OFFICE: RGFO LLCOF02000

TRACKING NUMBER: DOI-BLM-CO-F02-2014-0067 DN

CASEFILE/PROJECT NUMBER: Grazing Record # 0505315 (Jack Gaffney Jr.)and Grazing Record# 0504995 (Timothy Krantzl)

PROPOSED ACTION TITLE/TYPE: Range – Grazing Permit Transfer and Renewal for Gillett Ind. Allotment #05225

LOCATION/LEGAL DESCRIPTION: T.14S., R.69W.,Sec. 32, 33 and T.15S., R.69W.,Sec. 4-6— Public Acres: 111

APPLICANT: Timothy Krantz

## **A. Description of Proposed Action and any applicable mitigation measures**

The proposed action is to transfer the authorization to graze livestock on public lands included in the Gillett Ind. Allotment. The new lease/permit will expire after ten years. **Grazing use on the allotment will remain as previously scheduled. There will be no changes in livestock numbers; authorized grazing dates and times; authorized levels of use; or terms and conditions.**

The base property for the Gillett Ind. Allotment was previously owned by David Wollaston who leased to Jack Gaffney Jr. Jack Gaffney Jr. lost control of the base property. The base property is now owned by Timothy Krantz who has applied for the grazing permit for public land included in the Gillett Ind. Allotment. The new permit will expire in ten years (2/28/2024).

The allotment has undergone internal interdisciplinary team review through Public Land Health Assessments conducted in 2001. The allotment is currently meeting public land health standards. In addition, the allotment was analyzed for permit renewal under BLM-CO-200-2008-0073 EA, conducted in September, 2008.

## **B. Land Use Plan Conformance**

LUP Name: Royal Gorge Resource Management Plan	Date Approved: 05/13/1996
Other Document: Final Livestock Grazing EIS	Date Approved: 1995
Other Document	Date Approved

**The proposed action is in conformance with the LUP, even though it is not specifically provided for, because it is clearly consistent with the following LUP decisions (objectives, terms, and conditions):**5-2, 5-4, C-30, & C-44

Decision Language:

5-2: Season of use and stocking rates will continue based on the Grazing EIS and vegetation monitoring.

5-4: Grazing is authorized on 123 allotments.

C-30: Base livestock grazing management on the 1981 Royal Gorge Area Grazing Environmental Impact Statement. Continue to use allotment management plans (AMPs) on an interim basis until replaced with IAPs.

C-44: On single pasture allotments with season long spring/summer grazing, utilization will be held to the 40 to 60 percent range on forage species in lieu of a rest standard. This requirement will be on high elevation allotments where deferment or dormant season use is impractical because of deep snow and fencing the allotment into smaller units is uneconomical.

### **C. Identify applicable National Environmental Policy Act (NEPA) documents and other related documents that cover the proposed action.**

**List by name and date all applicable NEPA documents that cover the proposed action.**

BLM-CO-200-2008-0073 EA Term Grazing Lease Renewal

Date Approved: September 24, 2008.

**List by name and date other documentation relevant to the proposed action (e.g. biological assessment, biological opinion, watershed assessment, allotment evaluation, and monitoring report).**

Public Land Health Assessment 2001

Date Approved: September, 2001

### **D. NEPA Adequacy Criteria**

**1. Is the new proposed action a feature of, or essentially similar to, an alternative analyzed in the existing NEPA document(s)? Is the project within the same analysis area, or if the project location is different, are the geographic and resource conditions sufficiently similar to those analyzed in the existing NEPA document(s)? If there are differences, can you explain why they are not substantial?**

The Proposed Action is substantially the same action and at the site specifically analyzed in the existing NEPA documents. Grazing use on the allotments will remain as previously scheduled. There will be no changes in livestock numbers; authorized grazing dates and times; authorized levels of use; or terms and conditions.

**2. Is the range of alternatives analyzed in the existing NEPA document(s) appropriate with respect to the new proposed action, given current environmental concerns, interests, and resource value?**

Yes. The RMP/EIS and EA considered a range of alternatives. The existing EA for permit renewal was conducted in 2008 and continues to be appropriate for current conditions. The EA included a proposed action alternative, a no action alternative, and a no grazing alternative that were analyzed in the document. The proposed action is described in this document. The no action

alternative was analyzed as the “current management” of the allotments in the previous EA with no changes in terms and conditions. The no grazing alternative was analyzed as removal of livestock grazing from the allotment. No new environmental conditions or change in resource values have arisen that would invalidate those alternatives analyzed.

**3. Is the existing analysis valid in light of any new information or circumstances (such as, rangeland health standard assessments, recent endangered species listings, updated lists of BLM sensitive species)? Can you reasonably conclude that new information and new circumstances would not substantially change the analysis of the new proposed action?**

Yes. The previous information and circumstances and analysis are still valid in light of the 2001 Health Assessment, and no new issues concerning grazing have arisen on this allotment. Also, the EA was recently completed.

**4. Are the direct, indirect, and cumulative effects that would result from implementation of the new proposed action similar (both quantitatively and qualitatively) to those analyzed in the existing NEPA document?**

Yes. The impacts remain unchanged. Those impacts, including cumulative impacts, normally associated with livestock grazing are mitigated through monitoring of land health standards.

**5. Are there public involvement and interagency reviews associated with existing NEPA document(s) adequate for the current proposed action?**

Yes. Extensive scoping and public involvement occurred in the RMP/EIS. Also, scoping occurred during the recent permit renewal.

## **E. Persons/Agencies/BLM Staff Consulted**

### **Note**

Refer to the EA/EIS for a complete list of the team members participating in the preparation of the original environmental analysis or planning documents.

### REMARKS:

#### Cultural Resources:

Pursuant to BLM Instruction Memorandum Number CO-2002-029, RGFO cultural resources staff conducted a literature review of previous inventories and sites recorded on the public land in the allotment area [see Report CR-RG-14-138 R)]. Based on the information collected during the literature review, it was determined that no historic properties would be impacted by the proposed undertaking.

#### Native American Religious Concerns:

The literature review indicated that no traditional cultural properties have been recorded within the allotment boundaries. Native American Tribal consultation has been completed for these allotments. There is no other known evidence that suggests the project area holds special

significance for Native Americans. Therefore, it is unlikely that any traditional cultural properties or other sites of concern to the tribes will be affected by grazing.

Threatened and Endangered Species: There are no records of any federally listed or BLM sensitive species within or near the project area. The Proposed Action will not result in impacts to TES species.

MITIGATION:

## Conclusion

Based on the review documented above, I conclude that this proposal conforms to the applicable land use plan and that the NEPA documentation fully covers the proposed action and constitutes BLM's compliance with the requirement of NEPA.
