DETERMINATION OF LAND USE PLAN CONFORMANCE AND NEPA ADEQUACY

OFFICE: Royal Gorge Field Office

PROJECT NUMBER: DOI-BLM-CO-200-2013-085 DN

PROPOSED ACTION TITLE/TYPE: Range – Grazing Lease Transfer and Renewal for Logan Hill Allotment #05795

LOCATION/LEGAL DESCRIPTION: Colorado, Park County, Sixth Principle Meridian, T. 10 S., R. 75 W., sec. 29, 30 & 32. (see map for more precise location)

Public Acres: 694

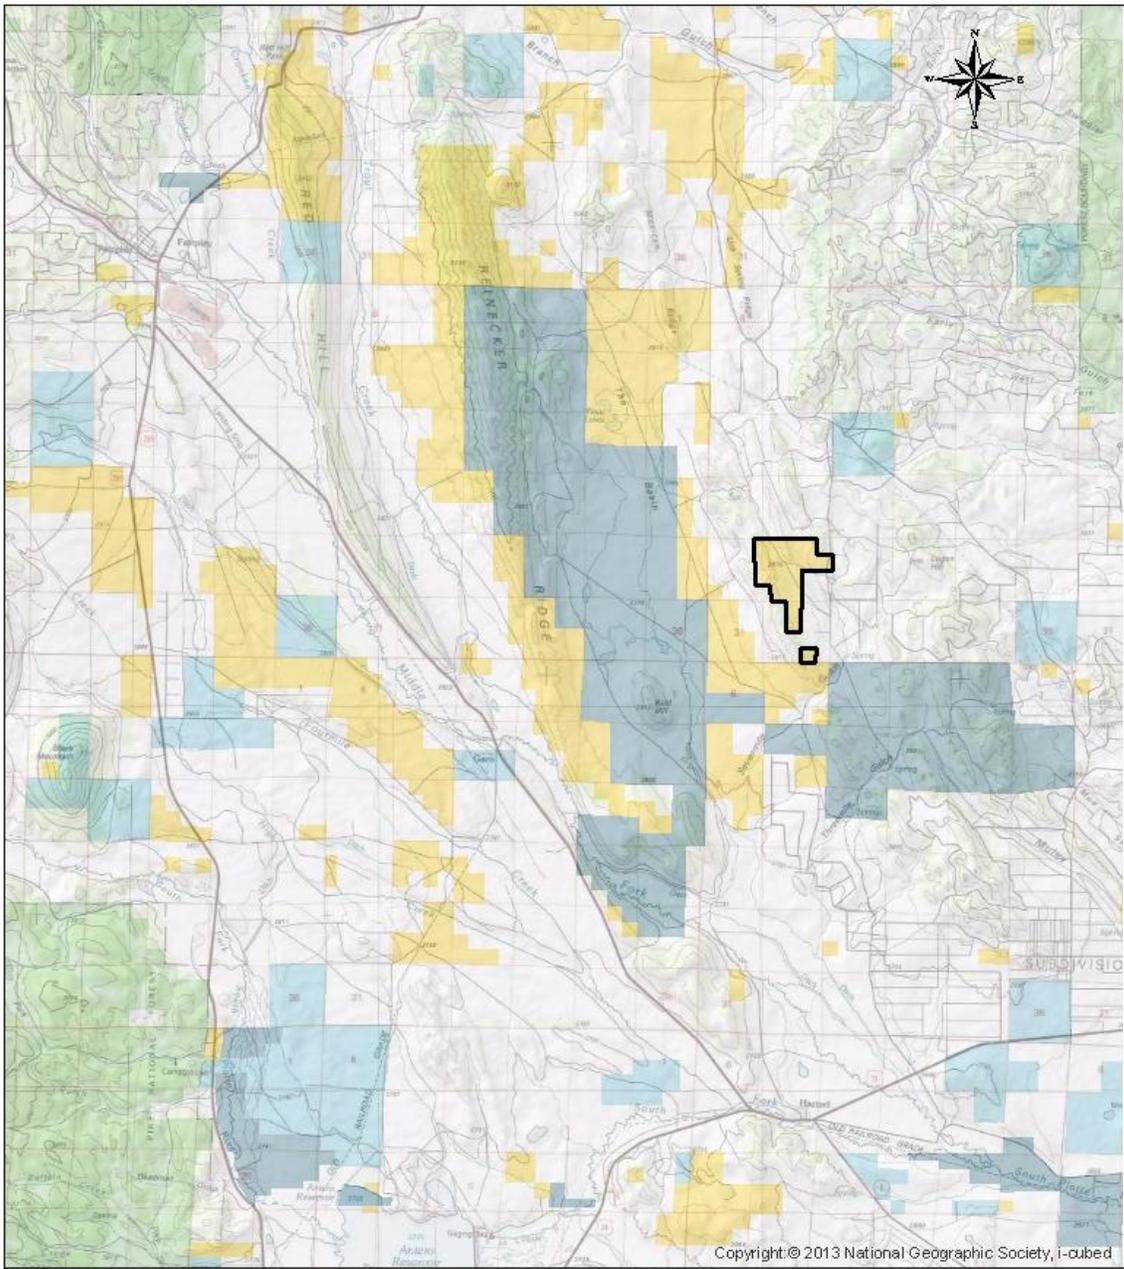

APPLICANT:
Walker Ranching, Enterprises, LLC

A. Description of the Proposed Action and any applicable mitigation measures

The proposed action is to transfer the authorization to graze livestock on public lands included in the Logan Hill Allotment. The new lease/permit will expire after ten years. Grazing use on the allotment will remain as previously scheduled. There will be no changes in livestock numbers; authorized grazing dates and times; authorized levels of use; or terms and conditions.

