To Whom It May Concern

Re: 20+ year old Gray Stud

On October 27th I examined the above horse and found him to be blind in the Right eye due to a pre-existing injury that has caused significant atrophy of the globe. In watching his behavior in the pen I believe he would be a danger to himself and any handler due to his inability to compensate for the vision impairment. Due to these reasons he was euthanized.

Jeremy J. Lay, DVM
