

Plan Maintenance (Change) No. 2

Plan Name: Glenwood Springs Field Office, Record of Decision for the Approval of Portions of the Roan Plateau Resource Management Plan Amendment and Environmental Impact Statement, June 2007

Area: Glenwood Springs Field Office, Glenwood Springs, Colorado

Pages: ROD-31, pages 31 and 32

Chapters: ROD-Plan Elements

Heading: ROD-Cultural Resources

CHANGE:

ROD, page 31: Management Actions

CR-1: Change sentence to read: "Conduct Class III (100 percent) inventory of all areas in the high-sensitivity zones that have not been surveyed."

CR-2: Change sentence to read: "Monitor all major ground disturbances within the high-sensitivity zones."

CR-3: Change sentence to read: "Avoid disturbance of or test all sites in the high-sensitivity zone that need data collection to determine National Register of Historic Places eligibility."

CR-7: Change sentence to read: "Conduct Class III (100 percent) inventory of all areas atop the plateau in the moderate-sensitivity zone that have not been surveyed."

CR-8: Change sentence to read: "Conduct Class II (probabilistic inventory of all areas below the rim in the moderate-sensitivity zone) inventory of all areas below the rim in the moderate-sensitivity zones that have not been surveyed."

CR-9: Change sentence to read: "Monitor all major ground disturbances within the moderate-sensitivity zone on top of the plateau and in intact Holocene or late Pleistocene deposits below the rim."

CR-10: Change sentence to read: "Conduct no further work in inventoried areas below the rim in moderate-sensitivity zones where no cultural resources have been identified and the survey is considered adequate."

CR-11: Change sentence to read: "Avoid disturbance of or test all sites in the moderate-sensitivity zone that need data collection to determine National Register of Historic Places eligibility."

ROD, page 32: Management Actions

CR-15: Change sentence to read: "Conduct Class I inventory (professionally prepared study that compiles and analysis all cultural resource data and literature into a management-focused, interpretive, narrative overview, and synthesis of the data resulting in a recommendation of determination of effect) of all areas in the low-sensitivity zones that have not been surveyed."

CR-16: Change sentence to read: "Conduct no further work in inventoried areas in low-sensitivity zones where no cultural resources have been identified and the survey is considered adequate."

CR-17: Change sentence to read: "Avoid disturbance of or test all sites in the low-sensitivity zone that need data collection to determine National Register of Historic Places eligibility."

REASON: To clarify the contradictions in the management actions of the Glenwood Springs Field Office, Record of Decision for the Approval of Portions of the Roan Plateau Resource Management Plan Amendment and Environmental Impact Statement, June 2007. These management actions were described in The Glenwood Springs Field Office, Roan Plateau Planning Area, Resource Management Plan Amendment and Environmental Impact Statement, Final, Volumes I, August 2006, Chapter 4, Environmental Consequences, page 4-92 through 4-94, Section 4.4.2.4, Table 4-24 Recommended Cultural Resource Management Actions and in the narrative. The mistake involved the inadvertent replacement of "areas" with "sites" resulting in confusion as to how to proceed with cultural investigations.

Signature as Appropriate:
