Field Office. They also connect Loma to the trails in Rabbit Valley. Loss of these routes will encourage the public to use paved roads to access adjoining legal OHV routes.

Recommended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone K should remain open to the general public for all forms of use including motorized/OHV use. Routes K: 145; 122; 9; 123; 5; 8; 13; 56; 14; 63; 16; 3; 261; 179; 177; 25; 35; 213; 265; 271; 41; 48; 40; 84; 22; 20; 34; 38; 184; 120; 226; 227; 221; 280; 222; 234; 235; 78; 225; 281; 70; CVI; 64; 278; 149; 152; 155; 156; 159; 254; 62; 169; 173; 254; 251; 80; 245; 250; 247; 93; 246. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone K routes listed above.

– Route: K149

– Segment: 4345

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Golden Eagle Nest (0.5 miles)
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Recommended: Foot/Horse/Mechanized/Motorcycle

All of the action alternatives close all existing public access throughout the zone. This is not an adequate range of alternatives. The routes shown in Alt A act as connector routes between trails in the adjoining Moab Field Office. They also connect Loma to the trails in Rabbit Valley. Loss of these routes will encourage the public to use paved roads to access adjoining legal OHV routes.

— Segment: 7103

Designation ?

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct

impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.

- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Public Comments On Route: K195

Commenter Name: Aaeng, Joe

Organization:

Submission Code: cfc0041

Recommended: Open (All modes of travel)

The existing trails (K41, K48, K194, K195, K196, K197, K199, K202, K203, K205, K207, K271, K273 and possibly others) sometimes cross roads on which there is light energy-related and occasional sight-seeing traffic in SUV's and trucks. At those points, the trails could be signed to advise the motorcycle trail traffic to be cautious (stop, yield, etc.) which would enhance safety. Riders could be advised of those road-crossing safety and any other concerns at trail head kiosks. This area could also be at least partially maintained by user-groups.

Recommended: Foot/Horse/Mechanized/Motorcycle

All of the action alternatives close all existing public access throughout the zone. This is not an adequate range of alternatives. The routes shown in Alt A act as connector routes between trails in the adjoining Moab Field Office. They also connect Loma to the trails in Rabbit Valley. Loss of these routes will encourage the public to use paved roads to access adjoining legal OHV routes.

- Water Does not meets Public Land Health Standard Hydro
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.

The existing trails (K41, K48, K194, K195, K196, K197, K199, K202, K203, K205, K207, K271, K273 and possibly others) sometimes cross roads on which there is light energy-related and occasional sight-seeing traffic in SUV's and trucks. At those points, the trails could be signed to advise the motorcycle trail traffic to be cautious (stop, yield, etc.) which would enhance safety. Riders could be advised of those road-crossing safety and any other concerns at trail head kiosks. This area could also be at least partially maintained by user-groups.

Zone K (Baxter Pass Area) - I started riding this area on my mountain bike and motorcycle about four years ago. I dont see any reason to make any changes to this area. The trails that I tend to ride on are K277, K196, and K202. These are fun trails to ride and this area is far away from any nearby town and theres existing gas field roads weaving around so I dont see any reason to close any of the accesses down in this Zone. For Zone K, I prefer and recommend that the BLM keep the current system the same and adopt Alternative A for the RMP.

Recommended: Foot/Horse/Mechanized/Motorcycle

All of the action alternatives close all existing public access throughout the zone. This is not an adequate range of alternatives. The routes shown in Alt A act as connector routes between trails in the adjoining Moab Field Office. They also connect Loma to the trails in Rabbit Valley. Loss of these routes will encourage the public to use paved roads to access adjoining legal OHV routes.

Alternative D (Development): Open (All modes of travel)

— Segment: 2239

Designation

Proposed Designation: Admin/Permitted Use Only

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Mule Deer Winter Range
- Wildlife Wildlife Emphasis Area

- Range Development

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
- Designation was considered to maintain a minimum of administrative access to range improvement projects and to areas necessary to properly administer grazing permits.
- Designation was considered in some cases to limit public access to protect range improvements from potential damage.

All of the action alternatives close all existing public access throughout the zone. This is not an adequate range of alternatives. The routes shown in Alt A act as connector routes between trails in the adjoining Moab Field Office. They also connect Loma to the trails in Rabbit Valley. Loss of these routes will encourage the public to use paved roads to access adjoining legal OHV routes.

