NOTE TO MAP USERS

The surface and minerals management status overprints are published as separate maps because some of the lands, surface and minerals estate or rights, may have been shown as federal lands due to the lack of information available to BLM with respect to the ownership of such lands. Tracts smaller than 40 acres are usually omitted, because of the map scale. The official land records in the respective offices of the Bureau of Land Management or other responsible Federal agencies should be checked for up-to-date status on any specific tract of land. Inadequacies in the BLM maps should be reported to the respective Bureau of Land Management offices from which the maps were obtained.

PUBLIC ACCESS

Roads crossing public lands may be travelled by the public unless closed by signing or notice by the land owning agency. Public lands interspersed by private lands may not have public access. Permission is required from the private landowner to cross private land, unless access is provided by a Federal, State, or County road, or a BLM road with legal access.
