Stakeholder comments & questions on BLM information:

- Why was privately-owned section at the upstream end included in the eligible segment?
- How do those landowners feel about the potential for their part of the stream to be determined “suitable” for Wild & Scenic status?
- Is there a chunk of private land in the middle of the segment as well? *No – BLM verifies after the meeting.*
- Would BLM seek to swap or acquire private land on a segment if it was determined suitable? *A: yes.*

	ORV Needs	Current Uses & Values	Potential Future Uses	Current Problems/ Assets	Policy/Mgmt tools – options and impact
1	Wildness	<ul style="list-style-type: none"> • Hunting • Fishing • Hiking 			Within Camelback Wilderness Study Area (WSA): <ul style="list-style-type: none"> • Provides surface disturbance protection. • Does not provide protection specifically for ORV's. • BLM found “not suitable” for designation as Wilderness; no process for revising.
2	Flows	Large diversion upstream.		Sometimes stream goes dry in places.	
	Habitat quality			Russian knapweed problem (most severe among Monitor, Potter & Roubideau).	BLM spraying done on horseback because of WSA restrictions.
3	Cultural preservation				Nominated for National Register of Historic Places (<i>would require that any federal or federally funded project take into account potential</i>