The base property for the Logan Hill Allotment is owned by Wyatt Engelman. Wyatt Engelman is now leasing the base property to Walker Ranching Enterprises, LLC. Walker Ranching Enterprises, LLC has applied for the grazing lease for public land included in the Logan Hill Allotment.

The allotment has undergone internal interdisciplinary team review through a Public Land Health Assessment in 2006 and is currently meeting public land health standards. In addition, the allotment was analyzed for permit renewal under BLM-CO-200-2007-0057 EA conducted in September, 2007.

Land Use Plan (LUP) Conformance

LUP Name Royal Gorge Resource Management Plan	Date Approved 5/13/96
Other Document Final Livestock Grazing EIS	Date Approved 1995

The proposed action is in conformance with the applicable LUP because it is specifically provided for in the following LUP decisions: 4-2, 4-4, and C-30

Decision Language:

4-2: Season of use and stocking rates will continue based on the Grazing EIS and vegetation monitoring.

4-4: Grazing use is authorized on 123 allotments.

C-30: Base livestock grazing management on the 1981 RGRA EIS.

C. Identify applicable National Environmental Policy Act (NEPA) documents and other related documents that cover the proposed action.

List by name and date all applicable NEPA documents that cover the proposed action.

Term Grazing Permit Renewals: DOI-BLM-CO-200-2007-0057 EA.

List by name and date other documentation relevant to the proposed action (e.g., biological assessment, biological opinion, watershed assessment, allotment evaluation, and monitoring report).

Public Land Health Assessments: 2006

D. NEPA Adequacy Criteria

1. Is the new proposed action a feature of, or essentially similar to, an alternative analyzed in the existing NEPA document(s)? Is the project within the same analysis area, or if the project location is different, are the geographic and resource conditions sufficiently similar to those analyzed in the existing NEPA document(s)? If there are differences, can you explain why they are not substantial?

The RMP and Grazing EIS analyzed livestock grazing by allotment with the mandatory terms and conditions. The previous EAs analyzed grazing use and permit renewal on the same allotment. The Proposed Action is substantially the same action and at the site specifically analyzed in the existing NEPA documents(s). Grazing use on the allotment will remain as previously scheduled. There will be no changes in livestock numbers; authorized grazing dates, times, authorized levels of use; or terms and conditions.

2. Is the range of alternatives analyzed in the existing NEPA document(s) appropriate with respect to the new proposed action, given current environmental concerns, interests, and

resource values?

Yes. The RMP/EIS and EA's considered a range of alternatives. The existing EA for permit renewal was conducted in 2007 and continues to be appropriate for current conditions. The EA included a proposed action alternative, which would have provided for any change in grazing or season of use, a no action alternative that would have continued grazing as previously scheduled and a no grazing alternative. No new environmental conditions or change in resource values have arisen that would invalidate those alternatives analyzed.

3. Is the existing analysis valid in light of any new information or circumstances (such as rangeland health standard assessment, recent endangered species listings, updated lists of BLM-sensitive species)? Can you reasonably conclude that new information and new circumstances would not substantially change the analysis of the new proposed action?

Yes. The previous information and circumstances and analysis are still valid in light of the 2006 Health Assessment, and no new issues concerning grazing have arisen on this allotment.

4. Are the direct, indirect, and cumulative effects that would result from implementation of the new proposed action similar (both quantitatively and qualitatively) to those analyzed in the existing NEPA document?

Yes. The impacts remain unchanged. Those impacts, including cumulative impacts, normally associated with livestock grazing are mitigated through managed grazing schedules, pasture rotations and monitoring of land health standards.

5. Are the public involvement and interagency review associated with existing NEPA document(s) adequate for the current proposed action?

Yes. Extensive scoping and public involvement occurred in the RMP/EIS. Also, scoping occurred during the term permit renewal.

E. Persons/Agencies /BLM Staff Consulted

INTERDISCIPLINARY TEAM REVIEW			
NAME	TITLE	AREA OF RESPONSIBILITY	Initials/date
Matt Rustand	Wildlife Biologist	Terrestrial Wildlife, T&E, Migratory Birds	MR, 7/23/2013

Other Agency Represented: None

REMARKS:

Cultural Resources: No historic properties are located in the area of potential effect [see report CR-RG-13-178 (R)]. Therefore, the proposed undertaking will have no effect on any historic properties (those eligible for the NRHP).

Native American Religious Concerns: No possible traditional cultural properties were located during cultural resources inventories in the area (see above). There is no other known evidence that suggests the project area holds special significance for Native Americans.

Threatened and Endangered Species: There are no records of any federally listed or BLM sensitive species within or near the project area. The Proposed Action will not result in impacts to TES species.

Realty: No concerns.

MITIGATION: None.

CONCLUSION

DOI-BLM-CO-200-2013-085 DN

Based on the review documented above, I conclude that this proposal conforms to the applicable land use plan and that the NEPA documentation fully covers the proposed action and constitutes BLM's compliance with the requirements of the NEPA.