Designation [?](#)

Proposed Designation: Closed

Seasonal Limitations: None

Designation Following Mitigation: Open (All modes of travel)

Seasonal Limitations: None

Mitigation

- Reroute
- Needs More Data

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural Resource Concern
- Cultural Resource Concern
- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Pronghorn Antelope Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

All of the action alternatives close all existing public access throughout the zone. This is not an adequate range of alternatives. The routes shown in Alt A act as connector routes between trails in the adjoining Moab Field Office. They also connect Loma to the trails in Rabbit Valley. Loss of these routes will encourage the public to use paved roads to access adjoining legal OHV routes.

Zone K Road 271. K 271, 41, 273 & 48 are important routes used by small game hunters and trappers. Each of them should remain open to all motor vehicles. Road K48. K48 is an important road used by small game hunters and trappers; it should remain open to all motor vehicles

Commenter Name: Aaeng, Joe

Organization:

Submission Code: cfc0041

Recommended: Open (All modes of travel)

The existing trails (K41, K48, K194, K195, K196, K197, K199, K202, K203, K205, K207, K271, K273 and possibly others) sometimes cross roads on which there is light energy-related and occasional sight-seeing traffic in SUV's and trucks. At those points, the trails could be signed to advise the motorcycle trail traffic to be cautious (stop, yield, etc.,) which would enhance safety. Riders could be advised of those road-crossing safety and any other concerns at trail head kiosks. This area could also be at least partially maintained by user-groups.

Submission Code: cfc0084

Reccomended: Open (All modes of travel)

I feel strongly that these high value recreational routes (route segments) in Zone K should remain open to the general public for all forms of use including motorized/OHV use. Routes K: 145; 122; 9; 123; 5; 8; 13; 56; 14; 63; 16; 3; 261; 179; 177; 25; 35; 213; 265; 271; 41; 48; 40; 84; 22; 20; 34; 38; 184; 120; 226; 227; 221; 280; 222; 234; 235; 78; 225; 281; 70; CVI; 64; 278; 149; 152; 155; 156; 159; 254; 62; 169; 173; 254; 251; 80; 245; 250; 247; 93; 246. RS 2477 Right of Ways (ROWs) and Prescriptive ROW's have been legally established on the entire list of Zone K routes listed above.

– Route: K41

– Segment: 2551

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Federally Listed vegetation species proximate (200m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meets Public Land Health Standard Hydro
- Water Stream Crossing
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes to minimize habitat fragmentation and minimize direct impacts to listed plant species habitat; As well as occupied habitat from motorized and mechanized users of roads, routes and trails.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

All of the action alternatives close all existing public access throughout the zone. This is not an adequate range of alternatives. The routes shown in Alt A act as connector routes between trails in the adjoining Moab Field Office. They also connect Loma to the trails in Rabbit Valley. Loss of these routes will encourage the public to use paved roads to access adjoining legal OHV routes.

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or

other resources of the public lands, and to prevent impairment of wilderness suitability.

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Recreation Extensive Recreation Management Area
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Pronghorn Antelope Winter Range
- Wildlife Bald Eagle Roost Site

Rationale for Decision

- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Travel Management Zone K Map, Alt C We support the route closures on the Alt C Zone K route map as they will protect Alt C, combined Prairie Canyon ACEC and Wildlife Emphasis Area (WEA) (totaling 22,000 acres). The closures will help maintain the wildlife diversity found in the area including prong horn antelope, long billed curlew, long eared owl, white-tailed prairie dog, kit fox, and burrowing owl habitat. Please implement Alt B K route closures on.: K213-K212-K210-K209-K211- K204- -K205-K203-K202 K252-K62-K251-K253-K255-K254-K252- K231-K235-K238-K239- K241 248 273 277 K102 KK115-K110-K48- K111-K30- K151-K152-K149-K147- VIR 50 195-K196-K194-K198-K197-K199 K41--K -K51-K 150 KK78-K93

- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Stream Crossing
- Wildlife Pronghorn Antelope Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.

Alternative B (Preferred): Admin/Permitted Use Only

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Open (All modes of travel)

— Segment: 5165

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural Resource Concern
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Soils Mancos Shale areas
- Special Designation VRM Class IV
- Vegetation Sensitive vegetation species In or Through (20m points)
- Vegetation Sensitive vegetation species proximate (100m)
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Wildlife Pronghorn Antelope Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize ongoing or potential impacts to cultural resources that are eligible or potentially eligible for listing on the National Register of Historic Places.
- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes in areas with Mancos Shale soils.
- Designation was considered to reduce redundancies in routes minimize fragmentation, and minimize direct impacts from motorized and mechanized users of roads, routes and trails on relic vegetation communities and sensitive plant species.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant

routes susceptible to cheatgrass and noxious weed infestations.

- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

[Trails Preservation Alliance - www.coloradotpa.org][Subject: Combined input to the BLM RMP, from the TPA and COHVCO.] Map K: The single track trails west of 4.0 Rd. near Prarie Canyon Rd. are excellent recreation trails. Designation of this trail system is important to local residents. Please try to work with the Moab FO to assure that the other half of the trail system, in Utah remains available for public use. The routes are: K213-K212-K210-K209-K211-K41-K115-K110-K48-K204-K111-K30-K102-K205-K203-K202-K195-K196-K194-K198-K197-K199-K51-K151-K152-K149-K147-K252-K62-K251-K253-K255-K254-K252-K231-K235-K238-K239-K78-K93--K244-K245.

– Route: K95

– Segment: 3054

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

Resources and / or Uses Present

- Cultural Resource Concern
- Energy Access COGCC well
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class IV
- Vegetation Public Land Health Standard not meeting biotic standard
- Vegetation Plant communities susceptible to Cheatgrass Invasion
- Water Does not meet Public Land Health Standard Hydro
- Wildlife Wildlife Emphasis Area

Rationale for Decision

- Designation was considered to minimize impacts to cultural site integrity (to maintain the visual, audible, and setting characteristics of cultural sites).
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to maintain or restore vegetative communities to provide soil stability and resistance to erosion. Use vegetative treatments to improve diversity, reduce noxious and invasive species, and restore native plant communities to support wildlife and livestock.
- Designation was considered to reduce the spread of cheatgrass and noxious weeds as well as reduce redundant routes susceptible to cheatgrass and noxious weed infestations.

Public Comments On Route: M101

Commenter Name: Weber, Patricia

Submission Code: emc0459

Organization:

Reccomended: Open (All modes of travel)

M101, 327, 100, 145, 242, 261, 415, 293, 140, 164 (Coal Creek Canyon): currently this is open to vehicles, and makes a delightful 4WD trip to overlook the Grand Junction Valley. Alternative B proposes to limit this access to <50" OHV's. Please do not restrict access to this area. It is a great recreational boon for the Grand Junction area. Plus, there is a limited parking for trailers with OHV's - no more than 4-5 vehicles plus trailers could be accommodated with the small parking area.

Commenter Name: Znamenacek, Dale

Submission Code: emc0597

Organization: Grand Mesa Jeep Club

Reccomended: Open (All modes of travel)

Trail Number(s): Coal Canyon and the overlooks, Hoodoo Trail Name: M140, M145, M261, M101, M164, M152 & M170, The rest of route M157 traveling west, M148, M156, M162, M157 connecting with M156 and M177, M13 I would like to see all routes in this area left open to all sizes of vehicles. These are commonly used jeep routes, and also a fantastic trip on my UTV and on an ATV.

Commenter Name: Shepherd, Janice

Submission Code: emc0835

Organization: The Quiet Trails Group

Reccomended: Admin/Permitted Use Only

In Coal Canyon, we would recommend Alterative C travel zone management for this area. Specifically, we would propose that the entire route complex of M101, M100, M145, M242, M293, M261, M140, M 164, M181, and M185 should be administrative use only.

Commenter Name: Hundtroft, Thomas

Submission Code: emc0693

Organization: Bookcliff Rattlers

Reccomended: Open (All modes of travel)

Coal Canyon and overlooks M140, M145, M261, & M101, M164 Route down the canyon *Marked to be restricted to ATV-width M152 & M170 Route to overlook of Grand Junction *Marked for closure The rest of route M157 traveling west This is a steep rocky hill (looks like fun jeeping!) that appears to connect to M148 *Omitted from maps M148 Route to old mine is a place of interest * Marked to become ATV-width M156, M162, M157 connecting with M156 and M177 Crosses private property and ends on BLM Land at overlook of Grand Junction * Marked administrative on all alternatives

Recommended: Open (All modes of travel)

Area M: M140, M 145, M 261, M101, M164, M152, M170, M157, 1. History: Coal Canyon and its overlooks have been used for many years by the grand Mesa Jeep club. 2. The Grand Mesa Jeep Club had a special event permit from the BLM for their "Rock Junction" its event in 2012. 1. The Grand Mesa Jeep club has an annual club run to the Palisade rim of the Coal Canyon trail in the fall. 2. This trail has been a favorite of many due to the prime vistas of the grand Valley and the town of Palisade. 3. One piece of this trail seems to have been omitted from the maps. Segment M 148 does not is not visible on current maps. 4. Routes M156, M162, M157, and M177, are marked administrative on all our current alternatives. These end near an overlook of Grand Junction 5. We ask that the BLM consider changing all of Coal Canyon to "open to all motorized vehicles" on the 2013 Travel Management Plan.

- Designation was considered to reduce the number of duplicative and redundant routes in the Little Book Cliffs Wild Horse Range.
- Designation was considered to emphasize protection of wild horses in the LBCWHR and minimize impacts to their population and habitat.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Limited to Vehicles Under 50" wide, Winter Closure

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Limited to Vehicles Under 50" wide, Winter Closure

— Segment: 6398

Designation

Proposed Designation: Closed

Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Other Considerations County Vested Interest
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Special Designation Wild Horse Area
- Water Stream Crossing
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to eliminate duplicative or redundant routes with potential severe erosion hazards.
- Designation was considered to reduce the number of duplicative and redundant routes in the Little Book Cliffs Wild Horse Range.
- Designation was considered to emphasize protection of wild horses in the LBCWHR and minimize impacts to their population and habitat.
- Designation was considered to minimize potential impacts from routes with multiple stream crossings.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.

Public Comments On Route: M140

Commenter Name: Weber, Patricia

Submission Code: emc0459

Organization:

Recommened: Open (All modes of travel)

M101, 327, 100, 145, 242, 261, 415, 293, 140, 164 (Coal Creek Canyon): currently this is open to vehicles, and makes a delightful 4WD trip to overlook the Grand Junction Valley. Alternative B proposes to limit this access to <50" OHV's. Please do not restrict access to this area. It is a great recreational boon for the Grand Junction area. Plus, there is a limited parking for trailers with OHV's - no more than 4-5 vehicles plus trailers could be accommodated with the small parking area.

Commenter Name: Znamenacek, Dale

Submission Code: emc0597

Organization: Grand Mesa Jeep Club

Recommened: Open (All modes of travel)

Trail Number(s): Coal Canyon and the overlooks, Hoodoo Trail Name: M140, M145, M261, M101, M164, M152 & M170, The rest of route M157 traveling west, M148, M156, M162, M157 connecting with M156 and M177, M13 I would like to see all routes in this area left open to all sizes of vehicles. These are commonly used jeep routes, and also a fantastic trip on my UTV and on an ATV.

Commenter Name: Smith, Jerry**Submission Code: emc0773****Organization:****Recommended: Open (All modes of travel)**

Area M: M140, M 145, M 261, M101, M164, M152, M170, M157, 1. History: Coal Canyon and its overlooks have been used for many years by the grand Mesa Jeep club. 2. The Grand Mesa Jeep Club had a special event permit from the BLM for their "Rock Junction" its event in 2012. 1. The Grand Mesa Jeep club has an annual club run to the Palisade rim of the Coal Canyon trail in the fall. 2. This trail has been a favorite of many due to the prime vistas of the grand Valley and the town of Palisade. 3. One piece of this trail seems to have been omitted from the maps. Segment M 148 does not is not visible on current maps. 4. Routes M156, M162, M157, and M177, are marked administrative on all our current alternatives. These end near an overlook of Grand Junction 5. We ask that the BLM consider changing all of Coal Canyon to "open to all motorized vehicles" on the 2013 Travel Management Plan.

Commenter Name: Shepherd, Janice**Submission Code: emc0835****Organization: The Quiet Trails Group****Recommended: Admin/Permitted Use Only**

In Coal Canyon, we would recommend Alterative C travel zone management for this area. Specifically, we would propose that the entire route complex of M101, M100, M145, M242, M293, M261, M140, M 164, M181, and M185 should be administrative use only.

Commenter Name: McClellan, Roz**Submission Code: emc0846****Organization: Rocky Mountain Recreation Initiative****Recommended: Closed**

Zone M Close M 140, 145

Commenter Name: Hundtroft, Thomas**Submission Code: emc0693****Organization: Bookcliff Rattlers****Recommended: Open (All modes of travel)**

Coal Canyon and overlooks M140, M145, M261, & M101, M164 Route down the canyon *Marked to be restricted to ATV-width M152 & M170 Route to overlook of Grand Junction *Marked for closure The rest of route M157 traveling west This is a steep rocky hill (looks like fun jeeping!) that appears to connect to M148 *Omitted from maps M148 Route to old mine is a place of interest * Marked to become ATV-width M156, M162, M157 connecting with M156 and M177 Crosses private property and ends on BLM Land at overlook of Grand Junction * Marked administrative on all alternatives

– Route: M145

– Segment: 6388

Designation

Proposed Designation: Open (All modes of travel)**Seasonal Limitations: Winter Closure**

Mitigation

- Reroute
- Maintenance
- Drainage Crossing

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the

compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Known Cultural Site Visible or Nuisance
- Other Considerations County Vested Interest
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class II
- Special Designation Wild Horse Area
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations during critical periods.

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Soils Severe Erosion Hazard roads and trails
- Special Designation VRM Class III
- Special Designation Wild Horse Area
- Water Stream Crossing
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations during critical periods.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Previous Alternatives Analyzed**Alternative A (Current): Undesignated****Alternative B (Preferred): Limited to Vehicles Under 50" wide, Winter Closure****Alternative C (Conservation): Admin/Permitted Use Only****Alternative D (Development): Limited to Vehicles Under 50" wide, Winter Closure****— Segment: 6358****Designation** **Proposed Designation: Open (All modes of travel)****Seasonal Limitations: Winter Closure**

Mitigation

- Reroute
- Maintenance
- Drainage Crossing

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Limited to Vehicles Under 50" wide, Winter Closure

— Segment: 6270

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: Winter Closure

Mitigation

- Reroute
- Maintenance
- Drainage Crossing

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.
- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Special Designation Wild Horse Area
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations during critical periods.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations during critical periods.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Previous Alternatives Analyzed

Alternative A (Current): Undesignated

Alternative B (Preferred): Limited to Vehicles Under 50" wide, Winter Closure

Alternative C (Conservation): Admin/Permitted Use Only

Alternative D (Development): Limited to Vehicles Under 50" wide, Winter Closure

— Segment: 7474

Designation

Proposed Designation: Open (All modes of travel)

Seasonal Limitations: Winter Closure

Mitigation

- Reroute
- Maintenance
- Drainage Crossing

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

- **Minimize Harassment:** Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.
- **Minimize Conflicts:** Areas and trails shall be located to minimize conflicts between off-highway vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Cultural Resource Concern
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Special Designation Wild Horse Area
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to maintain public access to areas identified as important for recreation.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations during critical periods.
- Designation was considered to maintain a minimum of administrative access to rights-of-way, other land use authorizations, and utility corridors.

Designation

Proposed Designation: Closed
Seasonal Limitations: None

Mitigation

- No Mitigation prescribed for this route segment

Rationale

Designation Criteria

- **Minimize Damage:** Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

Resources and / or Uses Present

- Cultural High Potential Cultural Class 1 Modeling
- Recreation County identified recreation vested interest route
- Special Designation VRM Class III
- Special Designation Wild Horse Area
- Wildlife Bighorn Sheep Production Area
- Wildlife Mule Deer Winter Range
- Lands and Realty Utility corridor

Rationale for Decision

- Designation was considered to minimize the potential for impacts to cultural sites and to reduce density of routes in areas known to be of high expected cultural resource density or in areas of high value to the cultural program or Tribes.
- Designation was considered to reduce the number of duplicative and redundant routes in the Little Book Cliffs Wild Horse Range.
- Designation was considered to emphasize protection of wild horses in the LBCWHR and minimize impacts to their population and habitat.
- Designation was considered to reduce road density and disturbance of human activities in production areas and winter ranges for large ungulates.
- Designation was considered to provide sufficient forage, cover, and protection from disturbance for large ungulates in order to maintain healthy viable populations.
